

STAGE 3 - SECTION 32

CHAPTER 7

TRANSPORT

ADDENDUM

Addendum to Section 32 statement for stage 3 of the Transport proposal

The section 32 report for the earlier stages of the Transport proposal contains the evaluation of the provisions in those stages.

Stage 3 of the transport proposal just contains consequential changes as a result of the introduction of other proposals in stage 3, specifically the Coastal and Central City proposals.

Additional matters of discretion have been added for the formation of unformed legal roads in the Coastal Environmental overlay to recognise the effects that the formation of unformed legal roads could have in this area due to the sensitive nature of the Coastal Environment.

The reference in Road Classification maps (Appendix 7.12) to the Christchurch Central Recovery Plan will now refer to the Central City Transport provisions in the Central City proposal.
