PURPOSE OF REPORT

1. The purpose of this report is to seek the approval of the Council for:
   (a) the sale of three parcels of Council owned land.
   (b) part of a Local Purpose (Drainage) Reserve being acquired by the Crown for road in order that intersection improvements can be undertaken to State Highway 75 at the junction of Halswell and Dunbars Roads.

EXECUTIVE SUMMARY

2. The proposed upgrade is urgently required as the intersection currently experiences long travel delays at peak traffic periods through congestion and as such the proposed improvements are supported. However, the work cannot proceed without the Council’s consent first being given under the Public Works Act 1981 to the acquisition of Area 1 on the plan (Attachment 1) and to the approval of the Council being given to the sale of Areas 2, 3 and 4 to the Crown.

3. The land required is designated within the City Plan and as such has previously been notified through the planning process and did not attract any sustainable objections.

4. As the impact of the road will only have a relatively minor effect on the Council’s properties and as the benefits in terms safety and traffic management far outweigh the land lost it is considered the proposal should be supported and consent given.

FINANCIAL IMPLICATIONS

5. There are no financial implications for the Council with all the costs being born by Transit New Zealand.

Do the Recommendations of this Report Align with 2006-16 LTCCP budgets?

6. Not applicable.

LEGAL CONSIDERATIONS

7. Under section 114 of the Public Works Act 1981, the Minister of Land Information, may by Notice in the Gazette, declare any land whether owned by the Crown or not, to be road. The land cannot, however, be declared to be road without the written consent of the body in whom the land or its control is vested, which in this case is the Council. Area 1 is a Local Purpose (drainage) Reserve subject to the Reserves Act 1977 and was acquired on subdivision by the Council. The Department of Conservation consent to the sale of Area 1 will therefore be required. Areas 2, 3 and 4, however, only require the Council’s approval to effect the sale.

8. With respect to Areas 3 and 4 the eventual sale of this land was foreshadowed at the time of purchase by the Council and surveyed off as separate lots in anticipation of the intersection improvements.

Have you considered the legal implications of the issue under consideration?

9. Not applicable.

ALIGNMENT WITH LTCCP AND ACTIVITY MANAGEMENT PLANS

10. Not applicable.

Do the recommendations of this report support a level of service or project in the 2006-16 LTCCP?

11. Not applicable.

ALIGNMENT WITH STRATEGIES

12. Not applicable.

Do the recommendations align with the Council’s strategies?

13. Not applicable.

CONSULTATION FULFILMENT

14. Not applicable.

STAFF RECOMMENDATION

It is recommended:

(a) that the Council consent to the land described in the schedule below being declared to be road pursuant to section 114(2)(b) of the Public Works Act 1981, subject to the following conditions:

(i) That the Crown obtain the Minister of Conservation’s consent to the acquisition of the reserve for road (Area 1).

(ii) The Crown to accept responsibilities to undertake the necessary surveys and complete the gazetted and proclamation action at its cost.

(iii) That the Crown meet the Council’s legal and valuation costs associated with the sale and pay the agreed compensation as outlined in paragraph 19 of the report.

(iv) The Crown to undertake at its cost all necessary works to alter the Council’s existing swale (area 1) in accordance with the Transit New Zealand/GHD Limited plans relating to State Highway 75 Halswell/Dunbars Roads intersection Upgrade Design Layout Plans Numbers 51-23442-C202203 and 204 Revision A and 51-23447-C401, 402, 403, 404, 410 and C336 Revision A.
The Crown to ensure that all Council’s infrastructure requirements in relation to those works are met and incorporated into Transit’s design for the upgrade and that any changes to those works will first require the prior written consent of the Council.

All boundary fences are to be replaced with similar fences on completion of the works.

**BOARD RECOMMENDATION**

That the staff recommendation be adopted.

**BACKGROUND (THE ISSUES)**

15. Transit New Zealand is proposing to upgrade the intersection of State Highway 75 with Halswell and Dunbars Roads. This is urgently required as the intersection currently experiences long travel delays at peak traffic periods through congestion. This intersection upgrade is scheduled to occur in 2008/09 and funding for this has been allocated in Transit New Zealand current ten year programme of State Highway Improvements. Subject to all of the property being acquired it is expected work will commence in September of this year.

16. In the wider context, Transit New Zealand intersection upgrade allows for a possible future fourth leg should the Council subsequently proceed with an extension of Dunbars Road to the Hendersons/Sparks Roads intersection, as proposed in the Christchurch Rolleston Environment Transport Study (CRETS) and South West Area Plan Transport Strategies. The Dunbars Extension would occur following plan changes to the currently zoned rural property to the south to provide for more intensive development under a living zone as proposed by the Urban Development Strategy and the extension would be acquired at that time through the subdivision process.

17. Transit New Zealand intersection upgrade is designed to tie in with the possible future intersection form as well as Transit New Zealand longer term proposal to four lane this section of State Highway 75 further east and along Halswell Road with minimal rework required.

18. The principle objectives of Transit New Zealand intersection upgrade are to

- Reduce congestion and delays through the intersection at peak times.
- Reduce accident rates.
- Provide cyclists and pedestrian access and facilities.
- Ensure mitigation of actual or potential adverse environmental effects.
19. Transit New Zealand’s intersection upgrade will be designed to improve the safety and efficiency of the intersection for current traffic and normal growth predictions. It is currently proposed that this will include the installation of traffic signals, pavement widening, to accommodate turning movements and a slip lane turning east from Dunbars Road into State Highway 75.

COMPENSATION

20. The compensation payable was assessed by Ford Baker registered public valuers as follows:

<table>
<thead>
<tr>

</tr>
<tr>
<td>Area 4</td>

</tr>
<tr>

</tr>
</tbody>
</table>

21. In addition to the compensation, Transit New Zealand will be responsible for the legal and survey costs incurred with the acquisition of the land.

THE OBJECTIVES

22. Not applicable.

THE OPTIONS

23. The proposal has been considered by the Council’s Transport Asset & Network Planning Unit, has met the appropriate audit requirements in terms of safety and as such there are no reasons why the proposal should not be supported by the Council.
