☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.1 Have we got the game plan right?

I am a user and lover of the Wharenui sports center in Riccarton. It is my local pool and I feel very proud of the fantastic organisations that operate there and my small involvement with them. The swimming pool provides LTS services, public swimming and club swimming in a cost-effective way whilst also maintaining excellent relations with key stadium stakeholders including basketball and boxfit. To decommission this historic pool is not the appropriate solution for the community. Wharenui Swim Club is one of New Zealand's oldest swimming clubs and the removal of their local training grounds would have an immediate negative impact on the sport and the athletes who have represented this proud organization. Further, Wharenui School as long term stakeholders have seen the benefits of swimming at the pool, an opportunity this community may miss out on should the pool close. As a former tutor at the poo, I took great pride in seeing these primary school students grow in their confidence around the water and more general confidence.

To close the pool when it provides a resource effective use of the space in a cost effective manner would be a shame. I strongly urge council NOT to proceed with this in the draft long term annual plan.

1.7 Our facilities

Again, I urge council to NOT support the move to close Wharenui pool in 2022, as described in the LT annual plan.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.1 Have we got the game plan right?

I would like to see an increase of spend on parks infrastructure following the Covid-19 epidemic, where parks were clearly a place of respite for our city. This may include further budget for the Red Zone park, and ensuring there is enough budget to create innovative and interesting places and spaces for people throughout the Garden City.

More annual bedding and trees spread throughout the city would be excellent.

1.2 Rates

This does not seem prohibitive as long as the rates do not continue to rise at 5 per cent per year.

1.3 Proposed changes to existing rates, and new targeted rates

I am not keen on seeing an excess water targeted rate. To me, this does not seem to have a logical reason behind it other than a way for Council to make more money and reduce the overall percentage of rates for everyone. I do not think I use more than 700 litres a day, so this would not effect me, but I still do not wish to see this targeted rate go ahead.

The heritage targeted rate sounds okay to me.

1.4 Investing in upgrading and protecting our city's water networks

I support this large investment in our water infrastructure.

1.5 Investing in our transport infrastructure

Loving all the cycle ways, keep them coming. The nay sayers suddenly love them when they are in place.

This is never going to happen.... but light rail from city centre to airport to Selwyn and Kaiapoi would be an amazing vision for our cities future.

## 1.6 Rubbish, recycling and organics

No comment

## 1.7 Our facilities

It is not clear what the changes to levels of service are, and I cannot find where it talks about this within the bubbles or on the main Have Your Say page, therefor I cannot comment.

## 1.8 Our heritage, foreshore and parks

I think the balance isn't quite right. The investment should be larger, and if we are serious about creating an international tourist destination within the red zone regeneration, further funding needs to be applied. Further upgrades to create innovative spaces. Do not simply go for the cheapest option for playgrounds, forests parks and heritage. Invest more heavily in these very valued spaces of Otautahi the Garden City.

## 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.3 Proposed changes to existing rates, and new targeted rates

Once again rates are ridiculously high. How is CCC getting on with the rates increase that was targeted for the rebuild of the Anglican Cathedral? Are you on target? There is noticeably little information about it.

1.5 Investing in our transport infrastructure

Truly public transport in Christchurch is not up to 21st century standard. Large buses on routes that are poorly designed and dont take account of passenger numbers. No surveys why?

Please please sort out St Asaph Street once and for all.

Cycleways are far too narrow and therefore a danger to cyclists and vehicles.

The inner city is becoming a nightmare to negotiate and as a result it doesnt encourage people to go there.

1.6 Rubbish, recycling and organics

Would you take a look at the unsightly mass of crushed vehicles and iron/steel that is invading Garlands Road. Why is this allowed? It is super ugly. Putting up a fence doesnt hide it.

The Tannery is a beautiful place, one of the few in Christchurch. Getting there isnt a good experience, besides which if ever there were mis-positioned traffic lights, this is it.

1.8 Our heritage, foreshore and parks

Could you look at Picton and what a beautiful waterside they have now>? Disappointingly, I compare it with Sumner which had the opportunity to be a beautiful village like St Ives or village equivalent in France, instead it is the usual mass of concrete along the promenade. Planting red flowers does nothing to enhance what should be Christchurch's most beautiful seaside. Little or no imagination has gone into its redevelopment post-quake. Such a shame.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

Yes, please give us something beautiful in a sea of glass and concrete that is the inner city now.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

##### Comments

The building has wonderful history, how it was funded initially, and it is bordering on criminal that it languishes unrestored.

#### 1.12 Any other comments:

I know I am wasting my time writing these comments because nothing will be done. As one Councillor told me when I challenged the decision to increase rates to pay for the Cathedral rebuild in spite of the majority of people saying no, 'it wasn't a referendum, therefore we didn't have to take any notice.'

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.3 Proposed changes to existing rates, and new targeted rates

In regards to the excess water targeted rate - Like many households (I imagine) we have no idea how much water we use per day. I think you need to provide this information before rolling out the charge so households can be aware and track if they will end up with an unexpected bill.

Additionally, approximately 11.64 billion litres are lost due to leaks in our water system each year. If we solved these leaks we could be less restrictive on water usage by households. I think it would only be responsible for the council to fix the broken water system before targeting household water usage.

Chlorine was also only supposed to be in our water supply for max of 1 year - this was a promise made and broken and it has caused a number of leakage problems. A push should be made to keep this promise and remove the chlorine ASAP to reduce new leaks forming and ensure households are paying for the water quality promised

1.5 Investing in our transport infrastructure

More focus on active transport is required to decarbonise. Cyclists should be given priority at all intersections to encourage active transport.

1.6 Rubbish, recycling and organics

A focus should be placed on reuse ahead of recycle as reusing is even better! Also collaborations should be made between the CCC and soft plastic and polystyrene recycling that is provided privately in Christchurch to reduce unnecessary landfill waste.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.2 Rates

You're looking to increase rates across the board with no items or investment proposed in the long term plan for Russely. Russley hasn't had much investment in recent times and it is disappointing to see the council not looking to support the suburb but still increase rates for those living within the suburb. It'd be great to see some cycleways to enable Russely to connect with the rest of the city by bike other investment could include improved intersections, parks upgrades etc. Additionally funding to tackle the growing crime in the area.

Adjacent suburbs also hardly get a look in with Avonhead only having two mentions in the long term plan. When compared to other suburbs Fendalton (10+), Riccarton (30+), Hornby (25+) this is very disappointing.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I'm not happy with the proposed water rates. We have 8 people living at our house, so the 700 litres per day would be far too low considering the average use per person in New Zealand is around 200 litres per day. I'm more than happy to conserve water and actually already do, so feel it would be unfair for our household to be charged for excess water when we have a larger than average family. Maybe there could be a daily allocation per person, rather than per household?

I noticed in the proposal, it says there could possibly be an exemption for large families so would love some clarification around this.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I'm commenting in support of the water use limitation. I myself live on a big property of around 800 sqm and love gardening and don't even need the water supply network often as I can just collect rainwater from the garage roof and use it for watering most of the time.

I guess families of 4-5 or more should probably be allowed a higher limit, but surely this will be considered.

This is a step in the right direction, most people in the world would be a little shocked to hear that we're using so much drinking water just for a greener front lawn. Rant over :-)

### Feedback

1.1 Have we got the game plan right?

Kia ora, thank you for the chance to make a submission on the long term plan. I would like to strongly urge that The Arts Centre is included in the Long-Term Plan 2021-31. I think the council should create and apply a Special Heritage rate to fund the grant.

The Arts Centre has provided me a personal and professional community and is one of the only bustling places in the city. Collaboration and creativity are seen daily, through innovate, ethical retail, excellent art galleries and the cinema, and amazing food options. The Arts Centre has provided me, an independent marketing consultant, with a well resourced office space close to clients and collaborators, at a competitive rate. This has been invaluable as I have rebuilt my business since moving to Christchurch from Auckland.

1.2 Rates

I support the rates increase.

1.3 Proposed changes to existing rates, and new targeted rates

I support the special rate for heritage buildings, specifically the Arts Centre.

1.7 Our facilities

More money for libraries! They are doing amazing things.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Yes the balance is about right - we need to be prudent but keep investing and maintaining our city infrastructure.

1.3 Proposed changes to existing rates, and new targeted rates

Rates should be targeted as much as possible - the general rating mechanism is generally unfair in my view and already overly burdens homes with higher capital value that get no better services and often are occupied by older people with lower cash from which to pay

1.4 Investing in upgrading and protecting our city's water networks

An absolute yes

1.5 Investing in our transport infrastructure

\$'s are fine the specific spend is not well balanced

1.7 Our facilities

Service level changes are fine and pragmatic - we don't need any more Council swimming pools in this City - the whole of life cost it way too high to justify any further local/community pools unless those communities want a targeted rate to pay for them

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

An absolute YES - this is a significant asset to the city and a piece of our city history that needs to be completed and opened as a vibrant space for all - locals and visitors.

We have lost so much heritage already - we absolutely need this!

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No
Comments
Have we considered a new build or alternative location?? We already fund the Art Gallery
1.11 Potential disposal of surplus Council-owned properties
Yes dispose

### Feedback

1.7 Our facilities

I think cutting the education programs at the art gallery is ridiculous. You comment that due to less overseas traveller's there is a decrease in numbers coming through the gallery's so why woul you therefore cut a programme that is run for locals. International travel does not impact the school program. The program ls already a small program with only one teacher therfore a 25% reduction is massive for the department and I doubt it would save very much money overall. I fact it will reduce the number of schools coming through the gallery which in turn may reduce the number of people coming through the gallery further as children go home and share their experiences with there families which in turn may cause there families to come to the gallery. It seems strange that you would cut something that directly links in with our community and our children's future. There arts education in school is already limited and the gallery education program is a brilliant way for schools to bring culture and art teaching into children's life.

### Feedback

1.1 Have we got the game plan right?

This is a Council which seems to prioritize charging residents more and, at the same time, recklessly and incompetently spending rates money. Charging for water is necessary only due to gross incompetence and mismanagement and this Council should be ashamed.

1.2 Rates

how about learning not to waste money.

1.3 Proposed changes to existing rates, and new targeted rates

id like to see you not waste money on white elephants no one wants. Incompetent council, incompetent planning

1.4 Investing in upgrading and protecting our city's water networks

your lack of sound fiscal management and planning now constitutes an embarrassing rate increase for your rate payers.

Self serving indulgent council.

1.5 Investing in our transport infrastructure

stop. You're ruining the city with your overindulgent view on transport and bike lanes

1.7 Our facilities

you are reducing services due to incompetent management. You should all resign.

### Feedback

1.1 Have we got the game plan right?

I am here primarily to comment support for you excess water use proposal.

1.2 Rates

I understand rates increases and why they need to be done - it's the cost of living in an evolving, broken city. I think some of your staff need a pay decrease while other, lower level staff deserve a raise. Other than that, I expect rates increases.

1.3 Proposed changes to existing rates, and new targeted rates

I am here to comment on the proposal for charging for excess water use.

I think you have struck a good balance and support the proposal. Water is a finite resource that people in this city take for granted. There are many countries around that world where access to fresh clean water is a luxury. Even within New Zealand access to water can be painful. People of this city don't seem to understand how lucky we are to have had free, uncapped water use. I believe it is in Canterbury's best interest that we start paying attention to our water use and charging accordingly for it.

As you have already put in the proposal, obviously allowances should be made for bigger families (so long as this is for bigger FAMILIES and not bigger houses. We are all aware there are wealthier people who have more bedrooms and not necessarily a bigger family to fill those rooms.) or people with medical conditions. I don't quite yet understand how this will be managed for tenants who have big families and have to move houses - I suggest making it as easy as possible to find, apply for and process applications for increased water use for these groups.

I, like many people, do find it hard to process why a decision has been made to sell the water to overseas companies and then turn around and charge your rate paying citizens for their water use. However, I anticipate the alternative to selling the water is increasing our rates further to make up the loss of that income. That is not an outcome many people can afford to have. Including me.

Obviously, the money to take care of and rebuild our city has to come from somewhere and while I do not support all of the proposed plans you have made for this city, I do support the Water use proposal.

1.4 Investing in upgrading and protecting our city's water networks  
this is long overdue.

1.5 Investing in our transport infrastructure  
I know you hear this all the time but please stop with the bike lanes and invest in fixing unsafe roads first.

1.6 Rubbish, recycling and organics

Yes this is a must for the preservation of our beautiful country and planet! I would personally like to see options for bigger green bins and not being charged such enormous fees for the privilege of composting. People can take green waste to the dump for free but to request a larger bins cost \$100 a year? That seems crazy and counter-productive to me.

Also I live in Bromley/Linwood and if this makes the awful smell go away, then do it!

1.7 Our facilities  
No comment

1.8 Our heritage, foreshore and parks  
As long as some of this goes to the east side of town, particularly New Brighton (and not just your flash new hot pools that are almost impossible to access), then I'm all for it.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
No  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
No  
Comments

1.11 Potential disposal of surplus Council-owned properties  
Get rid of it. It does not support our city and we need the money. If this helps boost the funds to make improvements and prevent further rates increases, sell it!

1.12 Any other comments:  
Please, I'm honestly begging you, invest more money in the east side. New Brighton in particular. It breaks my heart the condition this part of our city has been left in. It's obvious to anyone that you don't make income from the residents there, but you do from the home owners. And they will benefit financially from investment in the area surround their investments. I truly believe the council, all councillors, should feel ashamed of how the east side has been left to rot.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

No! Water is the basic human need so should be made available within the current rates structure. If charged separately then it will become another opportunity for money grabbing by councillors who are well out of touch with reality

1.2 Rates

Insane and out of touch with reality. Rates rises need to be brought back in line with inflation. It is becoming more and more unaffordable to live in Christchurch.

1.3 Proposed changes to existing rates, and new targeted rates

Totally opposed to changing the structure - feels like CCC is pulling the wool over our eyes.

1.4 Investing in upgrading and protecting our city's water networks

No. We are still waiting on earthquake damaged roads that are unbearable to drive on being properly fixed up.

1.5 Investing in our transport infrastructure

No - just get the existing roads properly resurfaced first especially the ones still awaiting repair from the earthquakes 10 years ago.

Most of the current portfolio of CCC transport projects seem to be creating more congestion rather than easing it  
Councillors haven't grasped the principle that the longer vehicles are stuck in traffic jams the higher the city's carbon footprint becomes. You've declared a climate change emergency so get the traffic moving more efficiently please - low hanging fruit.

1.6 Rubbish, recycling and organics

Yes this will help but you need to be recycling more materials.

1.7 Our facilities

No. We've spent enough on these facilities already. Spend the money on fixing those broken roads please.

1.8 Our heritage, foreshore and parks

No - this is not a priority at the moment.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

They are a separate organisation. Perhaps national government could help instead

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

Not a current priority

1.11 Potential disposal of surplus Council-owned properties

Yes - I support selling these buildings and use the proceeds to repair broken infrastructure

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I would like to see more details about your definition of a large family and how or if household size affects the proposed excess water rate. I think it is unjust to subject single income families with children or dependents to a flat rate. My understanding is that average water usage per person per day is around the 250-280 litre mark, meaning that households with children could be unfairly targeted and I would like to see some protections for families spelled out in the final plan. I also would like to see households warned when their water use reaches a certain threshold so they can become more aware of their own habits and adjust them before being charged.

## Feedback

1.1 Have we got the game plan right?

stick to core services until we can afford more. wouldn't hurt to close a library or community centre

1.2 Rates

no - we do not need things we cannot afford. I need a new kitchen but cannot go to my business and tell them to give me a pay increase to pay for it so I have to live within my means. Rate rises should only be in line with inflation. Concentrate on core services and skip the nice to's until we can afford it within our means.

1.3 Proposed changes to existing rates, and new targeted rates

no water rates until you can charge the water bottling plants for the water they take. When there is a will there is a way. charge a plastic bottle water rate if you need to

1.4 Investing in upgrading and protecting our city's water networks

this is core spending and is good

1.5 Investing in our transport infrastructure

no - user pays system is the only way it will work

1.6 Rubbish, recycling and organics

no - should be more. We need to be able to recycle everything and you should be working towards that target.

1.7 Our facilities

yes - close what you need to and amalgamate libraries

1.8 Our heritage, foreshore and parks

yes - needs to be done but not sure of the balance

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

user pays - they need to charge for entry

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No
Comments
live within your means. I can't ask my boss for a pay increase to buy some art
1.11 Potential disposal of surplus Council-owned properties
sell and keep rate rises down
1.12 Any other comments:
live within your means like every other ratepayer in the city has to - if you cannot afford within the current budget save up for it in the future like every rate payer has to

### Feedback

1.4 Investing in upgrading and protecting our city's water networks

Re: water charges. I wholeheartedly support this initiative. It is nothing to be afraid of. I know other councils have flexibility where leaks have caused over usage and have been rectified, I'm not sure if the policy supporting the charge allows for that but I would encourage it.

It is great to see the city finally making this move. I would have supported it a long time ago.

## Te Mahere Rautaki Kaurera - Our Draft Long Term Plan 2021-31

### Submitter Details

**Submission Date:** 13/03/2021

**First name:** Esther **Last name:** Docherty

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I am happy with the proposed budget and priorities set out in the plan, particularly the investment in the Avon River red zone area and community facilities across the city.

1.2 Rates

No one likes an increase but we have to pay for the investment in our city so this seems balanced.

1.3 Proposed changes to existing rates, and new targeted rates

I don't have a problem with user pays however my concern is that families who are financially challenged could struggle, particularly multi generational families that live together or families with higher water needs due to a family member having health care needs which increase water consumption.

An exemption from excess charges should be considered in those circumstances.

1.4 Investing in upgrading and protecting our city's water networks

Like most people I want them chlorine gone some I'm all for increases investment to replace the old pipes etc

1.5 Investing in our transport infrastructure

I am in favour of investment in safer cycleways which separate cars and cyclists

1.6 Rubbish, recycling and organics

Happy with investment in recycling

1.7 Our facilities

I do not agree with the proposal to close the service desk attached Lyttelton. You can't measure the need purely on the number of transactions that take place. I see residents, particularly older people going in with queries all the time. Even a reduced service would be better than no service, for example 1pm to 5pm. Not everyone can work online and the contract centre can be frustrating with the phone menus and wait times.

### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

#### Comments

Very happy with this investment in the Arts centre

### 1.11 Potential disposal of surplus Council-owned properties

If these properties are not producing rent to cover maintenance costs etc then happy for them to be disposed of.

### 1.12 Any other comments:

Overall I'm happy with the proposed spending priorities and the proposed rates increase to support the investment in our city.

I would like to see exemptions in excess water charges for families with lower incomes and family members with health issues leading to their increased water usage. We can always reduce our water consumption with more careful use of sprinklers on summer but some people cannot if a family member produces a lot of soiled laundry for example.

I do not agree with the closure of the Lyttelton service desk.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.1 Have we got the game plan right?

Your priorities are wrong. You are spending too much, the ratepayers cannot afford it. Rates are becoming more unaffordable due to your contact increases above inflation and wage rises.

Core infrastructure must be the focus, as it should have always been but you failed, now you must make it the focus and make cut backs elsewhere at the CCC.

I see no evidence of "permanent efficiencies in your day to day spending" other than three well publicised promotional lay offs.

1.2 Rates

CCC project a 50% increase in the rates take. You are spending too much and project to spend too much.

Rates should be kept indexed too the CPI. Council just abuses its compulsory taxation and spends.

1.3 Proposed changes to existing rates, and new targeted rates

No to the Arts centre rate.

No to heritage rates.

No to water charges.

Rates are too high.

#### 1.4 Investing in upgrading and protecting our city's water networks

You always had that responsibility, YOU FAILED.

This is core infrastructure and should not be left to fail.

All contracts should be fixed term, clear on what must be done, verified completed. Too many blow outs in council work.

#### 1.5 Investing in our transport infrastructure

You have heard from what residents? A few special interest groups are not residents.

No. You are spending too much on special bike tracks and public transport. Only a small section of the community will ever use these methods.

#### 1.6 Rubbish, recycling and organics

Reducing waste to landfill and recycling is good. Organic plant needs upgrades, it stinks.

Expecting a change to the throwaway culture is weasel words and beyond you.

#### 1.7 Our facilities

Reduce these services, 19 libraries is too many.

You have too many sports complexes, they lose money and are under utilised now, wait until the others are finished and this means the same people with more facilities so even more under utilised.

Art Gallery is used by a small part of the community and was a stupid build.

Closing the Riccarton bus lounges is good, once again a stupid idea from the beginning opposed by the community.....but council thought they new best when they do not.

#### 1.8 Our heritage, foreshore and parks

Old dungs should come down, we cannot be a modern city with old dungs that require subsidies and loans to groups to rent because no one else wants them.

I see little in the way of foreshore development, a small path north of New Brighton is not a programme.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

No funding for the Arts centre.

Yet another tax on ratepayers for a failed idea, just like the stupid Cathedral we are burdoned with and will continue to have to cover the costs.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

Yet another failed "investment" in Arts. Stop wasting money on stupid ideas.

1.11 Potential disposal of surplus Council-owned properties

Sell them now. Sell assets that lose money now, like you should have done with the Red buses, when it actually had a value. Instead you dithered and fire sold and asset with few contracts in place.

1.12 Any other comments:

My ideas / comments above just saved ratepayers millions, do not tell us no one wanted savings and they had no ideas.

CCC ratepayers need low rates for the city to progress.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.1 Have we got the game plan right?

The Wharenui pool should be sold to the swim club. We get a return, save maintenance and admin costs, and save demolition costs. Win, win, win for ratepayers.

1.2 Rates

Your rates rises are too high and are inflationary.

1.3 Proposed changes to existing rates, and new targeted rates

Your rates rises are too high and are inflationary.

1.4 Investing in upgrading and protecting our city's water networks

Core infrastructure should be your focus, always. This is necessary spend, but you must get your contracting system under control before tendering.

Your rates rises are too high and are inflationary.

1.5 Investing in our transport infrastructure

This is too much.

Your rates rises are too high and are inflationary.

1.6 Rubbish, recycling and organics

Your rates rises are too high and are inflationary.

1.7 Our facilities

This is an area you must focus on to reduce rates rises. These costs are excessive.

Yes close down the Riccarton Lounge, this was a stupid spend in the first place. Sack the people that wanted it.

Reduce the number of libraries and sports facilities, intensify those that remain so that overhead costs are reduced.

#### 1.8 Our heritage, foreshore and parks

This is an area you must focus on to reduce rates rises. These costs are excessive.

Maintain parks, START spending some money on the foreshore. Reduce spending on heritage buildings and remove subsidies. We are a young city, there are few worthy of heritage status, most are old dungsers that when fixed have no private commercial use.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

##### Comments

I disagree, yet another example of a trust relying on compulsory taxation powers of council to rip ratepayers off. Drop rates instead.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

##### Comments

Another rip off of ratepayers. Do not proceed.

#### 1.11 Potential disposal of surplus Council-owned properties

Sell off all excess, not just a few.

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I think the balance is approximately right. I wish that there could be less focus on roads and more focus on infrastructure for alternative transport modes. But at the same time I realise that most people wish to continue driving alone in their car every day as a primary mode of transport so the investment in roading is (unfortunately) necessary.

1.2 Rates

Ideally rates should not increase faster than inflation/wage growth, perhaps 2-3% per annum. But, if more money is required in order to accomplish all of the things that council needs to do, then I would rather rates increased than that more money was borrowed.

1.3 Proposed changes to existing rates, and new targeted rates

I like the proposed changes and would also support some kind of vacant land penalty rate in the CBD. To be honest, it would make sense to have a penalty rate for all vacant residential or commercial land to deter landbanking.

1.4 Investing in upgrading and protecting our city's water networks

Safe water is critical and if it costs this much to get there, so be it.

1.5 Investing in our transport infrastructure

This seems like an appropriate balance. Although (as above) I wish we could move away from car-centric lifestyles, that is just wishful thinking, most residents will not do that.

I do wish that CCC controlled the public transport network, rather than being at the whim of ECan. I suspect that this could create some serious efficiencies in the programme of public transport being rolled out.

1.6 Rubbish, recycling and organics

We need to prioritise making home-compostable products able to be discarded of in the council organics bins. Also, recycling more kinds of plastic.

1.7 Our facilities

I think that the proposed investment and changes to levels of service are appropriate.

1.8 Our heritage, foreshore and parks

Yes, this seems appropriate to maintain the attractiveness of our city.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

If the Arts Centre does not receive funding it will collapse and then probably end up on Council's hands anyway. Better to pay now and keep it going strong.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

This building is basically unusable for its mandated purpose without base isolation. I think it has to be done.

1.11 Potential disposal of surplus Council-owned properties

Great, get rid of them. Council should onnly be holding assets that contribute to its goals.

### Feedback

1.1 Have we got the game plan right?

stop increasing rates by 5% every year. My wages certainly dont increase by 1% and the continual increases arent helpful. The city council should stop giving themselves such high wages and put that money to good use. In regards to water use I have read a lot in the local newspapers about the off shore owned water bottling companies. I know I dont know about these business' and they bring money to the city but tax them more for they certainly take more than the 700 liters per day and draw on our water supply. Who should the people who live her continually have to pay for increased demand from others. In regards to those who use more water than most have you thought about having a warning system so people are aware they are getting close to their limit. You say it's only \$1.35 but in a time when every cent counts for a lot of us and you out our rates up time and time again a warning system letting you know you are getting close is helpful on two counts. 1) you might have a leak you are unaware off and 2) you could tell your family not to shower or water gardens for a week.

Dont just change rates owners more and more and more. You need to think of other options, charging those that use more for commercial gain (this include businesses not just residential property owners) and putting a warning system in place that families/rates owners can check. I know I have personally followed our water restrictions but also making these more advertised and wide spread through radio, tv and social media would all help. And cutting your wage Bill's would help as you can save that money and keep rates lower or only increase by 1 or 2 % per year.

If the council started making sound decisions they could stop cutting up roads time and time again (get all the teams together and do the job right once, save 100's of thousands of dollars), fewer disruptions to communities and more money to spend in other areas. Just an idea.

1.2 Rates

It stinks. Every year it goes up by 5%. Take less in wages and make better decisions as outlined above and a 5% increase isn't necessary.

### 1.3 Proposed changes to existing rates, and new targeted rates

bill water bottling companies at the same rates for their usage over 700 litres per day.

Stop hitting the little people who already pay too much in rates. You need a warning system to advise people in advance before sending a bill.

### 1.4 Investing in upgrading and protecting our city's water networks

get the chlorine out of the water system as that alone has been causing many house owners huge headaches with busted water cylinders and leaks.

actually listen to the people of the city. I am unsure if the balance is right. If the money is well spent then I guess it's good but I see so much wasted money in our area alone on roads, pipes, and stuff under the ground that gets fixed then ripped up and fixed and ripped up. Make one job do all repairs and you are good. Takes less time and less wasted resources doing and redoing the same prices of road.

### 1.5 Investing in our transport infrastructure

Stop making 30km zones. Friggen annoying. Also too many bike lanes cutting parking on residential street. You haven't been listening to residents and they have caused many near misses as cyclist remain ignorant to vehicles.

### 1.6 Rubbish, recycling and organics

yes this is important.

### 1.8 Our heritage, foreshore and parks

the council work in parks is so vital. For sport and recreation. I love seeing the workers upkeeping the parks and enjoy being able to thank them personally.

### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

I'm for a rates reduction.

### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

use what we already have

### 1.11 Potential disposal of surplus Council-owned properties

No point keeping them if someone else can acquire them and make use of them. Why hold on to unnecessary buildings and make rate payers pay for something useless.

### 1.12 Any other comments:

pay yourselves less, think about the little people trying to own a home, work full time and raise a young family without the privilege of being helped out by the government.

### Feedback

#### 1.2 Rates

Hello. Firstly I feel the plan looks good from what I have looked at so far. From the perspective of a rates payer with a young family I am in support of the plan and look forward to the benefits it will bring to the community. Something I do feel is missing, is an end to the rates increases, not necessarily in the short term but some sort of plan to improve the efficiency of existing and new services or project costs. The aim of this would be to stop raising or even decrease rates in the future. A return on the investment rate payers are making that comes directly back to dollars in the rate payer pocket. I feel such a strategy would get a lot of community support.

New and better things are nice, however if you cant afford them then they can become a prison of sorts. It's no easy thing for young family's to get by these days, increasing the rates may be necessary in the short term but some sort of relief in this area for the future would be well received by rate payers.

Thank you for your time,

Justin.

### Feedback

1.1 Have we got the game plan right?

no you have not got it right you've left the Eastside out of it all again we might as well be a city of our own. All that you've done a stripped the east side of everything that has had not replaced anything and worried about the rest of the city and stupid legacy projects and cycle lanes while putting our rates up and up charging us for water and everything else while giving it to other organisations for free to bottle even though we can't use the water because there's that much chlorine in it it is unusable.

1.2 Rates

it is already unaffordable live in Christchurch and you're making it even more unaffordable this is a joke in Christchurch is going to die because of it.

1.3 Proposed changes to existing rates, and new targeted rates

this is a joke as we can't use the water anyway because it is that chlorinated and the rust come through the pipes yet you give it away to other organisations for free to sell bottled water what do you really do for the city of Christchurch???????

This is such a joke with the extra rate rises it is now unaffordable to live in Christchurch.

1.4 Investing in upgrading and protecting our city's water networks

waterworks where exist certainly not on the east side just another side of the city forgotten while you carry on building the rest of Christchurch

1.5 Investing in our transport infrastructure

try fixing the roads that are broken before starting new projects pity you don't live on the east side otherwise we might actually have decent roads over here.

1.6 Rubbish, recycling and organics

try getting the council to actually empty the bins might be a start.

## 1.7 Our facilities

what a surprise another spend for the other side of town when is summer this money going to come towards Eastside and actually bring stuff into the area and community that were actually bring people back to our community the council has got it so wrong then so out of touch it's not funny.

## 1.8 Our heritage, foreshore and parks

what parks on the east side or that we have is plain flat open space is there's nothing to maintain except the why don't you actually try putting something in these parks for the kids to do.

## 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

## 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

why are you spending all this money on stupid projects when you can't even fix what Christchurch is broken at the moment we should be concentrating on fixing our city and roads and infrastructure before you start idiotic legacy projects.

## 1.11 Potential disposal of surplus Council-owned properties

that's it sell all the council owned properties and raise the rates that way the citizens of Christchurch or cover your expenses yet again.

## 1.12 Any other comments:

you need to take a long hard look at yourself and actually understand that you are harm in Christchurch rather than fixing it maybe you should get it dose of reality and actually come and talk to the people that live in Christchurch rather than trying to decide what is best for Christchurch on your own back because you are obviously getting it wrong and if you don't understand that maybe you should be talking to the public or not enough is it at all remember we are the ones that voted for you yet you haven't stood up to your own word yet.

Help yourself by helping Christchurch and listen to the people that live here.

### Feedback

1.1 Have we got the game plan right?

Are you really proposing to read ALL water meters every 3 months. If so this is a stupid idea. The majority of householders will not exceed the limit. You say that yourself. The time and costs involved of reading meters of ALL properties will be enormous, The number of units with little or no lawn/garden is large and building of these type of nits is also increasing.

There must be a better system than what you are proposing. If you don't read ALL meters and just pick out ones with larger gardens etc. that is also unfair. To me its either ALL meters are read or none. Then its also a matter of whether or not householders who, for what ever reason, try to beatify the City should be penalised for doing so. Perhaps those who try to have a beautiful garden should be given a rates rebate for making the City better looking. Not treated as criminals for using too much water.

You people have got it all wrong. A situation created by the Council itself for not having sufficient forward thinking in past years. The money wasted on projects that have done nothing for our living conditions has been enormous. Stick to the main projects for Councils. Water, Sewer, drains, roads etc.

This proposal is ridiculous and will cost the ratepayer if done as you state, almost as much as it will bring in. The benefit is for those that you will have to employ to completely record water usage from every meter in Christchurch, once every three months, and, processing the figures. . Or, don't you intend to read ALL meters, four times a year. I think you should come out and tell the truth about this. I feel that we have not heard the full story from the CCC on this proposal.

My feeling is that with more thought the CCC should shelve this proposal as unworkable and unfair.

## Feedback

1.1 Have we got the game plan right?

You know what the use, demand and need is of these various facilities is and should base what you are going to do on that.

1.2 Rates

I don't like that for obvious reason as a ratepayer. We should not have a rate increase of more than 2% per year. You have wasted more than enough money in recent years on non important things which has lead to the push for higher rates. Too many people in the Council are given a budget to spend and are sitting there thinking up ways to spend that budget. End result useless spending.

1.3 Proposed changes to existing rates, and new targeted rates

You have not got the water charge proposal right. That need to be reconsidered. I have already commented on that a few days ago.

1.4 Investing in upgrading and protecting our city's water networks

Our drinking water needs to be upgraded. It has been a disaster ever since the earthquakes. Not fit for some people to drink. I was very ill following Chlorine being added and that plus other impurities appearing in the water, and, for a period, the water being on the ACID side, has forced me to collect our drinking and cooking water from out of the Christchurch supply area. Since then my medical problems are gone. My Doctor is well aware of this.

1.5 Investing in our transport infrastructure

You certainly have not got the cycle lane's right. I am not against cycle lane's. Only some that are seldom used.

1.6 Rubbish, recycling and organics

Make it clearer to the public, what should be in various bins. Your advice on this matter has not been good and conflicting information has come forward at times.

1.11 Potential disposal of surplus Council-owned properties

What is the point in retaining these if they are not being used and there are no plans for their use.

### Feedback

1.11 Potential disposal of surplus Council-owned properties

Where land is vacant it makes sense to sell. Where land is being leased it does not. The lease of land is generally being used for commercial reasons so by selling you are potentially putting a small business out of work. The location of the business may be key to the success of the business i.e. a farm leasing the land next to them. I understand the Council wants to ensure our local economy thrives and a local business may not be in a position to buy the land they lease from Council. Also the lease of land is an ongoing income for Council. Please consider not selling leased land.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I am opposed to this new water tax. However if a water tax is introduced it should be based on the size of the household rather than a blanket amount for everyone. Obviously a 300 sqm property is going to use a lot less water than an 800 sqm property.

Property water meters will need to be changed so you can see how much water you are using a day - or an app introduced as an unexpected bill will add stress to a family on a budget. Also if this tax is introduced how do we know it won't be increased in a couple of years?

### Feedback

#### 1.2 Rates

i'm happy to pay my share of rates if investment is put into my side of town appropriate to the amount I'm paying.  
We would like to see underground power lines and new guttering installed to raise the aesthetics of our suburb

1.3 Proposed changes to existing rates, and new targeted rates  
this is good - water is our most valuable asset

#### 1.5 Investing in our transport infrastructure

better bike lanes from new brighton/south brighton to city centre

express bus from southshore to city centre for professional commuters

1.6 Rubbish, recycling and organics  
create opportunities for more recycling - this would create jobs and contribute to our environmental responsibilities

#### 1.8 Our heritage, foreshore and parks

further investment in new brighton - the investment to date is brilliant - keep going! Walking track along the dunes ... rubbish bins and dog disposal bags along the existing tracks ... ensure all taps on pier are working for fishing

parks - need to invest significantly in east side football grounds , particularly barnett park and ferrymead - very prone to flooding, either invest in remediation or perhaps look at artificial turf.

I support the continuation of the restoration of the Arts Centre and any other support the Council can give the centre. I think it is a great asset for the people of Christchurch and a real attraction for future tourists (when they do come back).

1.2 Rates

You have it right.

1.3 Proposed changes to existing rates, and new targeted rates

I agree with these proposals especially the targeted rates for the Arts Centre. The targeted water rate is fair enough.

1.4 Investing in upgrading and protecting our city's water networks

Wow! That seems a very high % of the Capital spend. I'd like to feel confident that project tendering process's are effective and are open to scrutiny by competent experienced people.

1.5 Investing in our transport infrastructure

Balance seems right. Thankfully dangerous intersections are steadily being improved. Hoon Hay Rd Cashmere Rd intersection will be much safer with the proposed design.

1.6 Rubbish, recycling and organics

You do have it right.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes

1.1 Have we got the game plan right?

we are looking to move back into the city and generally the plan makes us feel it is worth looking sooner rather than later. Of course a 48% rise in rates sounds a worry but if salaries keep up with that it is not a major until retirement.

1.2 Rates

You need to support the Art Centre, without it we our less of a community. It has been restored and it needs to be backed by the city council to not while supporting the Cathedral restoration would be a travesty.

you need to get people in the city more often so back a place that can if helped make that happen.

the city is a sad sight at night at times, make it vibrant and alive.

1.3 Proposed changes to existing rates, and new targeted rates  
support the arts more, much more.

1.4 Investing in upgrading and protecting our city's water networks  
whatever it costs get it right first time, which means a saving invthe long-term for new generations.

1.5 Investing in our transport infrastructure  
if you want people traveling on public transport have a total rethink. Joint ventures such as light rail must happen... to sit on your hands for another ten years would be deplorable. A missed opportunity so far.

1.6 Rubbish, recycling and organics  
Great do your best with what you can.

1.7 Our facilities  
keep investing the best you can, upport and endorse what you do.

1.8 Our heritage, foreshore and parks  
you can always invest more but get all jobs quoted at full cost. That goes for all jobs across everything.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

### Feedback

1.1 Have we got the game plan right?

a change i would like to see is about water excess. A family of 4 or 5 with your calculation will always be in water excess, even without watering the garden, just by a normal usage.

Why not introduce a water quota per household, say 200 l/day (which is the average usage in industrialized country) and multiply it by the number of person in the household to have the quota not to exceed.

Sad to see that in your proposition you did not consider that different household might have different needs. It feels this is a kind of punishment to families. Except if your goal is to see families leaving our city because it won't be affordable to access basic water needs.

1.2 Rates

Is it really needed? No possibility to decrease the salary amount of some CEO or decrease the amount of counsellors?

If it is above price index, this is not acceptable.

1.4 Investing in upgrading and protecting our city's water networks  
if it means fixing the pipes and stop wasting water then yes.

1.5 Investing in our transport infrastructure  
bus do not need to be free, they need to have their own lane all the time in all the biggest city lanes to show people it is quicker to take the bus  
We don't need more bike lanes, we need to make sure the ones we have are safe to use them.

1.6 Rubbish, recycling and organics  
great idea! My family and i are really careful with our rubbish so the more the better!

1.7 Our facilities

For our family it is ok, we can travel to go to a library opened on Sunday and we mainly do things online for the city council so never access the service desk.

1.8 Our heritage, foreshore and parks

honestly i don't mind if the cathedral or other heritage building got knocked down. I would prefer that then an increase of 5% of my rates.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

### Feedback

#### 1.1 Have we got the game plan right?

I am not in support of this proposal, The cost of administering this charge has not been factored, nor has the age of the majority of the meters and the accuracy, these will all have to be calibrated to assure the ratepayer that they may be charged for what they are actually using, this will also disadvantage those that choose to grow a vegetable garden to feed their family, quite often those on pensions and lower income families.

Civil utilities, such as swimming pools, fire services, city water features, botanic and community gardens and any other excess water using entities will be assessed and charged and their operating cost will increase and the city ratepayers will have to foot the bill through increased residential rates.

This is just another revenue grab from the rate payers who have lost jobs, reduced hours, businesses closed due to covid, I have not had an increase in my earnings for coming up 4 years, with inflation factored in, I have gone backwards dramatically.

For those unfortunate enough not to own their own property will face even more rent increases to offset the cost of maintaining the operating cost of private rental properties, faced with huge Ecan increases, energy and fuel costs, increasing insurance, and rocketing house prices, and the healthy homes standard, the tenant will be lumbered even further. These costs all ways get passed on to the tenant.

The cost of all activities that use water would increase and it is always the end user pays for everything as they can not pass it on. and at the end of the line, it will also have GST on top of that as well, business can claim GST as a cost of supply and increase the cost of product or service.

I believe the cost of implementing and administering will reap a very small reward for our council at significant angst to those that can least afford it.

It appears that when the cost of living increases, council employees are awarded increases in salaries that significantly outstrip the real dollar increase in living year on year.

#### 1.2 Rates

That is in excess of 47% increase, nearly half again of what we are paying now. There are already people selling their homes because they can't afford the rates and insurance now. If the city council was a business with competition, it would have gone

bankrupt by now, the absolute waste in all aspects of spending , from cycleways for the few to repairing horizontal infrastructure multiple times due to mis-calculations and over runs etc. I can not run my household the way you run our city, If I can't afford something, I go without, I can't bill anyone else. learn to operate within your budget as everyone else has to.

1.6 Rubbish, recycling and organics  
Isn't this under private management and they are taking the profits.

1.8 Our heritage, foreshore and parks

Why are we propping up private business to fix old buildings, they have had income off the for years an not paid dividends to the ratepayer, they can borrow money from investors or banks like the rest of us.

alot of suburban parks and reserves go largely unused by the general public, I live next to one, mostly used for a few school kids smoking. maintain ok.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

My submission is in relation to the proposed water use charge amendments. As the Council is planning to add to the existing standard fixed charging system, it feels like a money grab. The intent is to encourage customers to use less potable water but this approach has little in the way of incentive (carrot), just a big stick.

**I suggest that if CCC can measure water use, then the fixed charge be scrapped and replaced with full metered pricing so households that do use less water, pay less than they currently do - this would be a fairer system.** Other positive initiatives could be to promote/support other water conservation activities by CCC such as roof rainwater harvesting (for gardens), toilet flush vol reductions, shower time limiters/flow restrictors etc.

### Feedback

#### 1.2 Rates

Obviously nobody wants a rate increase however realise after all the devastation we've had in Christchurch that a rate increase was imminent. Just hope it gets spent wisely on not on pay increase on salaries for the people at the top (again).

Rate increase needs to be justified with roads being repaired - get it right the first time rather than having to do it several times - the bridge on QE11 is a prime example where money was wasted as it had to be rebuilt as the foundations weren't right the first time!

It is scandalous how many times the same piece of road gets dug up and repairs. Mairehau Rd in Parklands is a prime example. The part junction with Daytona Place seems to have been repaired at least once a year.

#### 1.3 Proposed changes to existing rates, and new targeted rates

Yes, excess water especially for companies and businesses is paramount. The water bottle factory needs to pay for the water if everyone else has to. Do not make them exempt !

#### 1.4 Investing in upgrading and protecting our city's water networks

Yes, needs to be upgraded. Population is expanding. Just make sure you plan for the next 20/30 years.

#### 1.5 Investing in our transport infrastructure

Yes, ideal to invest in the transport infrastructure but make sure the money is being used wisely. I heard this morning that people are unable to continue working on road works whilst the school children are on their way to school - the workers have to stop work. Is this correct ? Apparently, rumour is, a child on their way to school fell in a trench (pass the barriers) whilst the workers were working on the road works, so now, the workers have to stop until all the children are school. They start at 6:30am, work for a while till they see a child, then continue

working when all the children at school.

Surely this isn't right ... Wasted employment hours.

When you see people doing road works, the majority of the time, 3 people are watching one person work... Is this right ?

#### 1.6 Rubbish, recycling and organics

Doesn't matter what it costs re: recycling and organics as we can't continue as we are the the moment. However, when visiting the organic factory they admitted they'd like people to place water inside their compost bins to help the organics fall into the bin lorry as they get paid on weight ! Who is paying them... the council... which in turn is the people paying the rates.

Recycling... encourage manufactuers to recycle. Plastic bottles, if we returned them to the milk factory, get 5c off next bottle of milk. Same with glass bottles, etc. As a council you need to get the government to make more action by getting the manufacturers involved.

If an organisation is producing plastic that cannot be recycled as it's too expensive for the organic or recycling material, why are the council paying to landfill it. The ownership/expense should be on the organisation - they need to pay a levy to sell the materials that cannot be recycled. This in turn will pay for the landfill expenses.

#### 1.7 Our facilities

This is where individual needs of the community come into play. If Riccarton library is usually empty on a Wednesday from 3pm then if there is no demand, close it. Same might be for Parklands library but from 9:30 on a Thursday morning.

Great to see service desks within the libraries so not having to rent additional spaces.

Need to ensure money is not being spent just because you've got it. The encouragement of school children visiting the library is a great initiative as a lot of parents do not take their children to the library.

#### 1.8 Our heritage, foreshore and parks

The parks/heritage are a huge bonus for Christchurch. The maintainence and protection is paramount. However, the John Adcock Reserve inbetween Lamorna Road and Bottle Lake Drive has had fencing around it for more than 6 months - apparently an algea was in the water. What is being done about that ? The hiring of the fencing is costing monies...

From: NZ Chinese Language Week  
Sent: Thursday, 18 February 2021 8:35 am  
To: Dalziel, Lianne  
Subject: New Zealand Chinese Language Week 2021 Annual Plan Submission

Dear Mayor Lianne Dalziel,

I am writing to you on behalf of Jo Coughlan, Chair of New Zealand Chinese Language Week Charitable Trust. Please find attached a letter from Jo seeking your support for the 2021 New Zealand Chinese Language Week (NZCLW). We wish to speak orally to this submission if possible.

Thank you for considering this request. We look forward to working with you and the Christchurch City Council to deliver a successful NZCLW 2021.

Many thanks and kindest regards

Libby

**Libby English Lyon**

Project Manager | New Zealand Chinese Language Week

Christchurch City Council  
PO Box 73016, Christchurch 8154

18<sup>th</sup> February 2021

Dear Mayor Lianne Dalziel and Councillors,

### **Annual Plan Submission 2021/22**

Please consider this a submission to the council's annual plan. I am writing to bid for \$5,000 to assist with delivery of the New Zealand Chinese Language Week (NZCLW) being held across New Zealand 26<sup>th</sup> of September to the 2<sup>nd</sup> of October 2021.

### **Background**

The New Zealand Chinese Language Week Charitable Trust was established in 2015 to enhance New Zealanders' understanding of Chinese language and culture. Since then, New Zealand Chinese Language Week has grown in reach and exposure year-on-year and had strong support from current and previous governments, as well as many Councils, schools and businesses.

Building linguistic and cultural skills of New Zealanders not only provides a crucial underpinning of our educational and social strength as a country and community, but will increasingly be a necessary foundation for New Zealand business, government and society to engage with China. Such skills will be needed to rebuild our tourism industry, to support local governments and their sister city initiatives, and to promote trade and investment.

As acknowledged already through Sister City relationships and the China New Zealand Mayoral Forum, the relationship with China is an important one. Many local businesses have found the support of their council has helped them to do business in China.

Supporting NZCLW is another practical way to get more local businesses and communities exposed to Chinese language and culture leading to more trade and exchanges. The week is growing in popularity and becoming an annual fixture on the calendar, however we require sponsorship and partnerships to deliver the initiative – hence we are asking for your financial support.

### **NZCLW 2021**

This week NZCLW will build on its past successes engaging schools; government and local government; local communities and commercial enterprises. We do this through supporting the delivery of a range of fun and practical activities – exposing Kiwis to Chinese culture and encouraging Kiwis to “give Chinese a go”. Planned activities include:

- Events to promote Chinese learning in schools, including activities with schools in China;

- Publishing a trilingual children's book for distribution to schools and libraries across New Zealand;
- Community-based activities including National Dumpling Day;
- Challenges to promote basic Chinese skills in business and the community, with supporting printed material;
- High level promotion of the importance of building Chinese language capacity – from the Prime Minister, Mayors, Ministers and business leaders;
- Media promotion; and
- Ongoing engagement and activities via social media.

In terms of council involvement, many Mayors have taken up the #5Days5Phrases Challenge; libraries have held a range of activities including book readings in Mandarin, China-themed displays and dances, calligraphy demonstrations and other events.

We believe supporting New Zealand Chinese Language Week is an investment in New Zealand's future and its prosperity. It is a means of acknowledging our multi-cultural character and the contribution made by New Zealanders of Chinese ethnicity to our business and society. As we emerge from Covid-19, having a society that has enhanced linguistic and cultural capability to engage with China will become ever more important. All parts of our community – government and business in particular – need to build knowledge and understanding of China and its language and culture.

For more information don't hesitate to visit the NZCLW website: [www.nzclw.com](http://www.nzclw.com)

Thank-you for considering our Annual Plan 2021/22 submission. If you have any further queries or information please do not hesitate to contact Cathie Bell, on email or on phone

Warmest regards,

Jo Coughlan  
Chair  
New Zealand Chinese Language Week Trust

# 2021 SPONSORSHIP

INFORMATION

---

New Zealand  
Chinese  
Language Week  
新西兰中文周

## ABOUT NZCLW

---

New Zealand Chinese Language Week (NZCLW) is a Kiwi-driven initiative designed to increase Chinese language learning in New Zealand and deepen cultural understanding with our largest trading partner.

NZCLW seeks to bridge the cultural and linguistic knowledge gap between China and New Zealand by delivering fun and practical initiatives that assist Kiwis to learn Chinese.

The initiative is the first of its kind in any Western country and emerged in the context of a rapidly strengthening relationship between New Zealand and China.

## WHY DO WE NEED NZCLW?

---

NZCLW helps New Zealanders feel familiar with China and its people, enhancing cultural understanding and linguistic communication to boost interaction both in trade and cultural exchange.

This involves New Zealanders becoming more “Asia literate” and fostering political, economic, and social relationships. China is a key area of focus for this.

China is now our largest trading partner, as well as being a vital source of tourism and international students. NZCLW builds on the Government’s objective to strengthen our relationship with Asia by actively participating in the growth and prosperity of the Asian region.

Supporting NZCLW will encourage the ongoing development of cross-cultural connections within our Kiwi Chinese ethnic community, as well as leveraging New Zealand’s ability to connect to China.

## 2020 BY THE NUMBERS

**700**

Books donated to schools, libraries and politicians in 2020. Up from 500 in 2019.

**313,649**

Individuals reached on Facebook and Instagram in 2020. Up from 225,805 in 2019.

**239**

Celebrations and events we are aware of in 2020 despite COVID-19.

**1.09M +**

Individuals reached through traditional media in 2020.

**\$251,390**

NZD Total advertising space rate in Kiwi media coverage up from \$165,635 in 2019.

**NZCLW is enormously grateful to all the sponsors and supporters of NZCLW who have provided advice, in-kind support, and financial assistance to date.**

For NZCLW to maintain momentum and achieve its goals we are seeking to reaffirm existing partnerships and secure new sponsors for 2021 and beyond. To continue our sustainable future growth, we would prefer a two-three year commitment for the trust to maintain momentum.

### WHY SUPPORT NZCLW?

---

1

Demonstrate your commitment to ensuring New Zealand is accepting and welcoming.

2

Demonstrate your commitment to diversity and social responsibility with key stakeholders

3

Use our platform to promote and show your commitment to the NZ China business relationship

4

Catch the attention of your Chinese audience and grow your community therefore enhancing business connections

5

Increase brand reach on social media and in the national media

## WHAT WE ARE ASKING FOR

### Feedback

1.1 Have we got the game plan right?

I have worked for Christchurch Hospital since 2013.

With limited access to staff carpark building past years, my carpark access application was submitted last year when new hospital building was to open. I was to wait for 24months to gain the access. So I continue to walk from off-street parking on Montreal street or sometimes south of Moorehouse avenue. It easily takes 20 minutes from the car to new hospital building one way. Many of my coworkers do the same. With off-street parking after dark, many incidents of vandalism to vehicles of hospital workers are constantly happening. The side mirror of my car was smashed during my night shift on New Year's eve. But hospital workers continue to walk to work. By the way, the public bus service does not cover for morning shift starts, and after evening shifts when slight overtime needs to happen, so public transportation for hospital workers are not practical options.

I am very disappointed that this long term document does not mention at all about building hospital staff carpark. I do not want to get into the argument of CDHB and CCC about who is liable to build the carpark.

We never get valued by the city we serve for. That is the common feeling at this moment.

### Feedback

1.1 Have we got the game plan right?

- Parks \$149 million

That is too much money. No need another multi million dollar project like Margaret Mahy playground. I would like the unspoiled state of the river much better than parks with man-made appearance. Please cut the budget and spend wisely. I do not agree to increase the rate in order to make more parks around Avon river. We would not benefit it. Think critically about the balance of the expenditures. Your decisions are not appropriate.

### Feedback

#### 1.7 Our facilities

As a regular user of the bus service, I would like to ask that the Riccarton Bus Lounges remain open. Having these available makes the commute much more pleasant during winter and summer as one can get out of the rain and wind and in summer it is particularly pleasant to wait in air conditioned comfort. Also for the elderly and disabled passengers it is a bonus to be able to have a seat while waiting for the bus as it would be very uncomfortable for these people if they had to stand outside, again it would be awful in the winter with the rain and cold.

I think that having these facilities will encourage more people to use the bus

Thank you.

### Feedback

1.1 Have we got the game plan right?  
more investment in arts and culture.

1.2 Rates  
I would like to see lower rates as there doesnt seem to be a lot of enthusiasm to fix things when they go wrong.

1.3 Proposed changes to existing rates, and new targeted rates  
happy to help with more arts investment.

1.5 Investing in our transport infrastructure  
i would like to see uou target speed and boy racers. They are an immense problem and yet notjinh is done about them. We live opposite Scott Park where burnouts happen every night and notjing has been done despite countless compaints. The same hoes for excessive speeding on main road from ferrymead bridge - nothing has been done to curb this.

1.7 Our facilities  
no, libraries should not have fewer hours. Also you should not charge fees for overdue books.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
No  
Comments  
i think this money would be raised by private fundraising.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

### 1.2 Rates

Overall the proposed rate rise is low compared to councils across the country, I believe we should be funding more activity via rates as opposed to running down assets, and funding all capital work with long term debt or out of reserves.

Council has a history of not investing in the future and prioritising the present. Present generations need to contribute more to climate change action, replacing ageing infrastructure and building sufficient assets to cope with population growth. All in all I would support a more significant rates increase to actually start making some real difference.

### 1.3 Proposed changes to existing rates, and new targeted rates

I support a targeted rate where households use more than 700 litres a day.

### 1.4 Investing in upgrading and protecting our city's water networks

Councils primary role is providing infrastructure, I believe the council can spend up to 50% of its capital budget on three waters. Why do Stormwater renewals only seem to start in year 4 onwards this should be brought forward to year 1? we should be investing in three waters right now.

### 1.5 Investing in our transport infrastructure

Transport spending needs to be focussed on infrastructure that promotes low carbon activities. How serious is the council about the climate emergency it has declared!? If so why do we need to keep building new roads, Christchurch is a perfect place to become the cycling capital of the world.

### 1.6 Rubbish, recycling and organics

I support all recycling initiatives and the work the council provides there.

### 1.7 Our facilities

### 1.8 Our heritage, foreshore and parks

I fully support the Otakaro Avon loop but the council should be planting the green zone full of native plants right now. Imagine the biodiversity & bird life this will encourage. This will also naturally assist with stormwater management and provide the public a

beautiful restful place to explore

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I think the council is on the right track with this LTP. I would like to see more protection put on Christchurch's architectural heritage and protecting historic streetscapes and areas. Christchurch's Villas especially are dwindling since the earthquakes as a lot have been lost to high density redevelopment. (not Earthquake damage)

1.2 Rates

not too bad, has to be done

1.4 Investing in upgrading and protecting our city's water networks

the cost seems extremely high, it is important but is there anyway to trim down?

1.8 Our heritage, foreshore and parks

ideally a larger proportion of this would be put into heritage, I would like to see the provincial chambers plans started, (doesn't need to be done all at once)

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

will be worth it in the long term and should be done now to line up with the museums plans

1.11 Potential disposal of surplus Council-owned properties

I support the sale of the surplus properties but not sure about the old Rolleston house. If the building can have its protection increased to ensure its not left to deteriorate or be redeveloped than i would support this also

## Feedback

### 1.7 Our facilities

Submission re reduction public services proposed for 2021-2031 Christchurch Public Art Gallery, Te Puna o Waiwhetu

In 2003 The Christchurch Art Gallery opened not just its doors but its arms to the people of Christchurch and Canterbury. And over the years the people responded by visiting. Visitors from NZ and overseas are made welcome. Many come with, and for their children to many of the diverse art, cultural and interactive programs offered. Christchurch has gained a reputation as a destination.

With Level 1 there has never been so many children attending from schools. Schools are being turned away.

The children and schools' program has blossomed. The children associate the gallery with anticipation. Participation in interactive tours with a class has grown, there is pride in making their own works of art. They learn the behaviours required to optimize their sessions. These children are the Adults of tomorrow who are grounded in visiting the gallery. Now is a time to increase inclusive programs definitely not to reduce to 4 days. Art appreciated helps mold a well-educated balanced adult.

Further, numbers have shown that Wednesday evenings has the most attended guide tours. It is the onetime professional and families can attend in the evening. This facility is known about, a regular on visitors' calendar. So, it's a **no** to cutting the number of Wednesday evening events.

Reduced numbers due to Covid 19 restricting overseas visitors is a blip. We are looking at the next 10 years and with popularity increasing the need to expand not contract services is paramount.

### Feedback

#### 1.2 Rates

Hi

I'm not sure how 47.8% increase over 10 years to household rates can be deemed as affordable and sustainable in an environment where basic living conditions are already out of reach for a lot of New Zealanders. Where the property is tenanted this cost is going to be passed on to the tenant(s). I understand that infrastructure requires ongoing maintenance however I'm not sure how Christchurch City Council is at the point that it is that the only option to continue to provide maintenance and support is via a large increase to the rates. Unless New Zealand has a desire to be owned by foreign investors (which I understand is a national issue/question) then there must be another way to offset the costs.

#### 1.3 Proposed changes to existing rates, and new targeted rates

- Love the idea of returning the water quality to the previous level i.e. removing chlorine.
- Christchurch is known as the 'Garden City'; therefore I can see how on average Christchurch would use more water however given the value of this resource a excess water charge seems fair although I'm not sure the quantities are right.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

Where is the EQC payout funds; what was this spent on? Why not charge the fees through a user pay implementation; there are some people who would not use / go to the arts centre.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

#### 1.11 Potential disposal of surplus Council-owned properties

If these are not being used; then they are utilising money / resources that could be re-directed elsewhere

### Feedback

1.1 Have we got the game plan right?

No. Your priorities are far off. Town is hard to get around in and expensive to park in so we won't go, yet you have spent so much money there. Eastern suburbs or (lower class) areas have been forgotten about big time.

1.2 Rates

we have owned our home for 4 and a half years and our rates have gone up over \$100 during this time, I think increasing rates is not the way to go. Many people are complaining about bin size and having to pay more rates to change sizes. I believe all the bins should be the size of the yellow bin with no change to rates

1.4 Investing in upgrading and protecting our city's water networks

I would like to see it done for the people of our city not to get sent overseas

1.5 Investing in our transport infrastructure

Would be great, spend it on getting rid of the cycle lanes!!!!

1.6 Rubbish, recycling and organics

all bins need to be size of yellow!!!

### Feedback

1.1 Have we got the game plan right?

I am not sure if anyone is aware but lot people are struggling to live day to day, and with proposed rate increases this will push a lot people over the edge. I for one do not have enough extra cash to fund ecan and ccc rate increases and not sure what to do.

1.2 Rates

The wage bill in extremely high and surely costs should be cut here. How many management staff are there that are not up to job. Why is costs so high in getting consultancy done

1.3 Proposed changes to existing rates, and new targeted rates

Can someone explain exactly where or how insurance money was spent. If buildings have been under insured then seems pointless exercise forcing rate payers to pay for wishes that should have been covered.

1.4 Investing in upgrading and protecting our city's water networks

This should have been done years ago. Surely after the earthquakes and road closures a majority work should have been done

1.5 Investing in our transport infrastructure

I think time has come that the transport service needs to be sold. How many years has money been wasted on this and each year it needs to be increased via rate rise. Sorry

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I would like the City Council to honour their promise to remove chlorine from our pure water supply in Christchurch. It has now

been over 3 years and submissions are still not completed for water to be back to the way it was. Our city has the best water

in the country and to prove it the chinese are exporting it. I want the City Council to use their budget to finalize this situation

once and for all for generations to come. We are proud of our pure water and want it back. Our pipes in Effingham St are above

ground and we still have chlorine being pumped into our water. Use the council to sort this out once and for all. We are not like

Havelock in the north island, we know we have good water here. Do something about this for the future

1.2 Rates

I do not agree rates should be increased for heritage reasons

1.5 Investing in our transport infrastructure

I propose the City Council should look at "coach" type buses instead of the large buses which use a lot of fuel and for the most

part are not full except for peak times. They are better for the city, as they are quieter, and use less fuel.

### Feedback

1.2 Rates

Very unreasonable.

My pay was cut back to 60% during covid last year.

Me and many others are not receiving 5% wage rises.

The private sector is doing it tough.

CPI is officially around 1.5 - 2.0%, therefore rate rises should be NO MORE than this.

Council staff numbers and salaries should be frozen or reduced by the required amount to keep rate rises below 2%.

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

In our rates the things that should be prioritized are water, roads and rubbish collection. I feel it's unfair for ratepayers to pay for water when the water bottlers take it for free.

Keeping chlorine and fluoride out of our water is imperative.

When it comes to transport the CCC need to have more right turn arrows at busy intersections on traffic lights. Investing in this should be a part of transport infrastructure. Our roads are so dangerous at various light due to the lack of them as it stops traffic flows

1.2 Rates

The problem I have with any rates increase is that ratepayers incomes do not increase at the same rate if at all. Some have decreased due to covid as jobs disappear.

Council needs to stick to the basics and get private enterprise to stump up for more of the fancy stuff ratepayers should not have to pay for

1.3 Proposed changes to existing rates, and new targeted rates

If we do not use a service why should we be paying for it?

The water targeted rates should be applied to the water bottlers as they can afford to pay this. The average ratepayer cannot afford constant increases.

We should not have to pay for heritage projects as not made of money.

1.4 Investing in upgrading and protecting our city's water networks

I think you have this right . I would suggest a targeted rate for water bottlers to help cover it

### 1.5 Investing in our transport infrastructure

Right turn arrows being activated at intersections where there are traffic lights to make turning safer.

No more cycle lanes where they impede access and parking for businesses. Narrowing of roads for cycle lanes that are already narrow should be abandoned.

### 1.6 Rubbish, recycling and organics

A bigger green bin to encourage green recycling.

### 1.7 Our facilities

Council needs to start charging land bankers as some areas are looking terrible. New Brighton has been neglected by the council and there is a lot of land banking going on there. It's ok to reduce services but what about hitting some of these people in the pocket to counter this.

### 1.8 Our heritage, foreshore and parks

What about New Brighton as seems to be neglected? It's ok having the library salt pools and new playground. But what about the rest of it? Target absent landlords and land bankers!!!

### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

As it will be repaid I am happy with this.

### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

The government should be funding this as is earthquake strengthening.

### 1.11 Potential disposal of surplus Council-owned properties

Yes you should dispose of them as unnecessary as not being used. That money can go back into the ratepayers kitty

### 1.12 Any other comments:

**The council has to realise that ratepayers are struggling as many lives and incomes have reduced due to covid. We cannot afford to be paying for stuff that we do not want or use. Too much money has gone into cycle lanes that at times make roads more dangerous.**

**Ratepayers should only be paying for the basics not the fancy stuff that is constantly chucked at us!**

## Feedback

1.1 Have we got the game plan right?

1.3 Proposed changes to existing rates, and new targeted rates

Kia Ora

Our submission is related to the proposed water charges. Our understanding is that council are considering a partial one size fits all approach which will directly impact on us as we have 15 people living at our address. (partial referring to our understand that Helen Beaumont believes that the higher value your home the more water you are allowed).

We support adults with an intellectual disability. Our organisation, Changing Lives NZ Ltd has been operating out of this residential property for over 25yrs and some of our Residents have been here longer than us. My whanau live onsite and we share our daily lives together. We understand that we use on average 1.75 cubic meters of water a day which is over the proposed limit and that we would be charged over \$500/p.a.

The highlighted fact in an article I read 20.6.20 that the CCC will generate an estimated 2 million dollars per year appears to be the driving factor in decision making and the inability for us to have our individual circumstances assessed case by case certainly reaffirms my opinion of why you want to charge for our water.

In my opinion if you were so concerned about our water (I use that term loosely as you seem to think its yours) you would fix the infrastructure (leaking pipes) that initial estimates suggest lost 11.64 billion litres of water last year, or you would not grant permits for Chinese based companies to sell millions of litres of our water overseas.

We do not waste water in our home and we do consider ourselves fortunate to live in a country were this resource is plentiful and available to us. We do not consider your decision to charge intellectually disabled adults to have daily showers reasonable or just given your wastage and poor decision making.

It is our request you reconsider how you can save our water by taking a look at yourselves first.

Regards

Glen Counsell

Director.

1.6 Rubbish, recycling and organics

We love to recycle here. We do try very hard to do our part. Sometimes we and our residents do get it wrong and put rubbish or recycling in the wrong bin. I do not agree that you have people walk the street marking bins for non-collection which has happened to us recently because we put a pizza box in the yellow bin. You should invest more at the plant where sorting should occur for the odd mistake.

1.7 Our facilities

yes - facilities are important but reducing services is not the answer.

1.8 Our heritage, foreshore and parks  
sounds good

### Feedback

#### 1.7 Our facilities

Changes to library hours will have, I imagine, little effect on customers, and are unobjectionable. Calling them "streamlining" as you do in so much publicity is outright deception, and chillingly Orwellian. Try honest language - you might like it.

The Riccarton Road bus lounges serve a useful purpose and closing them would be unfortunate. but the alternative to closing them is making them work, which means preventing the anti-social behaviour and outright criminality that goes on now.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

### Feedback

1.7 Our facilities

16 March 2021

This morning I helped the Gallery educator with a Year 3 school class visit. This was the third of four from the school's Year 3/4 syndicate. We looked at, discussed and drew details from works which focused on the Pacific and New Zealand. We then returned to the Education space and the children made their own prints using designs or images they had recorded while in the Gallery. The visit not only focused on art and art processes but also how it records our cultural identity, our multi-cultural diversity, our history and our place on the Pacific world. Teachers realise that a visit to the Art Gallery meets many of their cross-curriculum needs and Key Competencies, not just The Arts strand. The children get a real sense of achievement as they know their response and creative artwork was valued and they would take that into the future. Each exhibition change results in a new programme, a new art process and links to other strands, so there are reasons for schools to book one or more visits, or classes, or syndicates or homeschool groups to the Gallery each year. Every decile level makes use of the Gallery **They are your future and they mustn't feel the Gallery is a place that is only for the elite and well-off.**

As the first Schools Officer appointed to first, the McDougall in 1989, then Christchurch Art Gallery until I retired in 2005, I am aware of the value teachers placed on the opportunity to bring their classes to the Gallery and also the information they received and techniques they learned that aided their own professional development. I am excited to observe how this service to schools has grown over the years, knowing that it not just the ratepayers of Christchurch and their children who benefit but the regular school visitors from the wider Canterbury and West Coast. Because I know how important this service is I continue to volunteer to help with the schools and the public. Rather than arbitrarily cutting numbers I would investigate other ways to meet the costs of this vital service as I fail to see how fewer school visitors would reduce the cost of providing this service. There is still the one salary to find, the cost of materials, equipment replacement, cleaning, lights etc

Nga Mihi

Judith Houl

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

THe Robert McDougall is an important heritage building that deserves to be future-proofed with base isolation. In the late 1990s a considerable amount of time was spent on strengthening the building so it survived the earthquakes.

1.1 Have we got the game plan right?

As a previous Director of The Arts Centre I fully support the proposed capital funding by the Council. The Arts Centre is truly a unique facility in not only Christchurch, but also New Zealand. Prior to the 2011 earthquakes The Arts Centre was a facility that was accessible to all Christchurch residents with also a strong appeal to domestic and international visitors. There are many examples of the Council financially supporting visitor attractions in the city. It seems incongruous that a facility which can attract more than a million visitors a year is not receiving the necessary funding to ensure that it can fully support

There are many examples of the Council financially supporting visitor attractions in the city. It seems incongruous that a facility which can attract more than a million visitors a year is not receiving the necessary funding to ensure that it can fully support the work of ChristchurchNZ in promoting the city.

To lose The Arts Centre through lack of funding is unthinkable and would reflect badly on the Council. As your figures indicate 0.04 per cent of the budget is a small amount to pay for such a wonderful resource for the city.

### Feedback

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

I would like to be certain that the \$5.5 million capital grant to Christchurch The Arts Centre, proposed in the Christchurch City Council's draft Long Term Plan 2021-31, is given the green light.

The Arts Centre is an extremely important multi-cultural centre in Christchurch and an integral part of our heritage. It is attractive to Christchurch citizens and to visitors alike and has always had a variety of uses for people of all ages. Personally, I have valued it as a university, as a centre for learning music, dance, silver-smithing, for attending performances in the Great Hall, the Centre Gallery, the Court Theatre, for cinema at The Academy Theatre, and now The Lumiere. Because it is an ideal location, I booked The Great Hall for a Dickens Fellowship conference (which didn't eventuate due to the earthquakes). Over the years I have regularly frequented The Dux de Lux, Annie's, The Cafe, now The Bunsen, as well as the weekly market and the unique craft and gift shops and all of my visitors have loved the architecture, the open spaces, and the atmosphere of these remarkable buildings as much as I do.

### Feedback

1.1 Have we got the game plan right?

Aranui Library is a community hub shutting it on a Sunday will affect peoples ability to access vital services such as internet snd printing along with other supports.

I think having one late night at Linwood library is great for people who work full time its great as it coincides with the mall being open later.

1.2 Rates

I think increasing rates and reducing essential service hours i.e the library is unfair.

1.3 Proposed changes to existing rates, and new targeted rates

I think excess water rates is fair.

1.4 Investing in upgrading and protecting our city's water networks

yes healthy drinking water is important as long as improvements are done using materials and workmanship that will last.

1.5 Investing in our transport infrastructure

electric cars must be allowed in bus lanes.

1.6 Rubbish, recycling and organics

yes anything to reduce waste and put organics back into the ground

1.7 Our facilities

leave libraries as is.

1.8 Our heritage, foreshore and parks

more on replanting natives and upgrading walking tracks be good.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No  
Comments

1.11 Potential disposal of surplus Council-owned properties

fine

1.12 Any other comments:

libraries are community hubs please dont restrict access.

### Feedback

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

please excuse the quality of theis submission as im using my thumbs on my phone. I need to have a say about this now. For some time I have been extremely concerned the Council would not provide funding for the Arts Center, and so I'm very pleased to see the funding has been allocated. I hope it is enough - more than enough - for what is needed. The buildings and spaces of the Arts Centre hold memories now for generations of the majority of Christchurch people who have had many varying experiences there. These are some of mine: hearing countless stories from older relatives about their days going to university there, visiting rutherfords den in the late 70s (?is my memory correct?), hanging out there on weeeeknds in the 80s when it hadnt long been the arts centre, going the cafes in the 90s, learning ballet there (and then taking my girls to ballet there a generation on), partying at "Double Ds", then "Annies", and now sitting very properly while enjoying the new wine bar, going to movies in the most stylish lumiere, visiting art galleries - including wonderful student exhibitions, eating fudge, appreciating handmade candles and handspun and dyed wools and garments, going to the markets and eating souvelakis, more recently listening to university musicians rehearse as we walk past and attending concerts in the recital rooms, taking my children to always varying exhibitions at the classics gallery. Having my wedding reception in the Great Hall!!! As well as attending so many beautiful concerts in that stunning building over many years - drinking mulled wine and listening to Michael Houston perform Beethoven's Sonatas in there is a memory that will never fade. Everyone in Christchurch's identity is somewhat connected to experiences at the Arts Center. It also provides a sense of sophistication, decency and heritage within us all by knowing supporting the arts centre is just something Christchurch does. It has always been teh right thing to do and it absolutely should not ever be desparate for funding. It should always be well looked after and safe in the knowledge it is appreciated and valued. Please let us all know it will always be supported very well. Thank you for reading, Victoria

1.10 Funding for base isolation of the Robert McDougall Art Gallery

### Feedback

1.1 Have we got the game plan right?

No youve got it wrong as usual untill you can afford to fix our water waste and roads you know the core services you need to stop spending on shiny adventure parks big tvs and houses in akaroa statues etc. I will allow somespending on basic budget training for the councilers and staff.

1.2 Rates

You have already doubled our rates in the last ten years you need to set your budget for what you make now and learn to stay within it. I say no to your increases.

1.3 Proposed changes to existing rates, and new targeted rates

youve got it way wrong do lower the cap on water but not to the level you propose do not use water as a money grabbing sceme like you are planning. cut the wasteful spending on nice to haves first. Heritage buildings are a nice to have.

1.4 Investing in upgrading and protecting our city's water networks

yes you do have a responsibility to do this if only you had done this over the last decade we wouldnt be in sitiutuon we are now.

1.5 Investing in our transport infrastructure

I suggest you make a geniune effort to get the puplics opionion on this. Not just going off the small amount off submissions you get. I suspect most see the sceme of cycle lanes and empty buses a waste. And are making emissions worse by making car running times longer. And no to a mono rail.

1.6 Rubbish, recycling and organics

More recycling is good a shiny new desk at the recycling centre not so much make sure its spent on actual improvements

1.7 Our facilities

sure lower the spending on hardly used sevicees as long as your sure thats what they are

1.8 Our heritage, foreshore and parks

going by the projected rates rises you cannot afford to support private devolpments so no to that

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Yes, it seems well-balanced.

1.2 Rates

I support it.

1.3 Proposed changes to existing rates, and new targeted rates

I support these changes.

1.4 Investing in upgrading and protecting our city's water networks

It's clear we need to do this. I support this investment.

1.5 Investing in our transport infrastructure

There's much you could do to improve transport around the city, especially the CDB. I support this investment.

1.6 Rubbish, recycling and organics

Great idea! I support this spending.

1.7 Our facilities

I support this spending, in particular the ideas around changes to library services. It appears the changes you propose would not significantly reduce the library service, yet find some ways to save money.

1.8 Our heritage, foreshore and parks

Great idea, please do.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

I totally support this spending. It is regrettable that CERA and the government did not fund anything to help the valuable public asset that is our Arts Centre, and it is good to see you supporting the centre.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

I support this work. Thank you for agreed to help the Museum with this work.

1.11 Potential disposal of surplus Council-owned properties  
Seems like a good plan. I support it.

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.1 Have we got the game plan right?

Please no more buying of events like the ellerslie flower show.

1.2 Rates

As low as possible.

1.3 Proposed changes to existing rates, and new targeted rates

Targetted rates for The Arts Centre is supported by me. We older people remember the original University and it is central to Christchurch city for tourists, concerts, exhibitions as well as just looking appropriate near the Botannical gardens. The stunning restoration of the Great Hall was a highight of post earthquake for me.

1.4 Investing in upgrading and protecting our city's water networks

Water should be charged to individuals over a certain amount of usage, and then it will be more valued and people will learn how to use mulch if they water their garden all the time.

1.5 Investing in our transport infrastructure

I guess we have to accept that it is a public service and not expect profit.

1.6 Rubbish, recycling and organics

Balance is pretty right.

1.7 Our facilities

Is the Avice Hill facility in Memorial Avenue presumably gifted by someone, able to be sold and developed for housing? It seems a bit of a white elephant at present.

1.8 Our heritage, foreshore and parks

Balance is about right...

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes
Comments
The Arts Centre is one of the few reminders to those of us over 50 of the old Christchurch, and the original University. Restoring the Great Hall was the first ray of hope post earthquake and as much support is possible to retain this treasure.
1.10 Funding for base isolation of the Robert McDougall Art Gallery
Yes
Comments
Another old treasure that needs to be supported.
1.11 Potential disposal of surplus Council-owned properties
Perhaps it is time to dispose of any surplus property, even if they are Heritage. we need to streamline

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

no. You are not investing in roads. The road network is poorly maintained and a mess of patch repairs. Roads wear out and need to be fully resurfaced, the roads in the bays are in a awful state and the recent patching has just made thing worse.

We do not need anymore pointless cycle lanes unless you are going to widen Dyres Pass and keep the cars and bikes apart.

1.2 Rates

No, this is grossly unfair. I do not get a 5% rise to help pay off your wasteful spending. I would have a slightly different view if the money was been spent on the bay residents but we are completely neglected by you while being asked to fork out for pet projects in the city that we will never use.

Stop spending on cycle paths and needless drains/barriers and fix the problems that affect local residents in the community.

1.3 Proposed changes to existing rates, and new targeted rates

Well done, you have found another cash cow to milk.

When you have managed to supply us with fresh drinkable water you can start to talk about wastage.

We were promised that the chlorination of the tap water would stop but we still cannot drink it. The taste and smell is so bad it is like being in QE2 pool. Its unplesant to bath and shower in, the only thing it's good for is to water the garden.

Give us clean fresh water before you start talking about taxing us for it.

1.4 Investing in upgrading and protecting our city's water networks

Once again, no you haven't. You have failed to sort out our water so far, how can we have faith that you have the slightest idea in this area.

We have paid our rates for fresh drinking water and still don't have any.

Our drains are never cleared and constantly overflow as they are blocked.

Yet we are getting a brand new drain on a hill that never floods.

#### 1.5 Investing in our transport infrastructure

Better to spend this money on fixing the shoddy roads and not on anymore grand green dreams.

#### 1.6 Rubbish, recycling and organics

As long as we get red and green bins the same size as the yellow bin all the better.

#### 1.7 Our facilities

I don't use buses or cycle anywhere so i get no benifit from this. I do not use the libraries and have no intrest in any gallerys.

What do i gain from this?

#### 1.8 Our heritage, foreshore and parks

Well you have just wasted 2 million on a house i did not know exsisted and have no intrest in.

Where is the rebuild of Godley House and the piers in the bays?

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

##### Comments

There is more things to spend the money on.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

##### Comments

more wasted money.

#### 1.11 Potential disposal of surplus Council-owned properties

Sell them before the market collapses

#### 1.12 Any other comments:

We need fibre broadband, roads repaired, drains cleaned, a footpath along the road between Orton Bradley and the boat ramp and that is just the urgent stuff.

Stop wasting money and spend it on what the community needs.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Yes, the balance is right.

1.2 Rates

If the city increases its green space with parks and green corridors, including substantial, ongoing tree planting then I am very happy to pay the rates needed to achieve this.

1.3 Proposed changes to existing rates, and new targeted rates

Retaining our heritage buildings, including the Arts Centre is equally important as developing and enhancing our green spaces. So, yes, I am very much in favour of a rates increase. Living in a green environment with plenty of PASSIVE green spaces where people can find peace and tranquillity is crucial as our living spaces are compressed with infill housing and apartments which contributes to increased tensions and pressure.

1.4 Investing in upgrading and protecting our city's water networks

Clean, healthy, non toxic fresh water is essential and non negotiable. I agree with the investment proposed. As an aside, please do not fluoridate our artesian water.

1.5 Investing in our transport infrastructure

I am happy with the proposed investment. May I suggest much smaller buses more often. I have seen some on the roads; not nearly enough. We don't have the patronage to support the larger buses except at peak times.

1.6 Rubbish, recycling and organics

Smaller red bins, larger green ones. I'm unsure of the investment required for the upgrades, however I support the investment proposed.

1.7 Our facilities

I have heard the Council proposes to downgrade the level of services to our libraries and the Art Gallery. I totally disagree with that. We need more culture and information / reading resources, not less. Culture and libraries enhance our quality of life and that needs to be supported. Libraries are an essential service, places for communities to come together, a haven for some and a source of knowledge and reading pleasure for many.

1.8 Our heritage, foreshore and parks

No, the balance is weighted towards maintenance only I think. I would be very happy to see a substantial increase in rates in order to repair, restore and maintain our special, few remaining heritage buildings. As I said above, maintaining our parks and creating many more is really important in enhancing each person's quality of life. More green space is essential for mental health

of the community. Continuing to maintain existing parks to a high standard is very important. People respect their environment more if it is maintained to a high standard at all times. So please increase the rates to support that.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

More funding if necessary.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

Absolutely support the investment and see the McDougall Gallery back in use AS WAS INTENDED, NOT AS WAS SUGGESTED SOME TIME AGO UTILISED AS A FAST FOOD OUTLET. Shocking.

1.11 Potential disposal of surplus Council-owned properties

What are the surplus properties mentioned? Including the two heritage buildings? Without knowing which buildings are earmarked for disposal I cannot give an opinion. If the two heritage buildings are a small portion of that 1 percent of the portfolio then why cannot they be retained and maintained and rented out to interested parties?

1.12 Any other comments:

To summarise; I fully support an increase in rates to not only maintain our quality of life here in Christchurch but to enhance it; environment, culture, heritage and efficient, cost effective public transport being the priorities.

### Feedback

1.1 Have we got the game plan right?

I note in the 10 year plan that \$242.1 million is labelled for cycling over the 10 year period.

If we take a projected total population of 600 thousand which includes the youngest (babies) and eldest residents, this equates to \$403 per head of population! This seems a ludicrous amount per resident spend when considering other city needs.

Obviously not everyone of the 600 thousand would be capable of cycling, let alone willing, so if we made a conservative estimate that 25% of the residents were not physically capable of cycling, then the spend per potential resident cyclist would be \$537!

Even from the number potentially capable cyclists there will be a significant percentage that will never be willing, for various reasons, to ever consider cycling. Taking this in to consideration would further escalates the spend per cyclists head.

I find it hard to comprehend that any clear thinking councilor would give entertain or give any consideration to the \$242 million spend.

In my opinion the council is being hijacked by well intentioned but uninformed and unpractical planners. Also in my opinion councilors are delusional about what the uptake will for cycling by Christchurch residents

And yes I am aware that part of the funding would come from New Zealand Transport Funding, which is taxpayer money of which I am one. I take a holistic view.

1.5 Investing in our transport infrastructure

I note in the 10 year plan that \$242.1 million is labelled for cycling over the 10 year period.

If we take a projected total population of 600 thousand which includes the youngest (babies) and eldest residents, this equates to \$403 per head of population! This seems a ludicrous amount per resident spend when considering other city needs.

## Feedback

### 1.5 Investing in our transport infrastructure

Hard to say whether the balance is right as I am not sure what is being sacrificed to get that rate. However having alternative means of transport for different budgets and lifestyles is extremely important.

Please keep the work on cycle lanes going. I was able to switch to cycling after the major cycle lane connecting my house and workplace was built. With every additional cycle lane you build on major paths, more people will be able to switch to cycling: much better for health, budget, and environment.

There is a lot of criticism about cycle lanes, but as more are built and the city is more connected, more cyclists will be able to use cycle lanes exclusively, rather than having to hop onto pedestrian walkways to keep safe when a cycle lane isn't present, or navigate narrow roads.

Please also improve public transport. For the most part they are so smelly that they are unusable. People who cause nuisance aren't warned, and many bus drivers aren't friendly. People should be comfortable choosing whichever transport option will get them from point A to point B, but these issues mean that for anyone who doesn't like active transportation options, driving is the only option.

### 1.7 Our facilities

Please do not reduce library hours, and the late Wednesday nights at the Art Gallery. At least keep Turanga open until 8pm on weekdays.

In Christchurch there is a severe shortage of places one can go and enjoy for free in the evenings. For low income communities, students, young professional trying to save for a house, and anyone else on a budget for whatever reason, the options for entertainment at night is extremely limited. Sure, there are parks and walking tracks to be enjoyed, but they are much better enjoyed when the weather is good and the sun is out.

I have really enjoyed going to the Art Gallery on Wednesday evenings, when I wanted to dress smartly and have a nice night out with my partner or a friend without having to buy something. The changing exhibitions and artwork provide something new to see frequently. The building is amazing, much more so at night.

As for the libraries, please at least keep Turanga open until 8pm. I go there after work frequently to read or study

in peace and quiet in the company of strangers who are looking for the same thing. I work full-time and also study.

I am saving for a house, and also trying to self-fund my study, so frugality is my choice. However there are many others who have to be frugal because that is their only option. There are also others living in small rental spaces with their families, who really appreciate an hour or two of peace and quiet away from the ruckus.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

The Council's proposed water charge per property is expected to raise approx \$2 million

There has been no estimates, given, of the charges involved in reading all the water meters once to establish the current baseline

reading

then again in years time to see the use per property. The first will mean reading the boxes that have not been opened, in many

cases for many years, and may be time consuming to do

How many paid readers will be needed and the estimated times to carry this out and the wages and vehicle costs over a

year.

Does the figure of \$2 million mean after collection costs involved or not?

### Feedback

1.1 Have we got the game plan right?

1.7 Our facilities

I think the library services are one of the very few positive, free and all encompassing services provided by the council. My preference would be for them to be open for longer but I do understand you have financial pressures. I think you should open libraries at 10am instead of 9 and leave the closing hour the same. This allows people who are working to still have a decent amount of time to get their books. An alternative would be some late mornings and some late evenings. If you are opening for students - please consider this. Each of these students will have a library at their learning facility that they are choosing not to use.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

It is far more important to more people and used much more than the cathedral ever was.

1.11 Potential disposal of surplus Council-owned properties

Consider asking for expressions of interest from community groups stipulating that finance is no object. That way you might be surprised at what pops out of the woodwork. Lets face it, you aren't paying rates on them and they're only taking up space. It may also be possible to relocate these properties elsewhere.

1.12 Any other comments:

Our city lost it's heart and soul and randomness when the Govt took over our plan for redevelopment.

Give us some of that back. Allow random regeneration and weird projects.

I've also been thinking about the buses and each time I take a car journey, consider how I could've accomplished this by bus. Every time I could not - unless I was prepared to spend the entire day on it.

We need neighbourhood development now. Local shops in places it's nice to be. Bike racks outside them. Walks with outdoor exercise machines and challenges. I love what's been done at Ngā Puna Wai but where are the sheltered spots to sit and appreciate what's going on? Drill down into our neighbourhoods and make them special places to live.

## Questions to think about when making your submission

### Have we got the game plan right?

Our overarching proposal is to focus on a deliverable capital programme that helps drive our city forward, with particular investment in roads and transport infrastructure and in protecting and upgrading our water networks. We're borrowing for new projects that have long-term value, and ensuring that the debt repayments are spread fairly across the generations of ratepayers who will benefit from them. We're maintaining enough financial flexibility to be able to handle unplanned events, and we're finding permanent efficiencies in our day-to-day spending. We've managed to do all of this while keeping rates increases as affordable as possible.

**Have we got the balance right? Have we prioritised the right things? If not, what changes would you like to see?**

Less money for the inner city  
The suburban householder has no tax or  
rate rebates.

### Rates

We've considered a range of options for how best to achieve what we need to achieve while also keeping the average rates increase as affordable as possible.

**What do you think of this plan for an average residential rates increase of 5 per cent for 2021/22 and an overall rates increase of 4 per cent over the next 10 years?**

IF IT HAS TO BE, THEN IT HAS TO BE.  
doing nothing is not an option

## Rubbish, recycling and organics

In 2020 the Council adopted a new Waste Management and Minimisation Plan that focusses on changing our 'throw-away' culture and reducing the amount of waste we send to landfill. Implementing the actions in that plan are the key drivers of our operational and capital spending.

**We're proposing to spend \$25 million on organics infrastructure (which includes upgrades to the organics processing plant), \$18.5 million on transfer station infrastructure and \$18.4 million on recycling infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

YES

## Our facilities

We're proposing to invest 19 per cent of our capital spend on community facilities. We're also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service?**

**Have we got the balance right? If not, what changes would you like to see?**

PLEASE leave our libraries alone. They and the librarians are the heart of our community, along with the swimming pools.

close the Riccarton Rd Bus lounge, but support the bus services. Free buses for school children pre school 1hr and after school 1hr would encourage their use.

**Our heritage, foreshore and parks** Christchurch has a long and proud history of protecting and respecting our heritage. Over the past decade we've carried out a massive programme of repairs and restorations, but we still have some work left to do. In the next 10 years we will continue to restore our own buildings and support private development of heritage buildings. We will also be maintaining and improving our parks and foreshore.

**We're proposing to invest 11 per cent of our capital spend on our heritage, foreshore and parks.**

**Have we got the balance right? If not, what changes would you like to see?**

Please spend more money on our parks and native planting programmes such as Halswell Quarry, Port Hills and wetlands. Far better investment than "Public Sculpture"

## Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

**What do you think of these changes to existing rates, and new targeted rates?**

**Have we got it right? If not, what changes would you like to see?**

Excess water rates hopefully apply to  
"Bottling Companies" shame on the Council  
and Ecan for "Ocean Cloud" approval  
and lack of fining for infringements.

## Investing in upgrading and protecting our city's water networks

We have a responsibility to provide and maintain the wells, pipes, reservoirs, treatment plans and pump stations for drinking water, and manage the collection, treatment and disposal of wastewater and stormwater.

**We are proposing to invest 41 per cent (\$2.329 billion) of our capital spend on water infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

Yes.

## Investing in our transport infrastructure

We've heard from residents that transport is a top priority. It's also the city's biggest contributor to carbon emissions. We want to give people better options for getting around, whether by car, public transport, on foot, on a scooter or on a bike. We also want to ensure our networks are safe.

**We are proposing to invest 25 per cent (\$1.445 billion) of our proposed capital spend on transport infrastructure improvements.**

**Have we got the balance right? If not, what changes would you like to see?**

Yes. see note about 1hr Free Bus  
rides for school children 1hr before school and  
1 hour after school. This would save traffic  
congestion on roads, drop offs outside schools  
and be more social for the childrens,  
less stress balancing the household.

## Funding for the Arts Centre Te Matatiki Toi Ora

We are proposing to provide the Arts Centre with a capital grant of \$5.5 million. We would do this via a targeted rate that would recover the grant cost over 10 years, and would phase in over two years, so the targeted rate would be smaller in 2021/22 than in subsequent years. We're proposing that every ratepayer will pay this rate and it will be calculated as a number of cents per dollar of capital value.

**Do you support the Council funding \$5.5 million for the Arts Centre?**

**This proposal is currently accounted for in our proposed rates increase. If a decision is made not to proceed, rates would drop by 0.04 per cent.**

☒ Yes ☐ No

Comments:

Very much the Arts Centre  
less for the Cathedral

## Funding for base isolation of the Robert McDougall Art Gallery

Canterbury Museum considers the base isolation of Robert McDougall Art Gallery to be a key part of the Museum's redevelopment. In July 2019, the Council agreed in principle to support the base isolation of Robert McDougall Art Gallery at a cost of \$11.8 million, subject to public consultation in the Long Term Plan 2021-31.

**Do you support the Council funding base isolation of the Robert McDougall at a cost of \$11.8 million?**

**This proposal is not currently accounted for in our proposed rates increase. If a decision is made to fund base isolation, rates would increase by 0.07 per cent.**

☒ Yes ☐ No

Comments:

## Potential disposal of surplus Council-owned properties

We have a small number of properties, including two heritage buildings, that are no longer being used for the purpose they were originally acquired for. These surplus properties make up less than 1 per cent of Council's overall property portfolio.

**Help us decide their future – what do you think of this proposal to dispose of surplus properties?**

---

---

---

---

**Any other comments:**

Please support revegetating the Port Hills and Valleys, also waterway restoration.

Planting is one thing, regular weeding and caretaking for the next 3 years is also important. Please employ more people on the ground rather than well paid few at the top. High salaries salaries produce paper work, less public consultation and more doing please.

**Thank you for your submission**

### Feedback

#### 1.2 Rates

The current rate system is unequal and unfair on the majority of citizens. Based on a capital value it is grossly unfair when you consider every house owner uses the same services provided by the council, clean water, grey water, storm water, and rubbish collection. Our rates are close to \$4k per annum, our daughter with a similar sized house oays \$1,400 per annum using exactly the same Council supplied services as we do, Time to get away from a capital based rates (Tax) system and spread the charges equally among all rate payers.

### Feedback

1.1 Have we got the game plan right?

I don't support closing the Riccarton bus lounge we need put the money aside

it will be would a safety issue if the bus lounge closes . I for your self if you have to catch the bus in rain you have some where dry to wait for the bus .

I thought council was trying bussing easy to catch the if the council close it would put bus network 10 years beheld

it's not just people in Christchurch who use the Riccarton bus lounge people from the Selwyn district

think you send it the Selwyn district council to gave feedback

maybe one idea is the Selwyn district council could share the cost of the Riccarton bus lounge

1.4 Investing in upgrading and protecting our city's water networks  
this a good idea to upgraded our city water network

### Feedback

1.1 Have we got the game plan right?

Stop cycle ways they are making a lot more congestion on our rough roads. If you made them the size of Sparks Road we could drive down them. No room on the roads for bus stops we all need to stop and add to the congestion.

Drinking water being clean and pure.

Roads and footpaths being fit for purpose, All should have a warranty, not like cycle ways 1 year. Products designed to last even made from plastics. Give us back shingle Roads. (they lasted)

Cleaning our waterways.

Stop wasting money on painting buses and names of Council outlets. Also bring back time in motion for all Council workers.

1.2 Rates

I cannot afford it like many other low income families. Not all are paid a living wage.

1.3 Proposed changes to existing rates, and new targeted rates

Good idea as at least they will receive the cash, not to be told "we overspent"

1.4 Investing in upgrading and protecting our city's water networks

Most important. We the rate payers need to hear fortnightly what has been done. The forced chemicals in our drinking water needs to be acted on FIRST. Reason sick of gaging on it, sores, excema on skin. Stop buying our water back in bottles,

1.5 Investing in our transport infrastructure

Why bother it takes us 20min. walk to get a bus then half an hour plus to get to city. Struggle to get on the bus with any shopping. Forget buses. Roads for cars and bikes etc. No cycle lanes as they can cycle where they like.

1.6 Rubbish, recycling and organics

Have you got somewhere to send this once recycled? This should be the first priority, otherwise the problem remains.

1.7 Our facilities

The Art Gallery cost a lot to build, The Council moved in. Now repairs, are needed. Should our residing Councillors pay toward this as they are on a " living wage" We need to have insurance policy on all our buildings, like homeowners.

1.8 Our heritage, foreshore and parks

We have already spent a lot on the foreshore while the roads are ignored. Heritage, parks (not all need electric car plug ins) yes . Roads to take you to these places would be of more necessity.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes  
Comments  
I understand this is where the museum stores its items when not on display

1.11 Potential disposal of surplus Council-owned properties

Always dispose of extra facilities on the market, not given to a friend

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.1 Have we got the game plan right?

What sort of city do you want. One with slightly better roads and a very reduced access to art and literacy if you happen to work during the day, or if your parents do. Or if you live miles away from the central city in Sumner or Lyttelton with no easy alternatives you really will suffer from the cuts - but of course the road to the ones still open maybe will be so much better.

One that "rewards" successful things (library, art gallery events) by cutting funding and reducing hours and rewards inefficient and badly maintained assets such as roads with extra funding (and we all know they will still be rubbish).

So no, I don't think you do have the balance right.

1.2 Rates

I am paying more and getting less. I don't get a 5 per cent payrise every year to cover this.

1.3 Proposed changes to existing rates, and new targeted rates

I agree with the water one - if people cannot control their usage or want to keep a prizewinning garden watered they should pay for that. But you will have to fix leaks in good time. Apart from giving the "fix the roads" brigade another thing to hate I'm not sure why you need to list heritage spend - hopefully because it's temporary.

1.4 Investing in upgrading and protecting our city's water networks

I like water. It's important. if that is what it costs then do it.

1.5 Investing in our transport infrastructure

There is a lot that needs sorting here - if that is what it takes then do it.

1.6 Rubbish, recycling and organics

I'm not sure how a council changes a throwaway culture themselves. Mostly it just seems you don't pick up bins, tag them with a note when neighbours dump their rubbish in another persons bin and the whole lot gets fly tipped somewhere. Again costing me more money to get less.

## 1.7 Our facilities

You are taking something the council ACTUALLY does well and making it crap. Well done. You will have libraries that can only be visited by the retired and unemployed. You have a THRIVING art gallery events calendar you want to decimate. Our two best free spaces, that win awards, win worldwide acclaim and have LOTS of things to do for the rate payers throughout the year and you cut their hours and their events. Loads of people go to art gallery events so don't give me that. Yes the library is quiet for that last hour, so that's when people who need the solitude, who cannot tolerate crowds or cannot go at any other time go. Yes the art gallery is quiet on Wednesday night when it's open late - but once a month it's very crowded at the same time which evens it out and means different people can use it. This is the part of your plan that makes no actual sense and makes me angry.

## 1.8 Our heritage, foreshore and parks

No opinion

## 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

I do not support this if it means taking money from other similar institutions. That is ridiculous.

## 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

I do not support this at the expense of our existing art gallery and libraries thank you.

## 1.11 Potential disposal of surplus Council-owned properties

In general I think selling the silver to pay the expenses is not a great idea, but you don't list the properties so I have no opinion.

## 1.12 Any other comments:

A city is more than roads. Also people will never be happy with roads however much you reduce our librarians hours.

### Feedback

#### 1.2 Rates

i understand the need for rates, and we are all recipients of the things the rates fund. I do urge the council to take into account people on fixed incomes, like me, who is on superannuation. Even though S.A. does rise each year, it is not anywhere near the rates rises. Each year, money for the rates becomes more and more difficult to find.

#### 1.3 Proposed changes to existing rates, and new targeted rates

i am in agreement with targeted rates, especially if the money is to go to help The Arts Centre operate. I know they are in a dire position at the moment. We have already had a targeted rate for the Christchurch Cathedral, and it is thrilling to see the work on it, and, as I am a heritage supporter, i am delighted the council have seen the need for this.

Anyone who is using in excess of 700 litres a day, must pay for it.

#### 1.4 Investing in upgrading and protecting our city's water networks

All I am interested in, is WHEN IS THE CHLORINE BEING REMOVED FROM MY WATER??? I cannot tell you how annoyed I am that that vile tasting stuff is still in my water.

The mayor made a promise that it would be gone by May last year and guess what! It is still there.

i cannot use the water for drinking, or for tea, as the taste is so tainted. I go every week and fill 6 large bottles with artesian water which is clean and tasteless, the way our beautiful water used to be. PLEASE give us a date for our water to return to normal, and stick to it!

#### 1.5 Investing in our transport infrastructure

i afraid you have got it very wrong. The changes in St Albans, as an example, are horrendous. I have lived in the same position in St Albans for 35 years, and so I am in a good position to have an opinion. The blocked off streets (cannot turn left off Colombo Street any more) is just one of many infuriating changes, and the silly

different speeds (30, 40, 50 kms per hour) are just confusing and not needed. Why on earth has Westminster Street got a 40 km limit? Why is Forfar Street blocked off at Warrington Street? It just means the traffic now goes down Francis Ave or Flockton Street - so what is the difference? What has been gained by doing this. Nothing.

i am totally fed up with my suburb now. It was easy to get about in the past, and now it isn't.

#### 1.6 Rubbish, recycling and organics

our rubbish, recycling and green bins are wonderful. Full praise for that fantastic service.

#### 1.7 Our facilities

i am a little annoyed about the closing of the Riccarton Road Bus Lounge as it was opened with much fanfare not that long ago. How much money was spent and will be lost due to the closure?

i do not use it, but I do not like to see money wasted by the council.

#### 1.8 Our heritage, foreshore and parks

I am a gardener - have been for many years. It breaks my heart to see trees and shrubs planted and not watered. I could send you a list of dozens of areas which have had plants put in, and then left to their own devices. Who is in charge of looking after our gardens? Because they are doing a very poor job of it. If the council does not fund a water truck to water our public gardens, why bother planting anything.

Another outrage is the state of the huge (expensive!!) planters installed in Victoria Street, planted with very straggly red maples, which, ever since they were planted, have lost their leaves and now look very sick. At this time of the year, they should still be in full leaf, but they are not. If they die, it will be another example of a huge waste of ratepayers money. I will watch them closely.

just a note: we are supposed to be the Garden City. Please, we need to live up to that name. No more grasses

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

##### Comments

i have already said above that I totally support the granting of the money to the Arts Centre. I love the Arts Centre, and it has been disturbing to see it in financial trouble. We must cherish our remaining heritage buildings. There's not that many left.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

##### Comments

it is an utter disgrace that the beautiful Robert MacDougall Art Gallery, which is a perfect building for displaying our historic art collection is shut. I want it repaired and reopened as Mr MacDougall envisaged. He left that lovely classical building to the people of Christchurch, and its so wrong that it has been closed for so long.

i am also completely against the Museum helping themselves to that building in their proposed redevelopment. NO WAY can they be allowed to do that.

#### 1.11 Potential disposal of surplus Council-owned properties

What heritage buildings are they?? I am not going to agree to these sales, unless I know what buildings the council are talking about. If they are going to be demolished by a new owner, then I totally disagree.

Yes

**Comments**  
This heritage centre is unique in New Zealand. The long term sustainability is essential in the heritage plan for Christchurch and indeed New Zealand

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes

**Comments**  
This facility has been mothballed for too long. I feel strongly that it should be returned to the Art Gallery to be used to display art as it was originally donated for this purpose. I am a Life member of the Friends of the Christchurch Art Gallery, a major donor to the Bull and my late husband Ian Cocks and I were donors to the rebuild of the present Gallery.

Yes

Comments

I volunteer at the Arts Centre as a visitor ambassador and I see first hand how important a treasure the centre is to the people of Canterbury and to the many many visitors from NZ and the few overseas visitors who just love the place.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

Yes this beautiful building MUST be restored but

not for the Museum to just absorb, occupy and inhabit.

It was never anything to do with the museum, but it should be again a lovely space to exhibit the wonderful collection of art that lies forgotten and unseen in storage because the new gallery is not big enough. We need the McDougall to be the place where all our historic art collection is displayed again.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.1 Have we got the game plan right?

Yes, particularly the Arts Centre's development because the arts and creative opportunities have become more and more important in our daily lives due to the current climate of the times because of past earthquake stress, Covid lockdowns etc and to improve each person's mental health by seeing the beautiful buildings re-established to present gorgeous, creative things. When we lived and worked in Christchurch (pre-earthquake) own business many years ago was founded on giving artisans an outlet for their creations and much of my research took place at the arts centre because of its diverse and beautiful artworks. They helped me and I helped them with furthering knowledge of artisans names, sales and creative endeavours.

The Arts Centre buildings themselves bring an air of "the old" to the newly developed city centre post-earthquake and when the world settles down post-pandemic and visitors return in great numbers to the city centre, then it will be ready, after re-development necessary for this funding, to again become one of the city's most important visitor and NZ attractions.

I believe locals and NZers in general will be relieved to know the Arts Centre can again become a lovely, welcoming, creative space to visit where new ideas can be regenerated and a sense of spirited health as well as necessary wealth return to the Christchurch city.

#### 1.2 Rates

Initially, I think it seems a bit steep an increase in rates when you see 5 or 4% but when the amount is broken down to a weekly figure as itemised above, it does seem realistic and possible and should be promoted the latter way!

#### 1.3 Proposed changes to existing rates, and new targeted rates

Anything to do with ridding water retention or improving drainage is vitally important for Christchurch BUT please don't go selling our precious water to overseas companies for a pittance!

The proposed targeted rate increases are good because they spell out to the public exactly how rate monies will be spent.

## 1.4 Investing in upgrading and protecting our city's water networks

Good

## 1.5 Investing in our transport infrastructure

Great ideas - especially use of electric vehicles - but how much will the infrastructure for this cost? The charging stations etc.

## 1.6 Rubbish, recycling and organics

Nationally, we've all been wanting, in particular, an improved organics scheme and recycling as long as it was dependent upon recycling within NZ - not just shipped out of the country to other poorer nations. I believe north Christchurch needs a proper goods recycling depot for residents to peruse and shop at as well as deposit their unwanted goods.

## 1.7 Our facilities

It may be a bit early to know what level of service will be required into the future which is largely unknown at present - a certain amount must be pure speculation! But younger people are already looking to Christchurch and Canterbury where it is still possible for them to get a foot in the door of home ownership and this can only reflect on population increases into the future.

## 1.8 Our heritage, foreshore and parks

All good!

## 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

### Feedback

1.1 Have we got the game plan right?

As a retired teacher and having interest in the young people in our country the invaluable area of the arts in education entailing visits to the local art gallery and all it has to offer for the growing mind and understanding of not only our history but also our future. An appreciation, understanding, and the opportunity of producing art at a gallery is fundamental to the growth of the whole person. I would say that rather than cutting back the hours in which children may visit during school hours that the hours need to actually be extended.

### Feedback

1.7 Our facilities

Hello

Please keep some libraries open until 8pm (as currently the case with Fendalton). With full time working, and having three children who lead busy lifestyles, I find it nigh impossible to get to the library before 6pm. It is also sometimes nice to put the chn to bed at home with my husband and have an hour to myself in the library.

Please also don't reduce the range of services provided by the library - eg reduce funding for books, having books accessible for children, reducing educator hours or librarian ratios. Since the restructuring of the National Library, a hugely valuable resource shift has happened for teachers. Where previously I heavily used the National Library resource as a teacher, this is no longer a viable or even useful option. Instead I find the Christchurch Public libraries is my main source of inspiration and literature for engaging children in learning. In other words, which it may not have been the main aim of the CCC, the libraries have become an integral support to education services. The librarian educators provide a fantastic service and support to help this happen, and for books to be accessible for any child.

Thanks for everything you do.

### Feedback

1.11 Potential disposal of surplus Council-owned properties

RE PROPOSAL FOR WATER CHARGES FOR HOUSEHOLDS: Our reputation as the garden city will be no longer, if you bring in water charges for households. Many areas of East side Christchurch have a high sand base, so more frequent watering of gardens is required, therefore higher water consumption. How is it fair that a home with one resident is allocated the same amount of water as a home with 6 residents? Im sure that water allowances will be decreased over time and more households will pay, not just 'high users.' Money maker disguised as water conservation. Maybe the golf courses could stop wasting water or the council parks could turn off their irrigation and that would save the water demand you want to save, instead if charging households.

From: Michelle Simbulan  
Sent: Wednesday, 17 March 2021 7:52 pm  
To: CCC Plan  
Subject: closing time of Library

Kia ora,

Before anything else, I would like to thank you for providing facilities and an avenue for learning. I appreciate the library especially the Turanga, that is not only aesthetically pleasing to the eyes, but also offers a wide range of resource materials for learning and studying.

In this connection, I would prefer the library to close later as what is proposed. since I have work up to 5:30PM, I would like to spend more time in the library after work. The 8PM or if it is possible later would be ideal to me as closing time. As I am a teacher and a researcher as well, the library is really a useful source of information. This will also be helpful to my students as well.

I hope you will consider my comment in finalising the proposal for reduced library hours. Thank you.

Kind regards,

Michelle

Your role in the organisation

Do you wish to present your submission at a hearing? ☒ No ☐ Yes (if yes, you must provide contact details below)

Daytime phone number

## Questions to think about when making your submission

### Have we got the game plan right?

Our overarching proposal is to focus on a deliverable capital programme that helps drive our city forward, with particular investment in roads and transport infrastructure and in protecting and upgrading our water networks. We're borrowing for new projects that have long-term value, and ensuring that the debt repayments are spread fairly across the generations of ratepayers who will benefit from them. We're maintaining enough financial flexibility to be able to handle unplanned events, and we're finding permanent efficiencies in our day-to-day spending. We've managed to do all of this while keeping rates increases as affordable as possible.

**Have we got the balance right? Have we prioritised the right things? If not, what changes would you like to see?**

Too much money has been spent on cycleways for the minority that use them to commute! Most use has been on leisure cyclists who don't reduce the transport problem.

More should be spent establishing light rail for now and the future.

### Rates

We've considered a range of options for how best to achieve what we need to achieve while also keeping the average rates increase as affordable as possible.

**What do you think of this plan for an average residential rates increase of 5 per cent for 2021/22 and an overall rates increase of 4 per cent over the next 10 years?**

If I could see bold progress I would support it. More of the same, then no I don't support any increase in rates at all.

## Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

**What do you think of these changes to existing rates, and new targeted rates?**

**Have we got it right? If not, what changes would you like to see?**

EVERYBODY SHOULD PAY THEIR FAIR SHARE  
LIKE INCOME TAX.

## Investing in upgrading and protecting our city's water networks

We have a responsibility to provide and maintain the wells, pipes, reservoirs, treatment plans and pump stations for drinking water, and manage the collection, treatment and disposal of wastewater and stormwater.

**We are proposing to invest 41 per cent (\$2.329 billion) of our capital spend on water infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

YES I AGREE

## Investing in our transport infrastructure

We've heard from residents that transport is a top priority. It's also the city's biggest contributor to carbon emissions. We want to give people better options for getting around, whether by car, public transport, on foot, on a scooter or on a bike. We also want to ensure our networks are safe.

**We are proposing to invest 25 per cent (\$1.445 billion) of our proposed capital spend on transport infrastructure improvements.**

**Have we got the balance right? If not, what changes would you like to see?**

THE PRIORITY FOR THIS CITY IS PUBLIC TRANSPORT. IT HAS TO BE MODERN PUBLIC TRANSPORT THAT THE PUBLIC IS HAPPY TO USE. BUSES ARE NOT THE ANSWER. LIGHT RAIL FOR A NEW VIBRANT CITY IS ESSENTIAL. THIS WAS INTRODUCED TO CHCH IN THE EARLY 1900S and THE CITY ONLY HAD A FIFTH OF ITS CURRENT POPULATION. TOO MUCH HAS BEEN SPENT ON CYCLEWAYS + BUS LANES UNTIL VERY LITTLE INVOLVEMENT OF DATA/ANALYSIS.

## Rubbish, recycling and organics

In 2020 the Council adopted a new Waste Management and Minimisation Plan that focusses on changing our 'throw-away' culture and reducing the amount of waste we send to landfill. Implementing the actions in that plan are the key drivers of our operational and capital spending.

**We're proposing to spend \$25 million on organics infrastructure (which includes upgrades to the organics processing plant), \$18.5 million on transfer station infrastructure and \$18.4 million on recycling infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

---

---

---

## Our facilities

We're proposing to invest 19 per cent of our capital spend on community facilities. We're also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service?**

**Have we got the balance right? If not, what changes would you like to see?**

---

THE CENTRAL LIBRARY SHOULD BE OPEN LONGER  
CUT DOWN HOURS AT SUBURBAN LOCATIONS

---

## Our heritage, foreshore and parks

Christchurch has a long and proud history of protecting and respecting our heritage. Over the past decade we've carried out a massive programme of repairs and restorations, but we still have some work left to do. In the next 10 years we will continue to restore our own buildings and support private development of heritage buildings. We will also be maintaining and improving our parks and foreshore.

**We're proposing to invest 11 per cent of our capital spend on our heritage, foreshore and parks.**

**Have we got the balance right? If not, what changes would you like to see?**

---

PUT THE MONEY INTO BUILDING A  
MODERN TRANSPORT NETWORK  
THEN PAY ATTENTION TO THIS AREA

---

## Funding for the Arts Centre Te Matatiki Toi Ora

We are proposing to provide the Arts Centre with a capital grant of \$5.5 million. We would do this via a targeted rate that would recover the grant cost over 10 years, and would phase in over two years, so the targeted rate would be smaller in 2021/22 than in subsequent years. We're proposing that every ratepayer will pay this rate and it will be calculated as a number of cents per dollar of capital value.

**Do you support the Council funding \$5.5 million for the Arts Centre?**

**This proposal is currently accounted for in our proposed rates increase. If a decision is made not to proceed, rates would drop by 0.04 per cent.**

☒ Yes ☐ No

Comments: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

## Funding for base isolation of the Robert McDougall Art Gallery

Canterbury Museum considers the base isolation of Robert McDougall Art Gallery to be a key part of the Museum's redevelopment. In July 2019, the Council agreed in principle to support the base isolation of Robert McDougall Art Gallery at a cost of \$11.8 million, subject to public consultation in the Long Term Plan 2021–31.

**Do you support the Council funding base isolation of the Robert McDougall at a cost of \$11.8 million?**

**This proposal is not currently accounted for in our proposed rates increase. If a decision is made to fund base isolation, rates would increase by 0.07 per cent.**

☐ Yes ☒ No

Comments: \_\_\_\_\_

NOT AN URGENT PROJECT

\_\_\_\_\_

\_\_\_\_\_

## Potential disposal of surplus Council-owned properties

We have a small number of properties, including two heritage buildings, that are no longer being used for the purpose they were originally acquired for. These surplus properties make up less than 1 per cent of Council's overall property portfolio.

**Help us decide their future – what do you think of this proposal to dispose of surplus properties?**

YES

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

### Any other comments:

I FEEL THIS CITY HAS NO VISION WHEN  
LOOKING AT OUR TRANSPORT NETWORK  
CHRISTCHURCH ONCE HAD THE BIGGEST ELECTRIC  
TRAMWAY NETWORK IN THE SOUTHERN  
HEMISPHERE.

OUR FOREBEARS HAD VISION AND GOT THE  
WORK DONE. TODAY'S LEADERS HAVE NO  
VISION AT ALL IN MY OPINION.

PUBLIC TRANSPORT IS ONLY BASED AROUND BUSES. THIS  
MODE OF TRANSPORT IS IN THE PAST. MOVE ON!  
BUSES ARE NOT THE CHOICE OF THE PUBLIC  
EVEN IF FREE, I DOUBT MUCH DIFFERENCE  
WILL BE MADE, JUST MORE WASTED MONEY.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

The proposal for water charges over a certain limit per household.

This limit needs to take into consideration the size of the property and what use. For example, a larger block with stock to provide water to or native and growth required for stabilisation should be be a factor for a larger water allowance before any charges set in.

The amount of rates charged should also help indicate this increased allowance.

It is unacceptable to charge for water if animals or efforts to improve environmental conditions are hampered by this. It needs to be a case by case basis if the property is a lifestyle block or over a set size.

This is the charges I would NOT like to see.

1.6 Rubbish, recycling and organics

Lifestyle blocks over a certain size should receive a larger green bin as a matter of courtesy

1.7 Our facilities

I propose that the educator's hours in Te puna wai whetu ,Christchurch City Art Gallery are not cut.

Before the earthquakes there were 2 educators in the Gallery.

In 2018/19 almost **13000** students attended education programmes.

It is important to maintain a world class education programme for our children's future ,creativity and wellbeing.

Covid 19 may have impacted on Art Gallery visitors overall but not on the popularity of the education programme.The children are our tamariki from Otautahi.

The thought of cutting the educator's hours is long term false economy for our children.

I suggest that people who want to cut this service to go along to a session and see the awe and wonder of the students working in the taonga of our Art Gallery.

Our forebears strove to make Christchurch a city of culture. Please do not let us be the one's to cut this asset.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

I think that it would be false economy to allocate funds to an old brick building.

Definitely Demolish and Re-build

### Feedback

#### 1.7 Our facilities

Proposal to downscale education services at the Christchurch Art Gallery is a bad move. The children in this city need access to as many educational experiences as they can be given. Many children will only get to experience art if their schools take them. Children are open and receptive to art if they get the opportunity to see it - but this is not easy for many families. If the service is downscaled it will lose prestige and staffing and will be very difficult to reinvigorate. The guiding services for adults are important to make art accessible to all - visitor services are significant in galleries throughout the world. Covid restrictions should ease over the next year or two - scaled back are near impossible to reinstate.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

##### Comments

This is the most significant collection of heritage buildings to survive the earthquake. C19th Gothic Revival was a dominant feature of the cityscape. The collection of buildings including the Art Centre, The Museum and Christ's College is of great architectural significance and all effort should be made to complete the earthquake damage and allow the whole complex to work properly.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

##### Comments

This building needs to be in use. It has a fantastic interior and needs to be repurposed. This can't be done without the base isolation. 10 years of earthquake closure plus the years it was unused because of the building of the CAG is way too long. It was a significant gift to the city and should be in use again. Becoming part of the museum makes perfect sense.

#### 1.11 Potential disposal of surplus Council-owned properties

There needs to be significant consultation with the relevant Heritage Bodies before decisions can be made about these buildings. Should not be decided by a overarching public consultation but rather by specialists in this area.

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Overall, I believe the game plan is a very good one, with one exception.

**I do not believe my/our rates should contribute to a targeted rate to help the restoration of the Arts Centre.**

**- Yes, with one exception concerning the Arts Centre.**

I oppose the planned targeted rate to complete the Arts Centre.

**This restoration project is essentially the result of our major earthquake in 2011, which should have resulted in a satisfactory negotiation with both EQC and the Council insurers, like everyone else, to fund the full replacement costs less any "betterment" required.**

**Failing to achieve a satisfactory negotiation should not fall back on rate payers who have spent 10 years fighting their own individual EQC and Insurance battles.**

If the costs of "betterment" needed to be funded, then these items should have been considered as to how you were going to meet this additional cost, or reduce the amount of the "betterment" required. Perhaps individual benefactors or charitable trusts could have contributed to this additional cost.

1.2 Rates

-See Above-

1.3 Proposed changes to existing rates, and new targeted rates

**As in 1 above, we ratepayers should not have to fund the extra funding costs required for the Arts**

Centre project, as this is a result of an unsatisfactory negotiation with both EQC and Insurers to achieve the amount of funds required to restore the premises.

If "betterment" was determined to be necessary, then council should have approached Benefactors and Charitable Trusts for this additional costs before the overall project was proceeded with. If this did not eventuate then the project extras should have been deleted from the project.

1.4 Investing in upgrading and protecting our city's water networks

- Yes-

1.5 Investing in our transport infrastructure

-Yes-

1.6 Rubbish, recycling and organics

-Yes-

1.7 Our facilities

**As a resident of the Redcliffs/Sumner area, I deeply appose the proposal to reduce the hours of the new Sumner Library facilities, by closing the facility on a Sunday.**

I am a recently retired person who enjoys the opportunity to visit the library over a 7 day week. After my daily walk on the half finished Coastal Pathway, the library visits are the highlight of my week.

The staff are lovely and attend to your individual library needs. Both young and old enjoy the benefits this library has to offer.

**PLEASE KEEP THE OPEN HOURS AS THEY ARE NOW !!**

1.8 Our heritage, foreshore and parks

- I agree that council owned premises need to be restored by council from time to time - assuming these are not earthquake related.

- Private development of heritage buildings should not be at a cost to the council, other than time by your

heritage staff and resource consent consultations, and time to give developers the opportunity to discuss each project with you, prior to going ahead.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
No  
Comments

**As per my comments above, this project cost is the failure of Council to negotiate the FULL sum required from EQC and Insurers to fund the full replacement cost, following the 2011 earthquake.**

**Any additional sum required for any "betterment" items must be funded by either Charitable Trusts or Private Benefactors. In no way should this cost be a charge to us rate payers.**

1.10 Funding for base isolation of the Robert McDougall Art Gallery

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Extract from from P2 of your "The next 10 years" hardcopy mailout : "we're also spending \$5.6 billion on day-to-day services the Council provides over the next 10 years."

Q1 : Is the extra 5.6b the sum total of "Other main proposals" (P3) ?

Q2 : If so, and noting that your "other" includes water, roads, construction of facilities, what will the remaining \$7.5b (ie \$13.1b- \$5.6b) be spent on ?

Extract from P2 : "We've identified savings of \$52 million to these operational costs – \$18 million in this financial year alone, and additional savings of \$34 million in 2021/22. Over the whole period of the Long Term Plan, we're proposing to save \$329 million of operating costs.

Q3 : What does Council mean by "'savings'" ? If "savings" are merely projects Council has decided to drop from its budget, these can hardly qualify as "savings". If Council "saves" expenditure but at the expense of some worthwhile venture, where's the benefit ? If the venture was not considered worthwhile and has now been dropped, then why did it ever get included into projected expenditure ?

### Feedback

1.1 Have we got the game plan right?

Prioritise the grant to the arts centre.

1.2 Rates  
neccessary

1.3 Proposed changes to existing rates, and new targeted rates  
yes these changes are right

1.4 Investing in upgrading and protecting our city's water networks  
neccessary

1.5 Investing in our transport infrastructure  
essential

1.6 Rubbish, recycling and organics  
Unsure

1.7 Our facilities  
free and accessible access to libraries is paramount

1.8 Our heritage, foreshore and parks  
focus on arts centre and new Brighton

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

this is vital. The arts centre is a remmenant of the architectural heritage of the city. It promotes sustainability living and

heritage crafts in its courses.

It houses great cafes and shops and is breathtakingly beautiful, uplifting many residents through Christchurchs many struggles.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

this should remain as an art Gallery for stored works of the art Gallery not museum art. This us the legacy as directed by the doner robert mcdougall.

1.11 Potential disposal of surplus Council-owned properties

More information on which buildings these are required before comment

### Feedback

1.7 Our facilities

I'd like to see the educational activities and services for schools provided by the Art Gallery to remain. As well as their Wednesday night talks continue weekly. Immersing our tamariki in culture and providing these rich opportunities is very important.

I also think Tūranga provides a safe place for many people and would like to see it stay open until 8pm. I'm sure the reduction in hours is also affecting people's pay - so have they said they are happy to lose 7 hours of pay a week?

### Feedback

#### 1.1 Have we got the game plan right?

- We should start doing what Selwyn Council do and start charging for water  
We should look at the tendering process as there are a lot of flaws and money wasted as the team don't understand what they are tendering
- We need to ensure the contractors completing the work and not charge the council for variances as the CCC project team didnt fully understand the scope of work
- Stop putting up wages in the CCC office
- Complete road and 3 water projects

#### 1.2 Rates

Rates dont need to rise if CCC stop hiring incompetent consultants to do the work as they are the ones that spend alot of our money

We a landlord the rates increase will mean the rent will go up and it will soon be unafforable as we see now

#### 1.3 Proposed changes to existing rates, and new targeted rates

How are you going to charge this and it is not a well set out project, there are places where multiple houses are on one meter

#### 1.4 Investing in upgrading and protecting our city's water networks

This needs to be done but using decent contactors not a sub of a sub of a sub where they dont even understand basic H&S

#### 1.5 Investing in our transport infrastructure

We do not need more bike lanes they are useless

#### 1.6 Rubbish, recycling and organics

We can't even recycle properly now so why spend money in an area that isn't going to be affective unless people change how they do things

### Feedback

1.1 Have we got the game plan right?

I'm gutted to hear that you might be stopping the education classes in the Art Gallery. Our students love these trips and get so much value from their time at the Art Gallery and in the city centre.

1.7 Our facilities

Please keep the Art Gallery classes. It is so well run by the staff there, especially Bianca, she is a true asset! The students of St Martins School go every 1-2 years to the Gallery and have such valuable experiences. It would be such a shame to see this opportunity lost for these children.

Additional requirements for hearing:

### Feedback

1.1 Have we got the game plan right?

Public transport should be the top priority. The bus system has been mismanaged for years. People don't use it because bus routes have been repeatedly cut back to them extent that most people can't get to work or leisure by bus. Bus routes and frequency need to be increased to the extent that buses are actually useful.

Long term, light or heavy rail needs to be implemented. The initial outlay is high, but long term there are huge advantages. A well planned, reasonably priced rail system will be much more popular with commuters and holidaymakers than busses. The increase in wellbeing and vibrancy, and the decrease in road wear and environmental costs will make the initial outlay worthwhile.

I also believe that cycleways should be prioritised in spending. While the existing cycleways are helping a little bit, the full benefit of cycleways will not be seen until there is a bigger, interconnected network of cycleways so people can get where they need to go

1.2 Rates

I'm fine with it.

1.3 Proposed changes to existing rates, and new targeted rates

Excess water charge sounds really good.

1.4 Investing in upgrading and protecting our city's water networks

Seems fine.

1.5 Investing in our transport infrastructure  
public transport, cycling, and walking (or wheelchair) paths should be the top priority. This will decrease the need for road maintenance and have long term benefits for the city.

1.6 Rubbish, recycling and organics  
that seems sensible because of the odour problems with the current organics processing

1.7 Our facilities  
I would be careful of lowering service levels at libraries as they provide important community services

1.8 Our heritage, foreshore and parks  
seems fine

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
No  
Comments  
Not sure of the purpose of the arts centre

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes  
Comments  
the mcdougall needs to be protected

1.11 Potential disposal of surplus Council-owned properties  
If there is no use for them then it makes sense to sell.

1.12 Any other comments:  
I would like to see boldness from the council in budgeting for public transport. The benefits are well known, they just need to be acted on.

### Feedback

1.1 Have we got the game plan right?

no the priorities are not right. \$260mil on cycleways is not a good investment - this money should be put into fixing the broken roads and getting the basics right. Also reducing borrowing to keep rates neutral with no increases - learn to budget within your means.

1.2 Rates

I am completely AGAINST any rates increases. The council must learn to budget and spend within their means and stop squeezing residents for more money.

1.4 Investing in upgrading and protecting our city's water networks

I am AGAINST charging residents for excess water. We are already billed for water in our rates. The council advised water limits are not the issue, but the water infrastructure - the water infrastructure must be fixed. This should be a priority over cycleways!

From: Lara Flavell <  
Sent: Sunday, 11 April 2021 5:38 pm  
To: CCC Plan  
Subject: Feedback to Christchurch City Council Long Term Plan

Long Term Plan 2021–31

<https://ccc.govt.nz/the-council/plans-strategies-policies-and-bylaws/plans/long-term-plan-and-annual-plans/long/>

To whom it may concern

It is disappointing to read that the CCC are still looking at implementing a water tax, especially at such a low threshold of 700 litres per household. I am 100% **against** any additional water charges. Everyone should have the freedom to use water as they require it, without having to worry about cutting down showers or washing or dishes etc to avoid unbudgeted surprise water bills.

Also unhappy to read that rates are still on the rise. Makes it more unaffordable for single incomes to own a home. Almost 50% increase over 10 years is shocking! Households have to budget their money based on their income, why cant the CCC do the same and stop putting a financial squeeze on households for more!?

I would like the CCC to start looking after the Christchurch ratepayers and find ways to cut costs and keep rates at the same level with zero increases. We are treated like ATM machines. One suggestion is to eliminate the cycleways spending as \$260 million is outrageous for very little benefit.

Regards  
Lara Flavell

### Feedback

1.1 Have we got the game plan right?

Would like to see more action on climate change, less of a focus on business as usual.

1.2 Rates

Seems pretty low to me. I'd happily pay more if it was used for action on climate change.

1.3 Proposed changes to existing rates, and new targeted rates

Seems OK. Charging for excessive water use is fair (to me it seems strange that we don't already do this).

1.4 Investing in upgrading and protecting our city's water networks

No opinion.

1.5 Investing in our transport infrastructure

The amount seems OK but I disagree with spending the bulk of it on roads and car parking. We should be trying to give people better options for getting around by public transport, foot and bike - not subsidising people to drive. Smoother roads should not be our priority in a climate emergency - cycleways, walkable neighbourhoods, and bus lanes should be.

This philosophy seems to be reflected in the text, but not in the numbers in the budget in which significant proportions of spending are allocated to road reseals and renewals, and also significant sums allocated to car parking.

1.6 Rubbish, recycling and organics

No opinion.

1.7 Our facilities

No opinion.

1.8 Our heritage, foreshore and parks

No opinion.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.7 Our facilities

I'm not happy about the proposed reduction in the amount to be spent on the Christchurch Art gallery public programme, in particular the schools programme. The programme is over-booked so it seems nonsensical to reduce the offering. Offering children the chance to learn about Christchurch's Art collection in a class setting should be a fundamental policy. Children cannot speak for themselves on this issue so the Council needs to carefully think about what they are taking away from a group that do not have a voice.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

Ch.Ch. cannot afford to lose any more heritage buildings. We have had too many losses and every single one affects the people who love these places and hold them dear as the essence of this city. The Arts Centre is irreplaceable and there is no modern building anywhere near its magnificence. As a University site, it is still in the memory of the formative years of many, many citizens. We CANNOT leave it to rot. Just imagine how disgraceful such neglect would be regarded in Europe!

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Arts Centre is a Ch.Ch. jewel. We have lost so much of our heritage since the quakes and preservation of this magnificent complex should be a priority. It is not merely a market site or a tourist attraction which adds to the colour of the city. It is a hub of activity. My choir rehearses there every week and we also perform there. We first began there 40 years ago and we are overjoyed to be back. It is my first stop when taking visitors into Ch.Ch. They are always impressed by its beauty and the tremendous range of activities it houses. With its grand and peaceful buildings and intimate open spaces, it is the perfect place for festivals and music and all of the arts which enrich our city and the lives of our citizens. I can't wait to see it completed and fully operating.

## Feedback

1.1 Have we got the game plan right?

Do not close the riccarton bus lounges! Riccarton Road is busy enough already and due to the wonderful bus lanes is a great through fare for all public catching buses. By taking away the bus lounges all those people... School students, elderly, staff for the mall will be on the street causing dangerous situations with vehicles. The bus lounges allow for a place to sit and keep congestion down.

1.2 Rates

I have not seen any reason for the rates to increase. We still have chlorine in our water, the roads are still the same condition. Christchurch is not yet a city which can support its self in regards to night life or attracting tourists. Do not alienate the people who live here as well

1.3 Proposed changes to existing rates, and new targeted rates

Christchurch does not charge for water and should not charge for water especially if it is not the fresh spring water. We still have chlorine. Maybe use some of the money we get from selling our water to overseas investors

1.4 Investing in upgrading and protecting our city's water networks

Lets get the chlorine out first before worrying about everything else

1.5 Investing in our transport infrastructure

Stop with the bike lanes they are not used that often

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

The arts centre is a brand new building there are other needs that are far greater

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

We need a big focus on sustainability and climate change adaptation... this is always significantly cheaper than the retroactive costs!

1.3 Proposed changes to existing rates, and new targeted rates

Love the idea! There seems to be a loud minority in Christchurch of people that have no care for our cities culture or heritage... the more of our old buildings we can save, the better!

1.4 Investing in upgrading and protecting our city's water networks

Making sure we have reliable, safe drinking water supply is very important. I'd like to see more sustainable water use throughout the city... a water tax for high users would be a good start.

1.5 Investing in our transport infrastructure

Love the cycle lanes, keep them coming! there's a loud minority who are against them, but they just need to hop on a bike themselves! a more cycle/walking friendly city, especially central city is great.

I think a commuter rail system connecting Christchurch to the satellite towns of North Canterbury would also help reduce emissions, congestion and improve well being. The motorway at the moment is great, but we cannot just keep adding lanes

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

1.11 Potential disposal of surplus Council-owned properties  
I think it's important to keep Christchurch's heritage. Restore them, or sell them but ensure they can't be bowled for development.

1.12 Any other comments:  
  
I can't overstate the importance of climate change adaption, sustainability and resilience. keep up the cycle lanes, get rail in to the northern corridor. Bring some vibrancy back into the city - don't choke the night life by imposing strict bans on liquor/times/noise...

Comments

I was a student at the town site of Canterbury College/the University of Canterbury through 1955-9, and have many fond memories of my time there. I returned to Christchurch as a lecturer at the University in 1969, and continued there until 1990. I lived in Christchurch until 2015, and have made donations to the Arts Center in recent years.

The Arts Center is one of the best heritage sites in Christchurch, and certainly much the largest. World experts in old stonework have been brought in from Britain, and done a magnificent job of restoring most of the site to at least the original standard. It would be a great shame to miss this opportunity of completing the good work - at bargain rates compared with, say, the Anglican Cathedral. A completed Arts Center would be a treasure for the citizens of Christchurch and Canterbury, and a valuable attraction for tourists from overseas - as was clear from the pre-Covid crowds that could always be seen there.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I support the proposed extra cycleways and spending the money to make this happen. But please make them as smooth as possible, i.e. don't use cobbles. Thanks!

1.3 Proposed changes to existing rates, and new targeted rates

Put the rates up. Definitely charge for households using excess water, and make the charge fairly high.

1.5 Investing in our transport infrastructure

I think bus frequencies should be increased. And more money should be budgeted for cycleways (more than is proposed).

1.6 Rubbish, recycling and organics

Fine to spend the \$ on organics and recycling. I would like to see the introduction of more spot checks on recycling bins, and then either the removal of bins for egregious offenders or perhaps fines.

### Feedback

#### 1.1 Have we got the game plan right?

The general framing of the document is fine and the document indicates a progressive direction for Council. However, the actual effectiveness of the LTP will be largely dependent on the culture of the organisation. In the area of ecological restoration Council needs to be a much more outward looking and have much more constructive engagement with groups involved. I have observed some Council staff in roles that intersect with community restoration activities being awfully slow, vague and even obstructionist in engagement. Engagement that does occur is often paternalistic. Some staff have clearly withdrawn from engagement as they fare the process could lead to them losing power and influence to perceived outsiders. For successful implementation this ambitious LTP program there will need to be changes to CCC staff culture.

#### 1.2 Rates

A rates rise is not going to substantially change the lives of those on reasonable incomes. The real issue is what do residents get for what they pay. The LTP indicates Council is stepping up its climate change action which is great. If people see this results in more meaningful outcomes around these challenges, the rate rise will not be an issue longer term. Likewise, if communities see the Red Zone being ecologically restored as proposed in the Regenerate Christchurch Plan they will be satisfied with what they pay. Of course, there will be those with low incomes where a 4%-5% rate rise will be difficult, and these people will need support options.

#### 1.8 Our heritage, foreshore and parks

Biodiversity needs to be made a specific addition to this category heading and added as a capital budget category. A Biodiversity category highlighting spending on Biodiversity would be consistent with Council declaring a climate and ecological emergency. While a focus on climate change is important, a lot of Council's meaningful actions to mitigate and adapt to climate change will be related to biodiversity management.

**Page 39-42: Levels of Service Performance Measures.** These currently do not include good measures for increasing biodiversity in parks. I recommend that suitable measures are established that relate to the increase in indigenous biodiversity in parks. The measures around tree canopy cover (page 39) and coastal vegetation (page 43) are not specific enough and do not reflect Christchurch's strength in wetland biodiversity, which already includes many threatened or nationally declining native species. I recommend ambitious yet achievable Levels of Service that relate to the reintroduction of specific wetland birds such as Brown teal or Fernbird by 2030 for example.

**Page 136:** SW Waikākāriki - Horseshoe Lake Stormwater Treatment Facility (OARC) (Stage 2) - ID 57718. This is a substantive

budget for stormwater infrastructure at Waikakariki. This work will be beneficial to this area. Currently the volunteer group Avon Otakaro Forest Park operates a monthly ecological restoration programme in the reserve. I recommend that the LTP budget reflects not only stormwater infrastructure development, but parallel ecological infrastructure improvements in Waikakariki. My recommendation is for a separate capital budget designated to improving the ecological infrastructure at Waikakariki Reserve that is implemented at the same time stormwater capital works are. Budget could be drawn from the proposed boardwalk/walkway budget or this stormwater budget.

Page 140: South New Brighton Reserves Development - ID 43671. The allocated budget for South New Brighton Reserve is substantive considering what has been allocated in the previous 5 years. Since 2015 the Avon Heathcote Estuary Trust has been planting native coastal vegetation consistent with the 2014 Management Plan. Since 2015 no capital funding has been allocated to support this work. There are still many areas within the plan that are designated as native vegetation and that remain to be planted. Currently this additional planting is beyond the capacity of the Avon Heathcote Estuary Trust. One of the largest areas is between Jellicoe Street and the South New Brighton Campground, this area is still dominated by wilding pines and other weeds. If capital funding is allocated to plant this area and others nearby it would provide further habitat for the local Kereru population. My recommendation is that a separate capital budget line is created that states "South New Brighton Reserve-planting of coastal forest" and has \$15,000-\$20,000 allocated towards it for the next 2 to 3 years.

### Feedback

1.1 Have we got the game plan right?

- Water proposal

I am concerned about the charges for the water proposal.

It states the charge will be for a household who uses 700l or more a day.

I think it should be measured per person rather than per household as it will significantly affect lower income families who have more people living at home. This will disadvantage them as they will need to pay more for water compare to smaller households. Or they will not use water and go without showers as they wont be able to afford it.

For example if you have large families with 6 or more people they would use significantly more water for everyday needs like showers, drinking water, dishes, washing, etc rather than a retired person, couple or family of 4 people.

I also think its outrageous that Christchurch rate payers with children who struggle to pay the rates each year (and it keeps going up in price!) have to pay for water when water bottling companies such as Chinese-owned company Cloud Ocean Water in Belfast have been allowed to drill down and extract more than 1.5 billion litres of water each year! And what charges are you making them pay..? !

The residents of Christchurch are told to save water in the summer and yet this overseas entity is taking the water and selling it for fairly cheap prices internationally. NZ water needs to be for people living in NZ.

1.2 Rates

- Rates Increases over 10 years=47.8%

Too high!

This is too high a price and the average family or retired person/couple can not afford this.

Cut down the amount you are spending on roads..otherwise you need to start an asphalt company to source product at lower prices and take out the middle man.

More investment is needed in electric public transport options ...buses and light rail.

Thanks.

### 1.3 Proposed changes to existing rates, and new targeted rates

#### • Water proposal

I am concerned about the charges for the water proposal.

It states the charge will be for a household who uses 700l or more a day.

I think it should be measured per person rather than per household as it will significantly affect lower income families who have more people living at home. This will disadvantage them as they will need to pay more for water compare to smaller households. Or they will not use water and go without showers as they wont be able to afford it.

For example if you have large families with 6 or more people they would use significantly more water for everyday needs like showers, drinking water, dishes, washing, etc rather than a retired person, couple or family of 4 people.

I also think its outrageous that Christchurch rate payers with children who struggle to pay the rates each year (and it keeps going up in price!) have to pay for water when water bottling companies such as Chinese-owned company Cloud Ocean Water in Belfast have been allowed to drill down and extract more than 1.5 billion litres of water each year! The residents of Christchurch are told to save water in the summer and yet this overseas entity is taking the water and selling it for fairly cheap prices internationally.NZ water needs to be for people living in NZ.

### 1.4 Investing in upgrading and protecting our city's water networks

No, too much being spent on this.

### 1.5 Investing in our transport infrastructure

put more into electric transport to stop emissions.

Stop Electric scooters...they are too dangerous and are constantly riding on footpaths and are a hazard to pedestrians. Also left all over the place causing hazards.

### 1.6 Rubbish, recycling and organics

you need to get government to stop companies making plastic in every day products that are not recyclable... its everywhere and clogs up the landfill. No one wants it its terrible for the environment.

Then you wont need to collect as much waste but it is good to invest in recycling as much as possible. Being able to recycle more types of plastic would be good...you should not be allowed to make plastics that are not

able to be recycled.

1.7 Our facilities  
Ok. U need a sheltered alternative to the bus routes if you get rid of a lounge.

1.8 Our heritage, foreshore and parks  
No support of private heritage.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

The proposed Heritage ( Arts Centre ) Special rate is strongly supported.

The Arts Centre is a unique New Zealand ( and Christchurch) facility that must be protected and enhanced. Without the proposed special rate there are real risks to the further redevelopment of the Arts Centre and to its vibrant operation.

i know from personal experience that the Arts Centre is a significant attraction to visitors who are impressed with the concept, its operation and with its redevelopment. Together with the nearby Botanic Gardens , the Canterbury Museum and Christs College there is a strong story to tell about the development of Christchurch in the second half of the 19th century.

The proposed rate will be a significant investment in strengthening the "heart of the city".

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Dear Cchristchurch City Council

I appreciate your time and effort you put in those plans but unfortunately i think you dont get it quite right.

1. Cycle ways and public transport

Those cycle ways are an absolut nightmare for motorists and elderly people how mans stop and starts of kerbs do you want to create. Overseas examples show a much better approach if you just would consider this. Do you expect many people using them ? I certainly do not want to bike 15km return in harness helmet and rain coat every day to work.

2. Public transport

Recently all bus lines have changed and some of the Christchurch areas are not serviced properly anymore. Then they decided to paint them all again but Canterburys colours are RED it does not represent our city very well and not to forget the cost....The buses are half empty all the time why do you not use smaller ones. There should be only 1 bus company in Christchurch which provides adequate service to all areas. If people have to walk first 20 min to get to a stop without shelter the get left behind and have a journey of 3 hours to get where they need to go then nobody will use the buses i speak from experience. Also bus drivers need to be tidier and speak english.

3. Sport facilities

I was really happy when i heard about the new building of Metro sport complex but i must say i am dissapointed because i think more sports could have been incorporated there.

Why could not the Ice rink go there as well. We have to put up every day with an old grotty facility that condensates on the roof and creates an uneven surface for skating having an 25 year old machine for ice cleaning. Its an absolute disgrace that some lobbiiist up in the Council could prevent this move to a newer facility which would be more clima efficient and would produce more sport achievment.

## 1.2 Rates

Because of Covid 19 a lot of people lost their job or had their hours cut. They cant even afford to pay the rates how they are now. They already struggle to put food on the table not to forget the school uniforms camps etc. If it is considered by WINZ that working 24 hours a week is a full time job i would like to know how they would sustain a family.

The Council should consider to resolve that matter first before burden people more and more.

## 1.3 Proposed changes to existing rates, and new targeted rates

Please see above.

## 1.4 Investing in upgrading and protecting our city's water networks

This should be priority nobody likes drinking and using the chlorinated water. It creates more health risks and the cases of skin problems have risen dramatically....i see it every day.

## 1.5 Investing in our transport infrastructure

Please see above.

## 1.6 Rubbish, recycling and organics

We should be able to cope with our own rubbish and not sending it overseas or to landfill this will only pollute the grounds.

It should be considered to build a rubbish incinerator. With that energy created we could heat and provide electricity to many. They are so advanced nowadays there is no smell. i find it awful that freezing works fertiliser works Tegel factories etc cant control their emission and odours.

### Feedback

1.1 Have we got the game plan right?

We are in the middle of a climate crisis - the CCC has acknowledged this. Let's stop spending billions on roads. We need to get people out of their fossil fuel burning cars and onto public transport. We need better public transport (hopefully trains! but buses will do I suppose) and cycling infrastructure.

I agree with the upgrade of the water network. We should fund this by charging the biggest users of our water.

1.2 Rates

Yeah, sounds good. Just make sure you don't waste people's money on dumb shit. We are in a climate emergency - spend money on fixing it.

1.3 Proposed changes to existing rates, and new targeted rates

Yes, absolutely charge households that use more than 700 litres a day more. Water should be valued, and if people don't pay for it, they don't value it, unfortunately.

1.4 Investing in upgrading and protecting our city's water networks

Yes, this sounds good. We can't live without water.

1.5 Investing in our transport infrastructure

I think this is a good step in the right direction. I would like to see more spent, if anything. We are in a climate emergency. We need to be doing everything we can to get people out of their fossil fuel burning cars, and onto public transport or cycling. We need better public transport. I would love to see some trains.

1.6 Rubbish, recycling and organics

I love this. I would like to see more.

1.7 Our facilities

This is fine.

1.8 Our heritage, foreshore and parks

Parks and foreshore - yes. I don't think we should be spending money on heritage buildings. It's a nice to have, not a must have. The climate emergency is more of an issue.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No
Comments
The Arts are a "nice to have". We are in a climate emergency. This should be our priority. People who care about art and not the future of humanity on planet earth can stump up for an Arts Centre.

### Feedback

1.5 Investing in our transport infrastructure

Dont close the riccarton metro bus lounges please.

1.7 Our facilities

I am absolutely disgusted in the evan and the city council. Because why would you want to potentially close the riccarton metro bus lounges. In the middle of winter and when the elderly and young children sit inside.

So you expect everyone roughly 100-150 people sometimes more to stand out side

In the freezing cold while waiting for their bus.

NOT TO MENTION THAT JUNE IS START OF WINTER

Also think about the well respected security guards and that cafe business owner who will loose their jobs and business.

You should seriously reconsider your choices on closing down this metro lounge if you do however it would be a waste of money again just like how the roads haven't been done properly.

### Feedback

1.1 Have we got the game plan right?

i want to see the nitrate levels in our drinking water drop to a safe level that is not associated with an increased risk of colon cancer

I want to see all our rivers and waterways become swimmable and safe and healthy to swim in again, as well as fish and dive.

I want to see more community gardens or fruit trees or other forms of fresh healthy food for anybody to use but mostly easily accessible for the homeless and less privileged. I think the east side of christchurch really really needs more of this as the need is extremely high and there is plenty of red zoned land that could be used for this

I would also like to see a more obvious partnership between pakeha and maori in Ōtautahi. Christchurch is the only major city in new zealand that has pretty much no maori representation in its design. One or two bits of art in the city center doesnt cut it

1.4 Investing in upgrading and protecting our city's water networks  
yes please protect our waters!

1.5 Investing in our transport infrastructure  
please fix the roads. They are still broken. Japan fixed their whole totalled country in a few months and we havent even fixed all our roads in over a decade

### Feedback

1.1 Have we got the game plan right?

NO. I feel a car park for Christchurch public hospital is long overdue. Stop fobing it off staying it is for DHB OR GOVT to sort out. Take a stand for the health of people of Christchuch and the staff that work so hard for so little. Stop with the bike lanes that no one ever seems to be using. CBD staff live to far out of the city post earthquakes for cycling to be a possible form of transportation. Make public transport free for CDHB workers.

1.2 Rates

if it is required to keep up with inflation then I needs to happen. However don't then go and waste hundreds of millions of dollars on bike lanes that the vast majority DO NOT WANT.

1.4 Investing in upgrading and protecting our city's water networks

increase the tax on the bottling plan to assist with upgrading the Christchurch water network.

### Feedback

1.1 Have we got the game plan right?

Times are tough. If old buildings cant support themselves then let them die. The council would get a lot of capital relief by selling these buildings that require so much maintenance.

If we had an abundance of money, sure, heritage buildings might please a couple of people. We don't, so they should be one of the first things gone.

### Feedback

1.1 Have we got the game plan right?

Christchurch isn't about heritage building. We are already paying very high rate considering the size of city. Time to move on. Built future not live in past. Spend our money to make city attract visitors.

1.2 Rates

Disgusting. If you don't have money, you don't spend. It's that simple. Suppose the city council was a private company, already bankrupt. Reduce expenses.

1.3 Proposed changes to existing rates, and new targeted rates

excess water rate is the only one agreedable. As people live in Christchurch don't care about usage.

I dont agree with restoring the old building just a couple of hundred years old.

1.4 Investing in upgrading and protecting our city's water networks

If hard to tell wether 41% is the right number without looking into details.

1.5 Investing in our transport infrastructure

Mostly agree but not on cycle way since cycling isn't major transport in this city. Number of cyclist is way too small to spend huge money on. There must be a cheaper way to do it. Mayer just wants good look.

1.6 Rubbish, recycling and organics

Better recycling system and plant to do it.

1.7 Our facilities

city libraries have too over staffed. Sometime there are more staff than customers.

Christchurch Art gallery is the one of the most interactive gallery I have ever been. Building looks awesome but that's all. exivisions held there isn't everyone's cup a tea thus attracts very limited numbers of residence.

1.8 Our heritage, foreshore and parks

looking forward to seeing changes in parks. Many Heritage buildings aren't hugely known or been used. I rather see new useful buildings for young generations.

Comments

For many people the successful rebuild progress at the Arts Centre has helped to alleviate the devastating loss of so many heritage buildings in the Christchurch earthquakes. I was amazed to find that it does not currently receive any council or government funding, and consider that funding assistance to preserve and maintain this collection of buildings should be an essential part of the Council's long term planning.

### Feedback

#### 1.2 Rates

I believe in these uncertain times that you should not be putting more of a burden on the rate payers. As you have mentioned in the long term plan the council facilities income has been majorly affected by Covid, the same can be said for most rate payers.

By continually increasing the rates you are impacting the elderly's ability to pay, you will end up by forcing more & more people out of the city.

Is the cost of living increase at 5%? How about people's wages, do you think on average they have / will increase year on year by 4-5%? You have the RV changing every 3 years, which will increase the rates a property pays.

### Feedback

1.5 Investing in our transport infrastructure

Why can't the rail be used for commuters to the city? Granted another rail station in the centre would need to be built but would save a lot of traffic congestion especially in rush hour and I note that more carriages are going to be purchased.

1.7 Our facilities

Please don't close the bus lounges: As our local buses no longer go to the city we have to catch another one in Riccarton Road. It's OK in fine weather but mighty cold otherwise especially for the handicapped or elderly.

Usually I will drive down to Hornby & catch the "yellow" bus but in bad weather I'll take the car to town which is not what the Council want.

Additional requirements for hearing:

### Feedback

Have we got the game plan right?

Our overarching proposal is to focus on a deliverable capital programme that helps drive our city forward, with particular investment in roads and transport infrastructure and in protecting and upgrading our water networks. We're borrowing for new projects that have long-term value, and ensuring that the debt repayments are spread fairly across the generations of ratepayers who will benefit from them. We're maintaining enough financial flexibility to be able to handle unplanned events, and we're finding permanent efficiencies in our day-to-day spending. We've managed to do all of this while keeping rates increases as affordable as possible.

1.1

**Have we got the balance right? Have we prioritised the right things? If not, what changes would you like to see?**

An immediate reduction in rates, get rid of at least 75% of anyone earning more than \$125,000 per year. Wages capped at \$175,000 per year

## Rates

We've considered a range of options for how best to achieve what we need to achieve while also keeping the average rates increase as affordable as possible.

1.2

**What do you think of this plan for an average residential rates increase of 5 per cent for 2021/22 and an overall rates increase of 4 per cent over the next 10 years?**

I was going to write something meaningful and lengthy, however I know know you won't read it. So I'll just say `Qu'ils mangent de la brioche`. I can't really convey to you how much I'm against a rates increase, it is beyond words.

## Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

1.3

**What do you think of these changes to existing rates, and new targeted rates? Have we got it right? If not, what changes would you like to see?**

At Cornell University they have an incredible piece of scientific equipment known as the tunneling electron microscope. Now, this microscope is so powerful that by firing electrons you can actually see images of the atom, the infinitesimally minute building blocks of our universe. If I were using that microscope right now... I still wouldn't be able to locate my interest in a rates increase.

I'm 100% against all of the above.

## Investing in upgrading and protecting our city's water networks

We have a responsibility to provide and maintain the wells, pipes, reservoirs, treatment plans and pump stations for drinking water, and manage the collection, treatment and disposal of wastewater and Stormwater.

1.4

**We are proposing to invest 41 per cent (\$2.329 billion) of our capital spend on water infrastructure. Have we got the balance right? If not, what changes would you like to see?**

Fire some staff to pay for this.

## Investing in our transport infrastructure

We've heard from residents that transport is a top priority. It's also the city's biggest contributor to carbon emissions. We want to give people better options for getting around, whether by car, public transport, on foot, on a scooter or on a bike. We also want to ensure our networks are safe.

1.5

**We are proposing to invest 25 per cent (\$1.445 billion) of our proposed capital spend on transport infrastructure improvements. Have we got the balance right? If not, what changes would you like to see?**

hahaha `improvements` \*gestures towards Tuam St & High Street crossroads. A perfect of example of how not to invest in anything let alone transport, it`s so bad it`s bordering on Eastern European standards of infrastructure investment.

Rubbish, recycling and organics

In 2020 the Council adopted a new Waste Management and Minimisation Plan that focusses on changing our `throwaway` culture and reducing the amount of waste we send to landfill. Implementing the actions in that plan are the key drivers of our operational and capital spending.

1.6

**We`re proposing to spend \$25 million on organics infrastructure (which includes upgrades to the organics processing plant), \$18.5 million on transfer station infrastructure and \$18.4 million on recycling infrastructure. Have we got the balance right? If not, what changes would you like to see?**

You already get my green bin free of charge! Fire some staff to pay for this.

Our facilities

We`re proposing to invest 19 per cent of our capital spend on community facilities. We`re also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

1.7

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service? Have we got the balance right? If not, what changes would you like to see?**

Fire some staff to pay for this.

Our heritage, foreshore and parks

Christchurch has a long and proud history of protecting and respecting our heritage. Over the past decade we`ve carried out a massive programme of repairs and restorations, but we still have some work left to do. In the next 10 years we will continue to restore our own buildings and support private development of heritage buildings. We will also be maintaining and improving our parks and foreshore.

1.8

**We`re proposing to invest 11 per cent of our capital spend on our heritage, foreshore and parks. Have we got the balance right? If not, what changes would you like to see?**

That`s ok, but don`t waste money

Funding for the Arts Centre Te Matatiki Toi Ora

We are proposing to provide the Arts Centre with a capital grant of \$5.5 million. We would do this via a targeted rate that would recover the grant cost over 10 years, and would phase in over two years, so the targeted rate would be smaller in 2021/22 than in subsequent years. We`re proposing that every ratepayer will pay this rate and it will be calculated as a number of cents per dollar of capital value.

1.9

**Do you support the Council funding \$5.5 million for the Arts Centre? This proposal is currently accounted for in our proposed rates increase. If a decision is made not to proceed, rates would drop by 0.04 per cent.**

No

Comments

The only thing I like about the Arts Centre is that it has modern toilets facilities.

Funding for base isolation of the Robert McDougall Art Gallery

Canterbury Museum considers the base isolation of Robert McDougall Art Gallery to be a key part of the Museum's redevelopment. In July 2019, the Council agreed in principle to support the base isolation of Robert McDougall Art Gallery at a cost of \$11.8 million, subject to public consultation in the Long Term Plan 2021–31.

1.10

**Do you support the Council funding base isolation of the Robert McDougall at a cost of \$11.8 million? This proposal is not currently accounted for in our proposed rates increase. If a decision is made to fund base isolation, rates would increase by 0.07 per cent.**

No

Comments

I was going to say demolish it and start again, but you`d probably build yet another glass and concrete monstrosity.

Potential disposal of surplus Council-owned properties

We have a small number of properties, including two heritage buildings, that are no longer being used for the purpose they were originally acquired for. These surplus properties make up less than 1 per cent of Council's overall property portfolio.

**1.11 Help us decide their future – what do you think of this proposal to dispose of surplus properties?**

What are they?

1.12

Any other comments: (Includes comment from the hearings comments section)

Cut the management staff.

**CCC has completely lost touch with the ordinary working people of Christchurch. What will it take for you to get your act together?**

**First name:** Lesley **Last name:** Burkes-Harding

**Your role in the organisation:** Artistic Programme

Director of the Akaroa Community Arts Council

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

i believe this is a good balance.

1.2 Rates

it seems that rate increases are a necessary evil in order to progress. I do worry that older retired people cannot cope with rent increases. That provision needs to be made for them.

1.3 Proposed changes to existing rates, and new targeted rates

seems fair

1.4 Investing in upgrading and protecting our city's water networks

changes need to be made. I live in Akaroa. Our water supply is constantly challenged and very recently cut off because of reservoir contamination. I believe this is being worked on as we speak but is it future proofed and sufficient for a busy tourist town?

1.5 Investing in our transport infrastructure

i dont know :)

1.6 Rubbish, recycling and organics

positive moves forward are excellent.

1.7 Our facilities

My interest and current work is with the Akaroa Community Arts Council and is arts focussed. I have a 35 year professional career in theatre, film and tv production and live in Akaroa.

My comments here are about The Gaiety Hall. I'd love to bring plays and performance to that space. Its somewhat galling to see it empty:( My view is that to use the Gaiety as an actual theatre is well nigh impossible because of the cost structure.

Let me explain the necessary process involved required to produce a theatre show.

- rehearsal space for say 3 months prior - a couple of nights and a sat or sun all day per week.

- props and costume storage

- During the production week - full use from saturday am to late thursday pm to pack in a modest set and install lights plus tech and dress rehearsals in the evenings.

Then say three performances all day fri, sat, sun on a long weekend.

- Then a full cleanup day on the monday

some shows may not require the full week. A show that doesnt require a full rehearsal would only need show night(s) plus a day either end to set up and clear up.

Charging by the hour clearly is never going to work for this kind of community group project. A block price for the period concerned would. It doesnt have to be free - I'd be happy to brainstorm a price with council should they be at all willing to help in this area. Some shows would be ticketed , some would not.

many thanks for the chance to submit.

Yours in collaboration and hope,

Lesley Burkes-Harding

1.8 Our heritage, foreshore and parks  
im not at all sure

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes  
Comments

1.11 Potential disposal of surplus Council-owned properties  
this is hard. The preservation of the buildings is obviously of huge importance. The problem with selling them is being able to maintain a line of integrity with the new owners. In small places such as Akaroa, our heritage buildings are a vital part of vilkage life. Any change of ownership that resulted in changes to the buildings would be devastating.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.2 Rates

I think a rate increase of 5% and 4% longer term is too much.

I expect to see increased efficiency in Council performance to achieve lower rates increases than have been targeted, without having to sacrifice the planned outcomes.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

##### Comments

The Art's Centre is the largest collection of Category I Heritage buildings in Aotearoa New Zealand. It is a major tourist attraction for Christchurch. It needs to be supported on an on-going basis to ensure it is adequately and safely restored and that it is managed efficiently to maximise the contribution it makes to attracting visitors and events.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

##### Comments

The Museum along with the Art's Centre is a major tourist attraction for Christchurch. It needs to be supported so that it can strengthen its contribution to the Christchurch economy. The safe use of the Museum's buildings is crucial to maintaining Christchurch's reputation as a good place to live and a good, safe tourist destination.

#### 1.11 Potential disposal of surplus Council-owned properties

I support the disposal of surplus Christchurch properties

### Feedback

1.1 Have we got the game plan right?

Cycle registration

Having traveled well over a million kilometers as a company representative over the past 60 years throughout the South Island originally from Dunedin and transferred to Christchurch some 30 years ago I have witnessed changes from very low car ownership and relatively safe on the roads to what we have today with almost every household owning some kind of motorised vehicle.

Over hundred years ago places like Christchurch was a mass of cyclist everywhere in a time when it was safe on the roads

but

Times have changed and it is now the age of the motor car which is incredibly driven very fast. Fast cars fast roads. The age of the cyclist maybe for the enthusiast but it also is less safe for the cyclist who does not always stick to the rules of the road.

Some cyclist believe they have the right to ride their bikes at full speed without any thought for stopping in any emergency which in itself is a danger on the road for other road users.

A cyclist is able to report a car truck or other road user by taking the vehicles registration number.

A motorised is unable to report any cyclist riding in a dangerous manor as they are exempt of any such registration.

Cycle ways and lanes the Christchurch City Council have installed at a very high cost have not received any remuneration from the cycling fraternity in any way shape or form.

**So who has paid for this free privilege given so freely.??**

I believe some 100 years ago cyclist had to pay a registration.

Now into the 21st Century cyclists like everyone else should have to pay their way.

Cyclist should have a set of road rules that should be followed.

Cyclist as road users should also be subjected to a road test.

It is my belief that many hundreds of dollars can be saved if cyclist like motorists are paying a registration.

Cyclists registration is well overdue.

We are in the age of the motorised not the cyclist.

Thank you for letting me submit this option.

Geoff Guest.

### Feedback

#### 1.1 Have we got the game plan right?

I would like to know what the plans are for the Heathcote River towpath, between the Lyttelton Tunnel roundabout and the Ferry Road Bridge. It is an area of great historical interest for Canterbury and an important ecological area, yet the whole area has become a slum and a rubbish dumping ground. The demolition company Marbeck has driven away all the native nesting birds, and there is graffiti and barbed wire everywhere. For an ecological area which leads into the estuary, it's pretty poor.

I am also disappointed that submissions for the area after the 2011 Christchurch earthquake have largely been ignored. People asked for more green spaces where the river can be seen from Ferry Road and fewer tilt slab buildings. The growth of light industry along the tunnel road is concerning. Heathcote Valley is one of only a few valleys of natural beauty in Christchurch yet it's being ruined. Again, I'm seeing a disregard for people living in the east of Christchurch.

#### 1.2 Rates

No, I don't think this is fair considering the financial struggle people are already finding with the housing crisis. Older people will also find it difficult. Even as a former librarian, I'm struggling with yet another unnecessary expensive library being built. With my submission above, I'm not seeing a lot for my rates for the area I live in, which was zoned suburban/commercial when I purchased here, then rezone industrial without any consultation whatsoever.

#### 1.3 Proposed changes to existing rates, and new targeted rates

I think it is fair to charge for excess water use.

#### 1.4 Investing in upgrading and protecting our city's water networks

Yes The smell coming from the estuary and waste water plants are still a big problem. So is drinking water.

#### 1.5 Investing in our transport infrastructure

Charge a rate for cars entering the central city. London did and it's worked well.

1.6 Rubbish, recycling and organics  
Yes.

1.7 Our facilities  
Most people pay for services online. There only needs to be very few service desks.

1.8 Our heritage, foreshore and parks  
I would like to see far more heritage protection in the eastern suburbs. The Ferrymead recreational area off Ferrymead Drive has remained unfinished for years. I would like to see the green space by the Ferrymead tram area remain and developed into a park. The hilly knole is lovely and dogs love running around there safe from traffic.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

The WWHT generally supports the allocation of expenditure. However, a greater proportion of funding should go to the ecological restoration of the Otakaro Avon River Corridor, i.e \$30M and to the Strengthening Communities grant fund , i.e. \$9.0 M

1.2 Rates

WWHT support the proposed rate rises

1.3 Proposed changes to existing rates, and new targeted rates

WWHT support the proposed existing and targeted rates.

1.4 Investing in upgrading and protecting our city's water networks

WWHT generally supports the proposed investments in water infrastructure although a higher investment of 43% of capital spend is recommended to catch-up on past underspending.

1.5 Investing in our transport infrastructure

WWHT support the proposed investment in public transport.

1.6 Rubbish, recycling and organics

WWHT support a greater spend on waste treatment and recycling, i.e. an increased \$22 M for recycling infrastructure.

1.7 Our facilities

WWHT support the proposed capital spend on community infrastructure

1.8 Our heritage, foreshore and parks

WWHT supports the proposed investment

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

WWHT supports investment \$5.5M in the Arts Centre

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
No

Comments  
WWHT supports less investment of \$9.0M

1.11 Potential disposal of surplus Council-owned properties  
WWHT support CCC sell-off of useless assets and directing the revenue into regenerating the Red Zone.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.1 Have we got the game plan right?

I'm writing to urge Council to increase the priority ranking on the repair of Summit Road near Mt Pleasant and to reopen the portion underneath the Gondola. This and other condemned properties are a constant, unpleasant reminder of the earthquakes. It's time to repair this infrastructure and get back to life as we enjoyed it previously.

The condemned land along Kinsey Tce on Clifton Hill should be developed as a park if it is permanently red zoned. The views from that street are amazing and if CCC owns it now then it should become an amenity for all the people of Christchurch.

One more thing, I hate the use of loose gravel paving on city streets. It's a safety hazard for bicyclists. I've wiped out numerous times with my bike on the loose gravel immediately after "paving". Long term, it's a rough surface that make for a lot of road noise. I live on a well traveled road in an otherwise quite neighborhood and I really notice the sound of car tires on that rough chip seal pavement disturbing the quiet enjoyment of my property. How much are you saving per kilometer with that pavement selection? I don't think the tradeoff is worth it on a street bordered by housing. The rough streets are also terrible for kids to play on. I notice that Council specifies the nice smooth asphalt in nicer neighborhoods and well traveled streets. What does it take to qualify? It doesn't seem fair to me. Beckenham is a high value neighborhood and when it comes time to repave a street, I expect a high value repair job that lasts a long time.

#### 1.2 Rates

Fine, we are still paying much less in rates than Wellington.

#### 1.3 Proposed changes to existing rates, and new targeted rates

I am opposed to paying extra rates for Heritage buildings. Buildings in a city churn over every 50 years on average. If something is 100 years old it's usually functionally impractical to renovate and has to be really spectacular architecture to justify the expense.

Council is WASTING money on the central cathedral. Not even the Church wants it restored. The Church membership is dying out, no one goes to worship there anymore. Go to ANY Anglican Church on a given

Sunday and count the people. How much are we really going to spend so that our honoured elders get to maintain their sense of architectural continuity? They will be dead in 10 to 20 years and the living will still be paying for it. They won't even go to the restored buildings regularly except for holidays or memorial occasions. Are we doing this for the tourists? Really??? It is a 3rd rate church, sorry, but have you ever traveled?

It's a tragic case of good money chasing after bad, behind a very flawed decision making process. For the money we are spending on that old Arts Centre, we could have made something really spectacular, attractive, and useful for the next 100 years. Instead we have to fit our modern needs into a 19th century building that is realistically UNFIT for the purpose.

Architecture is not meant to last. It's not forever. Unless you build out of solid stone that makes an interesting ruin, it's only meant to last until it's functionally impractical.

1.4 Investing in upgrading and protecting our city's water networks

I take enormous pride and feel enormous benefit to my sense of physical security knowing that we are drinking some of the best and untreated water in the world. Any amount of spend is worthwhile to protect this VITAL ASSET.

CCC needs to apply all necessary pressure to the agricultural sector to clean up their freshwater pollution. I want to be able to swim in any little stream or river without worry of algal or effluent pollution. I want my kids and grand kids to enjoy what the older generation did when they were kids: swimming in an unpolluted river full of fish and eels.

1.5 Investing in our transport infrastructure

Transport is already easy by car. Public transport needs improvement and support. The young generation don't even want to own a car or learn to drive. GOOD ! Support them in that by improving public transport.

On the subject of parking in the CBD I want CCC to put Wilson's carparks out of business by driving down the cost of parking in a structure to the point that Wilson's business model is impractical here in Chch. Parking space is becoming their monopoly and once they own all the space the will abuse that monopoly power to the utmost. I want CCC to keep building parking structures to make it very easy for 50,000 cars to come into town for a game at the new stadium, to see the theater, the movies, the clubs, etc all on one weekend night. \$2 for an evening of parking is fair and attractive and probably profitable. Never, ever sell a carpark structure to Wilson's behind the privatization argument. The quick hit of money to the CCC budget will be paid for on the backs of the people forever. It ultimately drives people away from events in the CBD. Ye

1.6 Rubbish, recycling and organics

Yesss ! good work.

1.7 Our facilities

It's a shame that the libraries are not open for business longer into the evening, more days a week.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

### 1.1 Have we got the game plan right?

I think that charging households that consume more than 600 litres of water is the right solution to keep Christchurch citizens aware of the water. However public transport needs to be fixed. I often caught the bus from school to my Grandma's house, and it would take forever, not because I had to take 2 routes to get there, but the Purple Line, now the 5 if I am correct, was packed, like sardines shoved into a can. And it took me a good hour to get to sumner because of all the people having to get off the bus at different stops, when I may as well have biked and I would be there quicker. Unfortunately, people these days would take the car. Thats why we should look at fixing our public transport system.

### 1.2 Rates

I would be happy if I see positive change within Christchurch

### 1.3 Proposed changes to existing rates, and new targeted rates

I think that's a good idea, becuase like I said before, people don't need to consume over 700 litres a day if it is just a normal household. So I think paying for water over 700 litres would be a great idea. One way to reduce unnecessary water usage, and to give the council more money to pay for water infrastructure

### 1.4 Investing in upgrading and protecting our city's water networks

Water is an essential part of day-to-day life, and I think it is important to spend that little bit more now to help modernise our water system, rather than Wellington, who have left it too long, and now have to spend lots on it now.

### 1.5 Investing in our transport infrastructure

In 25 years time, I would love to catch a train, from Rangiora for example, to the CBD, within 25 minutes. Im not that person at the moment, but I think light rail is pretty essential for a running city, for people to get place to place without the wait for traffic lights, etc on normal roads. Obviously, light rail is a huge investment, but it is better to start looking at it now, rather than in 20 odd years time. Buses are also an important part of public transport. I would love more frequent lines, and more electric buses or more efficient diesel buses. I think all of these things would be essential for public transport to be more appealing to the public, so that they can adopt it into their day-to-day use, instead of the car.

### 1.6 Rubbish, recycling and organics

I think it would be great to see some innovative Christchurch businesses to help deal with some of the plastic waste. Plastic is a huge problem that we need to fix, so some money should be kept for a recycle recycling plant where they turn milk bottles back into milk bottles.

### 1.7 Our facilities

Community facilities is what I love most about Christchurch, the fact that there is a library with some friendly staff, a pool nearby, walks and parks near my house, it is all so awesome. I totally agree with the spending.

1.8 Our heritage, foreshore and parks

I love our museum, and go there every so often, but what I see when I walk into the museum is "Donate to help keep us running". I think things like that need more council funding as they are a prime source for people wanting to know where we come from. Important buildings I would disagree on, because it would cost a lot these days to rebuild due to new earthquake standards, and I think we could better spend that money. Parks, and foreshores are very important to maintain, and I think the council should continue maintaining them. But rivers as well, I would love it if one day, I could swim in the Heathcote river without worrying what will happen to me afterwards. Rivers need to be fixed, as they were once clean and fresh, but now are a polluted bed of water that is an excuse to have sewage running into.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments  
I would love to see more performances and plays that the council/other people put on

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No  
Comments  
I wouldn't mind if the money went to the museum, but I'm not a huge fan of art and the money could go towards a better cause

1.11 Potential disposal of surplus Council-owned properties

I reckon homeless housing, or depending on how big the land is and where, for the land to be used as a park

1.12 Any other comments:

I think the Christchurch City Council has done a great job of looking after their city. I love the facilities and parks, that we have three bins, even an organics bin which you don't get in other New Zealand cities, that you actually look after us with these facilities, rather than focusing on the city's basic infrastructure, like waste water, and even the council's own problems. So I just want to say big thank you to the council and keep up the good work.

### Feedback

#### 1.1 Have we got the game plan right?

I am appalled that you intend to charge for water that is below standard. You say that an average household uses 520 litres a day. Since when is an average household just 2 people. You also said that the chlorine would be removed from our water by last year. Still waiting for this to happen. Yet you manage to sell our fresh water to the Chinese at a small fee. Maybe increase the amount of money you charge the bottling plant in Belfast and not charge us for the water.

As for increasing our rates. I wouldn't mind so much if it was truly going to the improvement of our city but all I can see is that you gave yourselves a pay rise then increased the rates to accommodate this.

I am hoping that at the next election there will be a change in the council because there needs to be.

### Feedback

1.1 Have we got the game plan right?

Yes, I believe the balance is the best that can be done whilst keeping rates increases at a reasonable level. ,,

I am particularly interested in supporting the proposed \$5.5million over three years to assist the Art Centre to restore their remaining buildings. The Arts Centre is such an asset to Christchurch. The additional rental opportunities provided by the full restoration of buildings needs to be realised as soon as possible so that the viability of the Arts Centre is stabilised. I was incredibly disappointed, and really disgusted, when I heard that the ongoing annual funding support by the CCC was halted in 2018. The ongoing viability of the Arts Centre has now become very fragile as a result. The Arts Centre is enjoyed by all of Christchurch's citizens and admired by visitors to our city - it needs to have the financial support of the CCC.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I am wanting to submit on two points in the proposed plan:

Firstly, I fully support a targeted rate to provide \$5.5million to the Arts Centre. This is a vital and vibrant part of Christchurch. The heritage buildings are used by and for the community and as the largest group of A category heritage buildings in NZ it must be preserved and continue to function as a core component of our city. The viability of the Arts Centre has been severely challenged and our city's support is required. I have no hesitation in supporting a targeted rate being paid by we citizens.

Secondly, I do support the installation of base isolators in the Robert McDougall Art Gallery. This will become an integral part of the renovated museum and for too long the McDougall has been languishing and empty. It will be money well spent to have the building open again and displaying works of art from the museum's collection. it is such a wonderful building and I have been sorry not to be able to enter it for the last decade.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

Excess water charge seems appropriate

1.4 Investing in upgrading and protecting our city's water networks

Please dont put fluoride in our water supply. "Vitamin C is good but the city water supply is not the medium to deliver it" Likewise fluoride shouldn't be delivered that way.

Please cease chlorination at the pump stations where you have completed the upgrade work. We understand there may be a low probability risk.

1.5 Investing in our transport infrastructure

Thanks for the cycle ways

### Feedback

1.1 Have we got the game plan right?

Your game plan is balanced and the hard work appreciated. I support the gifting of Coronation Hall as this will benefit the club i play for and give us a home which we have not had for a number of years.

1.2 Rates

It would be good if rates can be kept to a minimum but understand that financially the increase is needed.

1.3 Proposed changes to existing rates, and new targeted rates

It would be good if rates can be kept to a minimum but understand that financially the increase is needed.

1.4 Investing in upgrading and protecting our city's water networks

This balance looks right. Don't over promise to under deliver.

1.5 Investing in our transport infrastructure

Joining of cycleways would be good.

1.7 Our facilities

Do not support the closure of Riccarton Road Bus Lounge. This was pushed to be opened with issues ironed out over time. I do not think closing this would be a good thing for Riccarton or the young people who use the lounge. Plus will money be lost on not using the facilities?

1.11 Potential disposal of surplus Council-owned properties

Support to disposal of Coronation Hall to the community. I also believe that if building have been surplus to requirements they should be sold to raise capital if they can not be gifted for community use.

### Feedback

1.1 Have we got the game plan right?

I support funding for The Christchurch Arts Centre and other heritage buildings. I support funding in support of high quality water supply. I support less funding on roads.

1.2 Rates

The increases are too high and some work should be re-prioritized so that the increases are affordable for everyone rather than being "as affordable as possible".

1.3 Proposed changes to existing rates, and new targeted rates

Generally support this approach.

1.4 Investing in upgrading and protecting our city's water networks

Generally support this approach.

1.5 Investing in our transport infrastructure

Public transport is sufficient as it is. I do not support increased funding.

1.6 Rubbish, recycling and organics

I generally support this approach.

1.7 Our facilities

I generally support this approach if it saves on costs.

1.8 Our heritage, foreshore and parks

I generally support this approach.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

1.11 Potential disposal of surplus Council-owned properties  
I generally support this approach as long as the heritage buildings put up for sale are long term protected.

1.12 Any other comments:  
You're survey requires age and gender information. I find this condition irrelevant.

### Feedback

1.1 Have we got the game plan right?

1.7 Our facilities

Sport, Recreation and Community Facilities

The trend nationally and internationally (depending on where you go) is toward increasing the level of 'community-led' and 'community-driven' delivery. Council is still empire building new facilities (sport and recreation) and still increasing the sophistication of the bureaucracy around this delivery as if it is the only option for the delivery of community infrastructure. My concern is with Metro, salt pools, new facilities in Linwood and Hornby, Nga Puna Wai and new stadium pending and only slight divestment of Community facilities that the overall cost burden will become untenable. A different approach focused on capacity building of trusts and incorporations, partnerships and collaborations will increase social capital, ownership, empowerment and commitment at the community level. It is acknowledged that this is being tried in some sites Lyttelton Rec Centre etc. One key concern is that a Council run facility is much less flexible and adaptable, must comply with Council Policy and is a one size fits all approach in many ways, whereas community run facilities can adapt and flex be locally relevant and will animate the spaces more frequently beyond being vessels-for-hire. Council could change its role to one of specifier, enabler and funding partner.

1.8 Our heritage, foreshore and parks

Active Parks

Council through its LTP targets support to parks on a needs basis. Delivery of park maintenance in some areas is poor and reducing. In some areas neglect has been ongoing for decades. The reserves act allows for the Minister to divest management of reserves to non-council entities and there needs to be consideration of this model as some local organisations/collectives could have greater access to community resources for park management in niche situations than the Council can muster via its collective contracts. There would be a need for funding support through rates but service management could be at a higher level if managed locally in some cases

## Questions to think about when making your submission

### Have we got the game plan right?

Our overarching proposal is to focus on a deliverable capital programme that helps drive our city forward, with particular investment in roads and transport infrastructure and in protecting and upgrading our water networks.

- 7 We're borrowing for new projects that have long-term value, and ensuring that the debt repayments are spread fairly across the generations of ratepayers who will benefit from them. We're maintaining enough financial flexibility to be able to handle unplanned events, and we're finding permanent efficiencies in our day-to-day spending. We've managed to do all of this while keeping rates increases as affordable as possible.

**Have we got the balance right? Have we prioritised the right things? If not, what changes would you like to see?**

The government has consulted Councils regarding a planned overseeing of all NZ water Is this factored in?

### Rates

We've considered a range of options for how best to achieve what we need to achieve while also keeping the average rates increase as affordable as possible.

**What do you think of this plan for an average residential rates increase of 5 per cent for 2021/22 and an overall rates increase of 4 per cent over the next 10 years?**

4% each year, not 5% for 2021/2022

## Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

**What do you think of these changes to existing rates, and new targeted rates?**

**Have we got it right? If not, what changes would you like to see?**

Evaluate how you will incorporate the existence of Ratepayers already paying water rates where there is One Land Title with multi Units on it.

## Investing in upgrading and protecting our city's water networks

We have a responsibility to provide and maintain the wells, pipes, reservoirs, treatment plans and pump stations for drinking water, and manage the collection, treatment and disposal of wastewater and stormwater.

**We are proposing to invest 41 per cent (\$2.329 billion) of our capital spend on water infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

Re Old Wells/Springs disturbed by Earthquake Tremors repaired under EQC guidance. RESULT: Freshwater channelled directly to drainage; subject to Neighbourhood complaints to Council. (Fresh Water wastage)

## Investing in our transport infrastructure

We've heard from residents that transport is a top priority. It's also the city's biggest contributor to carbon emissions. We want to give people better options for getting around, whether by car, public transport, on foot, on a scooter or on a bike. We also want to ensure our networks are safe.

**We are proposing to invest 25 per cent (\$1.445 billion) of our proposed capital spend on transport infrastructure improvements.**

**Have we got the balance right? If not, what changes would you like to see?**

25% Capital spending should include the price obtained from the Sale of RED Bus

## Rubbish, recycling and organics

In 2020 the Council adopted a new Waste Management and Minimisation Plan that focusses on changing our 'throw-away' culture and reducing the amount of waste we send to landfill. Implementing the actions in that plan are the key drivers of our operational and capital spending.

**We're proposing to spend \$25 million on organics infrastructure (which includes upgrades to the organics processing plant), \$18.5 million on transfer station infrastructure and \$18.4 million on recycling infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

*The sums to be spent seem Excessive*

## Our facilities

We're proposing to invest 19 per cent of our capital spend on community facilities. We're also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service?**

**Have we got the balance right? If not, what changes would you like to see?**

*Concerned at the suggestion of Wharenoa Pool being Decommissioned  
Until all the "Pool New Builds" (City + Hornby) are Completed & Operating;  
This should not even be considered as part of the Long Term Plan.  
continued: see 'Any other Comments'*

## Our heritage, foreshore and parks

Christchurch has a long and proud history of protecting and respecting our heritage. Over the past decade we've carried out a massive programme of repairs and restorations, but we still have some work left to do. In the next 10 years we will continue to restore our own buildings and support private development of heritage buildings. We will also be maintaining and improving our parks and foreshore.

**We're proposing to invest 11 per cent of our capital spend on our heritage, foreshore and parks.**

**Have we got the balance right? If not, what changes would you like to see?**

*The Sale of the Two Heritage Buildings should form part of the funding  
for this desire to continue to Restore Council buildings.*

## Funding for the Arts Centre Te Matatiki Toi Ora

We are proposing to provide the Arts Centre with a capital grant of \$5.5 million. We would do this via a targeted rate that would recover the grant cost over 10 years, and would phase in over two years, so the targeted rate would be smaller in 2021/22 than in subsequent years. We're proposing that every ratepayer will pay this rate and it will be calculated as a number of cents per dollar of capital value.

**Do you support the Council funding \$5.5 million for the Arts Centre?**

**This proposal is currently accounted for in our proposed rates increase. If a decision is made not to proceed, rates would drop by 0.04 per cent.**

☒ Yes ☐ No

Comments: \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

## Funding for base isolation of the Robert McDougall Art Gallery

Canterbury Museum considers the base isolation of Robert McDougall Art Gallery to be a key part of the Museum's redevelopment. In July 2019, the Council agreed in principle to support the base isolation of Robert McDougall Art Gallery at a cost of \$11.8 million, subject to public consultation in the Long Term Plan 2021–31.

**Do you support the Council funding base isolation of the Robert McDougall at a cost of \$11.8 million?**

**This proposal is not currently accounted for in our proposed rates increase. If a decision is made to fund base isolation, rates would increase by 0.07 per cent.**

☒ Yes ☐ No

Comments: \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

## Potential disposal of surplus Council-owned properties

We have a small number of properties, including two heritage buildings, that are no longer being used for the purpose they were originally acquired for. These surplus properties make up less than 1 per cent of Council's overall property portfolio.

**Help us decide their future – what do you think of this proposal to dispose of surplus properties?**

*Yes, support disposal of surplus properties, including  
 5 Worcester Street & Shalamar Drive Heritage buildings.  
 Profits to be reinvested into EXISTING Council Infrastructure.*

## Our Facilities

### Any other comments:

Strongly OBJECT to the closure of the Riccarton Road Lounges. This is a Well Used Interchange for Bus Routes giving direct services to Professional Services & Hospitals  
Note especially: St Georges / 100 Public / Yellow & Purple Orbiter connects to Orange / Burwood

I have particularly appreciated the comfort of the Lounges, early morning, & evenings. I am a regular Day user & use both Metro & Gold cards.

The diligence of the security staff assisting the slow & the hampered bus patrons is to be commended.

### Thank you for your submission

### Feedback

#### 1.7 Our facilities

I am not in favour of any changes to the current level of education programmes for school children at Christchurch Art Gallery. The introduction to this proposed change states the lower numbers of international tourists visiting the gallery as the primary reason for the changes. International tourists do not attend education programmes designed for NZ school students. The gallery's education programme sees 10,000 students per year enjoy and learn from the artwork exhibited. There are always schools who miss out. The 10,000 visits has not diminished over the seven years I have worked at the gallery, the demand is always there. Please don't make Christchurch school children miss out because of a lower number of tourists. Furthermore, the bubble with Australia set to kick in this year will mean more tourists coming to Christchurch. The proposal takes a short term view. Please don't make changes to the education programme for Christchurch school children at the art gallery.

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.2 Rates  
Adjust based on other feedback. Also appears to be an exercise in futility pending the water reform outcomes? Won't CCC have to re-shuffle funding again anyways?

1.3 Proposed changes to existing rates, and new targeted rates

Get rid of the Heritage Rate and bowl over those buildings already. They are a money pit and their time is past. Out with the old.

Charge even more for water. For everyone to reduce consumption. And invest in public education around promoting rainwater tanks.

1.6 Rubbish, recycling and organics  
Charge more for rubbish, but base it on how much you produce and/or how often you put your bins out.

1.7 Our facilities

Too many community facilities! How many pools does Chch need? The ocean is right there!

What about CCC sand volleyball courts and/or climbing facilities at Metro Sports?

1.8 Our heritage, foreshore and parks  
Repairs / restorations supported for existing operational buildings but get rid of old, outdated municipal buildings that are not yet repaired from EQ.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
No  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
No  
Comments

1.11 Potential disposal of surplus Council-owned properties  
Yes, get rid of them now.

1.12 Any other comments:

I noticed that there isn't a specific box to comment on the climate change response and I didn't see where/how funding would be allocated in this particular area....

For instance, what specific projects are being supported through the Sustainability Fund?

In addition to making changes to transport, waste, and energy usage, there needs to be a significant component around education to reduce (embodied) energy consumption through changes in diet and purchasing. It seems to be loosely suggested around sustainability advice and tools... It'd be cool if there was a budget/carbon tracker for each resident that they could fill in and see how they compare with other NZers, and people can then make (competitive) sustainability choices that are best for them and the planet (eg not everyone is able to bike everywhere, but they may choose to not fly anywhere or to volunteer planting trees to reduce their impacts). In addition to Biketober, there could be Greenuary or something corny to encourage awareness/competition.

I also imagine CCC will always need \*some\* petrol fleet vehicles for resilience so saying you'll have nil emissions for this by 2030 is likely unrealistic.

CCC is already producing biogas at it's wastewater plant. What's new? Or how will it be improved to further help with climate change?

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Please don't make cuts to the Art Gallery or Library supports for our children especially. Our kids have suffered so much. Losing more of these services will just diminish our city in every respect.

1.2 Rates

Appalling as you intend to cut services as well?

1.3 Proposed changes to existing rates, and new targeted rates

Buy placing water costs on families you only add to the poverty in this city. How cruel.

1.7 Our facilities

Please don't further limit the Art Gallery this is such a neanderthal backward step.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Comments

No let private business fund it.

1.11 Potential disposal of surplus Council-owned properties

If these are council housing then no- we need more poverty housing not less.

### Feedback

1.5 Investing in our transport infrastructure

Radley Street has had some work to bring it up to spec with the traffic islands halfway along. I would like to request that more work be done to make it a nicer place to live- there are always cars speeding along it and doing burnouts around the side streets.

Three areas particularly need work:

I) the intersection with Cumnor Tce is a frequent burnout location because the intersection is miles bigger than it needs to be. It could do with a roundabout or some traffic islands to force vehicles to move more slowly here.

II) the intersection with SH74A needs some work too. It is near impossible to get around the corner from Radley Street turning right onto SH74A at peak times, and traffic jams often build up here. A roundabout to alleviate this would help a lot.

III) the whole of Radley Street needs some speed bumps to stop trucks going down it and force them onto main roads. It is a suburban street, and we shouldn't have to deal with loud trucks at all hours of the day.

Thanks for considering this proposal. I am planning to contact my neighbours and get as many of them as possible to sign a letter to the council raising all these points to show I'm not the only one that wants these problems sorted out. I've spoken to three neighbours across the road so far and they all said they'd sign on these ideas.

Best Regards,

Simon Hulse

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I'm not quite sure. I think it is good to get it done as some roads are quite difficult to use.

1.4 Investing in upgrading and protecting our city's water networks

Yes, I think so. I know it may be a lot of work to be done. Lately there has been quite a lot of water on the roads near me from broken pipes. That costs a fair bit to repair.

1.5 Investing in our transport infrastructure

The only thing I can go on at the moment is biking and busing which I use. The roads need to be improved for my bike because there's a lot of glass from accidents.

1.6 Rubbish, recycling and organics

With the recycling and green bins I'm not always sure what can be put in or how to recycle best. Can you look at training for people who need more help than the pamphlets (e.g. with Otautahi Community Housing

1.7 Our facilities

I'm not keen on you shutting the Riccarton Road Bus Lounges. But I would like the library not to have cuts and most especially I don't want to lose the mobile library because I like getting books out and reading and meeting other local people at the mobile library. I help my neighbours by getting books for them when they can't go to the mobile library and then we can talk to other people before they go into the mobile library, like a group talking. It is great. I think it is great having the mobile library. I only use the mobile library. I don't go to another library at all. I have been to the library once in town and that's about it. If you stopped the mobile library I would stop using the library or getting books. [Keith doesn't have the internet so cannot access via IT].

1.12 Any other comments:

Sue Purdie has acted as reader/writer for Keith so that he can make an electronic submission.

### Feedback

1.8 Our heritage, foreshore and parks  
This seems to be at about the right level.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments

The Arts Centre Te Matatiki Toi Ora is one of the few set of heritage buildings in Christchurch that would greatly benefit from an injection of capital to enable the Arts Centre Trust to complete the restoration of the heritage buildings for the Christchurch, Canterbury and New Zealand communities. We strongly support this modest investment from the City Council towards this community facility.

Disclaimer: We are donors to the Arts Centre, but at a modest (~\$1,500 per year for 10 years) level.

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
No

Comments

Not at this stage. There are many other deserving projects in more prominent positions, and that would benefit a more diverse community, that could benefit from this amount of funding.

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.2 Rates

Rates are ridiculously high. Why should we keep getting penalised, because we have worked hard and live in a lovely area, and therefore our home ends up with a high rateable value, therefore increasing our rates.

#### 1.7 Our facilities

The mobile library is an important service. It encourages our children to get into books, particularly at a time when there are so many screens around. It would be giving them the wrong idea, to get rid of the mobile library, when books are such an important part of our lives, knowledge, escapism. It also is vital for our elderly too, who don't have their own transport to get to the libraries.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Good enough.

It is important to protect the city from flooding and sea level rise by keeping to the Regeneration Plan for the Red Zone. Stop banks should be mapped out before projects are given approval. The Green Spine is important so there must be no encroachment by private projects.

1.2 Rates

The Council can't keep cutting. We're chopping into the bone now after years of stringent cuts. If people want fancy stadiums and other bells and whistles then rates must rise. The stadium can be deferred because there won't be many tourists for a while to watch sports matches. Fix the Red Zones first, for protecting our assets.

1.3 Proposed changes to existing rates, and new targeted rates

Yes, target rates for heritage maintenance, but there should also be something left for smaller heritage restoration projects. Heritage is important for our history, identity, enchantment, etc.

1.4 Investing in upgrading and protecting our city's water networks

Well enough. Work with ECan to prevent industrial farming from polluting our aquifers.

1.5 Investing in our transport infrastructure

If the Riccarton bus lounges are to go then PLEASE cover the existing seats at bus stops!

We need good pedestrian / cycle paths. Lighting should be "warm" colours so as to not interfere with wildlife.

1.6 Rubbish, recycling and organics

About right. Recycling is important but we need to know that our efforts are not going to waste.

1.7 Our facilities

If the Riccarton bus lounges are to go then PLEASE cover the existing seats at bus stops!

Art Gallery, Museum are important. We can defer the large sports stadium because there won't be many crowds for a couple of years.

1.8 Our heritage, foreshore and parks

Heritage is important. There should be something for smaller projects.

Foreshore and parks are important to protect the city against climate change and sea level rise. Please ensure the Red Zpne Regeneration Plan is adhered to, with no encroachment of private projects especially into the Green Spine. Lighting should be "warm" so as not to interfere with wildlife.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments  
The whole Worcester Boulevard is an important asset to the city, and it contributes to Christchurch's character.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes  
Comments  
Another important asset. Yes, DO base isolate the McDougall gallery.

1.11 Potential disposal of surplus Council-owned properties

OK, provided the funds go towards city building and not higher salaries for the already well paid.

1.12 Any other comments:

Christchurch is a beautiful city. Please do something to retain and enhance the wildlife in the city, even if the Catholic Cathedral must adapt to Nature. The birds may be enticed to nest downstream a bit if stones were provided for them there.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.2 Rates

People cannot afford year on year rate increases. The council needs to radically slash it's spending to allow only CPI rates increases and increased spending on infrastructure repair/replacement.

Stop spending money on swimming pools and cycle lanes.

Drastically cut council staff and reduce size of council to no more that 10 members

Every dollar spent needs to be analysed to determine if it is a 'must' or a 'nice to have' if its not vital then don't spend it.

#### 1.5 Investing in our transport infrastructure

Your own research shows that the vast majority of people will not turn to cycling as a means of commuting Rather than wasting more money on cycle lanes invest it on electric car infrastructure. Electric cars are only going to become more popular so it's vital that charging points are going to be needed. If the council wants to reduce green house gas emissions this makes much more sense than cycle lanes.

#### 1.7 Our facilities

Plenty of scope for further cost cuts through more drastic cuts and closures

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

### Feedback

#### 1.2 Rates

I am happy with this rates increase as long as there is an increase in services.

#### 1.3 Proposed changes to existing rates, and new targeted rates

I'm happy with a targeted excess water charge.

#### 1.4 Investing in upgrading and protecting our city's water networks

Yes

#### 1.5 Investing in our transport infrastructure

Yes. I wish to see investment in light rail for christchurch on existing railway tracks.

#### 1.6 Rubbish, recycling and organics

Yes

#### 1.7 Our facilities

No you haven't. I do not wish to see any decrease in hours or service for the art gallery, museum or library. These facilities are very important to children's learning and for the overall well-being of our community. Covid is not an excuse to decrease services...tourist numbers will increase again in the long term and this is a longterm vision that we are submitting on.

#### 1.8 Our heritage, foreshore and parks

I would like to see further increases in funding to restore icon heritage buildings in the inner city that have been untouched since the earthquakes....this should be a priority and not just on a wish list.

I wish to see further increrase in funding to cover the cost for maintenance of our parks.....more specifically South New Brighton Reserve where there needs to be an increase in funding for ongoing maintenance and an upgrade of paths & tracks which are used on a regular basis by joggers, walkers & cyclists.....this is one park which has been untouched since 300+ trees were removed after the earthquakes...we deserve better.

### Feedback

1.1 Have we got the game plan right?

I feel like you're getting better with each plan. There's still more work to make it better.

1.2 Rates

I am not ok with this, especially since you are putting freezes on incomes. With everything increasing apart from one's income makes it harder to pay for all these extra rates.

Also, the RV rates are wrong across the city. Why not fixed them? This will give you income and owners will see their value increase. Like my place the RV is over \$200k off.

1.3 Proposed changes to existing rates, and new targeted rates

I'm not ok with all the extra bills the council is throwing at ratepayers, especially while the country is in a recession.

1. Water. I have no clue how much water my family of 5 uses. We try to limit it, but before i will agree to pay for water you need to properly educated people on how much water they use regularly. Also your terms are vague. For example you claim there may be exemptions for large families. What do you consider a large family? How does one prove this? Why is it not not a definite answer for large families? Furthermore, according to you because of leaks in the water pipes, 90 olympic size pools worth of water are wasted every week. It sounds like the issue of excess water usage is not the ratepayers, but the city itself! Maybe you should tax yourself instead.

2. Im against a land drainage tax as well. I cant seem to find good information on this and the cost. The interactive map doesn't tell you anything.

3. I like the idea of better transparency on rate payers portion that is applied to heritage buildings. I do find it frustrating all the grants and money the council seems to give for heritage buildings to be fixed. Why can't the places fixing up theiir heritage buildings take out a loan like the rest of us would (like the cathedral). Sometimes it seems that people are so fixated on the past and a broke, old building is getting in the way of moving forward.

4. I feel like the council needs to start heavily charging the owners of vacant lots/ unfixed buildings in the central city until a functional building is there. It is unexceptionable that there are so many places where its cheaper for

the owner to do nothing than to help rebuild our city.

#### 1.4 Investing in upgrading and protecting our city's water networks

Yes i agree with needing to upgrade the city's water network. Although it is important to know that the Avon River loop already has temporary stopbanks, so no nees to spend \$86 million more on that.

#### 1.5 Investing in our transport infrastructure

The city definitely needs to fix some of roads (please stop using chip seal! Its dangerous and painful for bikers! Plus its wasteful with only a 5-7 year life span.)

We need more bike lanes to the North East! There's nothing from Burwood to Bottlelake. There needs more education for drivers about bike lanes. I got hit by a car biking home last week in Parklands by a car who pulled out in front of me and didn't look. I could have died. More education is definitely needed. Also cars need to be held accountable for blocking bike lanes. Council tickets car for driving and parking in the bus lane why can't you do the same for bike lanes.

Please make the buses more affordable. It's still cheaper for me to drive than take the bus.

#### 1.6 Rubbish, recycling and organics

I ALL FOR MAKING OUR SOCIETY LESS "THROWAWAY"! This is not going to happen with better recycling infrastructure. Thats not getting to the heart of the problem. The issue is companies who are putting everything into packaging or plastic. For example, why can't the grocery stores have a milk refilling station instead of me having to buy 4 plastic jugs a week! That's 208 plastic jugs a year that were only used once!

Why can't you heavily tax companies who sell items in our city that are not recyclable or are one time use objects? Taxing this would encourage companies to buy alerturative brands who sell their items in recyclable or useable items.

#### 1.7 Our facilities

I think I'm fine with most of the changes. I am not ok with the art galleries public programming for children being cut though.

#### 1.8 Our heritage, foreshore and parks

See above re my comments on heritage spending.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

is this an additional rate increase on the proposed rates increase?

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

i feel conflicted about this. Part of me wants the Museum and Mcdougal to be redevelopment. future generations would definitely benefit from this. Fixing the building going to solve the work environment within the Museum though. Plus you've but a freeze on income increases, which as CLA to the museum, that includes their staff. So again, another increase in rates without an increase of income makes it harder on the ratepayer tp want to agree to all these rate increases.

#### 1.11 Potential disposal of surplus Council-owned properties

i don't have enough information on this to make a decision

1.12 Any other comments:

I would appreciate better information, with details instead of vague sentences on each of the above, on the council's website without having to download documents.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.1 Have we got the game plan right?

No, if the City council are so rich that its airport company can spend millions on an airport at Tarras which will reduce the amount of visitors to Christchurch therefore reduce the amount money coming into Christchurch for business and local jobs, then the council have no reason to increase the rates.

Inflation in New Zealand is very low, wages are not increasing so why are the rates going up at all, especially when house prices are increasing so and new housing are being built faster than ever so the amount of income collected from rates is increasing at a rate of over 20% each year with any extra increase.

#### 1.2 Rates

Inflation in New Zealand is very low, wages are not increasing so why are the rates going up at all, especially when house prices are increasing so and new housing are being built faster than ever so the amount of income collected from rates is increasing at a rate of over 20% each year with any extra increase.

#### 1.3 Proposed changes to existing rates, and new targeted rates

Heritage projects, art centres are a luxury for the rich, and their budgets should be slashed until the council fixed the essential projects like water works, flood protection, safe zero carbon transport options.

I have no issue with an excess water target as long as it applies to all premises, including all businesses. It would be unfair when I see my company pouring thousands of litres of water onto its lawns to look pretty, and I can not afford to pay for water to grow some vegetables. We will not be the garden city any more due to not being able to afford water. We cannot compare our water usage to Wellington or Auckland where it rains every second day.

#### 1.4 Investing in upgrading and protecting our city's water networks

Barring another earthquake, a lot of the infrastructure will last another 100 years, the old clay sewage pipes do not just deteriorate with age and are fine if they are left alone.

There is no doubt some money needs to be spent but this seems far to much over just 10 years.

1.5 Investing in our transport infrastructure

With the population increasing, climate change from our emissions, money needs to be spent on free flowing traffic, and alternative transport options like safe cycle ways. There is nothing worse for our planet than vehicles running stuck in traffic or continually stopping and starting for traffic lights.

There were multiple cycle fatalities last year in Christchurch, none where the cyclist was at fault. Christchurch has the ability to become the most cycle friendly city in the world. The roads need to be made safer for cyclists with more cycle lanes, with a minimum of cats eye vibration lumps between the car and cycle lanes.

Within 3kms of any school the berms should be changed to cycle lanes for scooters and bikes. With electric scooters and bikes short School runs in cars should be a thing of the past.

1.6 Rubbish, recycling and organics  
We need to improve on recycling.

1.7 Our facilities  
Facilities need to be kept up as benefit anyone that needs them

1.8 Our heritage, foreshore and parks

Buildings change and improve, and we do not have iconic buildings that stand out enough from all the rest of the worlds buildings to warrant spending rate payers money on supporting private development of heritage buildings, which is really just lining some owners pocket.

The spending on parks, native forest developments in the port hills, widening of the Avon river at Kerrs reach, and development of parks / cycle ways in the red zone should be more of a priority.

Subject: Feedback on Draft LTP

Briarlee Tutauha

Kia ora,

I believe charging for water isn't acceptable as the housing fleet is pretty hideous and overpriced. I understand our water is being depleted but we could spend developing desaltation plants. It would be great to see people building dream homes instead of just coping. Cheap accomodation need to be available in a papa kaiinga welfare complex or what in proposing for marae cabins in native sanctuary, freeing up home rentals for families and not providing incentives owning rentals. It would be great if the government owned more businesses to tax from also driving price down. Reading and construction have been reaping massive profits so would be a good move to develop competition. The redzone could also be used to be self sufficient, providing employment. A mood board of ideas good be as massive as the flag change. I'd love if the peninsula farms could be purchased for housing, where u rent land and build dream home. The problem with grid living is that it's a process to sort the problem. The aim should be having the people self sustaining in an environment not requiring attention. You can make profit of air.

Briarlee

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.1 Have we got the game plan right?

I fully support the roads, footpaths and our water networks being given priority. The state of streets and footpaths in Christchurch remain in a state of disrepair and are dangerous. We must protect our waterways and water networks.

I am at times dismayed at where the Council seems to spend money in areas where the roads and footpath were fine while leaving other areas simply to worsen or the contractors do a less than quality job resulting in ongoing repairs being required. The Council needs to be getting it right the first time.

An infrastructure that works is essential to a functioning city.

The works on Cranford Street have simply made the congestion worse in the area from Innes Road to Bealey Avenue and dangerous with no room for cyclists or persons living along that stretch of road and for a completely inadequate ability to merge. This is a project the Council has really gotten wrong in the opinion of residents in the area and only increased traffic flow and noise in residential areas with a high proportion of families, elderly, day care centres and schools.

#### 1.2 Rates

I understand a Council needing to increase rates to keep a city moving but when I see the results from what the Council undertakes or decides to spend my rate payer money on I am somewhat dismayed.

The Council, must do better and getting it right, it must get the city moving with much better city and road planning, cycle ways that actually remove cyclists from the road, our current system is equally as dangerous as not having cycle ways. It must be more pedestrian friendly.

The Council must support places for all people of Canterbury to meet and enjoy, by that I mean buildings and spaces. It must make sure the Museum, the Arts Centre, the Art Gallery and other community spaces are properly funded. If a Council can give 10 million to a Cathedral that only a few attend how can it not support those spaces and places and buildings that are available to all?

### 1.3 Proposed changes to existing rates, and new targeted rates

I fully support the Arts Centre receiving a targeted rate. However it is no good to them if you just increase its rates as that is not helping them. This in effect would mean the people of Christchurch give with one hand and the Council takes with the other which is completely unethical.

The arts Cente must be included in the Long Term Plan along with the Museum and Art Gallery. The Council is woefully slow in introducing a heritage rate. Most Eurpoean countries have a heritage tax system to ensure heritage is protected.

The Arts Centre is a place for all, it is a place of learning, socializing, exploring, of talent, concerts, plays, of markets and great food and where people simply get to wander and look at magnificent buildings.

I have learnt to play musical instruments there, learnt to sing, sing in a choir now that meets every Monday, I have performed in the great Hall, it is place I tell everyone who visits Christchurch to go, I have eaten there, enjoyed plays in the Summer outside, roamed the markets. It is a place of cherished past memories and I hope many many new memories.

I cannot believe that the Council has not offered meaningful assistance and sought submissions until now to protect this absolute jewel.

### 1.5 Investing in our transport infrastructure

It is time to get light rail introduced with an effective park and ride system. The system has to be cheaper though than driving a car.

Tolls should be introduced for people travelling into the city in cars during week days.

### 1.6 Rubbish, recycling and organics

We have to do more to recycle and do it better and also be more responsible for recycling more plastics than we currently can.

### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

### Feedback

#### 1.7 Our facilities

I am against reducing hours or services at the libraries or at the art gallery.

Among the benefits of the public libraries is that at night they are a safe place to be in if you have to wait around for someone if you have to be out at night. Some people work unusual hours and are not able to go into the library at more "normal" times so closing libraries or reducing hours does not seem to be a useful thing to be doing. Access to warm, dry facilities, the internet and the other resources that a library provides is of use to the homeless portions of the city's population. Many people, especially in the poorest parts of the city, do not have access to internet or other services because they can't afford those services so having access to them at the libraries is important. Libraries also provide a place for people to meet and learn. Libraries provide many services and programmes that are beneficial to ratepayers and these services have an impact that is financial and social well beyond the obvious.

The mobile library provides a valuable service to people who are not able to easily get to their nearest library. Maybe instead of ending the service new ways of using it to provide resources to people needs to be looked at - for example such as having it be at events such as the A&P Show, green living expos, or to go to places people gather like the Men's Shed. This way it would be easier to let the non-library going public know more about what the library provides and is easier to set up a display from the mobile library.

Elderly people and others who are technology challenged will find the closing of the service desks in Akaroa and Lyttleton distressing as it will leave them unable to do the jobs they usually do at these places. Unless these services are not used at all they should be kept open.

The art gallery is an important resource for the people of the city as well and to have hours or programmes cut seems irresponsible to me. The gallery holds toanga for many peoples and to reduce how and when people can see these toanga is forgetting about their place beyond the money they generate.

#### 1.2 Rates

Your rate increases for year after year have been way above inflation. And you are planning to carry on increasing them for the next decade. Yet you insist on claiming you are keeping rates affordable.

People's incomes are not rising at anywhere near the same pace as rates. Therefore rates are becoming less affordable.

Everyone has to live within their income. But you consider yourselves exempt. When you want more money you simply take it because you can. And then you lie about keeping rates affordable.

It is the easiest thing in the world to spend other people's money.

### Feedback

#### 1.1 Have we got the game plan right?

I feel you promise to fix the same things ever year and don't deliver, yet our rates continually increase.

We live in a relatively new subdivision. The waterways are overgrown with weeds and filling with rubbish, they smell and are not looked after. Our green areas are neglected and the only time we see any council staff doing any sort of maintenance is for a couple of days around the time rates are due.

You don't focus on these aspects which directly affect our day to day living in our neighbourhoods.

#### 1.2 Rates

It's unbelievable to think you want to increase rates by nearly 50% over 10 years. We have had increases nearly every year of the 7 years I've lived in Christchurch and I struggle to see the results. This is especially evident in the care and uptake of our local subdivisions. Disappointing.

When you are living off a single income, with a medically dependant spouse, and receive ZERO financial support from any government or council agency, what seems to you like a small increase, is actually quite significant.

Combine rates increase with an excess water tax, this is unfair and unreasonable.

#### 1.3 Proposed changes to existing rates, and new targeted rates

I would love to have a more thorough breakdown of my rates so I know EXACTLY what my money is being spent on.

I think my response to the increase in rates and water tax is clearly given above. The only thing I'll add is, if you want to introduce an excess water tax, I would expect you to stop selling our water to overseas buyers. You can't double dip.

#### 1.4 Investing in upgrading and protecting our city's water networks

I don't disagree that our water infrastructure needs improving, although this has been happening for the last couple of years yet we still need to invest more money into it?

1.5 Investing in our transport infrastructure

Roading is overall getting there, I have no issues. I think a big concern of mine is how you manage traffic diversions when roading projects are underway. These traditionally are poorly done. A current example is the planned works on Prestons Road relating to the Orion project.

1.6 Rubbish, recycling and organics

I think your recycling system is incredibly floored. I appreciate the thought behind it but you've made it SO hard to recycle and your being so pedantic about what's recycled to the point you won't collect peoples bins. You are driving people towards using the red bin for more things because your system is too complicated and therefore not achieving your original goal.

1.7 Our facilities

My only question is why is everything so expensive? Why do we charge so much to use facilities that our rates contribute substantially to? Swimming for example, \$6.30 pp. Not even a residents discount.

1.8 Our heritage, foreshore and parks

I have no issues with this.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.1 Have we got the game plan right?

Council operating costs: A full review of the council's operating costs needs to be considered and remove unnecessary costs. Consolidate council projects so that they are done together and not separately. The amount of times a road is resealed and then dug up and patched is ridiculous and costly. Do it Once!

1.2 Rates

I do not believe the proposed rates increase is a good idea as this will increase cost of living for a lot of people at a time when other costs are rising too. Christchurch needs to remain competitive and this will only push people to more affordable living and when you can work from home as 2020 showed us we do not want to price residents out.

1.3 Proposed changes to existing rates, and new targeted rates

Stop wasting money on heritage and being stuck in the past - move forward,

Take water costs/charges out of the rates and charge for it separately by the liter - then there is an incentive to use less take pressure off the network. Aim to have the water system costs self sufficiently funded by the water usage. Also this gives non ratepayers an incentive to use less as they will now be paying for their usage similar to power.

1.4 Investing in upgrading and protecting our city's water networks

make sure the money is spent wisely - the amount of times you see staff doing nothing is very frustrating.

1.5 Investing in our transport infrastructure

1. Public transport:

Do not invest any further money on buses - this should be a user pays system - I avoid taking the bus as they are often dirty and don't feel safe. the bus system in Christchurch is a joke - Trains / light rail are the solution not buses (underground preferably).

## 2. Roothing:

Christchurch needs to look to the future with regard to roads and it is clear that some people in the council do not like cars. They [cars] are not going anywhere so stop making cars stop and start too often and let traffic flow (as it feels like the council is trying to do). If we get our road network system flowing better this will help support the environment because fossil fuel cars will use less fuel if they do not need to stop and start and electric cars will then have more range. Stop resealing roads in chip seal as this also requires cars to use more fuel/electrical energy. Road markings should also be done to support technology in new cars to increase safety (painting a white line black does not remove the painted line to the eye of computers so you will just confuse them). AI in cars is going to come so prepare!

### 1.6 Rubbish, recycling and organics

it is not the council's job to change culture! just implement a user pays system and make the bigger bins more expensive to encourage smaller bins.

### 1.7 Our facilities

council should only operate essential services. if not essential sell it.

### 1.8 Our heritage, foreshore and parks

each case should be put to the public and told how much it will cost them in their rates if more than 50% want the project to go ahead then let it - kind of like an online election / shopping for rates put things on that you have to pay make others optional then see who wants to pay for it.

### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

#### Comments

I do not want to pay for this.

### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

#### Comments

I do not want to pay for this

### 1.11 Potential disposal of surplus Council-owned properties

Yes do it and pay off debt!

### 1.12 Any other comments:

Be good with money its the city's ratepayers money not the councils!

### Feedback

1.1 Have we got the game plan right?

Apart from the targeted water rate, I am comfortable with the general form of the plan, I'm surprised there is no room for savings outside the core roads and water. Page 15 of the LTP, councils response to Climate Change appears to be particularly well funded. Perhaps it is an area for further focus.

1.2 Rates

The scale of the increases is disappointing. The long term plan acknowledges the burden on ratepayers. Even so council continues to increase their charges above inflation.

Our household income has typically increases by 1 or 2 percent per year. Oh that rates could be kept in check to a similar level. The pandemic has further impacted our household by stifling one or our incomes.

1.3 Proposed changes to existing rates, and new targeted rates

I do not support a targeted water rate. This was explored last year. Council's finding then was that it was likely to disadvantage those who could ill afford it.

How will council recoup the cost of reading the meters city wide- will that go on the general rate or will it be loaded on those paying the targeted rate. How does council reconcile the ethics of charging some households more for water based on capital value and then charging them again on excess use. For those on fixed incomes the capital value of a home is no indication of ability to pay.

Our household keeps a garden that makes a contribution to keeping this city beautiful. I'd like to think that can continue.

1.4 Investing in upgrading and protecting our city’s water networks  
I support spending under this section. Please seek pragmatic solutions that keep communities safe. I'm disappointed that we still have chlorine in Christchurch water and trust council will work with central government so we can return to untreated water.

1.5 Investing in our transport infrastructure

Please examine this category again for potential savings. In general I support roads and new cycle ways. Some cycle ways built on existing roads give the impression that they were an exercise in ticking a box. They are hostile to cyclists and drivers alike. For example Rutland Street, St. Albans and Ilam Road (outside the university).

Remember that the money council takes from households may prevent the ratepayer making his or her own reduction to carbon footprint (e.g. by upgrading heating / moving to an electric car).

1.6 Rubbish, recycling and organics  
I support spending in this category.

1.7 Our facilities  
Please exercise care in this category. While I support the very beautiful buildings that celebrate our city, every section of councils business should be examined to avoid waste.

1.8 Our heritage, foreshore and parks  
I support spending in this category.

**First name:** Ada **Last name:** Yuen

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I find some road works are not necessary and not the highest priority. Of course it is always good to have better transportation and water plan. Would it be possible to cut down some other unnecessary spending like power bill from all council operated service? For example, I saw library lights were on round the clock. If just to turn off lights when it is closed, it can save significant amount of money for some infrastructure work. For just saving one thing at a time, say review power usage for all council operated service centers. The savings can be a surprise

1.2 Rates

I am a home owner and landlord of residential and commercial property. To be honest, christchurch council rate is among the highest in NZ. A significant raised was in place in 2019/2020 and at the same time we suffer from rental lost due to the pandemic. Yet as a landlord we don't have any subsidise to help us recover from the lost. Now with the new policy (without prior consultation) about interest cost no more tax deductible. If council insist on rate raised for 5% every year, it will put landlord in financial difficulty. We don't get break as a landlord. Rate increased, Landlord required to meet healthy home standard. Then minimum wage increment. Pandemic stop overseas student back NZ to continue their study (loss of rental income), interest cost not tax deductible, now Rate increased again and jump 50% in ten years. Can council give us a break? We need time to recover from loss and increased spending. The council staff are kor really helpful when we need their help. We even got tenants early terminate tenancy due to state house noise issue. Council staff replied nothing they can do but we as next block landlord tried our best to protect the quiet environment for our tenants.

May be it is time for not just landlord and tenants to save money to support council spending. It is time for council staff to review how can you cut cost and share the load with the rate payers. I believe every household and companies are facing certain kind of financial difficulty during the pandemic. In order to save expense, we had to walk extra miles to cut cost. Wish council staff also review their workflow and resource allocation to help cut cost together with us rate payer. I will appreciate your effort in doing so and we can work together to get things back on track sooner.

I noticed some libraries n some council operated service center lights are on round the clock. Let review on power usage and set target to cut power consumption. Can be a easy great start for being a responsible partner for all christchurch residents.

cheers

Ada

### Feedback

#### 1.7 Our facilities

My view is that Council performs its functions well at both governance level and operationally. I do think on occasion Council needs to confine itself to core activities and not take rate payers on strange entrepreneurial journeys through its trading subsidiaries – an example in recent years being property development – if individual rate payers have an appetite for risks and returns, they can choose to engage as individuals via direct investment or share market.

**I want to address the sole issue of reduced hours for Christchurch City Council libraries and the proposed redaction of the mobile library service. I see both proposals as an attack on civil society.**

I make this submission as an educationalist with a passion for libraries and the benefits they can provide in terms of learning and enriched community engagement.

The functions and services of libraries have changed and evolved over time, reflecting new information technologies and the constant effort by librarians to reduce barriers to engagement for all ages and cultures.

I understand budgetary constraints and the need to prioritise, but the reduction of opening hours provides a significant loss to the communities involved.

Along with change in libraries and their functions so have communities change. Precariat hours of work, the need for workplace flexibility, perhaps also the need for multiple jobs to make ends meet are common. A reduction in library hours reduces the ability of many to engage. Unfortunately for some libraries are safe places the reduction in opening hours will impact.

Research indicates the negative effects of reduced library hours – even for a few hours. Such a move negatively impacts on civil society. Social engagement, learning enrichment will all be casualties.

I use the Fendalton Library outside of core business hours, I always observe a welcoming environment, the library it is not overly populated by users, but there a good cross range of ages, cultures, and the library being used for a variety of purposes – reading of newspapers, study, use of computers, borrowings, book enquiries.

The arguments, I have made also extend to the proposal to cut the library bus service. The only explicit rationale is the pending end of life of the vehicle. Do we say to an elderly member of society who needs a hip replacement sorry no, your mobility must now be discontinued. No, we ensure support and intervention is provided. We encourage mobility – we sustain mobility to allow life to continue, to be lived: Another vehicle needs to be purchased so a sustainable library service is provider to the community of both current and future borrowers.

In terms of users – reducing the hours is an oppressive response to the need for budgetary reductions. It is crude response and an attack on a core platform of civil society. A library is both functional and symbolic – you may not choose to always use it, but it is there and represents a source of nourishment – literacy, critical thinking, and staff support/guidance in a safe environment. Maximum accessibility is optimal, maintenance of existing hours needs to continue.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.2 Rates

no increases! Have you considered dropping the amount you pay your CEO? How can they earn the same or more than the Prime Minister? What is she doing to deserve wages like that cos we still clearly still have major issues with our roads and water. Christchurch is a mess thats seems to be swept under the rug instead of dealing with it or increasing rates. Increasing rates and paying the wages you do is a big slap in the face to hard working people who are already struggling in these times!

1.3 Proposed changes to existing rates, and new targeted rates  
do not increase rates! Look at reducing your wages instead!

## Our Draft Long Term Plan 2021–2031 submission form

---

**Your details:**

Full name Lance Robin Kidd

**I am completing this submission:**

☒ For myself or ☐ On behalf of a group or organisation *(please tick one)*

Organisation name \_\_\_\_\_

Your role in the organisation \_\_\_\_\_

Do you wish to present your submission at a hearing? ☐ No ☒ Yes *(if yes, you must provide contact details below)*

## Questions to think about when making your submission

### Have we got the game plan right?

Our overarching proposal is to focus on a deliverable capital programme that helps drive our city forward, with particular investment in roads and transport infrastructure and in protecting and upgrading our water networks. We're borrowing for new projects that have long-term value, and ensuring that the debt repayments are spread fairly across the generations of ratepayers who will benefit from them. We're maintaining enough financial flexibility to be able to handle unplanned events, and we're finding permanent efficiencies in our day-to-day spending. We've managed to do all of this while keeping rates increases as affordable as possible.

**Have we got the balance right? Have we prioritised the right things? If not, what changes would you like to see?**

Please do not close Wharenui Pool. I have been using the pool since 1958 and live 2 blocks away from it. Having to use another pool would be a big inconvenience for me as well as the other <sup>older</sup> people who I swim with. I currently use the pool 4 to 5 times a week.

It would also be a shame for the school children to not have ~~the~~ a local pool and have to travel to another pool.

### Rates

We've considered a range of options for how best to achieve what we need to achieve while also keeping the average rates increase as affordable as possible.

**What do you think of this plan for an average residential rates increase of 5 per cent for 2021/22 and an overall rates increase of 4 per cent over the next 10 years?**

## Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

**What do you think of these changes to existing rates, and new targeted rates?**

**Have we got it right? If not, what changes would you like to see?**

---

---

---

---

## Investing in upgrading and protecting our city's water networks

We have a responsibility to provide and maintain the wells, pipes, reservoirs, treatment plans and pump stations for drinking water, and manage the collection, treatment and disposal of wastewater and stormwater.

**We are proposing to invest 41 per cent (\$2.329 billion) of our capital spend on water infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

---

---

---

---

## Investing in our transport infrastructure

We've heard from residents that transport is a top priority. It's also the city's biggest contributor to carbon emissions. We want to give people better options for getting around, whether by car, public transport, on foot, on a scooter or on a bike. We also want to ensure our networks are safe.

**We are proposing to invest 25 per cent (\$1.445 billion) of our proposed capital spend on transport infrastructure improvements.**

**Have we got the balance right? If not, what changes would you like to see?**

---

---

---

---

---

## Rubbish, recycling and organics

In 2020 the Council adopted a new Waste Management and Minimisation Plan that focusses on changing our 'throw-away' culture and reducing the amount of waste we send to landfill. Implementing the actions in that plan are the key drivers of our operational and capital spending.

**We're proposing to spend \$25 million on organics infrastructure (which includes upgrades to the organics processing plant), \$18.5 million on transfer station infrastructure and \$18.4 million on recycling infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

---

---

---

## Our facilities

We're proposing to invest 19 per cent of our capital spend on community facilities. We're also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service?**

**Have we got the balance right? If not, what changes would you like to see?**

Don't close wharenui Pool

---

---

---

## Our heritage, foreshore and parks

Christchurch has a long and proud history of protecting and respecting our heritage. Over the past decade we've carried out a massive programme of repairs and restorations, but we still have some work left to do. In the next 10 years we will continue to restore our own buildings and support private development of heritage buildings. We will also be maintaining and improving our parks and foreshore.

**We're proposing to invest 11 per cent of our capital spend on our heritage, foreshore and parks.**

**Have we got the balance right? If not, what changes would you like to see?**

---

---

---

## Funding for the Arts Centre Te Matatiki Toi Ora

We are proposing to provide the Arts Centre with a capital grant of \$5.5 million. We would do this via a targeted rate that would recover the grant cost over 10 years, and would phase in over two years, so the targeted rate would be smaller in 2021/22 than in subsequent years. We're proposing that every ratepayer will pay this rate and it will be calculated as a number of cents per dollar of capital value.

**Do you support the Council funding \$5.5 million for the Arts Centre?**

**This proposal is currently accounted for in our proposed rates increase. If a decision is made not to proceed, rates would drop by 0.04 per cent.**

☐ Yes ☐ No

Comments: \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

## Funding for base isolation of the Robert McDougall Art Gallery

Canterbury Museum considers the base isolation of Robert McDougall Art Gallery to be a key part of the Museum's redevelopment. In July 2019, the Council agreed in principle to support the base isolation of Robert McDougall Art Gallery at a cost of \$11.8 million, subject to public consultation in the Long Term Plan 2021–31.

**Do you support the Council funding base isolation of the Robert McDougall at a cost of \$11.8 million?**

**This proposal is not currently accounted for in our proposed rates increase. If a decision is made to fund base isolation, rates would increase by 0.07 per cent.**

☐ Yes ☐ No

Comments: \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

## Potential disposal of surplus Council-owned properties

We have a small number of properties, including two heritage buildings, that are no longer being used for the purpose they were originally acquired for. These surplus properties make up less than 1 per cent of Council's overall property portfolio.

**Help us decide their future – what do you think of this proposal to dispose of surplus properties?**

Keep Wharehūi Pool.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Much more emphasis on public transport than cars. I'd like to see private vehicles banned from the city centre (unless there are mobility issues for the driver) and a truly inclusive PT system that runs often enough to make it attractive for anyone to use. Carrot and stick.

1.2 Rates

Fine.

1.3 Proposed changes to existing rates, and new targeted rates

Yes yes yes. Charge for water. It's about time. Water delivery has a cost, so charge for that if you have to, but make all users (industrial, agricultural and domestic) pay for the water they use.

1.4 Investing in upgrading and protecting our city's water networks

Good. But more focus on natural systems to avoid future flooding events. The Red Zone should be wetlands and act as a water reservoir, soaking up storm water and releasing it in drought.

1.5 Investing in our transport infrastructure

Yes to the amount, but get away from the car. Cars destroy communities. How many people talk to other car drivers? Make the city more attractive to people and businesses by removing the cars and making it easier to walk, bike, scoot and PT around. PT within the central city should be free, widespread and frequent (as in Melbourne).

It should be quicker to travel the city without a car.

1.6 Rubbish, recycling and organics

Great. Carry on.

1.7 Our facilities

Libraries are a key part of communities and waste/carbon reduction. They were the thing many of us missed most (after coffee with friends) during Level 4. Please don't reduce hours, even if it means reaching out to the community to staff them at lower cost. Please consult with each community before changing libraries.

1.8 Our heritage, foreshore and parks  
Reduce costs by rewilding more parkland. Involve the local community more to weed/plant. I've proposed this many times in Lyttelton and been ignored and your workers come back over and over again to spray glyphosate to no effect.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments  
HELL YES. One of the best assets the city has.

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
No  
Comments

1.11 Potential disposal of surplus Council-owned properties  
Okay in principle, in consultation with community on a case by case basis.

1.12 Any other comments:  
I hope you really are going to read this and think about it. Thanks.

To: CCC Plan  
Subject: Librray closing hours submission

Categories:

As a frequent user of the public libraries  
in particular the Aranui and Eastgate and South Library

I am opposed to the possible/proposed city plan reduction for the public library hours

1. I frequently use the Aranui Library on a Sunday - it is easy to access and has good car parking on site
2. I often use the South Library between 6pm - 7pm week days
3. I also regularly use the Eastgate Library sometimes on their one night a week late night 7pm closing

If anything, I was hoping the library in the city (Turanga) would eventually go back to being open until 9pm week days  
- as the former city library once was - not being reduced to 7pm

This is one City Council service which I am keen to see not reduced.

Consider my submission to be opposed to any possible/planned reduction in the library opening hours and to removing the Sunday option from the libraries that currently have them open.

Kind regards

Robin Neal  
I am a Christchurch City ratepayer

### Feedback

#### 1.2 Rates

I don't envision that my Salary will increase by 5% in this current year, so I wouldn't want my rates bill to increase by a significant amount, making it harder to afford to live in our house in Halswell.

#### 1.8 Our heritage, foreshore and parks

I don't believe or think it is worth moving the Carrs Reserve Kart Club (\$3.9 million for relocation). It is a club that has been on that site for 60+ years. We will a stone's throw away from the Kart Club, and have never minded the noise or activities that go on there. We are supportive of recreational activities, and knew there was a Kart Club situated when we built and moved in our house on Halswell Junction Road, in Knights Stream Park. The noise level is not excessive, sometimes depending on the wind we can hear Ruapuna Speedway and Racetrack, and large planes taking off from the airport. That is a part of life, and we choose where we live and accept that noise is created by many things.

### Feedback

1.12 Any other comments:

The Sumner Village shared space, Project P1.3.1 of the Sumner Village Master Plan was originally intended to be completed 2022/2023, this has now been pushed back to 2030. Given it is a critical pedestrian connection between the Village and the beach and funding has been set aside, I request the timeframe is reconsidered to complement the existing street enhancements to Marriner Street.

### Feedback

1.1 Have we got the game plan right?

Balance ok

1.2 Rates

Reasonable

1.3 Proposed changes to existing rates, and new targeted rates

Satisfactory, including new targeted rate for Arts Centre

1.4 Investing in upgrading and protecting our city's water networks

Satisfactory

1.5 Investing in our transport infrastructure

I would like to see the public transport (buses) come under CCC

1.6 Rubbish, recycling and organics

Satisfactory

1.7 Our facilities

OK

1.8 Our heritage, foreshore and parks

OK

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

It is an important part of the city's history and amenities

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

Needs to be done to allow future use of building, a desirable outcome

#### 1.11 Potential disposal of surplus Council-owned properties

Reasonable

#### 1.12 Any other comments:

It is a pity that the city's public transport system is not under a city based body, rather than a provincial one. The service needs improvement, particularly more frequent buses. The current infrequent service is a discouragement from using the bus rather than driving.

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.5 Investing in our transport infrastructure

I believe the council has got the balance on money spend in terms of transport completely wrong with far to higher weighting being given to public transport or Bike lanes vs actually improving the roads for how the far majority of people use them in private vehicles

1.12 Any other comments:

The Go Kart track in Halswell has been there for so long, its a complete waste of money to shift it, The Hours of use are in the Daytime and the Noise created is not anything that concerns any of the long term residents, the money could be used in some many different and better ways

### Feedback

1.1 Have we got the game plan right?

I think that you have got things right

1.2 Rates

I think that si reasonable given the significance of the proposed capital gains to the city that we will be able to enjoy

1.3 Proposed changes to existing rates, and new targeted rates

I think this is about right, I agree with the targeted support of the Arts Centre as a vital, central part of Christchurch, and one of the few remaining links between the old (pre-quake) and the new. It si widely enjoyed by a diverse number of citizens and a set of builds I am always proud to recommend to visitors to the city

1.4 Investing in upgrading and protecting our city's water networks

Not being an engineering expert I expect that you have this right. We don't want to be in the same position that Wellington finds itself in in a few years.

1.5 Investing in our transport infrastructure

I think spending more as an example of non-fossil fuelled transport is a must, so think you have this about right.

1.6 Rubbish, recycling and organics

It si crazy that we don't have any way to process our recycling, I would hope to see Christchurch as an example of how to do it world wide rather than the worst city in NZ

1.7 Our facilities

I have no view on this one, except the gallery may need some support over and above how much it is actually used.

1.8 Our heritage, foreshore and parks

I think the parks around Christchurch are a cause for pride in the Garden City and should be managed as well as you can. They are used significantly for sports and recreation so I am sure you have this about right

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
No  
Comments

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

No alteration to Harewood Road. If you want a bike lane for cyclists merge it with the Berm. This would mean taking the grass away and widening it by 1/2 meter at the most. This makes more sense. It would course such congestion on the road which is already very congested at the either time of the day. I would like to know where all these so called cyclists are coming from and where would they be going. The money that would be spent on this makes absolutely no sense at all when other more important matters in this wonderful city need doing.

Eg: finishing all the needy infrastructure from the water mains, sewers and bad roads and drains that DO need to be repaired around the city.

1.2 Rates

If we got more bang for our buck I would not mind. But NOT the willy nilly spending to keep some of you in jobs. NO

1.3 Proposed changes to existing rates, and new targeted rates

No. I don't and until you stop giving our beautiful water away you should in NO way charge for water

1.4 Investing in upgrading and protecting our city's water networks

I hope so

1.5 Investing in our transport infrastructure

I don't know. Electric buses may help. A light rail out to Pegasus, Rangiora and Rolleston Burnham areas on a regular morning and afternoon service. A connection to the city to connect to Colombo Street or Manchester Street.

1.6 Rubbish, recycling and organics

I hope so because we need to do this ASAP

1.7 Our facilities

Yes get rid of the Riccarton Rd Bus Lounges they just trouble

1.8 Our heritage, foreshore and parks

Good

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

What will it be used for?

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

Isn't one gallery enough in our city. Merge them into the one building

1.11 Potential disposal of surplus Council-owned properties

Sell them if you don't use them. But what are the buildings in question?

1.12 Any other comments:

Take a good look at your spending please. It seems that the public have their say but Council seem to take absolutely no notice of what is said or what the public want you to spend the rates on.

### Feedback

1.7 Our facilities

Art Gallery submission

With reference to the the Long Term Plan Public Consultation Document which proposes changes that will affect Christchurch Art Gallery Te Puna o Waiwhetu's level of service in relation to public and school-specific programmes. The Council proposes to:

- Reduce the Gallery's weekly Wednesday late night programme to one late Wednesday a month.
- Reduce the Gallery's public programme and education offering by 25 per cent a year.

I note that the Long Term Plan identifies the issue of constrained accessibility to the Art Gallery on its central city site - for people who live further away from the city centre.

Considering accessibility, it has to be accepted that the Art Gallery and its collections can exist on only one site - the curation of art collections requires a dedicated building in order to safeguard the collection materials. Without such a building it is likely that many of the visiting collections would not even come to the city at all. The Gallery's own collection needs appropriate housing.

I find it illogical that the Council is proposing to reduce two aspects of Art Gallery activity that manifestly provide the greatest degree of accessibility - the education offering and the Wednesday late night programme.

The education programme provides opportunities to bring young people from all parts of the city to the Art Gallery for dedicated engagement activities, thereby explicitly addressing the challenge of accessibility for those who live further afield. Reducing the education programme by 25% reduces this aspect of accessibility by 25%. Furthermore - why 25%? this seems like an arbitrary % - not even corresponding to a single day/week, nor the structure of the education programme on any individual day. If education programmes have to be cut (and I do not accept that this is appropriate or sensible), it would make more sense to make a reduction of a single unit of delivery, which might correspond to half a day per week less than at present (i.e. 10% reduction in personnel time).

Regarding the Wednesday evening programme - from my direct observation, Wednesday evenings are amongst the busiest times in the Art Gallery, attracting more people over a 1-2hour period than almost any other time of the week. So why reduce Wednesday evening sessions at all, let alone by 75%?! That constitutes a drastic reduction in accessibility and will inevitably result in significant reduction in overall attendance numbers, making it even more difficult to justify future support. It would be preferable to close the Art Gallery for a few hours at some other time of the week if staff costs are the issue (e.g. open an hour later each weekday).

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

You say that "A key focus of our Long Term Plan is reducing emissions by making changes to the way we travel, ..."

I agree that this is appropriate.

I would support your completing the city's network of cycleways as soon as possible, encouraging further transfer of commuters from cars to bicycles and other forms of mobility. On that particular aspect of 'making changes to the way we travel', my opinion is that you are not doing enough to incentivise travel behaviours away from single-occupancy car travel - particularly for daily commuting to work or school - and incentivise other modes of travel. And, on that count, why does the city not partner with ECan to make available free wifi on all city bus services?

I would not support the continued high rate of expenditure on streets/roads to increase accessibility for increased car travel AT THE EXPENSE OF reducing the important public/community services that ratepayers wish to access, enjoy and derive so much benefit from - Turanga, the Museum, the Art Gallery, the Wharenui Rec Centre, etc., etc. And also cutting other services that overcome problems of access, such as the mobile library.

In your cost-reducing calculations, have you quantified the scale of impact on users and user benefits? What is the point of improving driver access around city streets when you are simultaneously reducing access to these actual activities - reducing their hours and some of their services.

Furthermore, where is your analysis of the consequences for travel-related emissions of your continued investment in new roads and road repairs? And where is your analysis of the social wellbeing outcomes of reducing access to the range of community services and activities I've mentioned? Where do you even demonstrate that you have considered these aspects?

You argue that your planned investment in this type of infrastructure is motivated in part by a wish to give greater "certainty to the construction and other sectors, and stimulating economic activity." Have we not had 10 years of a construction boom in this city as a result of the 2011 earthquakes? Is it not time to focus the city's attention more broadly when considering how you allocate our rating revenue?

So, please, DO NOT TRIM YOUR OPERATING COSTS of a wide range of important community facilities/activities IN ORDER TO BOLSTER your roading/street maintenance programmes for the next 10 years. I would prefer you REDUCE THE BUDGET for roading infrastructure (I don't include new cycleways in this) and MAINTAIN AT THE VERY LEAST EXISTING LEVELS OF ACCESS to the range of community facilities and services I have referred to.

1.2 Rates

I assume you mean "an overall rates increase of 4 per cent PER YEAR over the next 4 years?"

I would support this ONLY IF THE RATES REVENUE IS RE-DISTRIBUTED IN THE WAY I HAVE RECOMMENDED.

I do not wish to see any more rates revenue spent encouraging private car use in the city. If the Council wishes that, then it should propose a dedicated driver 'mileage levy' so that residents contribute according to the extent to which they use the road/street system.'

1.3 Proposed changes to existing rates, and new targeted rates

If it is acceptable to introduce new targeted rates, dedicated to particular purposes, then why does the council not introduce a targeted levy on all major thoroughfares coming into the city AND also require all shopping malls to introduce parking charges so that the central city is not disadvantaged?

1.4 Investing in upgrading and protecting our city's water networks

I accept that this infrastructure is essential to the health and wellbeing of city residents.

1.5 Investing in our transport infrastructure

See my earlier submission comments above.

1.7 Our facilities

See my comments above.

I reject the logic put forward in relation to the (presumably reduced) levels of use of the library, art gallery, museum and other facilities.

I note that you have provided \$ figures for the levels of spend across infrastructure in the preceding sections but have failed to provide corresponding \$ figures for the capital spend on community facilities and the operational cost savings proposed.

To me, this failure to provide such comparative information is disingenuous and dishonest.

With respect to my earlier submission (i.e. above), I NOW REQUEST that this information be provided by email - specifically annual and 10-year savings in operational costs of community facilities proposed.

### Feedback

1.1 Have we got the game plan right?

I support the creation of the Special Heritage (Arts Centre) rate to support the capital grant to the Arts Centre.

1.3 Proposed changes to existing rates, and new targeted rates

Sounds good.

1.4 Investing in upgrading and protecting our city's water networks

It is a must to get rid of having to add chlorine to the water.

1.6 Rubbish, recycling and organics

All for trying to reduce as much waste going to landfill that makes economic sense.

There is still a lot of education required around what can go into the recycling bin and what can't. The app is a great initiative but the ones that don't really care, won't be the ones that download it.

1.7 Our facilities

Reducing hours that facilities are open based upon low usage times make a lot of sense.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

I support the targeted rate.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

I am not aware of the function of the gallery.

1.11 Potential disposal of surplus Council-owned properties

It makes sense.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I think it all looks about right.

1.2 Rates

if its necessary, I support the increase.

1.3 Proposed changes to existing rates, and new targeted rates

I agree with a targeted rate for the Arts Centre. Its an important heritage facility for ChCh and we all need to support its ongoing viability.

Not sure whether I agree with an excess water rate of 700 litres per day! My concern is for households of 5 plus.

I would support 1000 litres. However, I do agree with conserving our precious water supplies by limiting garden watering.

1.4 Investing in upgrading and protecting our city's water networks

I agree with investing in water infrastructure. Especially upgrading old water pipes and upgrading all water storage tanks on the Banks Peninsula.

1.5 Investing in our transport infrastructure

probably about right

1.6 Rubbish, recycling and organics

I think this is a good proposal

1.7 Our facilities

all good

1.8 Our heritage, foreshore and parks

all good

### Feedback

1.1 Have we got the game plan right?

Overall, it looks ok

1.2 Rates

acceptable

1.3 Proposed changes to existing rates, and new targeted rates

yes, targeted rates makes sense

1.4 Investing in upgrading and protecting our city's water networks

this is essential service and one that I believe lies very much with local government

1.5 Investing in our transport infrastructure

we have to do something to reduce carbon emissions, and transport is a large part of this. It is unsustainable to continue to move in cars the way we have become accustomed to - electric cars is a step but not the whole answer, and continuing congestion and costs of roading means that we must encourage alternative transport modes

1.7 Our facilities

we have to be realistic re services.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

Arts centre is success storey and very important part of the city fabric. I fully support this. One always has to prioritise things but Arts centre is up near the top for me. Far more important, for instance than the cathedral restoration.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

Before charging for water as I disagree with this section , the current allowed usage is 912 ltrs per day and now it getting reduced which to me makes this a revenue scam.

I strongly suggest a monitoring program and education program first as I have no idea and no communication that my property could be up for water rates until one day I get a bill.

I am scared and frightened that the council will bring this in with consulting with big users or someone who doesn't know they a big user

If we need to pay for infrastructure , this should be in our rates , leaks should be identified and people should be consulted.

My concerns are

1/ Has the council consulted with large water users, have they tried to educate people to conserve water? If I was one of them i have never been consulted on high water usage.

2/ I have 678sqm section , my neighbor has 500sqm section , should I get more of allocation? what is the average section size?

3/We have caveats in Prestons where we have approved plants -green affect if these die because lack of water and my grass has to be re sown who is going to pay costs and legal fees if rip out all the plants .

4/Porous land of the east requires higher daily water allowance before penalties kick in, looks like council don't care just send the bill

5/ I rang council and they could not tell me of last meter reading or even how to read a meter

6/ Is there going to be warnings of excessive use if water rates come as I am paying 5k in rates and cannot afford anymore costs. Are we going to get bill that we can't pay for?

7/ Why is it a double take? It was based purely on capital value of your property. Now its that plus what water you use per day.

8/ We have 4 adults in our house , the dishwasher is daily washing machine 9kg 2 x daily , my daughter 30 mins in shower due to long days on road management

9/My section shares with council land and I am up keeping council land, I could get penalized

I do not support water rates as Christchurch is the Garden City and we have had certificates from CCC saying we have the most improved properly in area and once again no education process.

### Feedback

#### 1.1 Have we got the game plan right?

I think we need to prioritise our response to climate change. I think it's absolutely vital that there is passenger rail between Rangiora, Rolleston and around the city. Through doing this we will see massive increases in patronage on public transport as at the moment the buses are very unreliable, they will be 20 minutes late for 5 days and then one time they will come early. It is not good enough and makes it really hard to use the bus services.

I also think we need to prioritise getting people back into the city, rather than retailers going into the suburbs. Things like the stadium need to hurry up because they are absolutely crucial to the city and encouraging people to go into the city. As well as this I think it is best to continue the great work of the Terrace, Cashel St Mall and Riverside, they are the real heart of the city and I think it would be good to continue to expand off of this such as along the river either way. Because once you get out of that area at the moment there isn't much.

#### 1.2 Rates

I think as long as the money is going to good use, it is good that we are investing back into the city.

#### 1.3 Proposed changes to existing rates, and new targeted rates

I think this a good idea especially the water tax one as water is a limited resource but people aren't acting like it.

#### 1.4 Investing in upgrading and protecting our city's water networks

I feel like 41% is a lot however if it is needed that is fair enough and hopefully by the money you will get from the new water tax you can fund a bit of this.

#### 1.5 Investing in our transport infrastructure

It amazes me that a city like Ōtautahi still does not have passenger rail. It is the second biggest city in the country and has a railway line running straight through it. I think we should put on rail between Rangiora and Rolleston with stops near Riccarton Rd where you can access light rail that will take you into the bus interchange and make it a loop so then it goes down Colombo to Moorhouse Ave and connects there.

#### 1.6 Rubbish, recycling and organics

I would like to see more education as to what plastics you can recycle and what and just more education in general about our rubbish systems.

1.7 Our facilities

Yeah I think that is about right but lets act with some speed because by the time the stadium is finished a whole generation will have missed watching rugby at a proper stadium during their childhood.

1.8 Our heritage, foreshore and parks

I dont really care about our heritage personally especially if it is about colonisers. I would love to see much more things around the city showing off our diversity and Māori heritage. Lets not been known on google as 'a city known for its English heritage' anymore it looks like we are just a town of racists if we dont do anything more. Further that lets change the name of the city back to its original name, Ōtautahi.

Re: Proposed Water Charges.

Dear Sir,

You will obviously be aware that the Council Planning / Rates division, has recently made the suggestion that the Council is considering charging city ratepayers, for water usage.

There are no doubt arguments for and against this proposal, both within Council, and from ratepayers in general. I am instinctively opposed to this, and would therefore like to submit my concerns regarding this proposal, as follows:

- Firstly though, I have to say, that in a smaller number of cases, mainly commercial, there are possibly valid reasons to charge for usage. For example, it has also been well publicised that some companies, for little to no cost, take large amounts of our water supply, and profit from that usage.
- However, from a personal point of view, I would directly oppose the proposal for Council to charge domestic ratepayers for water usage. My reasoning, while somewhat selfish, is nevertheless very valid. I am a superannuitant, and like many of us in this category, and being retired, find a great deal of pleasure and purpose, in having a home garden to enjoy. Obviously, in order to do ones gardening justice, there is an undeniable need for adequate irrigation. It is not a matter of hosing ones garden all day, every day, but a knowledge that this usage can be done freely, as required, without the added mental burden of cost!
- There are undoubtedly other sectors of our community, that would personally oppose charges, based on their own personal situations?

I would therefore ask that the Council consider my opposition to this proposal, based on my argument above, and make every effort to allow Christchurch domestic ratepayers the freedom to use water , unabated by extra cost, as we have always done.

Yours Faithfully,

Mike Graham,

CHCH

### Feedback

1.1 Have we got the game plan right?

Transport needs a total rethink NOW for the future. Why big buses? Why not tiny buses? Get ready for driverless tech. Why not an uber for every Metro card holder instead of a big bus? Think crazy and get it right. Same old same old isn't right. Metro buses are a drag for the rider, the rider that isn't riding ( so, so many), the taxpayer , the environment, the capital cost, the driver ( so bored) and the animals that aren't allowed.

1.2 Rates

Shape up the transport and then we are okay with this.

1.4 Investing in upgrading and protecting our city's water networks

Let's also stop the pollution before it gets in the aquifer and rivers!

1.5 Investing in our transport infrastructure

Transport needs a total rethink NOW for the future. Why big buses? Why not tiny buses? Get ready for driverless tech. Why not an uber for every Metro card holder instead of a big bus? Think crazy and get it right. Same old, same old isn't right. Metro buses are a drag for the rider, the rider that isn't riding ( so, so many), the taxpayer , the environment, the capital cost, the driver ( so bored) and the animals that aren't allowed!

1.6 Rubbish, recycling and organics

Get industry to stop messing around with packaging . Industry should be paying heaps of money for disposal not the consumer! Change up the packaging away from plastic, away from TOO MUCH packaging.

### Feedback

#### 1.2 Rates

Personally, I would support even larger increases if it allows more projects to be undertaken.

#### 1.3 Proposed changes to existing rates, and new targeted rates

Christchurch and Canterbury have had their fair share of challenges in the past ten years which have had a financial and emotional impact on the community.

At times of uncertainty, people turn to the arts and to the familiar for comfort, distraction, perspective and inspiration. The Arts Centre is one place that fulfils this function and remains dear to many Cantabrians. As a well-known and long established cultural institution, the Arts Centre supports the community of Christchurch, Canterbury and New Zealand by providing a space for creative people to practise their work, for the public to experience the performing and visual arts and for people of all ages to explore their own creativity through workshops and hands-on activities.

It also forms part of a brilliant historic area that includes the Canterbury Museum, Hagley Park, the Botanic Gardens, Antigua Boatsheds and Christ's College. This whole area attracts many visitors, and to have a major part of it remain hampered in its restorations reduces the attractiveness of the rest. Were the Arts Centre to stagnate and not have any further restoration, or even to close, it would be a real loss to Christchurch.

For many visitors there are strong memories or personal associations with the Arts Centre from its previous role as an education hub.

In my own volunteer work there as a visitor services host I often meet visitors who come specifically to the Centre to see how the restoration is going, to visit the place where they studied or to make their first visit to a place known throughout the country.

Some of the comments I have received include:

"I did my School Cert in the Great Hall"

"I studied Art here at the School of Art then went to London where I had a career starting out painting theatre backdrops"

"I studied Chemistry here, then did my PhD and had an academic career in Melbourne"

"I have a connection here. My PhD supervisor's supervisor's supervisor was a student of Rutherford"

"It's so good that it has re-opened and is still going"

Even those who do not visit regularly like to just think that the Arts Centre still exists as part of New Zealand's cultural patrimony. Its future must therefore be secured. The proposed \$5.5m capital grant will help to create a solid financial basis through tenancies in restored buildings, thus enabling the Centre to grow and thrive and continue its activities and services to the community.

### 1.5 Investing in our transport infrastructure

This is an important item of expenditure. Yes to more off road bike paths to enable safe access to the CBD, yes to more investment in public transport and yes to fewer car parks in the CBD.

### 1.8 Our heritage, foreshore and parks

Parks and foreshores are important recreational areas and deserve as much investment as possible.

### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

### Feedback

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Arts Centre is a unique collection of significant heritage buildings; unique for Christchurch and for the whole nation. Too many of our heritage buildings were lost as a result of the earthquakes. With the Cathedral at one end of Worcester Boulevard and the Museum at the other, the Art Gallery, Coca and the Arts Centre are complementary parts of our city's Cultural Precinct. The ongoing restoration has uncovered treasures in the original construction that we were not aware of and has enabled very significant refurbishment [for example The Great Hall]. The innovative uses to which the Arts Centre is now being used is testimony to the central place it plays in the social, cultural and economic life of our city.

There is still more to be done to restore the Arts Centre to it former glory and I strongly support the grant of \$5.5million over the next three years. I have to say I was surprised that the Arts Centre receives no financial support from from the City Council. To my mind this shows the success of the Arts Centre Trust in achieving what they have done to date.

### Feedback

Our facilities

We're proposing to invest 19 per cent of our capital spend on community facilities. We're also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

1.7

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service? Have we got the balance right? If not, what changes would you like to see?**

I am      years old      and my 'have a say' is regarding the Te Hapua: Halswell Centre. I am a high school student and a member of the      which trains in one of the rooms the facilities provide. We have kids classes from 5-5:45, 5:45-6 every Tuesday and Thursday evening. The library provides a place for families to wait for their children who are in these classes as sometimes we have siblings, where 1 child is in the mini kids class 5:45 and an older sibling in the older kids class from 5:45-6:30. Shutting the Library at 6:00 would be a huge inconvenience to the children and to all the families who need to wait with their children until the class is finished. Children who finish their classes and need to wait for a parent to pick them up wouldn't have anywhere to wait and this is a safety issue for them as it can get dark around that time (6:30pm), not to mention these children are in dobok (training uniform) which makes waiting outside challenging because wearing a dobok in public without permission of the instructor is against the rules and has safety risks for that child. Another reason is that I teach from 5-5:45 and then spend 5:45-6:30 in the library completing homework from school. I wouldn't be able to do this if the Library was to be shut at 6:00pm and therefore it would be hard for me to be as involved in my sport as I am. The library is a safe, family friendly space for myself as a teenager and for the other teenagers and students at our club. I see a lot of other students in there studying because

sometimes students come from households where peace, safety and low-level noise isn't available to them. Shutting the library at such an early time is creating more problems than benefits for myself, my club, the children and families of my club, other students like myself who need a local library to focus on school work or to meet with friends to study together. In an ideal world you could get home from school, arrive at the library around 4-4:30 and study till 7. Only being able to study until 6 really isn't enough time and could and will discourage people to make the trip to the library if it shuts 3 hours after school finishes. If the Christchurch City Council is wanting to cut the times shorter maybe they should spend some time at the library themselves observing the amount of people of all ages still there at 6:30 for numerous reasons. People do pay for this Library which is a fantastic facility so give them time to use it. Please reconsider the new hours that you would like to put into effect because for myself, my students and the families you will be making studying and training a lot harder. Please reconsider your times. Kind regards Ava Sheehan.

## Te Mahere Rautaki Kaurera - Our Draft Long Term Plan 2021-31

### Submitter Details

**Submission Date:** 26/03/2021

**First name:** Natalie **Last name:** Bridge

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.4 Investing in upgrading and protecting our city's water networks

Some collaboration with ECAN would be nice to see. I see regular complaints regarding the businesses who profit off selling Chch water. I understand this is an ECAN issue but if the city council were able to work with ECAN so Chch residents don't feel as though they are being side-lined for large overseas companies I think perceptions of the council may improve.

1.5 Investing in our transport infrastructure

I would like to see more focus on public transportation over bike lanes. I am unable to bike to my work (and frequently hear peoples complaints regarding new inner city bike lanes), If public transport, i.e. buses and trams, were more accessible I would be more inclined to utilise those over driving into the city.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Arts Centre has provided my business the opportunity to grow in an arts focused environment. The community atmosphere between tenants is mutually beneficial as we often work together to bring more locals into the complex.

The arts industry is slowing gaining more recognition for the positive way they impact people from all walks of life. The Arts Centre is a wonderful organisation which supports different people and business who work to create more opportunities for people to be involved in Art.

The Arts Centre has a long history in Christchurch and I hope it will remain a focal point for locals and tourists alike.

1.11 Potential disposal of surplus Council-owned properties

Dispose of how?

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.11 Potential disposal of surplus Council-owned properties

I would like to register my disapproval of the plan to dispose of the following property:

27 Hunters Rd, Vacant Land, Pt Lot 1 DP14050+ +

This is a large area of land that is used frequently by many residents of Diamond Harbour. Locals have spent a considerable amount of time replanting and installing footpaths for the benefit of the community. I am led to believe that if this land is disposed of in the way you are proposing, it will remove the ability of residents to have any meaningful input into its development. This is totally unreasonable bearing in mind the location of the land within this special community. I don't have objections to the development of the land, but it must be done with meaningful input from the many residents that will be impacted by such development.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.11 Potential disposal of surplus Council-owned properties

I am writing in relation to the proposal to dispose of the land as described as 27 Hunters Road, Vacant Land, Pt Lot 1DP14050 ++, 12F/538, 390,222 sq metres.

I request that this land be removed from the LTP and fast track disposal.

Further consultation with the community should be taken and proper consideration given as to the future of this land. Many locals in Diamond Harbour tend native vegetation on this land. They have built and continue to maintain walking tracks for the benefit of all Diamond Harbour residents. The land at present is an asset to the community, much of it being a beautiful and peaceful place of recreation.

Again I urge you to involve the community in further consultation and remove the land from fast track disposal.

Thank you.

### Feedback

1.11 Potential disposal of surplus Council-owned properties

I am writing in relation the disposal of the land in the Diamond Harbour area. I have lived in DHB (and indeed live adjacent to the poposed lot) for the past 30 years. It has always been a peaceful sleepy village with a rural feel. Recently (in the past couple of years) some of the locals have been very busy planting natives and constructing walking tracks in the very area proposed for sale. These tracks are incredibly well regarded and utilised.

Please I urge you to consult with the local community before the disposal of this most loved and great natural asset of our community.

### Feedback

1.1 Have we got the game plan right?

Please ensure environmental concerns are properly taken into account

1.2 Rates

Unfortunately we do need an increase, but remember the people on fixed incomes!!

1.3 Proposed changes to existing rates, and new targeted rates

You MUST support the Arts Centre - it is unique in NZ.

1.4 Investing in upgrading and protecting our city's water networks

WE need the pure water standard we used to be proud of - please enhance this!!

1.5 Investing in our transport infrastructure

More buses- & rail!!

1.6 Rubbish, recycling and organics

Yes

1.7 Our facilities

Libraries / info services are the key elements. Please maintain at least to the current standard.

1.8 Our heritage, foreshore and parks

Yes

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

Please look after this - so much has been lost due to EQs

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

1.11 Potential disposal of surplus Council-owned properties  
Don't sell to overseas interests.

1.12 Any other comments:

I am appalled at some of the derelict building both in the commercial sector and residential, which are allowed to be in use - or not, at a very poor standard. Why don't we regulate to bring these property owners into line?

### Feedback

#### 1.1 Have we got the game plan right?

There should be more public transport available and an easily accessible ferry from Diamond Harbour jetty. Thankfully there is to be a pontoon which will work much better for elderly and prams. Parking access should be made bigger as again pushing a pram up the hill or asking elderly to walk up the steps and hill is too much for some. Small shuttle bus would solve need for parking.

Something to replace Godley house please!!!

No house building on land outlined in this proposal. Much prefer a reserve as tracks have been made over time for children to walk to school. Very community driven walking track construction and planting has taken place and I strongly disagree with the land outlined being used for residential development.

#### 1.2 Rates

living in a city struck by quakes it has seemed very unfair to have rates rising so much over the years. Diamond Harbour has been a bit of a backwater with little to no infrastructure and the one thing the community keeps asking for...to have Godley house or something similar reinstated ...seems to fall on deaf ears at the council. Please if you're going to raise the rates, please help develop the infrastructure to cope with the increased population here before trying to develop more residential homes.

#### 1.3 Proposed changes to existing rates, and new targeted rates

WATER is an essential human need! It is the council's priority to provide its citizens with clean drinking water. Why should we need to pay extra for that essential fundamental right!

The Arts centre is a jewel in the crown of Christchurch city. Rate payers should not be targeted for upholding the running of this building. It should source lotto funding or some events fundraising of it's own to survive.

1.4 Investing in upgrading and protecting our city's water networks  
As I said earlier it's a fundamental right to drink clean water. Climate change and agriculture waste needs to be addressed. If the money needs to be spent to ensure our right to clean water then it needs to be spent.

1.5 Investing in our transport infrastructure  
train from Lyttelton to the city would be awesome.train from the city to Rangiora would be awesome. Public transport is the way of the future.

1.6 Rubbish, recycling and organics  
Yes sounds good

1.7 Our facilities  
Bus services are important to communities so I think bus lounges should be maintained

1.8 Our heritage, foreshore and parks  
yes you have got balance right

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

No further significant investment is needed in public transportation. additional investment in mass transit is needed in Christchurch. In the short term this will cost a lot but the investment will reduce long term costs

1.2 Rates

rates can be raised even further. New Zealand generally and Christchurch specifically have some of the lowest levies of local and regional body taxation in the world. incrses in rates will allow for significant long term investment in the city that is needed

1.3 Proposed changes to existing rates, and new targeted rates

Targeted water rates would not be needed if a approtrat overall rate rise and investment in infustructor occurred

1.4 Investing in upgrading and protecting our city's water networks

you should be investing more now to account for future growth.

1.5 Investing in our transport infrastructure

again this investment is not significant enough to make any substantial difference. more long term planning into mass public transportation e.g Light rail is needed.

Also currently a large problem is not the investment in transport but the implantation, not enough is done to adress and tap into potenal demand e.g. transport from Hornby to Lincoln takes 2 bus rides and around 40 minutes where as its 15 minutes by car. More money will not solve implementation issues

1.6 Rubbish, recycling and organics

The investment in facilities are good but not enough is done to understand the real consumption of people in the region in the first place. if things are not easy to recycle it doesn't matter if you have the facilities

1.7 Our facilities

Some of these changes are Short term.covid can not be the driver for a long term plan.

1.8 Our heritage, foreshore and parks

the current issue with this investment is the acessability of these facilities. more needs to be done to link parks to public

transportation ans to ensure that usage increase

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes

Comments  
A even larger investment is needed. this should be part of the core Budget and not a targeted scheme so that once established ths funding is always available for sustained development

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes

Comments

1.11 Potential disposal of surplus Council-owned properties  
the property should not be sold but rather made available in some form for housing redeployment converting then renting the propertys would be a better option

1.12 Any other comments:  
as indicated mode investment is nedded and currently this plan is not really rhat long term.

### Feedback

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

I fully agree to the proposed funding for The Art's Centre. It is such an important and beautiful asset of Christchurch and without this funding as a whole it couldnot continue to function.

I, like everyone else was devastated to see the damage it suffered as a result of our earthquakes and I watched with great interest the amazing and beautiful work carried out by those wonderful workers. I regularly attend the Monday concerts held in the Great Hall and feel so privileged to be seated there enjoying local talent. Only this afternoon my cousin who was visiting from Auckland couldn't wait to tell me that he had visited The Arts Centre and how stunning The Great Hall is.

It is a very worthy recipient of the funding - we cannot afford to see the demise of this beautiful and historic centre which is dearly loved. The small increase in our rates is of no consequence . I much prefer funding be provided here - the funding given to the cathedral was a complete waste of our money. A new and modern cathedral would have been preferable.

### Feedback

1.5 Investing in our transport infrastructure

Hello

I am writing to you today regarding something I feel strongly about and so do many other residents of Christchurch. something many people think should of happened years ago. This email is tied into the next 10 year spending plan. WHY is there no everyday public transport train system. The idea is simple. A public transport system set up using electric trains running from Ashburton through Rolleston to Christchurch CBD and also a route from Rangiora to the CBD with stops along the way to pick up and drop off passengers. There could be two main hubs in Christchurch city allowing close stations for those business hubs those being addington and somewhere along Moorehouse ave. Because the way the world is going electric trains would be great by cutting emissions down as many people travelling from these places only come to sit behind a desk or retail requiring no need for a car other than transport unlike tradesmen and other job fields. I feel this would cut down traffic, emissions and accidents on roads. The next question would be how do these people then get to work? Simple, the train stations could house a secure bike storing facility. This would consist of lots of storage units the width of a bikes handle bars to store the bikes vertically with a hook on the wall to secure it. this would be a pay to store system. All lockers can only be accessed by a swipe card given to the renter of the locker making it safe and stress free. I feel although it would be an incentive to get people biking and use all those new cycle ways that aren't really getting used. Other benefits would be the transport being used in the weekends by families and friends going to see the wider Christchurch area, along with attracting more people into the city for events eg a rugby game or concert. The city is only getting wider and crazier. Its a big investment but well worth it in many peoples eyes.

Thank you for your time I look forward to hearing from you and happy to assist with more information/ideas on how this would work.

### Feedback

1.1 Have we got the game plan right?

I would like the land known as 27 Hunters Rd, Diamond Harbour to be removed from the LTP and instead disposed off following consultation with the community board. My primary concern is the loss of "Sams" and "Morgans" gullies. These sites are being extensively reforested with native vegetation and my understanding is they will one day become reserves. As an active member of the reforestation group, and a proud father who enjoys walking the tracks with my boys I would hate to see all the good work go to waste only for a few houses to be built.

I have no problem with the sale of the flat useable land for residential building, just not the reforested gullies.

### Feedback

1.1 Have we got the game plan right?

i do not think the plan sufficiently values the contribution the arts and culture make to the community. To build a great little city that the young people of today will be proud to live in tomorrow, the plan needs to give more weight to arts education and opportunities.

1.2 Rates

Overall, yes. We can't build a great little city without investing in it steadily.

1.3 Proposed changes to existing rates, and new targeted rates

i strongly support tge soecial funding of the Arts Centre to finish the restoration and open fully. Along with monitoring water use and charging for excessive water use, please cancel all contracts to bottle our water for export.

1.4 Investing in upgrading and protecting our city's water networks

balance looks good

1.5 Investing in our transport infrastructure

cut the number of car parks in the city and disincentivise people from moving in and out of the city in a car containing one person. Make all buses attractive by installing free wifi. Increase bus lanes. Keep routes sensible and fares low.

1.6 Rubbish, recycling and organics

Has to happen. We must increase the emphasis on reuse, recycle and reduce.

1.7 Our facilities

please do not cut the education programmes, especially for school aged children, at the Christchurch Art Gallery. These children are the future users of arts facilities and we need to grow the future audience. The arts education programme is outstanding. It is highly valued by schools. Primary schools, in particular, struggle to provide stimulating arts programmes that meet the expected outcomes of the New Zealand Curriculum. Please continue the support for low decile students to engage in arts programmes.

1.8 Our heritage, foreshore and parks

yes. Good balance.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

i support this very strongly. This is a huge asset for the city and completing the repairs should be prioritised.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments  
and get it back into use as a gallery space.

1.11 Potential disposal of surplus Council-owned properties  
it sounds feasible but do support tge renewal of heritage buildings. We cannot afford to lose any more heritage buildings.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Although it is a tricky balance, I believe that the plan largely allows for the basic infrastructure to be maintained while also planning a vibrant city of the future. Please be bolder about managing climate change and the environment by cutting use of petrol and diesel transport.

1.2 Rates

Rates rises are inevitable if we want the city that Christchurch could and should be in the future.

1.3 Proposed changes to existing rates, and new targeted rates

I am a strong supporter of the targeted rate to support the ongoing repair and operation of the Christchurch Arts Centre. I also support the funding of other heritage buildings that need repair and the limits on water use via excess water charges. .

1.4 Investing in upgrading and protecting our city's water networks

Yes. Keep to the goal of returning Christchurch to chlorine free water.

1.5 Investing in our transport infrastructure

I strongly support the provision of safe, accessible public transport and encouragement of walking and cycling. Please restrict the number of open air carparks in the central city - there is enough capacity in the parking buildings, both existing and planned. Christchurch people need to be weaned off the concept that they are entitled to free parking right outside the premises they want to visit. There should be lanes for the use of cars with multiple passenger. Put free wifi on all buses. Explore the rail corridors for fast commuting from Rolleston and Rangiora.

1.6 Rubbish, recycling and organics

OK

1.7 Our facilities

I strongly reject the cuts to the education programmes at the Christchurch Art Gallery. This is an excellent programme that supports the provision of arts education in schools and in the community. It is essential to give our young people a love of the arts to grow the audiences of the future.

1.8 Our heritage, foreshore and parks

Please accelerate the development of the red zones - it is a very depressing look for Christchurch - wastelands.

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

roading is important but youre making the roads narrower and now its just traffic jams, not to mention the reduced speed limits. Its nonsensical.

id like to see improvement to the red zone along the river. Also fix New Brighton area, the shopping centre needs new life.

get the water networks back to what it needs to be to get the water that we once had.

the new highways are great.

But focus in what was broken in the earthquake.

1.2 Rates

i dont mind increasing the rates but the council spends it on stupid things. Forcus on fixing what was broken in the earthquake.

1.3 Proposed changes to existing rates, and new targeted rates

Itemising rates to show transparency is a great idea.

Take a leaf out if your own book, with regards to watering parks! Some council parks water in the middle of the day at the hottest point and also during raining days. Ie Linwood Park. Lead by example.

The art centre should be open for all people. But Ive only gone twice in my lifetime, its not a priority!

1.4 Investing in upgrading and protecting our city's water networks

yes get our water back to what it was

1.5 Investing in our transport infrastructure

Have you ever seen a full bus? People just arent using them, its not working. Yes fix the roads, some newly developed areas dont even have pavements ie Prestons subdivison to walk, scooter or ride a bike safely down Marshlands Road.

1.6 Rubbish, recycling and organics  
agreed.

1.7 Our facilities  
its a shame to lose these hours and service, no doubt jobs also. Make sure to not forget English words on the front of Libraries to make them identifiable- new town library, if i jadnt been taken there by my daughter i wouldnt have known it was a library.

1.8 Our heritage, foreshore and parks  
  
privately owned heritage buildings should have separate rules, that they need to be maintained and jot dismantled by the private owner like in Britain.  
  
they need to stop putting rubbish dumps close to the foreshore, thats a future issue nobody wants.  
  
it is wrong for the continued pollution to be piped into the Waimak River by the old road Waimak bridge. It had something to do with the meatworks, you want to clean up the water start by renewing some of your decisions.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
No  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
No  
Comments

1.11 Potential disposal of surplus Council-owned properties  
only if sold at true market value, the council has a habit of overspending purchasing properties ie heritage property in Akaroa. And selling propeties at a loss, under market value

1.12 Any other comments:  
there are too many surveys, make a decision and get it done. The council ususally just does what it pleases and spends money on things that only benefit a few rather than the masses. Stop buying artwork, do not waste money on moving the epitaph war memorial beside the catherdral. Waste of money, leave it where it is, in its rightful place!

### Feedback

#### 1.2 Rates

To counter the land banking for the bare spaces in the centre of the city, I would like to see an increase in rates on the bare land value with a corresponding reduction in the rates on the value of improvements. This would encourage development in the central city and reduce the ease of parking on these bare lands. This would bring about a reduction in the traffic volumes as people would tend to use public transport for the commuting of city workers and improve parking for shoppers.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.2 Rates

To be honest, it should be more. 4% is not going to be enough.

- The horizontal drinking water structure is a major concern and the city needs to upgrade that at enormous cost.
- The bus service should be given a greater boost so that people really do find it to be **the** attractive alternative
- Heritage and parks should get a greater spend as we try to regather ourselves and make the most of the opportunity to nurture a diverse community of assets that the whole population can share and celebrate.

#### 1.3 Proposed changes to existing rates, and new targeted rates

The Arts Centre targetted rate should be increased to hasten the completion of that landmark heritage project.

The excess water rate should kick in a lot lower - say 600 litres per day. If the average usage is 540 litres per day, then lets educate, through their wallets, people who take so much water that they can reduce water usage (and therefore reduce overall demand and pressure on the Council to provide not only excessive amounts of water to existing households but also to make it easier to meet the demand of new households both in the City and in Greater Christchurch.

#### 1.5 Investing in our transport infrastructure

There does need to be a stronger financial commitment to the bus service. It must become attractive to more users, in and around the city and into Greater Christchurch.

I would still like to see

- a free inner city green bus service, especially if there is a rise in commuter trains from Rolleston/Rangiora
- more of the inner Four Avenues streets served by bus routes coming from the suburbs (I'm not a fan of so many buses using Manchester Street to go North and West or South and East when they could use for example Montreal/Durham), encouraging people working near those arterials to leave the car at home or at a park'n'ride

#### 1.7 Our facilities

Good to see Riccarton Rd Bus lounges reduced; even though I want more buses, that has always seemed excessive.

Te Puna o Waiwhetu should become a more prominent and promoted cultural hub (especially if the Robert McDougal project is mothballed - see later)

#### 1.8 Our heritage, foreshore and parks

Congratulations on many of the projects worked on so far: the Victoria Square, some of the rotundas, the river bank projects are all a great credit to the designers.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

This Arts Centre heritage project is the most obvious one to complete. That unique collection of buildings could become a major drawcard again (it may even qualify as a UNESCO World Heritage site in conjunction with Christ's College and the Canterbury Museum) but more importantly, it is a major symbol of hope in restoration in a city where there are still a lot of half-cocked projects.

We are not going to get a Cathedral in the Square for decades, we are not going to get a Provincial Building for decades. The Arts Centre can be one major structure that could be completed in four - five years if funded adequately.

Please throw \$15 million at it, get it done, and create a suite of buildings which, collectively, will represent real heritage progress and which will in its entirety be a far more viable commercial proposition than the half-baked sorry site with its broken teeth that make it singularly unattractive over much of its site for the foreseeable future.

The progress in the west of the site needs to be hastened across the whole complex, making it an attractive destination and a prized asset for commercial businesses, commercial residences, commercial arts uses - a complex bringing vitality to The Westend.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

Whilst I understand the need to increase museum and gallery space at the Rolleston Avenue site, we do have an Art Gallery with full base isolation that should assure international touring collections. This Robert McDougall extension component to the refurbishment of the Canterbury Museum project should be deferred, releasing further funds to complete the Arts Centre Te Matatiki Toi Ora.

The museum upgrade in its existing footprint should go ahead so that the neo-Gothic building component can be enhanced. That will link well with the neoGothic collection provided by Christ's College, the Arts Centre collection and the Museum.

Any money destined for the Robert McDougall should be re assigned to the speedy completion of the Arts Centre heritage site.

If there is a need to have more space for art, can we not use part of the Arts Centre (say the Court Theatre building or the Southern Ballet studio) as exhibition space for the museum, or perhaps rotating exhibitions through the new Ravenscar boutique?

### Feedback

1.1 Have we got the game plan right?

Balance appears correct

1.2 Rates

Accept this as inevitable

1.3 Proposed changes to existing rates, and new targeted rates

Don't believe we should have a excess water rate when Water bottling plants in Belfast are exporting and selling water to the Chinese.

If Belfast is in Waimakariri District Council this should be included in Christchurch City Council area as part of a Super City.

1.4 Investing in upgrading and protecting our city's water networks

Fine

1.5 Investing in our transport infrastructure

Fine

1.6 Rubbish, recycling and organics

Fine

1.7 Our facilities

Don't believe in reducing open hours for libraries for the very little in cost savings.

Closing an libraries an hour earlier means less library access for working people at the end of the week days.

School pupils will have less access time for research.

Lees advantaged citizens will have less access times to library computers.

Less access to library toilets particularly in areas like Sumner where other Council toilets are substandard along the beach boardwalk.

1.8 Our heritage, foreshore and parks  
Fine

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments  
A Super City concept would also ensure Rate payers from Selwyn and Waimakariri districts would also contribute to the facility.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

1.7 Our facilities

Every term we attend classes at the Christchurch Art Gallery with our home education group that is made up of over 230 families.

The classes expose our children to art, information and lessons that are hands on and dearly loved by the children in our community. Reducing the number of classes will mean that many children will miss out on visiting the art gallery and miss out on exposure to New Zealand artists. The educator Bianca at the art gallery does a wonderful job inspiring our students to develop their creative abilities.

### Feedback

1.12 Any other comments:

i am generally happy with the proposals however not with the sale of land without the usual consultation process in Diamond harbour. The land in two local gullies is being looked after by locals - regenerating native trees. The land is steep and rugged and not suitable for development so should be gifted to the community to continue to look after for generations to come. The paths are used by local kids to get to school and to play on. They are also an added attraction to visitors to the area and are safer than the cliff tracks.

### Feedback

1.1 Have we got the game plan right?

I support an additional level for the Arts Centre.

Cynthia Hawes

1.2 Rates

I agree with it.

1.3 Proposed changes to existing rates, and new targeted rates

I agree with it.

1.4 Investing in upgrading and protecting our city's water networks

I haven't enough information to comment on that.

1.5 Investing in our transport infrastructure

I am in favour of public transport (except the terrible waster of repainting the buses!!)

1.6 Rubbish, recycling and organics

I am not well informed enough to comment on that.

1.7 Our facilities

I support financial assistance for the libraries. I do not wish to see more Lego or playgrounds in libraries however - please focus on books, whether hard copy or electronic. The Art Gallery needs variety - currently it is dull and there should be changes in the exhibits in order to encourage repeat visits.

1.8 Our heritage, foreshore and parks

I am not sure what our 'heritage' is - if it is heritage buildings, I support funding for them. Parks are essential in the city.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes  
Comments

1.11 Potential disposal of surplus Council-owned properties  
I can't comment, as I do not know which buildings are in question.

1.12 Any other comments:

Please support the Arts Centre. It is the most significant heritage area of the city, and should be preserved. Money for the arts should otherwise be directed to the the Art Gallery. I do not think that any payments for "street art" are justified - it is generally of low quality, and the money would be better provided to the the Art Gallery.

On the whole, the City Council achieves a reasonable balance in its spending. It must be very difficult to please everybody.

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I feel that cutting the proposes changes that will affect Christchurch Art Gallery Te Puna o Waiwhetū's level of service in relation to public and school-specific programmes would be negative. As a family who homeschool, feel these informative, engaging and diverse workshops offer my daughter an experience that I would not be able to offer her. She receives excellent tutoring set in a key cultural feature on the Christchurch landscape - a place we hope she will develop a lifelong connection to. Creative thinking and practice are key skills in the current global climate and fostering them in a positive public space is something that should be supported.

1.2 Rates

I think that we all need to contribute towards our city functioning efficiently for everyone who lives here - it should be done with respect for the environment, all members of our community and our wellbeing. I am not opposed to rates increases but strongly feel that corporate and business interests should also be making more contributions.

1.3 Proposed changes to existing rates, and new targeted rates

I can't comment on this as I am not informed enough about the subject.

1.4 Investing in upgrading and protecting our city's water networks

I can't comment fully on this as I am not informed enough about the subject. However, I strongly object to drinking water being fluorinated. Businesses and farming need to be made more accountable for their environmental impact.

1.5 Investing in our transport infrastructure

Yes! Please get more bike lanes, with specific bike lights in and out of the city into all outlying suburbs, especially along the river to New Brighton. Look at the Copenhagen model with it's green light policy. Please close the roads around cathedral square and along the edge of the river around the convention centre towards Oxford Terrace to all cars and traffic expect deliveries at specific times and possibly taxis. Make a commitment to bikes, scooters etc and make this city efficient, clean, healthy and a first in NZ.

1.6 Rubbish, recycling and organics

More focus on organic recycling and general recycling. More education and fines for people not sorting properly - like the Dutch do!

1.7 Our facilities

Service desks should be at libraries. Libraries are an integral part of a healthy society and should be kept open and supported.

1.8 Our heritage, foreshore and parks

I can't comment on this as I am not informed enough about the subject.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

Put the money into protecting our waterways instead.

1.11 Potential disposal of surplus Council-owned properties

If it is done in a legit manner, to people who are going to preserve and respect the spaces then it seems logical to let them go.

Yes

Comments

The gallery art education for children is something that I have read about over the last couple of years and await the time eagerly when my children will be old enough to go along and enjoy then. I understand that there is a proposal to reduce these sessions by one day per week. In the uncertain times again and the age of ever changing technology, I think it would be a huge mistake to reduce funding for educating children in the arts. We truly don't know what the future of jobs will hold for our children but art and creativity is an important way for them to express themselves, find happiness and understand the beauty in the world. I would be very sad to hear that the decision was made to reduce the school art sessions at the gallery, I have heard that they are really well run and every much enjoyed by a wide variety of families, from lots of different backgrounds across Christchurch.

### Feedback

1.1 Have we got the game plan right?

Stop all backstreet work. Stop redesigning back streets. It is not essential. It's not a priority when we are still recovering from a disaster. Lay off half the transport planners and engineers.

1.2 Rates

This Council statement is cynical; "We're aiming to keep rates rises as affordable and sustainable as possible."

That statement is disingenuous rhetoric. The person who wrote that and the person who authorised it should be immediately made redundant. We can't afford disconnected and disingenuous spin doctors.

The council has been raising rates continuously above the rate of inflation for well over two decades. It now looks to continue to increase rates at an excessive rate for the next decade. The continual raising of rates above the rate of inflation is not affordable or sustainable to us ratepayers.

Up 52% since 2013 and projected to increase another 47% over the next decade. Those numbers exclude the continual increases before 2013. This is gobsmacking. The word excessive fails to cover it.

The Council needs to live within its means and focus on the essentials. Stop competing with other cities to outdo other cities.

The Council is far too impatient in its recovery from the Earthquakes of 2011.

The Council is impatiently ravaging money from the ratepayers who lived through the Earthquakes. The ratepayers didn't cause the earthquakes and shouldn't be punished for the recovery

40% on payroll is an excessive ratio. It's time to cull some Council staff. For starters cull the spin doctors. Halve the traffic planners and traffic engineers. This group continues to pump out projects for the sake of it. Redesigning neighbourhoods and lowering speed limits is not essential work. It's nice-to-have and should be parked for a decade plus.

Stop all work and projects linked to 'Redesign' work. Focus on the recovery of the essential infrastructure. Cut everything which is connected to "REDESIGN". Repairs yes, redesign no.

The Council must learn to live within a budget like households have to. Park the dreams until after we have recovered from the earthquakes.

I've just looked at my monthly costs. Rates are now staggeringly my 2nd highest outgoing each month behind food. How did we get here so quickly? With rates set to rise for the next decade, they will overtake food and become my highest monthly cost. That's just wrong. That's out of whack.

Rates need to be held at zero for the next decade to realign them to realistic income ratios. The Council has to cut work which is not about recovering from the earthquakes.

Take out long term loans and amortise the cost over a generation of ratepayers. Stop penalising the loyalty of the survivors. We have paid excessively already.

The 1974 Commonwealth Games were paid for with a long term loan and took decades to pay off. The cost of recovery should be spread out over a longer period.

### 1.3 Proposed changes to existing rates, and new targeted rates

No to charging for water.

No to any targeted rates.

The cost of rates is too much already. This is just Council greed.

### 1.5 Investing in our transport infrastructure

The Council squanders far too much money on non-essential work.

The focus should have been on repairing the roads. Getting the basics done first. Instead I constantly see backstreets being redesigned at an exorbitant cost. While the Council claims it has no money. While I see semi main roads still in need of basic repair. The priorities and the spending are inconsistent and exorbitant.

Redesigning neighbourhoods and streets should have been put on hold for the more important basics like **repairing the roads. This city spends far too much money on "redesigned" backstreets. This city spends far too much money on redesigning streets.** Is this work really where our priority should have been when we are recovering from the destruction of a major earthquake?

For nearly two decades this city has spent a lot of money on a strategy of sabotaging the roads for motorists to get them onto public transport or bicycles. This strategy has made virtually no improvement to the mobility or the congestion of the city. The strategy has cost an incredible amount of money. When does the Council step back and take a hard look at this strategy? The strategy has contributed to the roads being inefficient. This impacts on public transport. It impacts on the climate when road users are detained on roads because of deliberate inefficiencies and sabotaging.

The Council is guilty of not assessing the cost versus the value over this time. The Council is guilty of not assessing the true conversions of improvements. Guilty of a lack of objective assessment. Guilty of listening aneadoctly to the agendas of lobby groups.

Huge amounts of money have been spent on cycling infrastructure for sadly a token gain in cyclists. The Council blindly believes sabotaging motorists and oversupplying cycling infrastructure is working, when it isn't. Cycle lanes are good, but not when they impact on the flow or the safety of other users. We lose more than we gain. The gain in cyclists has been tokenism. The impact on congestion has been sadly ineffective. The Council is again guilty of not assessing the cost versus the value over this time. More importantly it is guilty of not reassessing the strategy.

The Council seems to be led too much by the interests of a few at the expense of the majority. Do the majority have any real representation with the Council?

The Council blindly ignores the multitude of reasons for why people use their cars.

Petrol cars are not great but the alternative options are currently not at feasible levels. We all want to go there but it just isn't an option for many for the foreseeable decade.

Improving the efficiency of the main roads should have been a priority. The main roads should be the new priority. Inefficiencies with our main roads impact on the buses and side streets. Sabotaging motorists also **sabotages buses. The sabotaging strategy has to stop. It hasn't worked.**

Too much of the overdesign on our main roads impacts on the efficiency of the roads. What is often dismissed as insignificant becomes significant when multiplied out over many intersections and lanes and peak hour timings. The overdesign also impacts on the climate when road users are kept on the roads longer than they could be.

Cease all work on redesigning backstreets and side streets. Cease all the work on reducing the speed limits

in neighbourhoods. There are bigger priorities. Ratepayer money can be better spent. Cease all "redesign" work. Repairs yes, redesign no.

Make half the transport team of engineers and planners at the Council redundant. They will continue to create designs for the sake of it while they are employed on the basis of next next next ... spend, spend, spend.

The current planners should be replaced with a new group scoped with assessing what worked and what didn't and focusing solely on getting the city flowing for the majority. When assessing what worked it has to meet a quantitative threshold way beyond a token gain. We've been focused for too long on the minority.

Beyond the self-serving rhetoric, where is the true assessment on the impacts on the flows and congestion of our main roads?

Cars will not disappear for the next decade. They will shift to electric but they will still be here. They will be here for the multitude of reasons the Council blindly ignores. Autonomous vehicles will change the way users use the roads but this is possibly 15+ years away. They will be different to the vehicles we know today. Private cars will still be here for the next decade plus.

Redesigning the suburbs to encourage more walkable neighbourhoods is an expense we can't afford. The cost for value just doesn't stack up. This vision, like too many roading projects, is more idealistic than practical. This will be an excessive amount of money for the tiniest gain. The city can't afford it right now. The money would be better spent on more important priorities. It is not essential right now.

The city has already been oversold on over designed cycling infrastructure and the overdesigned CBD with sadly not enough gain for either.

The Council's current roading plans and strategies suffer from tunnel vision and aren't working. We have to do better than token gains. We have to stop trumpeting token gains as great gains.

The next decade needs to focus on the majority of users. Better public transport and efficient main roads. Congestion needs to be reduced as best it can be. Traffic lights need to be smarter. There are too many timed to service no current road user. Too many inconsistently favour one direction of flow.

Cycling is sadly not it. The experiment has not worked. Keep the cycle lanes simple.

Drop all roading projects and focus only on public transport and main roads.

The buses are not efficient. Parking on bus stops to kill time is not a good strategy. Only the start time of a run should be arbitrary. Bus routes which traverse 270 degrees around the bus depot to kill some time on some routes, when they can get in quicker with a single 90 degree route, has to be changed.

Dump the discounted pricing structure of the Metro cards. Anyone who uses the bus gets the lowest price, including people who pay cash. Lets get people onto the buses without barriers. Move to a phone app.

Paying should be done with a phone app. Download the app from a QR code etc at each bus stop. QR codes at each bus stop, to display time tables and how far away the next bus is. As soon as they scan their phone on the bus it auto debits from an account.

We need to reduce the people who jump on and take up to 3mins to discuss their paying options. I've lost track of how many times I've seen people wanting to put the rest of their family on the fare price of their one Metro card. Just make the price the lowest price for everyone.

Technology could also be used to notify users how far away their next bus is. Technology can also be used to send alarm notification prompts for the next bus.

Also consider pie shaped runs for some parts of Christchurch. So start at the bus depot in town and go up and then across and down another run back to the bus depot. If the similarly opposing run is offset by x minutes then users have even more options as in less waiting and added expediency to their destinations. This gives the passengers traveling further out, two options instead of just one.

The Council should lobby the government for a law change which makes it mandatory for other road users in a 50kmh zone to let a bus out from a bus stop with priority. Apparently this is law on the Gold Coast of Australia. Melbourne also makes road users stop for trams. Stopping other users while a bus loads isn't the answer, just stopping to let the bus out when it's ready to re-enter traffic.

1.7 Our facilities

Yes to reducing these services.

Yes to removing the Riccarton Road Bus Lounges.

1.8 Our heritage, foreshore and parks

Put a 10 year hold on developing the red zone into a "park".

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No  
Comments

Use the 5.5 million to reduce rates. The cost of rates is too much already.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No  
Comments

Use the 11.8 million to reduce rates. The cost of rates is too much already.

1.11 Potential disposal of surplus Council-owned properties

Agree.

### Feedback

1.7 Our facilities

I do not believe the hours or service provided by CAG should be cut.

Why?

The CAG provides classes to schools throughout the city. Many schools do not have art teachers. This service is excellent. The equipment and exposure to art exhibitions at a young age in our city is valuable. These are the future visitors to galleries and supporters of acquiring art for the gallery. Encourage the to be part of CAG do not put obstacles in their way by limiting hours.

The CAG must be accessible. Keeping every Wednesday night open til 9 pm enables a different visitor to experience the gallery from those able to visit during the daytime. The public programmes are excellent and attract a good number. The free guided tour is one of the busier free tours CAG offers. people who work til 6pm or people who come from out of town visit the CAG on a Wednesday evening.

it is important to keep the CAG open every Wednesday evening. It becomes a habit to attend the public talks etc. People are creatures of habit and we want people visiting the city centre as well. A lot of people will visit and meet up with friends for a wine or a meal in the neighbouring restaurants after the ate night wednesday gallery visit.

Do not cut funding to the Arts. Arts sustain people through visual stimualtion, talks and films all on offer.

1.5 Investing in our transport infrastructure

I support the proposal ID 1346. Cashmere, Hoon Hay & Worsleys Intersection Improvements proposed for the 2021/22 year.

This intersection has complex manoeuvres and connects two major collector roads. It also services a lot of traffic coming from the Bike Park. There is also a busy little local shopping area to the left of the Hoon Hay/Cashmere intersection.

It is my understanding also that when this intersection is realigned and is controlled by traffic lights the road access to Gosforth Way off Worsleys Road will be open. This is really important so that there is a second access point to Westmorland (currently all via Penrudock Rise). This will help service new development happening in that area.

1.11 Potential disposal of surplus Council-owned properties

I do not support any sale of properties used for community housing. There needs to be access to low income communities to appropriate housing, and the market is failing to provide housing at a price point that enables peoples health and wellbeing.

### Feedback

1.1 Have we got the game plan right?

Proposed cemetery at Duvauchelle

My husband and I have tried over the last few years to pay for and reserve a space in the local Akaroa Cemetery. We have had a holiday house here for approximately 35 years. We have always considered Akaroa is where our roots have been truly established. It has been our most used and loved property that we have ever owned. Before retirement we spent many weekends and school holidays here. When we lived overseas we always came back here to stay on our frequent trips home. We re-built it 15 years ago with the aim to spend most of our life here in retirement. We have actually lived here for the last five months. Although our permanent address is in Christchurch we intend to have more of a 50/50 arrangement.

Why when there is space still available here at Akaroa would the cash-strapped Christchurch City Council direct \$400,000 towards establishing a cemetery at Duvauchelle? Why cannot the Council work within the already established frame-work and work alongside a willing Community who have made many valid observations about the feasibility of this plan?

Is it fair to deny long term residents of Akaroa the certainty of making and establishing preparations as to where their final resting place would be? Is it fair that the Akaroa Community is being forced to a final resting place which many of us have absolutely no connection or infinity with? Is the local community being listened to?

Sally and Geoffrey Thomas

1.11 Potential disposal of surplus Council-owned properties

To whom it may concern

I am writing to you in regards to the disposal of council land in Diamond Harbour, 27 Hunters Rd., Vacant land, Pt Lot 1 DP 14050++, 12F/538, 390,222 sq metres). I ask it to be removed from the LTP and from fast track disposal. The normal process for disposal of land, that would require Community Board and public consultation should be used instead.

The property has special environmental values that can be only protected by public ownership. For many years local volunteers have planted and cared for native plants in parts of the property. The volunteers's group "Friends of Morgan's and Sam's Gullies" even has been awarded in this years Canterbury Aoraki Conservation Board Awards for their committed and meticulous work. What an affront to sell this land without proper public notification!!

There is an 'immediate identified public use' to combat climate change and the council wants to destroy best intentions and the volunteer work of many years.

I ask again to take the land mentioned above to remove it from the list of disposable land and let it go through the proper public channels.

Thank you

File
LTP Submission - 27 Hunters Rd - Vacant Land - Pt Lot 1 DP14050

The Council property section are trying to fast track disposal of this land, and avoid meaningful public consultation by inserting the disposal into the Long Term Plan.

This is a submission to the LTP on this, requesting that the land as described as (27 Hunters Rd, Vacant Land, Pt Lot 1 DP14050++, 12F/538, 390,222 sq metres), be removed from the LTP and from fast track disposal. The normal process for disposal of land, that would require Community Board and public consultation, should be used instead.

Deforestation of Diamond harbour land meant the destruction of important ecosystem services and renewable resources, and the reduction of carbon sinks. However, this destruction can be slowed, stopped, and in some cases even reversed. Here in Diamond harbour a large bunch of volunteers have been planting out the gullies in Diamond Harbour and particularly Hunters Road Gully. We move regularly amongst these gullies planting a huge range of native trees that are unique to the Diamond harbour region. We spend weeks over the warmer months watering the plants we all lovingly care for. From young plants to the point where they will hold their own is about three years. When we plant these natives we have a commitment to keep the weed down around and trees that we plant and ensure they receive adequate water. Many of us have purchased huge lengths of hose that are connected to our own house water supply to ensure the survival of the native trees we planted.

We want to establish these native forests to encourage the return of all the fauna that is unique to this region. We already have a flourishing bird population thanks to the existing native vegetation that is not limited to the following birds; chaffinch, yellowhammer, greenfinch, goldfinch, starling, house sparrow, Californian quail, rock pigeon, white-backed magpie, blackbird, song thrush, skylark, mallard and pheasant.

But there are lots of native birds too: bellbird, tūī, brown creeper (pīpī), tomtit, rifleman, kererū (NZ pigeon), grey warbler, fantail, silvereye, morepork, shining cuckoo, kingfisher, paradise shelduck, grey duck, pipit, welcome swallow and spur-winged plover.

It is so important to protect these very valuable native forests to ensure we rebuild the previous ecosystems that we destroyed in the past. Help us to retain these young ecosystems so that our children can enjoy them into the future.

Comments

I can't imagine that the Arts Centre would be able to survive with its current operating plan in the short term without external funding. Whilst I would be keen to see it become self-sufficient, current circumstances with regard to visitors means that it will require some support for the next few years. It is too important a structure and organization for us to risk losing it.

## Rubbish, recycling and organics

In 2020 the Council adopted a new Waste Management and Minimisation Plan that focusses on changing our 'throw-away' culture and reducing the amount of waste we send to landfill. Implementing the actions in that plan are the key drivers of our operational and capital spending.

We're proposing to spend \$25 million on organics infrastructure (which includes upgrades to the organics processing plant), \$18.5 million on transfer station infrastructure and \$18.4 million on recycling infrastructure.

Have we got the balance right? If not, what changes would you like to see?

---

---

---

---

## Our facilities

We're proposing to invest 19 per cent of our capital spend on community facilities. We're also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service?

Have we got the balance right? If not, what changes would you like to see?

Mobile Library  
 I am elderly (90 on 5/4/21) so I greatly appreciate the Mobile Library service which comes to Mt Pleasant School weekly.

## Our heritage, foreshore and parks

Christchurch has a long and proud history of protecting and respecting our heritage. Over the past decade we've carried out a massive programme of repairs and restorations, but we still have some work left to do. In the next 10 years we will continue to restore our own buildings and support private development of heritage buildings. We will also be maintaining and improving our parks and foreshore.

We're proposing to invest 11 per cent of our capital spend on our heritage, foreshore and parks.

Have we got the balance right? If not, what changes would you like to see?

Cashmere View Retirement Village  
Residents Committee

Christchurch City Council  
53 Hereford Street  
Christchurch Central City  
Christchurch 8013.

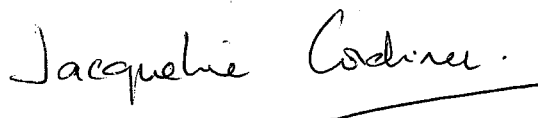

Dear Sir/Madam

**Re Library Bus**

The residents of Cashmere View Retirement Village have heard about the possible withdrawal of the library bus service. There are a number of residents who use this service regularly and are very worried about this possibility. With many people not having transport and especially those unable to get on a bus it is of real anxiety to these regular readers.

The residents committee have been asked that we contact you to express this concern and we would like to know your plans for this service.

Yours Sincerely

A handwritten signature in cursive script that reads "Jacqueline Cordiner". The signature is written in dark ink and is positioned above a horizontal line.

Jacqueline Cordiner  
On behalf of the residents committee

1.1 Have we got the game plan right?

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

#### Comments

The Christchurch City Council should continue to financially support the Arts Centre in the Long Term Plan 2021 -2031

The Arts Centre is special to the people of Christchurch, and is also unique in the world. It is a focal point of the arts, entertainment, social gatherings, exhibitions and events in our community, and once our borders are opened after covid-19, it will again return as a prime tourist destination and will once again become a significant contributor to the economic welfare of our city.

The distinctive architectural design of the complex is a treasured gem in our city.

The Arts Centre promotes and supports a wide range of NZ creative crafts and arts by providing creative spaces and by making products available for purchase locally and by visitors. By supporting the arts, the Art Centre effectively boosts the internationally recognised high standards and brand of our New Zealand products, e.g., wool products, leather, pottery and ceramics, jewellery, fabric design, Maori art, etc., which are purchased here and carried around the world.

Because the Arts Centre location plays a significant role in making NZ-made products easily available to our international visitors for purchase, it plays an important economic role as good-will ambassadors for New Zealand-made products around the world.

In providing financial to support to The Arts Centre, the Christchurch City Council goes a long way in playing a critical role to ensure the continuation of this important local and international facility. This facility contributes enormous economic and social benefits to our city in sustaining the well-being our of city, and therefore, it behooves the Christchurch City Council to ensure that this economic and social architectural gem continues to benefit our city and its people.

### Feedback

1.7 Our facilities

At Christchurch Art Gallery I have used the education service with my classes for several years. This service is amazing and supports the Arts Programmes in schools. I understand that the number of teachers has been reduced to 1 and it is being considered that this service will be stopped altogether. This is a grave error as the education service is the beginning of an interest in the Art Gallery that can last a life time. It is important that we expose children to this valuable city asset as many will not get the opportunity through their family life. In my experience the service offered by the Education unit has been outstanding and has totally engaged the students that I have taught. Please ensure that this service remains and has at least 2 teachers employed full time.

Thank - you

Rosemary Lewis

### Feedback

1.11 Potential disposal of surplus Council-owned properties

I am submitting on the inclusion of 27 Hunters Rd Diamond Harbour in the list of potential sale land.

I strongly object to the sale to private developers or buyers.

1. It would be contrary to the current nature of the area. A past attempt at a subdivision misjudged the community by trying to install a gated community.

2. The roads and infrastructure are insufficient to cope with a lot more houses.

3. The community has spent hundreds of volunteer hours ( with support of council) planting and enhancing the natural environment of the gullies and built tracks for healthy walking. Although we are assured these would be covenanted there are other areas where planting could be extended and help meet the Councils Climate Change challenges.

Instead I propose the CCC continues to hold the land which is a unique opportunity to provide appropriate, cost effective, and community focussed development.

The saddest thing for residents is to have to leave Diamond Harbour because their family home and section is too large, steep or unmanageable. Many single people live in houses that have become too big. Part of this land could be used for varied size homes sold or leased to the residents by CCC thus bringing money just as the sale to a developer would do. Community involvement would ensure that the rural village environment would be maintained. A developer is more likely to put up 6 ft. wooden fences enclosing sections before any houses appear. This is what we saw near Hallswell this week.

I am sure there are councillors able to see that new ways of living are demanded by changing challenges.

I have had 25 years experience living in a housing community of six families sharing gardens and grounds but maintaining independent homes. Unlike sub division houses a complex for retired people would be more able to meet needs in the local area from the new shopping complex rather than travelling to the city for work.

### Feedback

1.1 Have we got the game plan right?

Closing of Wharenuui Pool

I do not agree with the decommissioning of Wharenuui Pool as outlined in Christchurch City Councils Long Term Plan and would like to see the pool stay for use of the local community and Wharenuui Swimming Club

The Wharenuui Pool is an important facility for Children to learn to swim but also caters for adults who use the facility to swim during the day in their lunch breaks. For me personally I work in Riccarton and swim twice a week as recovery from a back injury and surgery. This enabled me to recover and return to work a lot quicker than I would have if I wasn't able to do rehabilitation.

1.7 Our facilities

To whom it may concern:

I disagree with the proposal to reduce library hours and to stop the mobile library service. I was a school librarian (primary and secondary) for 25 years and i saw the clear benefits to the children when they had regular class time in the school library. I see that recreational reading has increased significantly during the Covid 19 lock downs both in New Zealand and overseas. Also I read of an increase in the number of bookshops both of new and secondhand books and that there has been a noticeable move from digital books to actual books. I believe that encouraging a love of reading benefits society in many aspects of our lives.

Kind Regards

Miriel Dixon

### Feedback

1.2 Rates

I agree with the increases

1.3 Proposed changes to existing rates, and new targeted rates

I agree. I want to support the Arts Centre

1.7 Our facilities

Please do not cut funding to the Art Gallery

1.8 Our heritage, foreshore and parks

I would like to see the upgrade of all toilet facilities in Hagley become an urgent priority for the Council. These have long been substandard, and being in one of the re-emerging city's major tourist attractions, I think replacement has been long overdue.

I would like to have seen it become a "shovel ready project" post Covid, and was disappointed to see that it was not allocated funds for upgrade of toilet facilities in the region, when the likes of Coe's Ford were given funding. Surely our city's facilities are a greater priority

I have hopefully attached photos... the well known yellow toilets in Picton, the exeloo exported from NZ to Colorado, and the remaining photos are from a toilet block in a small seaside town on the Coromandel called Whangapoua

A "touchless" toilet made in West Auckland has been named America's best public restroom.

## NZ-made toilet top public loo in US

**Esther Taunton**

A New Zealand-made self-cleaning toilet has been named America's best public loo.

The Exeloo unit, designed and manufactured in West Auckland, was named the nation's top toilet at the inaugural Best Restroom in America awards in November.

The "touchless" toilet was the subject of a viral post on popular social media platform TikTok when it first opened at Bancroft Park in Colorado.

As well as racking up millions of views, the toilet also attracted attention from media and locals alike, leaving some "shocked" by its unusual facilities.

"It was very different. It felt like I was in the future," Bancroft Park woman Kamlynn Potee told US television channel Fox 21.

The unit, which launches into a self-cleaning process after every 30 uses, has lights indicating availability and push button entry. Soap, water, toilet paper and the hand dryer are all activated with a wave.

The toilet also sends an automatic alert via an app to maintenance crews when supplies start running low.

But users can't linger too long over the bells and whistles.

The toilet also has a 10-minute time limit which visitors ignore at their peril – after a final

countdown, the doors open automatically.

Exeloo managing director, Craig van Asch, said the US publicity has fast-tracked orders from new projects with LA Parks, which oversees more than 16,000 acres across the district of Los Angeles.

The area is made up of 86 city councils, roughly the same number in the whole of New Zealand.

As well as exporting to Australia, the US and Canada, Exeloo has supplied prefabricated "intelligent toilets" to increase capacity in Pictou, and dedicated bus driver toilets across the Auckland City transport network.

### Feedback

#### 1.1 Have we got the game plan right?

As someone representing a cultural institution I am dismayed at potential cuts to investment in related areas, such as the gallery's public programme and education activities. There is now considerable international research that demonstrates the benefits to individuals and communities of engaging regularly with the arts (improved health and wellbeing, better education outcomes, community cohesion to name a few). The arts give form to the intangible, helping us to articulate our identity and place in the world. Work in this area is relied on heavily in times of 'psychic' and social need, and is relatively small amounts of funding for immense return on investment.

#### 1.7 Our facilities

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

##### Comments

This is an incredibly small percentage of a rates increase that is itself quite modest (compared to many other parts of the country). The horrendous earthquakes of a decade ago destroyed a lot of the built environment, changing much of the city's architectural landscape. The buildings in the Arts Centre are a significant part of the Gothic Revival architecture that is such a signature feature of the Christchurch character and its preservation is of vital importance.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

##### Comments

The Robert McDougall Art Gallery is both part of the artistic history of Christchurch in and of itself and as part of the plans being proposed for the Museum's redevelopment. As an institution occupying a listed heritage building that has undergone earthquake strengthening, I know what a difference it makes to people's feelings of comfort and safety to be in a building that has undergone such work. It also makes an incredible difference to the willingness of lenders (and donors) of artworks to know that the building has had such work done.

TO: CHRISTCHURCH CITY COUNCIL

SUBMISSION TO RETAIN BUS DEPOTS IN RICCARTON ROAD  
TO WHOM IT MAY CONCERN

I READ WITH DISMAY YOUR "SMALL" NOTE OF ADVICE THAT THE CITY COUNCIL WAS:

1. SHORT OF MONEY - UNABLE TO AFFORD BOTH KEEPING OPEN.
2. BECAUSE OF COVID: SEEMS A WEAK ARGUMENT - A SMOKE SCREEN.
3. NO OTHER FACILITY LIKE IT (FAVORITISM?) - WHEN THERE IS NO OTHER SITE IN TOWN THAT THE BUSES DON'T RUN TO THE CITY.

\$600,000 YOU SAY TO SAVE MONEY SEEMS GOOD VALUE + A PITTANCE FOR THE SERVICE IT PROVIDES.

SO, TO ME YOU ARE WANTING ANOTHER WHITE ELEPHANT! WHEN IT WAS FIRST OPENED IT WAS LAID AS ESPECIALLY ENCOURAGING PEOPLE TO USE THE BUSES.

ON MY BUS ALONE THERE ARE 74 MOVEMENTS EVERY DAY - THERE MUST BE AT LEAST APPROXIMATELY 800 EVERY DAY WITH EVERY BUS STOPPING AT RICCARTON BUS DEPOTS

I USE THE BUSES MOST DAYS + AM AWARE OF HOW MANY PEOPLE USE THESE FACILITIES.

OLDER CITIZENS - THOSE ON WALKERS + MANY ON STICKS.

PEOPLE IN WHEELCHAIRS - THERE ARE MANY MORE THAN BEFORE.

SCHOOL CHILDREN - MANY CATCHING LINCOLN + ROLLESTON FURTHER AFIELD.

- THEY ARE CLOSE ALSO TO THE LARGEST MALL IN CHRISTCHURCH + MANY PEOPLE CATCH BUSES AT RICCARTON WITH ALL THEIR SHOPPING.

NOTE HERE: I BELIEVE IT IS A SAFETY ISSUE FOR THE VULNERABLE + THEIR ONLY MEANS OF TRANSPORT. IT HAS BEEN POORLY ADVERTISED

THAT YOU MAY BE CLOSING + FOR SUBMISSIONS BEFORE APRIL.

— THE BUSES THAT USE THIS SERVICE ARE:

100, 130, ORBITER, 140 (to Moorhouse Avenue) THAT DON'T GO TO THE CITY.  
MEANING THEY HAVE TO HAVE A CONNECTION POINT.

THE OTHERS: 80, 3, 5 GO TO THE CITY + IMPORTANTLY MANY USE  
FOR WHATEVER REASON TO GET TO THE HOSPITAL. SOME VERY INFIRM.

EACH OF THESE SERVICES RUN EVERY  $\frac{1}{2}$  HOUR SO ONE HAS TO WAIT  
SOMEWHERE! WHERE? WE MAY WELL ASK.

WHAT A GREAT SERVICE IT HAS BEEN SO FAR + TAKE STRESS OUT OF  
CATCHING ANOTHER BUS ALTOGETHER.

SO DO WE ALL (+ OFTEN THERE ARE MANY OF US) STAND OUTSIDE ON  
THE FOOTPATH, OUTSIDE SHOPS, FREEZING COLD OR BLOWN AWAY, WHILE  
YOUR FACILITY HAS GOT A CLOSED FOR BUSINESS SIGN ON IT.

I REALISE THERE WAS FOR A TIME TROUBLES WITH YOUTHS, ETC. WHICH  
WAS ATTENDED TO + THE ODD BEHAVIOUR PROBLEM.

THE SECURITY GUARD THERE HAS ALWAYS BEEN VERY HELPFUL  
+ ALWAYS HAPPY TO ASSIST QUITE A FEW WANTING HELP WITH  
TIMETABLES. THE PLACES ARE ALWAYS VERY CLEAN.

I AM FURNISHING THIS IN THE HOPE THAT WE WILL CONTINUE  
TO KEEP THIS FACILITY FOR THE PUBLIC OF CHRISTCHURCH.

YOURS FAITHFULLY

MARGARET GIBSON (M.R. Gibson)

### Feedback

1.1 Have we got the game plan right?

Re No 27 Hunters Road proposed sale of land and potential sub-division:

I do not support the sale of this piece of land for subdivision purposes at this current time. Many of us who live in this area of the peninsula came here for the semi-rural nature of the environment and the close knit nature of the community. Neither will be enhanced by a subdivision of this size. Currently there are plots of land that have been on the market for a number of years and are yet to be sold so this large parcel of land is not required at the present time.

The infrastructure of the community would be put under pressure with such a large development. The roads, the ferry service, the sewage system and school are not suitable for a large increase in population.

I support the Christchurch City Council maintaining ownership of the land in the medium to long term. I also strongly endorse the Council's protection and enhancement of the gullies in the area, with native planting and pathways.

Hunters Road speed limit: The traffic coming down Hunters Road from Bay View Road pass the local school. The road is narrow and often cars are parked on either side of the road adjacent and opposite to the school. With the gradient of the road, drivers tend to increase their speed or not reduce it to a safe level. I urge the Council to reduce the speed limit for the down hill traffic, mark the road approaching the school on the downhill section, and consider the use of speed reducing road humps.

Thank you for your consideration.

1.5 Investing in our transport infrastructure

Church Bay, Hunters Road speed limit: The traffic coming down Hunters Road from Bay View Road pass the local school. 1.1 Have we got the game plan right?

1.7 Our facilities

I do not support the proposal to reduce library hours. Libraries have become an essential refuge for students and others (including disadvantaged and homeless) seeking a quiet space with access to a computer where that can undertake tasks that are difficult or impossible elsewhere. For many people the only time that they have to do this work is after hours and over weekends. Reducing library services will contribute further to hardship and inequality

1.11 Potential disposal of surplus Council-owned properties

I submit that the land described as (27 Hunters Rd, Vacant Land, Pt Lot 1 DP14050++, 12F/538, 390,222 sq metres), be removed from the LTP and fast track disposal. The normal process for disposal of land that would require Community Board and public consultation should be used instead.

The gullies included with the land in question are in the process of being ecologically restored by local volunteers - a process that has been underway for about 7 years now and has involved many hours of volunteer time with thousands of trees planted and nurtured to independence. The tracks in the gullies (built by local volunteer efforts) are popular with Diamond Harbour walkers and provide a valuable recreational resource for locals and visitors. Prior to the involvement of the community the gullies were weed infested wasteland ignored and neglected by council. The LTP's disrespectful lack of acknowledgement of the community work undertaken is very disappointing.

1.1 Have we got the game plan right?

I do not agree with the decommissioning of Wharenui Pool \*as outlined in Christchurch City Councils" Long Term Plan and would like to see the pool stay for the use of the local community and Wharenui Swimming Club,"

I do not want Wharenui Pool to close because it's easy access for me

- My grand children love swimming, and it keeps the whole family active.
- To get to another pool at a good time means driving in lots of traffic and having to find a car park.
- I don't want Wharenui to close because it gives me privacy when i am swimming
- I can't get to the hydrotherapy pool at QEII
- Wharenui has been in our community for years
- Closing Wharenui will leave a big gap in the community
- I use Wharenui in my breaks because i work in the area

I support keeping wharenui as well as having a new central pool that is the correct game plan

1.2 Rates

happy to pay rates to deliver both pools the rates are so high now an increase will not be any consideration for me

1.3 Proposed changes to existing rates, and new targeted rates  
please target rates to support my submission

### Feedback

1.1 Have we got the game plan right?

Less borrowing. Less unnecessary spending on nice to have but unaffordable projects. Reduce CCC staffing and cut your cloth to a zero rates increase. You will force people out of the homes they have owned for many years at the rate you are proposing to increase our rates. Time for CCC to get stop spending!

1.2 Rates

It should be zero. The wastage we witness by CCC all around us is criminal. Get your act together

1.3 Proposed changes to existing rates, and new targeted rates

I believe in user pays for everything! Why should I subsidise others for using services I dont ever use eg cycleways

1.4 Investing in upgrading and protecting our city's water networks

CCC has ignored infrastructure maintenance, instead spending our money on Councillor and Council staff vanity projects. The water infrastructure is a priority but Central Govt should also pay their share. No 'nice to have' but unnecessary projects should be funded at all until the water infrastructure is sorted. eg cancel the Harewood cycleway spend.....the bit that is funded by CCC. Also cancel the Redcliffs walkway spend, partly funded by CCC....what a joke these are!

1.5 Investing in our transport infrastructure

I do not believe transport is a priority. Borrow zero funds only do what we can afford within current cash flow

1.6 Rubbish, recycling and organics

I guess we ratepayers are having to bail out CCC for the mess in Bromley. Another joke. Get your facts correct before you spend anything on organics or it will again be wasted

1.7 Our facilities

Only spend here if user pays cover the costs ie zero impact on ratepayers

1.8 Our heritage, foreshore and parks

Why on earth would ratepayers fund restoration of privately owned buildings? I cant even get metre high noxious weeds removed from Council owned land near my house. The gutters are never cleared. So much for Christchurch being the Garden City given all the weeds across the city. Your excessive wastage of current ratepayers funds is abhorrent, let alone giving you any more to waste with rates increases!

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No	
Comments	Every little reduction in spend adds up
1.10 Funding for base isolation of the Robert McDougall Art Gallery	
No	
Comments	Every little reduction in spend of our money adds up
1.11 Potential disposal of surplus Council-owned properties	
Yes, absolutely get rid of surplus property and reduce our rates	
1.12 Any other comments:	
The Council staff come across as dictatorial and dont like to be challenged. It seems to me that they have their own personal agendas eg cycleway, that they refuse to back down from. Time for some strong leadership at CCC, much streamlining of personnel and user pays services	
Bring back car parks. Bring back our Garden City.....tidy up our verges and sidewalks and Council managed gardens.p	
Stop wasting our money

### Feedback

1.1 Have we got the game plan right?

Investment balance generally supported.

Recommend more funding for contestable funds for resourcing community groups to collaborate with CCC on ecological restoration projects including Avon River Corridor and combined with healthier waterways.

1.2 Rates

Recommend raising the the rates to 6 % in 2021-22 and annual increase of 6% over the next 10 years with additional funding directed to ecological restoration of parklands and the Avon River Corridor/red zone with enhances open space recreation opportunities and to adaptation to climate change.

1.3 Proposed changes to existing rates, and new targeted rates

Generally support the proposed rates scheme.

1.4 Investing in upgrading and protecting our city's water networks

This investment is supported, however a proportion of the funding should go the reducing sediment, nutrients, metals and other pollutants into our waterways and restoring wetlands and riparian areas

1.5 Investing in our transport infrastructure

I support the proposed investment provided a higher proportion is invested in bikeways and walkways.

1.6 Rubbish, recycling and organics

I support this investment.

1.7 Our facilities

I support this proposed investment

1.8 Our heritage, foreshore and parks

I recommend a greater investment for maintaining and improving the Parks and making funds available to support community led ecological restoration efforts , particularly in the Red Zone.

### Feedback

#### 1.1 Have we got the game plan right?

i don't agree with the decommissioning of Wharenui Pool as outlined in the Christchurch City Councils' Long Term Plan and would like the pool to stay open for use by the local community and Wharenui Swimming Club. My reasons for this are as follows. Firstly, the numerous older people who use this pool and socialise with other swimmers who go to Wharenui. I know one woman who comes over twice a week from Parklands because she loves the pool and the people who work there and swim there.

There is a lot of talk about the loneliness of elderly people and the lack of social contact and the affect this has on both their mental and physical health. This is one place that is accessible for local people in the community, that is not expensive and has a positive impact on their lives. For many older people going to the new Metro Sports Centre or Jellie Park will add stress with traffic or catching buses and competing with the big numbers who do/will use these pools.

On a personal level I use Wharenui 3 or 4 times per week. It is better for my eyes as Jellie Park seems to use a lot more chlorine. I have developed friendships with the staff and other users and all my children have enjoyed swimming lessons there at a reasonable cost. I take my granddaughter there to teach her to swim as their school doesn't have one. A vital skill considering New Zealands drowning statistics.

If money was found for some of the voluntary libraries after the earthquake due to their impotence in the community why not for a community pool?

Sometimes social benefits outweigh financial benefits.

#### 1.2 Rates

i think it's too much. Why is the council giving money to the Anglican Church for the cathedral!

#### 1.3 Proposed changes to existing rates, and new targeted rates

Totally agree with the water rates as get very annoyed with people watering their berms and footpaths.

Yes but make sure leaky toby's etc are fixed pronto and no more selling water to overseas companies.

Happy to pay for PUBLICLY OWNED heritage.

1.4 Investing in upgrading and protecting our city’s water networks  
Agree

### Feedback

1.7 Our facilities

I disagree with the proposal to reduce the Gallery's weekly Wednesday night opening hours and to cut public programmes by 25 per cent a year.

I believe the Gallery should be open one night a week as this is an ideal time for people to attend lectures, floortalks and film screenings outside their work hours. I have presented several Art History talks for the Gallery and Friends on Wednesday evenings over the past few years and I have always had good attendance and interest from the public and Gallery community. As a freelance Art Historian, the Gallery continues to provide me with an excellent opportunity to share my research and speak in public at a very low cost to the Gallery.

If the decision is made to remain open only one Wednesday evening a month, perhaps it might be worth considering opening on Friday or Thursday evenings instead? Or perhaps using the TSB space at Turanga as an alternative venue for the Gallery's public events?

### Feedback

1.1 Have we got the game plan right?

i agree with the priority being investments in road/transport and water quality, however some of the other projects such as new parks and the avon-river corridor do seem non-critical and so in terms of affordability and rates increases these should be re-evaluated or alternative funding sources should be considered to cover these.

1.2 Rates

5% for year 1 is excessive for cantabrians who have had a tough year following covid especially with many facing reduced incomes and increasing food and consumer prices. Overall the 10 year 4% average annual increase is unsustainable given it is double CPI forecasts. This means that each year households are going to face increased rates bills that (on average) will exceed their income rises. Christchurch is an affordable city in national terms however with rising house prices and the suggested combined rates increases from CCC as well as Ecan, the next decade will see the city's overall affordability and attractiveness decline.

The council needs to remember it has a responsibility to the public to operate with financial sustainability. If that requires some projects to be trimmed down and others delayed or stopped so be it. Private businesses do not have the luxury of proposing significant price increases onto their customers without the risk of losing business. I understand one off projects or initiatives can lead to short term rates rises, however a 10 year cumulative increase of 47% shows that the council is not operating within its means. As a result financial management and strategic leadership needs to be questioned and i urge the council to reconsider its long term plan, the propopsed expenditure packages and their associated rates increases.

### Feedback

1.1 Have we got the game plan right?

I can not comment on the required amount of investments to the rubbish sorting and processing infrastructure, but I would like to see the following thing changed and incorporated into the plan.

Recycle-ability depends on 2 factors

- 1) capability of the rubbish processing plan (which you are proposing to upgrade and invest into) so it could allow to recycle things which are not recyclable today in Christchurch AND
- 2) reduction of incoming rubbish which can not be recycled even by the upgraded and improved infrastructure

The second item is not addressed in the plan and diminishes the benefits of the first. However, the second point can be easily addressed without requiring much of the investment: Products and its packaging, which are made of non-recyclable (by Christchurch rubbish collection and processing plant) materials AND which have got an alternative products serving the same purpose but made of recyclable and/or reusable materials, should be banned! Preferably across the entire country.

An example: if there is no method to recycle single use coffee cups (now or by the upgraded plant), these cups should be banned. Yes, it will cause a bit of inconvenience for some initially, but eventually people will get used to reusable glass made cups, or bring-your-own metal cup, or bring-your-own folding cups (like for hikers) which are made of recyclable (at least in US) rubber plastic.

An example #2: if a milk bottle comes with a lid made of plastic which can not be recycled (as it is the case now), these should be changed to the lids made of a material which can be recycled.

1.2 Rates

Is it to cover this initiative? If yes, you better introduce additional tax on products made of non-recyclable materials and reduce GST on product made of recycle materials. If I, as a person caring about the environment, do not buy (or at least limit as much as possible) things which contribute to red bin waste, I do not want to pay more for rubbish service via increased rates, as I already pay a bit more for products which are more recyclable or reusable (but for some reason are more expensive).

Also you plan to increase 5% next two years and 4% overall over next 10 years is unclear and ambiguous. Do you mean 9% in total? Can you really know what will happen in 10 years time to guarantee no more than 4%? Also, it seems like 5% increase is a lot to cover the cost of waste processing plant.

### 1.3 Proposed changes to existing rates, and new targeted rates

"and an excess water targeted rate for households that use more than 700 litres a day" - I am not sure how much we use, but it should be a limit per person. My family of 6 people (including 4 kids), means about 115L per day per person. Might be OK. But somebody else's family with 2 adults and no kids - 350L per day per person. Why do they have larger allowance?

### 1.4 Investing in upgrading and protecting our city's water networks

I have no idea about amount of money. But I would like to see pure drinking water back. It still did not come back to what it was back in 2012 year.

### 1.5 Investing in our transport infrastructure

It is unclear what specific infrastructure you are talking about. I guess more important question is what portion goes to infrastructure for cars and what for bikes and where.

### 1.6 Rubbish, recycling and organics

I can not comment on the required amount of investments to the rubbish sorting and processing infrastructure, but I would like to see the following thing changed and incorporated into the plan.

Recycle-ability depends on 2 factors

- 1) capability of the rubbish processing plan (which you are proposing to upgrade and invest into) so it could allow to recycle things which are not recyclable today in Christchurch AND
- 2) reduction of incoming rubbish which can not be recycled even by the upgraded and improved infrastructure

The second item is not addressed in the plan and diminishes the benefits of the first. However, the second point can be easily addressed without requiring much of the investment: Products and its packaging, which are made of non-recyclable (by Christchurch rubbish collection and processing plant) materials AND which have got an alternative products serving the same purpose but made of recyclable and/or reusable materials, should be banned! Preferably across the entire country.

An example: if there is no method to recycle single use coffee cups (now or by the upgraded plant), these cups should be banned. Yes, it will cause a bit of inconvenience for some initially, but eventually people will get used to reusable glass made cups, or bring-your-own metal cup, or bring-your-own folding cups (like for hikers) which are made of recyclable (at least in US) rubber plastic.

An example #2: if a milk bottle comes with a lid made of plastic which can not be recycled (as it is the case now), these should be changed to the lids made of a material which can be recycled.

### 1.7 Our facilities

We clearly see overcrowded swimming pools now. This year swimming pools are magnitude worse/busier than a few years ago. Invest in swimming pools more? Why only libraries?

### 1.8 Our heritage, foreshore and parks

It is OK to invest into public parks and government owned facilities. I am against putting tax dollars into private owned / developed buildings.

### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes
Comments
Comparing with billions attributed to other things, this seems like a drop in the ocean..?
1.10 Funding for base isolation of the Robert McDougall Art Gallery
Yes
Comments
1.11 Potential disposal of surplus Council-owned properties
Remove and put parks instead, especially in the center of the city.

### Feedback

1.5 Investing in our transport infrastructure

Our street, Fergusson Ave, really needs an upgrade. We still have the old, deep gutters, most of our street trees have died, and people park on the grass verges which in wet weather turns them into deep, muddy quagmires. I see we are on the list to have our road and footpath resurfaced but it really needs a complete overhaul. We moved here 30 years ago, and its so disheartening to see the verges progressively destroyed and the trees removed. There is a kindly in the street, as well as a community organisation - both of which generate a lot of cars which park on the street. We also get significant car parking from sports events at the local sports ground.

I have photos of just how bad it gets - please let me know if you want them.

This is an issue that many residents in our street feel strongly about - we've had to resort to placing large rocks along the verges to keep people off the grass. This is by no means an ideal solution.

It would be great if you would consider this request and add it to the plan.

### Feedback

1.1 Have we got the game plan right?

NO! Stop spending money you don't have, stop building things that aren't needed and trying to find a use for them afterwards and PROPERLY fix that which needs fixing, Chlorine out of the bloody water and roads!

1.2 Rates

I think it absolutely sucks, and I'm tired of the council constantly spending money they don't have, how about you spend the money on what IS \*needed\* and not everyone's bloody wish list. Let users pay for the extras that they want not the Christchurch Rate Payers!

1.3 Proposed changes to existing rates, and new targeted rates

No. Just No. You still have not got the Chlorine out of the water as promised and I am sick of you spending up large without doing what you should have done first so NO.

1.4 Investing in upgrading and protecting our city's water networks

do it now, do it faster, get the bloody well heads to secure status, get the Chlorine out of the water and if you ever put anything else in it expect a law suit.

1.5 Investing in our transport infrastructure

Cars and busses - keep your bloody cycle lanes most of the cyclists out there have no decorum and cut in front of drivers at a moments notice.

1.6 Rubbish, recycling and organics

Ratepayers not pay for it.

#### 1.7 Our facilities

Absolutely NOT, no way, no how, if people want these facilities let the people who want them pay for them through an admission fee.

#### 1.8 Our heritage, foreshore and parks

Heritage buildings - you mean Churches... NO.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

##### Comments

You've already forced us to pay for churches so no, I don't want to pay any more.

Let the users pay through an admission fee to the arts centre.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

##### Comments

Let the council pay for it then, I didn't agree.

#### 1.11 Potential disposal of surplus Council-owned properties dont care as long as it reduces rates.

#### 1.12 Any other comments:

If you can't figure it out, I am sick to death of the Council borrowing money and expecting the rate payer to fund their wish list, especially while existing services which should have been fixed are not. Get your shit together.

**Submission Date:** 01/04/2021

**First name:** Peter **Last name:** King

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

The expenditure on water networks is appropriate but the expenditure on other infrastructure is not appropriate - see the comment included below.

1.2 Rates

We have spent far too long pretending that keeping rates low is the be all and end all of local government. That is a false idea, building a fair and effective city in which to live is what is needed so rate increases are needed to catch up on years of pursuing the wrong goal. And see comment below for the scale of change required.

1.3 Proposed changes to existing rates, and new targeted rates

Targeted rates are sensible.

1.4 Investing in upgrading and protecting our city's water networks

If anything expenditure should be even higher in this area.

1.5 Investing in our transport infrastructure

See the comment below.

1.6 Rubbish, recycling and organics

Recycling will become much more important. Rubbish "generation" should become more expensive.

1.7 Our facilities

No particular comments

1.8 Our heritage, foreshore and parks

Sounds about right.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

How do we get the surrounding districts to pay a share? It is bad enough that so much of our rural surroundings has been swallowed up by ugly housing without the residents freeloading on the city facilities.

## 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

## 1.11 Potential disposal of surplus Council-owned properties

Get on with it.

## 1.12 Any other comments:

The long term plan is for the ten year period from 2021 to 2030 so in the current period of needing radical change to cope with climate change the plan needs to focus not just on the ten year period but also on the need to start the progress towards addressing the Climate Change Emergency. Otago must position itself to succeed in a world of zero net carbon emissions. For most of the developed countries this means a much less energy intensive way of life. The clean energy sources all have limitations which means that these countries have to adapt to a much lower energy usage, perhaps as much as a 75% reduction. This means they will not be in a position to produce the vast numbers of industrial goods for Aotearoa that we currently import. The energy they have available will be directed to the needs of their own people not to industrial goods for Aotearoa.

For the long term plan for Otago there are three key issues that arise from the unavailability of imported industrial goods. Construction materials, especially high embedded energy structural steel and cement, will be much more expensive and restricted to being used only in special circumstances or in limited quantities. Future construction in Otago will use far more engineered timber. Motor vehicles have very high embedded energy and the infrastructure to support their use also has high embedded energy quite apart from emissions from ICE engines. A zero net carbon world will not have private motor vehicles or their infrastructure because there will no countries prepared to use their limited energy availability in producing either. There is no realistic way in which aircraft can operate without fuel derived from oil and again both the aircraft and the infrastructure for them to operate have high embedded energy. There will be no civilian aircraft in a zero net carbon world.

These three issues of constrained construction materials, no private motor vehicles and no civilian aircraft require a much more radical change in the way of life in Otago and the makeup of the city than is being prepared for in the proposed long term plan. Whilst the full effects of the radical change will not be apparent in the ten year period of the plan the capital expenditure in this period must be guided by the need to move towards this change. Clearly expenditure on roading infrastructure and on airports has to be very limited if it is not to be obsolete soon after.

Without private motor vehicles the whole physical “shape” of the city must change. Everyday amenities will have to be within walking/cycling/micro-vehicle distance of residential hubs that are high density. By 2050 perhaps thirty or forty of these will be required for a population of 6 -700,000 with green corridors between them. Travel between hubs will be by public transport, either trams or buses. The present sprawling outer suburbs will become unliveable without cars so will be returned to rural usage. There will be a very large amount of land within the city that is freed up without cars. Just think about Moorhouse Avenue as an example. There will be no need for six or eight traffic lanes, for car parking or for all the businesses dependent on car usage. The retail businesses dependent on customers using cars (big box and many malls) will also be no longer viable. Looking at the city as whole hundreds of hectares of land will be freed up.

Without private motor vehicles or aircraft the city also needs to plan for intercity travel by public transport. This will mostly be by rail but there will need to be buses to smaller nearby centres. The termini for these services need to be close to the city centre, not in positions that result in every traveller having to transfer to a second journey to reach the city centre.

Goods transport will also change radically. Intercity movement will be by rail and this means that major users of goods transport (industry and distribution centres) will have to be located with rail access. Location near the

airport will of course no longer be an issue.

Obviously much more could be said about the radical change required but the above discussion shows the scale of what is needed. The proposed long term plan does not balance the real longer term needs against the tweaking of business as usual. A failure to think about Otautahi’s future within a radically changed world has resulted in this unbalanced plan.

The changes identified are not going to be popular with a population that has developed a whole way of life dependent on cheap fossil fuel energy (there is no low cost substitute) and has become addicted to this. Breaking an addiction is difficult but it has to be done if we are to have a future not blighted by excessive global warming. However none of this requires technological breakthroughs and there are thirty years to make the changes, we just have to make sure that the next ten years are setting us up to make them.

### Feedback

1.2 Rates  
not happy with rates increases.  
Often see upgrades on buildings or roads which fairly recently been upgraded, why new upgrades needed? Is it from Bad design, need to spend the budget (cant underspend or there will be budget cuts next year) or is it to keep the workforce busy or bad workmanship. The constant road repairs / thousands of cones spanning the city, like NO OTHER city i know!

1.3 Proposed changes to existing rates, and new targeted rates  
NZ should not allow private companies to extract our water reserves and sell abroad. This precious resource should stay in the country and be used by the masses.

1.4 Investing in upgrading and protecting our city's water networks  
That seems like a too big a percentage!

1.5 Investing in our transport infrastructure  
Again 25%, what about affordable housing???

1.6 Rubbish, recycling and organics  
recycling is the future!

1.7 Our facilities  
Leave the Art Gallery alone.  
make decisions that are long lasting and commit to them. Don't keep fiddling with details. The city can operate ok as it is. seems like council has to keep itself busy otherwise us rate payers could ask awkward questions about efficiency!

1.8 Our heritage, foreshore and parks  
good

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
No

As a native Cantabrian, it has always been my aim to bring lucrative film production to Christchurch. I have brought two international productions to the city and am in the process of packaging a series to bring and shoot in Christchurch (hopefully utilising the proposed new studios.) I understand a regional film and tv incentive has been proposed and I want to offer my support for this. The incentive will give Canterbury an edge, attract more overseas production and mean many of our skilled locals can return home rather than having to be near regular work in Auckland or Queenstown.

I think we should keep the Mobile Library Bus because it is handy for all of us who don't have transport. I would be lost without this service because I can't get to another library because I don't have any transport to get me there. I don't use the internet so I couldn't access the library via the internet. The staff at the Mobile Library are very friendly and they are lovely to talk to so they become part of our community and that stops people becoming isolated.

I also want to say please keep the Riccarton Bus Lounges open, don't close them because they are handy to the buses when they come in and they provide shelter and a place to sit down. This is important especially for older people like myself.

### Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

### Feedback

#### 1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

#### 1.2 Rates

rates are already expensive enough

#### 1.4 Investing in upgrading and protecting our city's water networks

It would be great if you could stop chlorinating the water

### Feedback

#### 1.2 Rates

We need a rates increase to help pay for the infrastructural projects the council needs to do in Christchurch.

#### 1.3 Proposed changes to existing rates, and new targeted rates

Yes I support the increases especially the targeted rate for households who use more than 700 litres a day.

#### 1.4 Investing in upgrading and protecting our city's water networks

Yes the balance is right.

#### 1.5 Investing in our transport infrastructure

Thank you for the cycleways. I live next to a cycleway and the usage is huge. People can safely cycle around Christchurch without the fear of getting hit by cars. I really enjoy seeing whole families cycling along the cycle way.

#### 1.7 Our facilities

My submission is regarding the cutting of library hours and services. Christchurch City Libraries are the most innovative library service in New Zealand. Christchurch City Libraries are the hub of the community in all local areas of Christchurch and Banks Peninsula. Cutting the hours of libraries is a short-sighted measure that will affect the users of our libraries. Having libraries open to 8pm is very helpful to families, students and the working public so that they can use the library when they can. Not everyone works 9 to 5. Many people work flexible hours and often more than one job. Cutting the hours will affect the people who need the library the most: people with young families, the elderly, students and the working rate payers. I suggest we increase the library hours not decreased in all libraries around the Christchurch area.

I visit the Art Gallery often, and the hours at the moment are excellent and do not wish any changes to be made.

I am concerned about the closing of the Riccarton Bus lounge. I have often sat in the Riccarton road bus lounge while waiting for my bus. It is a safe place to sit and wait for the buses. I witnessed an attack outside the lounge by a man against another man and I called the police. Waiting for the bus on Riccarton road is often frightening, especially for the elderly and for mothers with young children. If the lounges closed, I suggest a regular police presence.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

As a regular user of the Arts Centre I welcome the news that the Arts Centre recieve a capital grant. Whenever I have visitors to Christchurch I alwasy take them to the Arts Centre, it is the foremost tourist attraction in Christchurch. It will be great to finish the earthquake reparis and finish the completion of the rebuild of the Arts Centre.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

### Feedback

1.1 Have we got the game plan right?

No, i don't believe you have this right. You are not considering the different socio-economic groups in Christchurch and how the closure of Wharenui pool will impact them. The Wharenui pool is a staple of the community and you are taking this history away. Families and schools who use this pool often don't have the means to travel across town to different facilities, which will therefore impact on their ability to learn to swim and their ability to keep fit and active.

As a Social Worker working with different communities, I can see how important the role of community facilities is, and see Wharenui fitting into this. We want our future generations to be healthy, how do you expect this to happen if you close the closest facility to them and they have no means of transport? Additionally, Wharenui is a family, everyone knows everyone. I would be devastated if you closed it down.

1.2 Rates

If increasing rates would mean community facilities such as Wharenui could stay open, then I support this.

1.7 Our facilities

You have not got the balance right and are taking services away from vulnerable communities. As stated in thr first question, if you close Wharenui down, you won't be a council that thinks about everyone in the city. You will only be thinking about those who can afford to travel across town and have the means to do this regularly. There will be a large portion of the community that will miss out on services and lead them to possibly leading unhealthy lives.

I would like Wharenui to remain open - the pool, basketball court and gym area. Please consider this in your long term plan.

1.11 Potential disposal of surplus Council-owned properties

I do not agree with this. Heritage buildings have that title for a reason and I do not think they should be closed or disposed of.

### Feedback

1.1 Have we got the game plan right?

I have some concern that a focus on cost cutting in service areas that provide an aesthetic quality for the city in order to achieve a relatively modest amount of savings. Tired and badly maintained green spaces, littering, repairing ageing paving, graffiti removal etc must not be sacrificed to the temptation to build bigger and better public amenities.

1.2 Rates

Unfortunately necessary.

1.3 Proposed changes to existing rates, and new targeted rates

I support a targeted rate for land drainage and the changes proposed. I support a targeted rate to support The Arts Centre Te Matariki Toi Ora and specific heritage projects. This is essential. A targeted excess water rate cannot come soon enough in my opinion. For too long we have abused our perceived unlimited supply of clean water. It must be conserved and quality protected for future generations.

1.4 Investing in upgrading and protecting our city's water networks  
it needs to happen.

1.5 Investing in our transport infrastructure

I really appreciate the changes made in the last 5 years for active transport and request that the major cycleway project continue to roll out as soon as possible. I fully support the future connections spend to truly give good active transport choices throughout the entire city ( bike, walk, scooter ) . I would like to see a final major cycleway be considered to connect the CBD to the suburbs of St Albans east, Shirley, Burwood, Prestons, Parklands and Queenspark. I support every \$ that is spent on improving our public transport system, particularly buses.

1.6 Rubbish, recycling and organics  
OK with that

1.7 Our facilities  
support the suggested changes.

1.8 Our heritage, foreshore and parks  
Balance is OK.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

1.12 Any other comments:

I have attached some photos taken last Wednesday 10th March to further show our concerns. The photos were taken at 5pm after it had rained between 3-4pm and gives you better understanding that although the weather was suitable for training, the courts themselves were unusable. I'm sure you can imagine how the situation is increased during our netball season months. Regarding the toilet block, the netball club do not feel safe to use the toilets in the current condition. As you will see from previous photos taken, they are unhygienic and although may fall within the guidelines of being able to occupy for short periods are realistically unusable. We are continually receiving complaints from players and parents about the state of the block, never any

toilet paper available and they do not flush properly.  
There is also no adequate lighting, which is rather scary and unsafe when our need for use is predominantly after dark.

Currently the toilets are locked at all times with the exception of the netball club unlocking them if a dire need arises and the rugby club that use them on the weekends when the grounds are in use.

### Feedback

1.1 Have we got the game plan right?

I think the balance is about right. I like that we're not taking on too much debt, that we're keeping rates increases affordable, but still maintaining our assets and growing our city. However, I disagree with the amount of money that is going to be spent on road renewals. I know this is an area that residents frequently complain about - but I am not one of them! I think are roads are generally acceptable and there are more important things to be spending our money on. It also runs contrary to our climate change goals in my opinion. I am quite happy with spending money to improve roads suitable for buses and cycling, as that will help encourage mode shift away from private vehicles. However, improving transport access for private vehicles will not drive the changes that we need to make.

1.2 Rates

I think the rates increase is reasonable

1.3 Proposed changes to existing rates, and new targeted rates

I support these changes in general, and specifically:

- I support the Arts Centre Te Matatiki Toi Ora targeted rate. The Arts Centre Te Matatiki Toi Ora is firstly an amazing collection of heritage buildings. We lost so many during the quakes, and these buildings have been so beautifully restored, it is important that we, as a city, provide support to ensure they are maintained. However, beyond the buildings themselves, the Arts Centre Te Matatiki Toi Ora is an amazing community and arts-focused space. It is a place which holds many memories for me and I want the city to support it moving forward.

- I also support the excess water targeted rate. I was shocked to hear that a small number of properties use such a large proportion of the city's potable water. Our water is a precious resource, and when there is no link between cost and usage, then it is as good as free - and anything that is free is never fully appreciated by all. So I support this rate so that people in Christchurch will have (another) good reason to value and conserve water. I am a gardener too, and appreciate being able to water the vegetables and lawn - but I always make sure to do so at sensible times and with minimal wastage. I see too many people watering the footpath or driveway, or watering during warm weather, and I hope that this rate will encourage people to conserve our precious water.

1.4 Investing in upgrading and protecting our city's water networks

I think the balance is about right here

## 1.5 Investing in our transport infrastructure

I do not think the balance is right here. I think we need to reduce spending focused on private vehicles and increase spending on low-carbon modes. Currently I do not think this LTP is doing enough to reduce the very high car dependency in our city, and therefore transport will remain a significant (and probably growing) component of our carbon emissions - which is not good enough :-)

I support the following, and would like to see more spending in these areas:

- Improving safety

- Central City Projects

- Cycling improvements. I am a regular cyclist and am looking forward to the South Express cycleway opening as it will give me a safe, efficient route into town for my daily commute. I am also excited by the 'local connections' projects which hopefully will improve cycle access across the network.

- Public transport spending. In particular, I want to see more bus priority measures installed so that it is faster to travel by bus than by car during peak times, to encourage mode shift and reduce our carbon emissions.

However, I do not think we should be spending as much on the following:

- Road and footpath renewals. Unlike most Christchurch residents who fill out your satisfaction surveys (ie the grumpy people) I am satisfied with the general state of our roads and footpaths. I do not want us to be spending so much money on renewals. I would rather the money is spent on the other aspects identified above or put towards beneficial mode shift/climate change projects. I have seen many streets around the city that have been resealed without any real need. My (former) street was renewed, and it actually became worse after the chipseal was relayed! People were able to use it anyway - so really what was the point?! I support some of the more major works, but I think the road smoothing and resealing budgets should be cut back.

I also think we should be retaining the Riccarton Road bus lounges. Given that changing buses is a requirement of our current bus network, having the bus lounges makes this a more pleasant and safe experience. Expecting people to wait on the footpath in all weathers is not going to encourage people to shift to public transport. You state that "This kind of suburban facility is not provided anywhere else in Christchurch" but I feel that is not a reason to close this one! Instead it should be a reason to open more facilities like this, or at least work with ECan so that major transport/transfer hubs can be co-located with CCC facilities to provide a safe and pleasant place for people wait while transferring.

## 1.6 Rubbish, recycling and organics

I like that we are looking to minimise waste across the city

## 1.7 Our facilities

I support the proposed new community facilities, with the exception of the multi-use arena (although I know that ship has sailed!) I reluctantly support the proposed reduction in services.

As mentioned earlier...

I also think we should be retaining the Riccarton Road bus lounges. Given that changing buses is a requirement of our current bus network, having the bus lounges makes this a more pleasant and safe experience. Expecting people to wait on the footpath in all weathers is not going to encourage people to shift to public transport. You state that "This kind of suburban facility is not provided anywhere else in Christchurch" but I feel that is not a reason to close this one! Instead it should be a reason to open more facilities like this, or at least work with ECan

so that major transport/transfer hubs can be co-located with CCC facilities to provide a safe and pleasant place for people wait while transferring.

1.8 Our heritage, foreshore and parks  
I think the balance is about right

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments

As I mentioned earlier...

I support the Arts Centre Te Matatiki Toi Ora targeted rate. The Arts Centre Te Matatiki Toi Ora is firstly an amazing collection of heritage buildings. We lost so many during the quakes, and these buildings have been so beautifully restored, it is important that we, as a city, provide support to ensure they are maintained. However, beyond the buildings themselves, the Arts Centre Te Matatiki Toi Ora is an amazing community and arts-focused space. It is a place which holds many memories for me and I want the city to support it moving forward.

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes  
Comments

1.12 Any other comments:  
Do more on climate change!! (more bikes, fewer cars)

**First name:** Hans **Last name:** Andersen

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

No dont think so. you should live with in your means instead of fleecing the rate payers for still more

more money. The City council will be aware that our property prices have shut up, so our rates will go up sharply whatever the council does.

So just spend less and forget some of the fancy projects they want to force down our throats.

Especially the socialist and green councilors on the council love spending heavily on cycle lanes.

THat is not necessary and I put it to these idealistic councillors " How is my wife goes to do her shopping if

it gets more difficult every year' You tell Me??

So dont wish to waste time on a long winded submission which Council will disregard in any case

So JUST SPEND LESS???

All I will say we dislike greenies and dont like to be told what to do with our lives.

We got two cars and do not travel by public transport, but that is our choice.

By the way I happen I was born and breed in Denmark long ago, but know probably a lot more ab out cycling that your selfstyled experts on CCC will ever know.

I use by bike here from Ilam for recreational purpose and that is it.

1.2 Rates

Spend less and live frugally and sack some of your huge inefficient staff

1.3 Proposed changes to existing rates, and new targeted rates  
Any rate changes are mere pittance and just keep rates unchanged.,

1.4 Investing in upgrading and protecting our city's water networks  
Spend more on water and less on cycle lanes.

1.5 Investing in our transport infrastructure

transport costs are there to be paid for, but i doubt that many more citizens will hop on a bus, as people prefer their own mode of transport. Personally I would not use a bus, Could not think of anything than sitting on a public bus to go anywhere.,

So OK to spend transport money on better roads and better conditions in the city but drop this insane

preoccupation on cycle lanes which I doubt will ever be well used, apart from students going to and from university,

But why should I pay for them and their cycle lanes.

1.6 Rubbish, recycling and organics  
Spending money on rubbish and recycling moderately is fine, but don't go over board.

1.7 Our facilities  
Spending on feel good and cultural projects should be minimized and a lot of that should be on a user pay basis. I do not wish to pay for our people's trip to the library.

1.8 Our heritage, foreshore and parks  
Less should be spent on these projects with and not 11%, say 5% should be sufficient

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments  
Far enough to spend money on Arts centre as needed.,

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes  
Comments  
Mc Gougall is worth spending on so go ahead

1.11 Potential disposal of surplus Council-owned properties  
Sell them, as it is not the job of CCC to collect old buildings, which are not needed any more.

1.12 Any other comments:

NO , but please put the liking cycle lane group under control, as it will always be a minority of people

who will ever using any cycle system for riding to work, but as myself nice to have some room

riding around on a sunny weekend recreationally

### Feedback

1.1 Have we got the game plan right?

Further hedance and stronger targets need to be given to global climate change and the impact the city and wider area has on the enviroment. The proposed targets are no where near ambitious enough.

1.2 Rates

While I have no disagreement with rate increase, I believe there are very important issues that have not been prioritised in the LTP.

1.3 Proposed changes to existing rates, and new targeted rates

Further targeted rates for higher polluting industries if allowed under current legislation. Consideration for a low emission zone within the CBD.

1.4 Investing in upgrading and protecting our city's water networks

Fluoridation of water is ok by me, further investment in planting programs for city storm water drainage.

1.5 Investing in our transport infrastructure

Low emmsion zone for non residents, all funds from this to be directed to clean transport.

1.6 Rubbish, recycling and organics

Ensure a cyclical process for all recycling.

1.7 Our facilities

Looks Good.

1.8 Our heritage, foreshore and parks

Looks like there could be room for a bit more investment here.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes
Comments
1.10 Funding for base isolation of the Robert McDougall Art Gallery
Yes
Comments
1.11 Potential disposal of surplus Council-owned properties
I think this should be seperated from the long term plan, with a simple consultation process allowing the electorate to give feedback on each asset up for sale.

### Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

### Feedback

#### 1.1 Have we got the game plan right?

The proposed rates increases are too high. Reductions should be made to the proposed budget, particularly in the areas of:

- water
- roads and footpaths
- transport
- sharing costs

I think that CCC needs to budget for the impact of climate change and it seems foolish not to have a proposed amount set aside for dealing with emergencies caused by stronger storms, flooding and other obvious climate impacts at the very least. There should also be funds allocated for repairing infrastructure damage, whether that's drinking water supply, sewage, bridges etc.

There is no explanation as to how CCC will manage its salaries and wages budget over the next decade. It appears that a high proportion of CCC staff are paid significantly more than the national average. Are some of these people really worth several hundred thousand per year? I would suggest a 5 year salary freeze for everyone paid more than \$180,000 p.a. and a freeze on bonuses for all staff (if not already in place). If any CCC staff are not paid a living wage, this must be achieved through a longer salary freeze for the highest paid staff.

#### 1.2 Rates

I think that the proposed rates increases are too high. Most people will not have salary or wages increases over the next decade which will cover the increased rates. I think that some of the proposed shared costs should be reconsidered. I strongly recommend that CCC does NOT contribute to the Canterbury Multi-Use Arena. The professional sports organisation who want this arena should pay for it themselves. Professional sport is a luxury which ratepayers don't need to support through rates.

We need to understand that the future is going to be radically different due to the climate emergency and pandemics. As we don't know the details of what the future holds, although it will be different and costly in unexpected ways, the contribution to the Canterbury Arena should not be made. Other proposals also need to be considered through a climate emergency lens, such as the transport, roads and footpaths, facilities, parks and foreshore proposals.

#### 1.3 Proposed changes to existing rates, and new targeted rates

Yes to the targeted rate for Te Matatiki Toi Ora. No to an excess water rate which is purely based on usage. Some large family households may need to use more water than most and may also be less able to pay a fee.

I think it is wrong to bring in excess water use rates when there are international companies bottling water for export from local aquifers. CCC should require ECAN to revoke these permits. There are a lot of leaky pipes supplying drinking water - once these leaky pipes are fixed, it may be possible to find an equitable way of charging for excess water use, which doesn't unfairly affect poor people.

#### 1.4 Investing in upgrading and protecting our city's water networks

Yes to protecting and upgrading the drinking water, stormwater and wastewater networks. This is important as there are too many times when sewage flows into our rivers due to storms. This is a significant risk for now and the future, due to more and stronger storms, due to an unstable climate.

Please do not bring in an excess water rate as the proposed charge looks like it will target large households, who may be poor or multigenerational households, who may not have the level of income to cope with extra costs. There needs to be another way of reducing and better managing water use.

#### 1.5 Investing in our transport infrastructure

Transport infrastructure costs must include completion of all the planned cycleways. Please don't spend any more money on car parks, car parking buildings or on-road parking spaces. We have a ridiculous amount of car parking already and very likely people will use cars far less frequently in the near future.

Public transport such as buses needs to be managed by CCC as ECAN has made and continues to make a mess of it. Bus services need to be regular, reliable and on a short pathway to an all-electric bus fleet. Frequent changes to routes (as in the last 10 years) have moved a lot of people off buses and back onto cars.

Please continue to reduce speed limits in Christchurch. The 30 kph zone in central Christchurch has made it much safer to be a pedestrian, cyclist or scooter user. It would be great to have a bigger 30 kph zone around the current zone, covering roads like Brougham street, Ferry, Lincoln, Papanui, Riccarton roads. This would save lives, prevent injuries and make many inner suburbs quieter and with better air quality. There is no reason not to trial a bigger 30kph zone for 5 years and then make it permanent. We need more cycle and scooter parking in local parks, outside libraries and pools, anywhere there is a regular weekend market or event. Please make the occasional on-street car park into a cycle park space or a space for outdoor seats or a portable garden. Do this in partnership with cafe owners and we would make Otautahi a much happier place. Please look at the changes made to limit car use in cities such as Barcelona, Paris and many others. Christchurch should follow the options used in many European cities to discourage car use and encourage alternative transport.

#### 1.6 Rubbish, recycling and organics

The proposed balance is mostly right. CCC should be working with companies which will take materials out of the waste stream and make them into other products. This includes soft plastics into fenceposts and fabrics into wall linings, glass and some plastics into road and footpath surfaces. Removal of materials from landfill to allow for re-use, re-purposing must be a significant focus from now on. We must get onto the path which leads to minimal use of landfill, all organics for composting and massive re-use, remaking, repurposing efforts. I hope this can happen with the proposed budget.

#### 1.7 Our facilities

I mostly agree with the proposed changes as so much can be done online. However, libraries are often the only places where poor people can use the internet, read and study. So please don't reduce library hours or services anywhere close to schools and in areas like Aranui, Linwood or Hornby. Anywhere where people are living in cars, garages, or have multiple generations squashed into a house, are places where libraries need to be accessible and well staffed. Please consider adjusting the hours at CCC service centres when co-located with libraries which are open on the weekends. Service centres in libraries need to be open on some weekend hours. Could Saturdays 9.00/10.00 am-1.00pm be staffed and some weekdays morning or afternoon hours be reduced so the change is cost-neutral?

#### 1.8 Our heritage, foreshore and parks

More will need to be spent on foreshores to mitigate rapid climate change. When you look at modelling of the impact of sea level rises or floods caused by stronger storms, \$60 million is a tiny amount. Please increase this amount to at least \$120 million. Spending on parks needs to be reduced and how our parks are managed needs to be changed. We need to make some parks into "wild parks" - plant long grasses, flowering annuals, and plant lots of food plants for beneficial insects. Wild parks will need less maintenance, less watering and will be great spaces for 'forest bathing' in our city and suburbs. Get input from Ngai Tahu on plant species.

Sports clubs need to pay more for use of parks and where their use damages parks, they should have to pay for repairs.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

Te Matatiki Toi Ora is a treasure and we must preserve it.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

Better to try to preserve this building and reuse it than demolish or let it decay.

1.11 Potential disposal of surplus Council-owned properties

I'm happy for surplus properties to be disposed of. Please ask Ngai Tahu to express their interest first before putting them on sale.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

Property Ref. 73053173 at 621 McLeans Island Road.

We do not support the closing down of the remissions of rates to non-profit organisations. Our organisation operates at McLeans Island in the flood plain between the two stop banks. It is basically riverbed. Here we run a railroad with locomotives and other steam equipment e.g. traction engines and steam engines which helped make NZ and are now heritage machines.

As an organisation we were very limited in achievements in the last financial year, last year's main Event was cancelled. Many of our members are in the over 60 age group. It is fortunate we are in a good financial situation. There are two major items that we did not start this year i.e. remaking our front fence and entranceway with a more attractive gate (\$7,000) and a 10 year survey of a steam locomotive (costs \$15-20,000). We feel we should not be penalised for running a non-profit organisation on basically riverbed land which we have cleared of noxious weeds and is part of the Waimak Recreational Park. We would like to see the rates remission policy remain the same for non-profit organisations like ourselves.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

In general yes the plan achieves a good balance. The Council has done a great job with this.

My only concern is that the rates increase over the next 3 years is front loaded, putting pressure on ratepayers when least able to afford it after Covid impacts. Better to spread the costs more evenly across the 3 years.

1.2 Rates

See above.

Also, if higher rates increase in year 1 is proceeded with, the Council must resist upping the projected rates in years 2 and 3 when setting budgets.

1.3 Proposed changes to existing rates, and new targeted rates

All good.

1.4 Investing in upgrading and protecting our city's water networks

All good, but I would like to see further work done on alleviating flooding along the Heathcote River. There seems to be a big focus on the Avon catchment but nothing for the Heathcote which still has serious flooding issues.

1.5 Investing in our transport infrastructure

I consider that the balance could be improved by switching significant spend from cycleways to roads and footpaths. The cycleways programme should be spread over a longer period.

The extra number of motorists who will switch to cycling purely due to the increase in cycleways is very low. Any increase is likely to be due mainly to the availability of e-bikes, or would have happened anyway. The case for more cycleways will become stronger as e-bikes become cheaper and petrol more expensive. The silent majority of residents do not support such a rapid programme of expensive cycleways.

In general we should let central Government do the heavy lifting, ie meet the major costs, for climate change

initiatives. EVs will be much cheaper and possibly subsidised in future.

1.6 Rubbish, recycling and organics  
All good.

1.7 Our facilities  
All good, but community housing only mentioned in passing. I would like to see more definite plans for this, eg to continue with 90 net additional units each year.

1.8 Our heritage, foreshore and parks  
All good.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments  
I strongly support this.

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes  
Comments

The upgrade/repairs are not worth doing unless the foundations are also upgraded. Should do both or neither.

This is a wonderful building and should be prioritised.

1.11 Potential disposal of surplus Council-owned properties

I consider that all surplus buildings should be disposed of unless there is a very strong case to retain in accordance with overall objectives. This avoids the inevitable gradual increase in costs for very little benefit.

The Council has taken a very responsible stand in suggesting these properties could be disposed of.

1.12 Any other comments:

The Council team should be congratulated for developing a plan which is both affordable and delivers the priorities requested for ratepayers.

The cost cutting identified to enable this is very much appreciated.

### Feedback

#### 1.11 Potential disposal of surplus Council-owned properties

With regard to 27 Hunters Road, Vacant Land, Pt Lot 1 DP14050++ 12F/538, 390222 sq meters.

This large piece of land is slate for fast track disposal in the LTP.

It would be wholly irresponsible of the council to to dispose of this land and zero foresight is demonstrated by the council. The suggestion is that this would likely be subdivided with potential for a possible 1000 new dwellings (approx doubling of current population. **Prior to** sale significant upgrades to local infrastructure would be needed. It would be very short-sighted for the council not to put sufficient funding into massive infrastructure overhauls prior to sale. This is not the responsibility of the developers - it is the responsibility of council. The following would be minimum requirements:

1) The roading access is already appalling and not suited to further traffic from cashmere right through to Diamond Harbour. Another 1000 vehicles per day would stress an already over-stressed infrastructure. The road is not wide enough from Cashmere right through to Purau. It is very windy, does not cater for safety of all road users (predominantly cyclists in danger who are regular users) and is a patchwork of repairs from under-runners and subsidence. The road will need rerouting or will need to be raised in elevation in multiple areas as it is prone to flooding during periods of high rainfall (Charteris bay, Teddington specifically) and future sea-level rises will require new roading solutions as many areas are close to sea-level at current high-tide marks.

2) There is a lack of provision for public transport. A potential doubling of the Diamond Harbour population would require substantial upgrading of the ferry service and bus access to the city (the most efficient and best way to get to the city). At peak times the ferry is already over-subscribed and ferry operators regularly make multiple unscheduled trips to move people across the harbour. Bus and ferry timetables often do not coincide making public transport loathsome to use during peak periods. At minimum buses and ferries must run on 20 minute intervals between 6-8.30am and 4.30-8pm with low transit times between modes built in to get people off the road and onto buses. Later ferry options must be offered on Friday and Saturday evenings. The wharf area in Diamond harbour and Lyttleton must be improved to cater for increased use. Consideration of light trains on current rails from Lyttleton to city would be an advantage to keep transport on time. Further provisions would be required for bicycle users with bus-cycle transport racks already at maximum capacity and patrons having to wait for the next bus so they can transport bicycles through the Lyttleton tunnel to the city. 30 minute waits for buses because bikes cannot be transported is infuriating.

- 3) The sewerage systems and water systems are already at capacity. New piping and capacity would be required across the harbour and the pumping stations likely need upgrading.
- 4) Pedestrian infrastructure requires major upgrades with narrow footpaths requiring widening and footpaths actually provided in places where they are absent.
- 5) Local schooling and education would need expansion with further provision for access to high-schools required (Cashmere high-school is already struggling to keep their role down and extra students from Diamond Harbour would not be helpful).
- 6) Electrical supply infrastructure would need upgrading and the security/resilience of the system improved.
- 7) Provision for increased capacity for other important services would need to be considered - doctors, dentists, fire and emergency, pharmacy etc.
- 8) Parks and reserves (of which some lie within the boundaries of the land to be sold) have been put in and maintained by locals. These must be protected as they provide significant public amenity and significant local investment must be respected.
- 9) Telecommunications would require significant upgrades (internet is appalling, cellphone reception very patchy for some areas).

In summary, the proposal for selling this particular tract of land is premature and council must address the significant infrastructure issues prior to sale. To sell the land without upgrading access and all other points mentioned above completely lacks long-term vision. It would be irresponsible and ill considered specifically in light of future climate impacts and sustainability issues for moving population around the city without the need for automobiles.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.2 Rates

I'm not happy about ongoing rates increases.

I am not sure that I will be able to manage that financially as I am now living off a retirement income.

Unfortunately, the Govt super is not increased by that amount each year. Rates increases should only be at CPI rate.

I would prefer to see the Council have a major restructure and become a much more efficient workplace. That reduction in salaries would fund council projects.

Feedback I've had from people who have worked there, is that not all staff work efficiently and effectively.

#### 1.3 Proposed changes to existing rates, and new targeted rates

It is a very good idea to support the Arts Centre. That is an amazing asset for our city.

I would support and excess water targeted rate for those who use more than 700 litres per day.

1.4 Investing in upgrading and protecting our city's water networks  
Agree

1.5 Investing in our transport infrastructure  
Agree

1.6 Rubbish, recycling and organics  
Agree

1.7 Our facilities

I don't support changes to the level of service at the Library and the Art Gallery.

I would support surrounding Councils contributing more to run these assets.

1.8 Our heritage, foreshore and parks  
Agree

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments  
Yes, strongly support that funding.

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes  
Comments

1.11 Potential disposal of surplus Council-owned properties  
agree

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.2 Rates

I think it's fine. This is an issue we all play a part in (except for larger companies importing things should have to pay much higher rates)

#### 1.3 Proposed changes to existing rates, and new targeted rates

Stop allowing farmers to so easily lower the water table. Stop allowing companies to export white bait and eels. Most people would be fine paying higher rates if other businesses weren't there to take advantage of the tax payer.

#### 1.4 Investing in upgrading and protecting our city's water networks

This is fine

#### 1.6 Rubbish, recycling and organics

Based on the fact that you have mentioned recycling markets, it shows there is still a large focus on planning to ship recycling offshore. There needs to be significant upgrades to resource recovery or re-using materials placed in the recycling bin. From a future economic stand point, the larger our capability to be self sufficient in resource reclamation the more stable our long term success will be as we won't need to rely on oversea support. Such an example of this importance can be seen from the recent pandemic. I suggest moving money away from organics (which almost everyone can process at home) and diverting it into recycling. Furthermore, putting more of an emphasis on recycling may allow you to re-allocate funds from rubbish to recycling too.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.1 Have we got the game plan right?

While reviewing Christchurch City Council's LTP consultation document against Christchurch City Council's climate strategy, I note an inconsistency in one area in particular - transport. I also note the contradiction between the LTP and the declaration of a climate emergency. They're great things to say but I don't see much walk to match the talk.

At present, private vehicle usage is incentivised within Christchurch City. Free on-street parking is available across almost all of the city. While considerable investment has been made on bus prioritisation, the lack of any economic disincentives from Council on private vehicle use.

If you're really serious about reducing emissions from transport then the subsidies that are provided to motorists through free on-street parking need to be removed to provide a true like-to-like comparison in financial terms between private vehicle usage and alternative forms of transport.

In fact, the extension of pay-to-park provisions on-street may in fact pay for improvements across alternative forms of transport that many Councillors seem to dislike.

#### 1.2 Rates

If you apply a user pays model to on-street parking then additional funding will be available for the funding of other public services related to roading. The existing approach to subsidising private vehicles parked on Council-owned land should not be funded through rating which it has for decades.

#### 1.3 Proposed changes to existing rates, and new targeted rates

No comment on this point.

#### 1.4 Investing in upgrading and protecting our city's water networks

Let's be honest. CCC is going to have to increase its funding on three waters infrastructure. I'd merely like to see consideration provided for integrating three water upgrades into other works, including the footpath programme to maximise cost efficiencies.

If anything however, the amount being allowed for may in fact be a little bit light.

1.5 Investing in our transport infrastructure  
Spend incentivising alternative forms of transport to private vehicles needs to be brought forward, replacing expenditure on transport infrastructure that incentivises private vehicle use. I don't see that within the Long Term Plan.

1.6 Rubbish, recycling and organics  
Strongly agree with this.

1.7 Our facilities  
Makes sense to close the Riccarton Road Bus Lounge. While I'd love for the hours at our community libraries to remain the same, I understand the rationale behind the change. I do not agree with the reduced hours for Turanga however which should maintain its current hours.

1.8 Our heritage, foreshore and parks  
I do not agree with the provision of funding for the restoration of privately owned infrastructure and buildings, including Christchurch Cathedral. The Arts Centre being an exception due to its broad utility to the community. I believe that this funding should be reallocated for future-focused improvements for the city.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments  
I support this

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes  
Comments  
I support this. The rupture of the Alpine Fault is overdue. As a city, we should aim to be as resilient as possible. I see this investment as an insurance policy against future losses.

1.11 Potential disposal of surplus Council-owned properties  
Agree

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.7 Our facilities

I am strongly opposed to the proposed removal of Wharenui Pool as a **community facility** for the Riccarton area and surrounds.

This pool remains an important highly ACCESSIBLE facility for local residents, of which I am one. I use the pool regularly because it is so convenient to my home. This can not be replicated by the central city stadium - which will be harder to access and therefore more costly in terms of travel and time. I am highly unlikely to travel in to the city to exercise.

I am in my 50s, but when I do go to the pool, there are a number of regular, familiar considerably older people using the facility. I would be very surprised if they felt comfortable travelling in to town to pursue their lane swimming and aquasize classes. There is a real sense of community at Wharenui pool. The facility is ACCESSIBLE, relaxed and familiar to older users.

Considering the lower socio-economic status of many residents in this area - it is all the more important to look after the health and well-being of this community by ensuring facilities are CONVENIENT AND ACCESSIBLE for both adults and children. Travel costs must be kept to a minimum - and this can only be achieved by having LOCAL COMMUNITY FACILITIES such as those provided by the Wharenui Swim Pool complex.

I am aware Wharenui Pool is also used by local schools. It goes without saying that in a country surrounded by water, this should be prioritised by local government. I have no doubt our local school learn-to-swim programmes would suffer if providing these classes became any less convenient, or more costly to their families.

Wharenui Swim Club is also a key community group. My daughter has enjoyed swimming with them. Christchurch swimming has already suffered considerably following the quake. If we want to have a strong sporting community that features nationally - then we need to keep these facilities open and encourage as many young people in to club sports as possible. Centralising these teams, undermines the sense of community our young people experience from smaller clubs. From a parent's point of view, it would also add to the stress of commuting and fitting in swim sessions around school. We should be breaking down barriers to encourage community health and exercise, not creating them!

For these reasons I strongly disagree with decommissioning Wharenui Pool as outlined in the long term plan, proposed by Christchurch City Council. It is critical that it stays open and remains a CONVENIENT and

ACCESSIBLE facility for local and nearby residents.

Thank you for your consideration.

Jane Nicholl

### Feedback

1.1 Have we got the game plan right?

I was concerned to see cuts in public funding AND cuts in funding for Wednesday night opening at our Art Gallery

1.2 Rates

No comment

1.3 Proposed changes to existing rates, and new targeted rates

no comment

1.4 Investing in upgrading and protecting our city's water networks

no comment

1.5 Investing in our transport infrastructure

I have made so many submissions now on the difficulty of using the bus service to get just about anywhere from my neighborhood, I have now given up and accept the bus system for what it is.

The days when the #60 used to take us straight up Pages road and into town are a memory. I refuse to let my 18 year old daughter old linger in New Brighton after dark between buses (sometimes a 20 minute wait). Even on a school day it is over an hour to get to her school, a 12 minute drive.

We use cars, or stay home.

1.6 Rubbish, recycling and organics

no comment

1.7 Our facilities

Please do not cut the late night Wednesday openings at the gallery, or funding for public programmes.

I work from home, and generally spend a lot of time alone. Christmas and New Years can be a challenge. I often find myself gravitating to the art gallery, and revel in the chance to mingle, even solitarily, among like minds.

The public programmes have enhanced this experience hugely - it truly is my happy place in the city.

The gallery has worked so hard to move away from the fusty dusty Robert McDougal image, and it is wonderful to see all walks of life there, taking part in the free activities on offer. Especially for arty families without a huge amount of discretionary spending, who are generally left with library books and on their own devices.

When I was a young single mother in the 1990's, I was so painfully lonely, and there were so few opportunities to engage in the community with my child. We never saw people "like us" at the art gallery. This is so different now, and I applaud the governance that has allowed this space to flourish

Any cut in funding for the gallery would be backwards and very very sad.

## Feedback

1.1 Have we got the game plan right?

rural urban fringe zoning needs changed either into a rural urban settlement or similar. 4ha subdivision limits should be 1ha with compulsory composting toilets and grey water fields.

easy as covenants on composting toilets (no septic systems)

Solar if street power insufficient

1x residential dwelling per build. (No minors)

whats the point of a rural urban if you don't move with the times.. some are a stones throw from big new subdivisions. With hundreds of homes.. we already have wheelie bins and street lights.. how are we rural?

composting toilets are the answer. And 1ha sites are a perfect lifestyle block size (without the lifestyle sentence)

it would create lots of development contributions while requiring minimal council contribution.

And encourage highly spec residential dwellings also creating more rates revenue with minimal council contributions most 1ha sites would be worth 800k overnight if close to town

This is a simple solution to the housing shortages while not straining infrastructure as almost none needed..

if power requirements were an issue make minimum solar installs a requirement

alternatively change more into residential new settlement. But we both know you can't afford the infrastructure bills...

1.2 Rates

think better spending would be the answer

Property values are increasing fast enough anyway this will boost your wealth tax anyway

1.6 Rubbish, recycling and organics

refuse stations are overpriced. Encouraging dumping this should be discounted as you guys must spend a fortune on cleanups

Y

1.7 Our facilities

wharenui pool has been an integral part of christchurch swimming training for as long as I can remember and now the youngest members of my family are achieving with the use of this facility. As a family we have no interest in the new metro center. Why - its size, location, and what we perceive as a total waste of money. This council has to really get its priorities right. Stop wasting money on ridiculous so called art cycle ways that have now turned our roads into narrow death traps. Leave our pool alone as its an institution and an amazing facility. We have pioneer pool close by but never use it for the simple fact that it's too big.

## Feedback

### 1.1 Have we got the game plan right?

Capital projects are for the greater good but we must keep in mind the wellbeing aspect of larger city living for all suburbs not just the inner city. We need to ensure there is equity for all sectors of the socio-economic spectrum.

In 2021 onwards we need to make sure communication is clear. We have less people reading the back pages of the newspaper but we do not have 100% access to online information so there must be many forms of communication used to inform the population of changes.

### 1.2 Rates

All rates decisions need to be inline with the Consumer Price Index so there is equity across the community that the percentage of income that pays rates is a similar percentage in each socio-economic band.

### 1.3 Proposed changes to existing rates, and new targeted rates

If equity across the community is maintained and communication of any changes is accessible to all and in many forms.

### 1.4 Investing in upgrading and protecting our city's water networks

If this is an acceptable practice across the world in cities of similar size that have faced similar infrastructure destroying events as Christchurch then best practice is being applied.

### 1.5 Investing in our transport infrastructure

Again if this is similar to the spending in similar cities across the world then best practice is in place.

### 1.6 Rubbish, recycling and organics

The system appears to work.

### 1.7 Our facilities

As long as the education programmes at the Chch Art Gallery, Christchurch Museum, Air Force Museum and libraries are maintained and as new technologies are introduced these places can keep up to date with these resources then I will agree with the 19 percent capital spend and hope that this percentage will increase when most of the water infrastructure has been replaced.

1.8 Our heritage, foreshore and parks  
In 100 years times what has been rebuilt since the earthquakes will be heritage so all buildings need care and attention. It would be delightful to have some safe 200 year plus building around in 100 years time.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Comments  
Do we need to be the owners of the Arts Centre?

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Comments  
I do support the retaining of the Robert McDougall Art Gallery so if base isolation is needed then this must happen. We have a significant collection stored in the Chch Art Gallery that is not on display and to have a permanent display in a building with a significant ambience that the Robert McDougall Art Gallery has would be magnificent.

1.11 Potential disposal of surplus Council-owned properties  
Good practice would be that they should be sold but if they are heritage buildings they would need to be sold on condition on maintaining them as heritage or at least the frontage maintained some heritage chattels incorporated in the new building.

1.12 Any other comments:  
Education programmes and relationships with all the schools of Christchurch must be maintained and where possible improved as technology changes. If there was the opportunity to set up a rotating access for each school during the school year then the schools would turn up and use them especially if their was a subsidy from the council for transport.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Balance looks about right except for a couple of things I would like to see;

1. A joint approach to transport between CCC and ECan. I think it's ridiculous that ECan manage public transport and CCC merely provide for bus stops! Both parties need to work together with Waka Kotahi (NZ Transport Agency) and be accountable for planning and building an efficient light rail transport system that connects satellite hubs like Rangiora and Rolleston with the city, which combine with bus and other transport options to get people around efficiently. The only planning failure is failing to plan, and measures should have been put in place for a light rail system decades ago, especially in a predominantly flat city. Spending more on more roads is not the answer, as this simply leads to more traffic and therefore congestion which is unsustainable both financially and environmentally. Efficient light rail public transport investment, combined with existing road infrastructure and public transport, would make Christchurch a much better place to live and set the city up for a prosperous future. Simply spend the money on light rail instead of more roads, then existing roading infrastructure would be sufficient as increased efficiency caters for increased future capacity demand.
2. An urban design planning policy framework that discourages/dis-incentivises suburban sprawl and encourages/incentivises medium to high density residential development linked to transport nodes (refer point 1) and brownfield development of areas that have become run down and ineffective. If residential suburban sprawl is allowed to continue at the current rate, the city will become an enormous sprawling expanse of 'house on section' residential housing and we will face the traffic congestion and unsustainable issues faced in Auckland. Infrastructure costs will be less with more dense nodes of development, housing affordability will improve and green spaces will be retained for all to enjoy. Otherwise there will be no green space left between Rangiora and Rolleston, and everyone will spend half their day stuck in traffic trying to get to work.

1.2 Rates

Seems OK, would be nice if rate increases were aligned with inflation however understand this is probably not feasible

1.3 Proposed changes to existing rates, and new targeted rates

OK

1.4 Investing in upgrading and protecting our city's water networks

OK

Suggest greater support and emphasis on residential roof water storage tanks. They reduce stormwater flow and save water which could be used for garden watering. Perhaps a rates rebate of some sort for people who invest in tanks when building a house

1.5 Investing in our transport infrastructure  
Focus completely on the wrong thing - refer point 1 above

1.6 Rubbish, recycling and organics

Would like to see Christchurch become a nationwide (if not global) leader in waste management including;

- 1. elimination of waste - ie - incinerate instead of sending it to landfill which is bad for the environment and gifts money to waste management companies
- 2. recycling of waste - ACTUAL RECYCLING - ie - turn waste into a new useful product again and again. Build recycling plant for plastics, glass and any other nasties that clog our waterways and oceans. Create value add industries that turn waste into energy or new products, contributing to a sustainable society, sell these technologies around the world. Start small and work with the private sector to innovate solutions
- 3. lobby government for product life cycle responsibilities to be required for any product sold in NZ - ie - any manufacturer of a product has to take the product back at the end of it's life and be responsible for the recycling or otherwise disposal of it.

1.7 Our facilities  
OK

1.8 Our heritage, foreshore and parks  
OK

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments  
OK

1.10 Funding for base isolation of the Robert McDougall Art Gallery

### Feedback

#### 1.5 Investing in our transport infrastructure

We are concerned that a disproportionate amount of money seems to be invested in cycle lanes and that there seems to be an anti-car stance that the council are taking. We would like to see evidence based decisions making. There are enough cycle lanes in place already to get some accurate cycle vs car counts. The counts need to be actual counts and not anecdotal.

We are also concerned that the council is looking to reduce the amount of car parks in the CBD and we feel this will put shoppers off coming into the CBD and they will be drawn to suburban malls as parking is easier, more plentiful and free.

We have all worked so hard to rebuild the CBD and it would be a tragedy if Council decision making was responsible for the demise of the CBD.

#### 1.12 Any other comments:

I am in full support of funding to establish a regional incentive for Screen CanterburyNZ to attract visiting productions and to support local content IP creation.

I feel it is vital that Christchurch adopts a plan to ensure we create a vibrant screen industry as I believe it will attract millions of dollars annually to the local economy and create high paying highly sought after jobs and will ultimately make Christchurch a more desirable destination and place to live.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.2 Rates

Too high again. Well above inflation. These rate increases are unsustainable and verging on the usurious in the long term.

There are plenty of areas to cut back costs eg mowing lawns in the middle of the driest March in 12 years! Some of the cycle ways are over engineered and the Harewood Road cycleways proposal is totally extravagant. Also I can't understand some of the roading decisions eg. resealing Chapter and Knowles Streets, St Albans. Not heavily trafficked and not in bad shape, but thousands spent on new seal. Bizarre.

#### 1.3 Proposed changes to existing rates, and new targeted rates

Generally support these targeted rates.

#### 1.4 Investing in upgrading and protecting our city's water networks

Do not support. Excessive

#### 1.5 Investing in our transport infrastructure

Excessive. Reduce and re-prioritise.

#### 1.6 Rubbish, recycling and organics

Do not support this level of funding. What is it being spent on?

More pressure needed on central government and business to reduce plastic packaging otherwise this is a losing battle.

#### 1.7 Our facilities

More effort needed to maintain public toilets and portaloos. Recently two portaloos visited had not been serviced. Avon Park and Windsurfer Park, Humphreys Drive.

Portaloo needed at the top of the Rapaki Track on the Port Hills. The track is used by hundreds in the weekend. and no toilet Portaloo could be accessed by Summit Road and would need to be serviced regularly.

1.8 Our heritage, foreshore and parks

Support this expenditure.

Do not support excessive mowing of parks/gardens, particularly at the height of summer. Recently I was at Avon Park and two huge mowers were working and the grass was almost dead! Why?

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No  
Comments

Extravagant and unnecessary engineering. There must be cheaper ways to strengthen this building. The old hospital, Parkside and Riverside is not even base isolated.

Another engineer's dream job.

1.11 Potential disposal of surplus Council-owned properties

Totally opposed to the loss of two heritage buildings, particularly Rolleston House which is a critical part of the Arts Centre Precinct. Some kind of community or public use should be found for this attractive building. Careful consideration must be given to whether or not sale of any Council building derogates the amenity values of a particular area.

Christchurch has lost much of its aesthetic value since the earthquake. Don't make it worse! It is a much less attractive city.

### Feedback

1.11 Potential disposal of surplus Council-owned properties

I request that the land parcel described as 27 Hunters Rd, Vacant Land, Pt Lot DP14050 etc, 390,222 m2 be removed from the Long Term Plan and fast track disposal. The normal process for disposal of land that would require Community Board and public consultation, should be used instead. There are many community connections with this land, it is very important to the community that the community takes a full part in any proposed disposal process.

### Feedback

1.11 Potential disposal of surplus Council-owned properties

Re: Proposal to dispose of 42 Whero Ave, Diamond Harbour.

There are several issues regarding potential disposal of this land that should involve community consultation, so fast-track disposal through the Long Term Plan is not appropriate.

Issues include:

- protection of the gullies;
- future of the walking tracks (which provide safe off-road access to the school for children) through this land;
- possibilities of land uses other than housing on this land;

Therefore I ask that the normal process for disposal of land that would require Community Board and public consultation be used.

### Feedback

#### 1.11 Potential disposal of surplus Council-owned properties

This submission is specifically focussed on the Hunters Road fast-track proposal in Diamond Harbour

This process is unfinished and incorrectly driven. The public are not adequately consulted. The detail of this section is buried so deep in the plan that many folk would miss out on learning about the detail.

The council should do a proper consultation process with the Community Board first followed by the public. The process requires seriously further thought and strategy.

It should be thinking about:

1. Covenant should be placed on Sam's Gully and Morgan's Gully to protect our recently planted native trees. We need a covenant controller.
2. Noise pollution will be an issue for many households living in this area. It's a **rural setting** and the main reason why people move to Diamond Harbour and the Banks Peninsula. This should not be developed into more residential sections. We do not require a Rolleston or Lincoln situation.
3. Currently there are working schemes to get native birds back in the area. Should residential development ever be the decision, our gullies, native birds and environmental projects will all be without success.
4. The infrastructure requires further thought. Where will the new roads go in and out for any further development? It needs a very careful well thought out plan to avoid disturbance to current dwellings and households, foot traffic etc. The boundaries are drawn all over the place with no consideration of where this infrastructure is going to go. The boundaries are placed directly over tracks and foot traffic areas.
5. The public should know more about the subdivision process and how the council manages the walking access and easements.

Think of ways how the whole area can be used to the advantage of the people who live here - perhaps make it a reserve with the help of DoC, Environment Canterbury, philanthropists, grants etc.

Perhaps extend the school, build a small retirement facility instead coupled with having a good size reserve area.

Fast-tracking this area will be a HUGE mistake and will create problems in many ways in the long term.

## RESERVE MANAGEMENT COMMITTEE - PRIORITIES FOR THE LONG TERM PLAN

	Priority initiative	Why this matters	Responsibility (RMC or Council)	Target timeframe
1	Sea/estuary frontage erosion	to protect public land and camping ground	ECAN	ongoing
2	Road bridge railings on Chorlton Road requiring repairing	Temporary mesh in place of broken barriers	Council	
3	Roadside trees from River Road bridge to near the Summit Road causing blind spots	Road safety	Council	immediately
4	Drainage adjacent to camp manager's house	health hazard with water causing dampness to underside of house	Council	before winter 2021
5	Roadside drainage/swales requiring clearance and maintaining	causing flooding to road and private properties	Council	prior to winter 2021
6	Drainage adjacent to hall under road and to estuary	causing flooding to road and private properties	Council	prior to winter 2021
7	Clearance of planting alongside Opara River up from River Road bridge	Will cause flooding of road and properties	ECAN	prior to winter 2021
8	New Community Hub building	No place for community to gather	Council	2021-2023
9	Millenium Bridge repairs	Health and Safety due to deteriorating balustrade railings	Council	
10	Path on the west side of Okains Bay Road from beach public area to Knapes Road	Rough surface not suitable for public to walk safely along the edge of the road esp. in busy holiday periods and with no existing walkway/path.	Council	November 2021
11	Public toilets adjacent to the Tini Arapata	No toilets in the area adjacent to the shop, museum, hall	Council	November 2021
12	Native planting to Opara riverside and Okains Bay riverside	beautification and restoring the ecosystems	Council/ECAN	ongoing

### Feedback

1.1 Have we got the game plan right?

It is concerning that discussions regarding the Strengthening Communities Funding could be cut by 5%. The funding for community organisations is stretched to capacity. The 1 April increase of the minimum wage has impacted even more on organisations that are doing their best to retain qualified and trained staff to deliver the best services we can to the Christchurch population. Many of our organisations that are funded by this fund, are not be able to pay their top staff more than \$25 an hour. Staff who manage up to 50 children a day, cook and provide meals for 40 people, manage volunteers, provide mentoring, social work support to name just a few of the many roles we undertake each day in your city. We can not continue to to sustain the minimum wage increases to provide quality staff in our organisations.

The Strengthening Communities fund, has not, except for the one off COVID funding, had any increase. We ask the Christchurch City Council to consider the incredible work that the not for profit sector provides across our city and to increase the fund BY 5% to meet the growing costs that we are enduring.

Thank you for reading this submission.

### Feedback

1.8 Our heritage, foreshore and parks

We are submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Transport needs more consideration as pressure comes from more development.

1.2 Rates

Rates should be capped at no more than 5%. Not an average of 5%. 4% would be better!

1.3 Proposed changes to existing rates, and new targeted rates

Given the lack of service on Banks Peninsula, I can't see how you can justify including rural properties and communities with additional charges for services they don't receive. I do not support the inclusion of the land drainage targeted rate for Banks Peninsula communities. Rates should reflect if they use City water, sewage etc. too.

I support all targeted rate increases for the arts or heritage projects and definitely a targeted rate for households using more than 700 litre of water a day.

1.4 Investing in upgrading and protecting our city's water networks

I support all and more efforts to protect our water supply and not to allow any private business to benefit from the aquifers which supply the city water.

1.5 Investing in our transport infrastructure

The road from Teddington to Purau has recently had repairs, which were sub standard. They have now had to be repaired again. We continue to live with a patchwork road which deteriorates each year due to lack of proper repairs. We also now have the issue of sea levels rising and the LTP should include protecting the Teddington, Charteris bay and Purau bay roads. This needs to be included in this Long Term Plan now. In ten years time it will already be an issue. We need to be proactive not reactive.

I would support a light rail investment in the city and re-igniting train services on existing tracks to encourage cars off the road.

I support the cycle paths and routes as long as they have consideration for local businesses.

More carpark should be available in the City centre and have reduced fees to encourage residents to use the City Centre and not malls!

1.6 Rubbish, recycling and organics  
Continue to recycle as much waste as possible.

1.7 Our facilities  
Godley House insurance money needs to be allocated and invested back into a new building for our Community. We have been waiting for ten years. This is urgent given the rise in our community population.

1.8 Our heritage, foreshore and parks  
Protect parks, roads and communities from rising sea levels.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes  
Comments

1.11 Potential disposal of surplus Council-owned properties

I do not support the un-notified and quick disposal proposal of 27 Hunters Road and 42 Whero Avenue. This needs to involve consultation with the local community. Disposal of the land for development should not be advanced without proper consideration for infrastructure including roading, water, sewage, schooling, transport etc.

Some of this land has already been developed by the Community as reserves and should be gifted to the community for reserve use.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

No. I'd prefer further rates increases to maintain or improve quality standards, particularly in regards to water.

1.2 Rates

I think it should be more to ensure there is enough to spend on maintaining or improving quality standards.

1.3 Proposed changes to existing rates, and new targeted rates

Totally agree with a targeted excess water rate. I actually think we should all be paying for the water we use, not just high users, but it's a start.

1.4 Investing in upgrading and protecting our city's water networks

I strongly want our water to go back to being unchlorinated, and the sooner this happens the better. I'm sick of filtering my water - we used to have beautiful drinking water. Obviously public health is important, but it seems to be taking a very long time to get this sorted.

I am also not at all happy with the idea of allowing more overflows from the wastewater. We should be seeking to minimise our environmental impact, not potentially increase it.

1.5 Investing in our transport infrastructure

We need to transition people away from using cars to get everywhere (Christchurch is appalling in this respect). We should use both a carrot and a stick (even though people inevitably don't like the stick part). Carrot -> better cycleways, easy and convenient public transport, better pedestrian options.

Stick -> expensive and limited parking for cars, make more streets and roads slow/pedestrianised.

Some trips will likely always need cars, but it shouldn't be the default! I tend to walk most places, but if it's more than a 35 min walk I usually drive. I rarely bus as it's expensive and infrequent compared to driving.

1.6 Rubbish, recycling and organics

I love that we collect organics.

I would like our recycling capabilities to be improved. Unfortunately there is a certain amount of waste that is difficult to avoid, so the more we can recycle the better.

1.7 Our facilities

Can't say I'm enthused about the multi-use arena - it seems a lot of money for something that will be used infrequently.

1.8 Our heritage, foreshore and parks

Not actually what is asked about, but for Hagley Park, I'd love to see the native part of the botanic gardens expanded/more of the park planted in natives. It would be lovely to walk/run in the shade of native bush! It also would provide a home for native birds, potentially encouraging them into the central city. The golf course doesn't seem to get a lot of use from what I see, nor do some of the sports fields, so that space could be repurposed.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments  
I fully support this.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes  
Comments  
I'm on the fence about this. If it's truly important then it should be done.

New Brighton Outdoor Art Foundation

**Your role in the organisation:** Chairperson

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

My submission is in regards to New Brighton. Since the 2011 earthquakes the area has become a hot spot for street art and outdoor art works. It has a bohemian feel and represents the character of the community.

My submission is that we keep the street art. The council continues to invest in community activities, murals and if there are opportunities to install artworks they are presented to New Brighton groups and artists first.

We would like to work with council and building developers on providing large scale murals.

1.2 Rates

I do not agree with rates increases. With the amount spent on consultations and other expenses it seems that a lot of our rate payer money is squandered instead of investing in action.

1.4 Investing in upgrading and protecting our city's water networks

Invoice people for excessive water use.

People should not be wasting water on lawns every day.

1.5 Investing in our transport infrastructure

We need to invest in a road bridge in New Brighton.

I do not think New Brighton road needs two laning.

The Oram Ave extension needs to be prioritised.

1.8 Our heritage, foreshore and parks

It seems that the land and property owners in Brighton Mall and Seaview road are not motivated to do anything with unsafe and derelict buildings.

Look to pass a bylaw making them responsible and have to upgrade or demolish. It is this buildings that reflect negatively on all the positive work being done.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes  
Comments

1.11 Potential disposal of surplus Council-owned properties

If they are derelict. They should be demolished and the land sold.

1.12 Any other comments:

After the past 15 months and installing multiple murals in New bRighotn. The overall feedback is that it is looking pleasant due to the art work. It helps take the eye away from the dereliction. It focus more on the positiveness of that artworks.

Lets do more together.

### Feedback

1.1 Have we got the game plan right?

Please include the full repair and future proofing of New Brighton Road, from the reinstatement of the two way section from Hawke Street, to Cresswell Ave, including footpaths, gutters, kerbs, cycle lanes, and islands to pre earthquake standard, in the 2021/31 Long Term Plan

Also not allow any quarries to be built or opened within 1km of residential land

1.2 Rates

Agree, seems fair

1.3 Proposed changes to existing rates, and new targeted rates

Only charge excess water if you can test and confirm all services to property are intact, not still EQ damaged and the watermeters are of a standard acceptable today and testable.

1.4 Investing in upgrading and protecting our city's water networks

perfect

1.5 Investing in our transport infrastructure

Stop spending any more money on cycleways in the CBD

1.6 Rubbish, recycling and organics

Cancel the contract with waste management and the plant at Bromley, Do not spend 21million on that site. close it and rebuild away from populated areas.

1.11 Potential disposal of surplus Council-owned properties

Regarding 27 Hunters Rd and 42 Whero Avenue.

I am rejecting these land sales. I am asking that normal land disposal processes are used including full community consultation and community board input.

Also, the locals have put a lot of work into the planting of the gullies included in these sales.

1.12 Any other comments:

### Feedback

#### 1.2 Rates

I support a rates rise if it can improve our environment.

#### 1.3 Proposed changes to existing rates, and new targeted rates

Re: Land drainage targeted rate

1. Agreed that the benefits of drainage extend beyond the properties currently rated.
2. There is a range in the amount of benefit received by different properties eg our property is a Banks Peninsula Farm with no direct benefit from CCC drainage works except a road culvert conveying a stream, in contrast low lying suburbs benefit from a huge investment in river control and drainage to prevent flooding.
3. If there is a range in benefit then there should be a differential rate.
4. Continue to charge a separate rate to fund drainage activities as proposed, to make it transparent.
5. Include all rateable properties as we all receive some benefit from drainage work but to different degrees.
6. Set the rate on a sliding scale according to the benefit received by the property using broad geographical areas.

#### 1.4 Investing in upgrading and protecting our city's water networks

Yes. Clean potable water and management of city waste water are vital. It is not acceptable to spill untreated sewage into waterways, estuaries and harbours each time an obsolete system comes under pressure or to allow uncontrolled discharge of commercial waste water.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

funding of the Arts Centre is essential for the future of arts and crafts in the city, and the future of the arts centre.

A thriving Arts Centre can once again become a major unique attraction for Christchurch.

We dont want to see the Arts Centre become just another mall for commercial outlets. This will ensure its demise.

Any council funding should be subject to the funds being used to promote local arts and crafts outlets.

### Feedback

#### 1.1 Have we got the game plan right?

I do not support the proposing to charge the people of Christchurch for use of water which is a basic right to life - who are you to tell the households how much they can use each day - water is a right for all - you do not hold the water bottling companies to account for the water they take and make money off of and even allow them to apply and take even more which robs the other people in Christchurch of our water - then tell us we have to restrict our water intake - hypocrites -It is now proposed to add even more toxins into our drinking water with out our choice - fluoride is toxic to life- nor you do not take in to account people with bigger land and gardens nor pets and the wild animals which need water also to survive , you do not take in to consideration people who have medical or health needs and need extra water for health and safety and use more water for their basic living standards - Do you jobs and fix the leaking water pipes which leak more each day than what the people of Christchurch use in a day - as noted in news in past - shame on you and your greed - you sit there and dictate to us all yet you under deliver every year on your responsibilities - our water quality , roads still unfixed or temp jobs you charge like a wounded bull for everything you can and in many cases going by the news in the past give back sub standard work or blame sub standard work on your contractors yet the buck stops with you- you keep putting up the rates every chance you can and want to increase it to 47.8% over the next ten years - just where will the people find this money - you squeeze blood from the stone now ... You spend big money on things that do not help the people in any way and even want to spend public money on private development of heritage buildings when this money could be better spent on the water, roads and sewer - you get contractors in who do sub standard work and then the public have to foot the bill for these mistakes and yet none of you are held to account for allowing this to happen in the first place - the list could go on and on - sub companies are hired to do the work the council used to do its self at a much better standard and they now also charge more with little to no accountability for sub standard work and you give yourself big pay rises or bonus for what you do do also noted in past news ... no I do not support your proposals for the next ten years - listen to the people for a change and what they want rather than your own agenda and fleecing the people of what little they have now.

You keep telling yourself and us that you do everything right yet an audit would show otherwise

#### 1.2 Rates

No to any rate rises your greed seems to have no bounds - I do not agree to the rate increase - you say the cumulative rate

increase over the next ten years will be 47.8 % - your greed will cause many to lose their homes and struggle to stay afloat and for what - your over spending and under performing of your basic duties - look at the stories in the news in past to prove this - sub contractors doing below par work or over charging , allowing work to go ahead and deteriorate others rights or basic living standards (buildings) not meeting your own basic output in work yet you sweep this under the rug ...look at news in past to support this .

### 1.3 Proposed changes to existing rates, and new targeted rates

Your greed and abuse of power will affect many if you limit households to 700 liters a day - you do not take in peoples health, animals, gardens, wild animals need for water to help protect the eco system you keep thrusting down our neck - you allow a overseas company to take massive amounts of water and bottle it and sell it to public at no extra cost , the water pipes leak and we lose more water each day in the leaks then what people use so the news tells us - fix these problems and there will be less issues with water - stop wasting public money on restoring private development heritage buildings and dead end projects that do zero for the people in the long run -- no I do not agree to your targeted rates increase nor the abuse of limited water usage per household .

### 1.4 Investing in upgrading and protecting our city's water networks

This work and responsibility of the council has been abused by you for years and now the public must pay the price - there are sub standard jobs done already going by past news and over charging of this work and chemicals added to our water which affect people health and damage the hot water cylinders etc- you have not meet your responsibility on the well, pipes, reservoirs, treatment plans, pump stations, drinking water nor the collection and treatment, and disposal or waste water and storm water for years and come up with excuses whenever you can = look at the flooding down New Brighton road as an example - after years of red tape and issues it was fixed only because others stepped in to sort it as the red tape and in fighting had been going on for years and you still kick up over it as noted in news...I have no faith in council for many things . You play with words and yet very little changes unless it is to take more money form the people. the people who you pay to water the public trees still do not do the job as they are paid to do - I have seen them water one or two trees and leave the rest to die of heat or give such a small amount of water to the plant whey may of well of not bothered - who checks on sub contractors work ?

### 1.5 Investing in our transport infrastructure

The money used on bike paths is a waste of money so far - the roads / highways are causing all sorts of problems for people -also look at the noise of the highway in the news the other day - and devalue of those homes affected- the roads in past that are not up to standard wear and tear - the changing of the layout of some roads cause more problems then help - you promise much and deliver little- stop spending money on new projects when you have not fixed your past mistakes. Where is the accountability for your massive mistakes so far...

### 1.6 Rubbish, recycling and organics

I understand the company that runs the Christchurch organics is not even a NZ company - why is tax payers money not being used for the benefit of the people of Christchurch - see past news on issues with this - the noise, smell, pests, and issues to those living by this is still not addressed in full, how many times has the company stepped over the line ...does this company . council still dump in land fill extra recycled products to keep the price high for the public buying end products - audit on this would be good and what the truth is in regards to the recycling processing plants .

### 1.7 Our facilities

People would get more out of the Riccarton Road bus lounges than the Christchurch Art Gallery and I would rather see the money used for the bus lounges and libraries - some people go to the public libraries to keep warm in winter or to hang out and this would help with giving people a place to go rather than on the street and causing problems and crime -

### 1.8 Our heritage, foreshore and parks

I only agree on maintaining and improving our parks and foreshore - stop wasting public money on private development of heritage buildings .

### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

Stop wasting public money on this stuff - there are more important things to spend public money on like water, roads, parks etc.

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
No  
Comments

1.11 Potential disposal of surplus Council-owned properties  
Invest in property and find ways to increase profit from them - look at long term profit rather than short term - why are the properties no longer fit for purpose - can they be used for housing short term the many people who are homeless at this point in time - think outside the box guys ...what do the people need - housing, rehabilitation places for people who need it , support centers for people suffering and needing a drop in center where they can get those needs meet.

### Feedback

1.11 Potential disposal of surplus Council-owned properties

I am writing in regard to the proposed disposal of the land at 42 Whero Avenue, Diamond Harbour and 27 Hunters Road, Diamond Harbour. I reject these land sales as stated and ask that the normal land disposal processes are used, including full community consultation and community board input. We live directly next door to the land at 42 Whero Ave. and use 'Pete's track' (which crosses through both of the land sites-Whero Ave and Hunter's Road) every day for walking our dog and for a safe 'off road', short route for our 5 and 7 year old kids to get to and from school. My kids and myself have put a considerable amount of work into helping to spread gravel onto the track and plant and water native trees along the track. It is critical that the track remains open for public use and for children to get to and from school safely. It would also be ideal for Sam's and Morgan's gullies to be turned into a reserve for the community to enjoy. In addition it is in the community's best interest to have a say in the boundaries, road access for subdivision development and land for school growth. Please consider our submission closely in your plan. Regards, Dr. Catherine Gongol

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

When considering infrastructure investment, please consider that the current road network to Diamond Harbour from the city is in a fragile state. Repeated patching of the road instead of proper repairs must cost more in the long term? If we are to increase housing stock across the peninsula, then we need safe and fit for purpose roading, especially where public transport options are limited.

1.2 Rates

I am in the fortunate position of being able to afford a rate increase, however, I want clear communication and accountability for how this money is spent.

1.3 Proposed changes to existing rates, and new targeted rates

Happy with the plan

1.4 Investing in upgrading and protecting our city's water networks

Yes, I would ideally like to see the removal of chlorine from our drinking water, however I do also understand and agree that the most important thing to have is safe drinking water. Environmental challenges will see water becoming a valuable resource, and we must invest into its safe delivery, collection and management for the future

1.7 Our facilities

I feel like under utilisation in the year 2020, cannot be justification for reduction in services. Yes, numbers are down due to the impact of COVID19, however once these services are reduced, it is almost impossible to have them re-instated once visitor numbers increase again. In regard to Bus lounges, a safe, dry area that may encourage public transport use should not be closed. As a woman using public transport in the dark I would want a safe space with security cameras.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Comments

I do not have enough knowledge to comment on this section

1.11 Potential disposal of surplus Council-owned properties

Each property should be considered on their own merit, and after public consultation, with the majority vote counting, within a limited timeframe. This ensures everyone has the opportunity to have a say, but that it doesn't drag on for years where people cannot agree.

1.12 Any other comments:

I am specifically interested in the piece of council owned land that is being considered for sale without public consultation. The land being between Bay View Rd and Whero Ave in Diamond Harbour. Whilst I believe the council have the right to sell the land, which is zoned residential, I do not believe that this should be done without due consideration and consultation with the people that it will affect. I am not anti-housing, or a NIMBY type person, however the council are elected to serve the will of the people, and are not some faceless corporate who can and often do run rough-shod over communities. If developed for housing, the impact on the local roading, drainage, electricity infrastructure, light pollution, school enrolment.. etc will need to be considered. The area is well utilised by dog walkers, as there are no other off-leash areas during the summer months. The regeneration of native plants and safe school walking track are also going to be impacted.

## Feedback

### 1.1 Have we got the game plan right?

No, I do not believe you have the balance right. According to the New Zealand Reserve Bank the CPI has averaged at 2% since 2000. The rise in rates has been much higher than this and is proposed to be on the same trajectory over the next ten years. This is not prudent planning.

Furthermore there has been a concentration of spending on "large flagship projects" many of which will be completed in time to be a further drain on the ratepayers.

In the meantime, it is the smaller unassuming projects which are not long-term drains on the city's coffers and make the local environment for citizen's much more pleasant, that are suffering.

I agree with Mike Yardley in his article in The Press on Tuesday 16 March 2021 - where he says that the "City council needs to right-size the ship"

### 1.2 Rates

I think that the rise in rates is out of control, this is especially so when they are compared to the NZ Reserve Bank CPI. The differences are incredible. What is more this goes back at least five years and is now projected for the future as well. There needs to be a plan which has a greater emphasis on priorities and not one that just demands more cash.

### 1.3 Proposed changes to existing rates, and new targeted rates

I think that the idea of targeted rates is an excellent one. However, given the history of targeted rates becoming general rates I am not so sure. It looks like they are just being used as an entry mechanism. There needs to be a change of philosophy from "the way to fix everything is just to raise the rates" to a proper prioritisation. I note that the CCC feels a strong groundswell coming through of "do the basics right". I thoroughly concur with this groundswell and think the Council needs to take much better notice of it.

### 1.4 Investing in upgrading and protecting our city's water networks

Spending the equivalent of \$6000 for every man, woman and child in the city on such infrastructure is a huge amount. Do we really need to spend at such a rate? It seems to me that what is really needed is better prioritisation.

### 1.5 Investing in our transport infrastructure

Again such a spend seems excessive to me. If the figures in The Press this morning (3 April 2021) are any indication with cycle lanes costing \$3M a kilometer the ratepayer gets very little for their money (and I should point out that I am a frequent cyclist). Furthermore the cost blowouts and increased timeframes give little confidence in the budgeting for future projects - whatever they

are.

1.6 Rubbish, recycling and organics  
Well it may surprise you - but yes I think you have the balance right. I feel quite good about the whole refuse system the CCC operates and really appreciate it.

1.7 Our facilities  
I firmly believe that we are over-catered with library services. I think this is particularly so in the digital information age where libraries are not the keepers of knowledge and "holding a candle in the dark". Despite the wonderful efforts of library staff, libraries are becoming something else as illustrated by Turanga. The question is whether ratepayers should pay for that "something else" In most cases I think not.

1.8 Our heritage, foreshore and parks  
Christchurch's parks, gardens and foreshore are a wonderful asset. I think that this capital spend is about right.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
No  
Comments  
Surely the Arts Centre needs to stand on its own feet, especially considering all the money that has been pumped into it. What is the point of spending vast sums of money on facilities that continue to bleed cash after they are finished?

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
No  
Comments  
Firstly, how firm is the budget figure and how long will it take? Clearly this is only the start of the Museum's redevelopment. While the Museum is a wonderful facility, I assume that it does not break even and so the extra spend will lead to even more expense. I note that the cost of the redevelopment has been put at almost \$200M.

1.11 Potential disposal of surplus Council-owned properties  
Yes. Surely that is one of the key functions of having a plan is to prioritise things, not just to ask for more rates.

1.12 Any other comments:  
There seems to be a marked reluctance within the City Council to come to terms with the effect that such increases in proposed rates will have on the less well off people of Christchurch and those on fixed incomes. These are the very people who simply cannot afford to have "gold plated" solutions for every problem.

### Feedback

1.2 Rates

In your projection you had given a 10 year cumulative overview of the rates 48% and you find it affordable?

Over the same period, what was the cumulative overview for the wages and the superannuation? % Was that also affordable?

In your projection 2021/2030 you will increase the rates again with 24.8%? Think about it, the New Zealanders don't have a money-tree in their garden. Keep the rates affordable or the housing rental prices will be rocketing high.

### Feedback

1.1 Have we got the game plan right?

I do not like the reduction of library hours and resources (especially Turanga). Hours after 5pm are the only times that i can personally access the library facilities and i imagine it is the same for a lot of other full time working people. I would be jappy to pay a small fee to access the libraries at later times if this makes it more cost effective.

1.2 Rates

happy with the rate increases. Wouldnt mind an even higher rate increase to cover increased library hours and more green initiatives.

1.3 Proposed changes to existing rates, and new targeted rates

### Feedback

1.12 Any other comments:

I would like to see 'Greening the East' plan made a priority in the LTP. The three guiding outcomes of the Greening the plan, Connect, Enrich and Discover are absolutely necessary if the East of our city is not to degrade any further - despite all the grandiose ideas for improving the east, little appears to have been done to improve the environment for many citizens. Leafy green suburbs on the north side of the city continue to thrive whereas those in the East remain neglected. Please consider these neglected suburbs with urgency.

Many thanks

Judy

### Feedback

Have we got the game plan right?

Our overarching proposal is to focus on a deliverable capital programme that helps drive our city forward, with particular investment in roads and transport infrastructure and in protecting and upgrading our water networks. We're borrowing for new projects that have long-term value, and ensuring that the debt repayments are spread fairly across the generations of ratepayers who will benefit from them. We're maintaining enough financial flexibility to be able to handle unplanned events, and we're finding permanent efficiencies in our day-to-day spending. We've managed to do all of this while keeping rates increases as affordable as possible.

1.1

**Have we got the balance right? Have we prioritised the right things? If not, what changes would you like to see?**

You will eventually be the downfall of this city and it upsets me to see this council be so heartless towards its lower income residents

Rates

We've considered a range of options for how best to achieve what we need to achieve while also keeping the average rates increase as affordable as possible.

1.2

**What do you think of this plan for an average residential rates increase of 5 per cent for 2021/22 and an overall rates increase of 4 per cent over the next 10 years?**

you know what THE ENTIRETY of this city thinks about your rates increase and CONSTANT LYING TO US about the level they're going up

You're also making it even more impossible you younger generations to get into the housing market as rates are basically rent we have to pay ON TOP OF a mortgage

---

Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

1.3

**What do you think of these changes to existing rates, and new targeted rates? Have we got it right? If not, what changes would you like to see?**

Excess water charges... youre gonna find a way to make to make it worse for lower income families... you always do

---

Investing in upgrading and protecting our city's water networks

We have a responsibility to provide and maintain the wells, pipes, reservoirs, treatment plans and pump stations for drinking water, and manage the collection, treatment and disposal of wastewater and Stormwater.

1.4

**We are proposing to invest 41 per cent (\$2.329 billion) of our capital spend on water infrastructure. Have we got the balance right? If not, what changes would you like to see?**

have your higher level councillors considered taking a pay cut? Firing Leanne will probably free up enough funds to pay for everything you selfish want to do

---

Investing in our transport infrastructure

We've heard from residents that transport is a top priority. It's also the city's biggest contributor to carbon emissions. We want to give people better options for getting around, whether by car, public transport, on foot, on a scooter or on a bike. We also want to ensure our networks are safe.

1.5

**We are proposing to invest 25 per cent (\$1.445 billion) of our proposed capital spend on transport infrastructure improvements. Have we got the balance right? If not, what changes would you like to see?**

MAKE BUSES CHEAPER they are no longer an affordable alternative to driving and I'm DONE with constantly having to download new apps onto my phone to be able to use the other garbage

Rubbish, recycling and organics

In 2020 the Council adopted a new Waste Management and Minimisation Plan that focusses on changing our ‘throwaway’ culture and reducing the amount of waste we send to landfill. Implementing the actions in that plan are the key drivers of our operational and capital spending.

1.6

**We’re proposing to spend \$25 million on organics infrastructure (which includes upgrades to the organics processing plant), \$18.5 million on transfer station infrastructure and \$18.4 million on recycling infrastructure. Have we got the balance right? If not, what changes would you like to see?**

Have your bin auditors follow a set criteria NOT LEAVE IT UP TO THEIR DISCRETION

Our facilities

We’re proposing to invest 19 per cent of our capital spend on community facilities. We’re also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

1.7

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service? Have we got the balance right? If not, what changes would you like to see?**

Cutting funding and reducing ALREADY REDUCED library hours has honestly got to be the worst idea the council has come up with since the cycle lanes, especially as you are already wanting to raise rates at a higher percentage than initially promised. you are actively trying to limit people's access to educational resources which sends the message that you want to keep the greater population of christchurch as uneducated as possible.

Funding for the Arts Centre Te Matatiki Toi Ora

We are proposing to provide the Arts Centre with a capital grant of \$5.5 million. We would do this via a targeted rate that would recover the grant cost over 10 years, and would phase in over two years, so the targeted rate would be smaller in 2021/22 than in subsequent years. We’re proposing that every ratepayer will pay this rate and it will be calculated as a number of cents per dollar of capital value.

1.9

**Do you support the Council funding \$5.5 million for the Arts Centre? This proposal is currently accounted for in our proposed rates increase. If a decision is made not to proceed, rates would drop by 0.04 per cent.**

Yes

Comments

Funding for base isolation of the Robert McDougall Art Gallery

Canterbury Museum considers the base isolation of Robert McDougall Art Gallery to be a key part of the Museum’s redevelopment. In July 2019, the Council agreed in principle to support the base isolation of Robert McDougall Art Gallery at a cost of \$11.8 million, subject to public consultation in the Long Term Plan 2021–31.

1.10

**Do you support the Council funding base isolation of the Robert McDougall at a cost of**

**\$11.8 million? This proposal is not currently accounted for in our proposed rates increase. If a decision is made to fund base isolation, rates would increase by 0.07 per cent.**

Yes

Comments

should have repaired this building years ago, you have priceless artworks rotting away in that building and you dont care

Potential disposal of surplus Council-owned properties

We have a small number of properties, including two heritage buildings, that are no longer being used for the purpose they were originally acquired for. These surplus properties make up less than 1 per cent of Council's overall property portfolio.

**1.11 Help us decide their future – what do you think of this proposal to dispose of surplus properties?**

do what you like, you're gonna do it anyway

1.12

Any other comments:

you're heartless pieces of and the lot of you in city council should be on minimum wage because that's all you deserve

### Feedback

1.1 Have we got the game plan right?

Things I would like you to include in the plan.

1. A footpath from Kukupa Pigeon Bay to the waterfront Pigeon Bay, preferably alongside Pigeon Bay stream and going through Hays Reserve.

2. This in turn could lead to the reconfiguration of the historic property Kukupa School back to a hostel/tramping hut connecting the existing walkway currently ending at Montgomery Park Hilltop with the DoC Pigeon Bay Heads walkway. The walkway would then include the Sign of the Packhorse/the Rod Donald Hut/and Kukupa School Hostel.

Note: perhaps the CCC could work with the Rod Donald Trust in this venture.

3. In turn this could lead to the DoC Pigeon Bay walkway, currently an out and back walkway, to have an extension leading to another bay. There are current unformed roads that could be used.

4. And again, in turn this could lead to the whole walkway going all the way to Hinewai and hence to Akaroa.

5. Items 1&2 are possibly 'shovel ready' projects (that could be partially funded by the sale of the mature pines on the Kukupa School property.)

6. Items 3&4 are much more long term and would require perhaps a 40 to 50 year commitment. However, this Long Term plan could be used as an opportunity to locate all reserves and unformed roads from Hilltop to Akaroa (and perhaps Hilltop to Wainui) in a 'desk-top shovel ready' plan so that a future track that would link Orton Bradley Park to Akaroa (&/or Wainui) could be planned and implemented over a much longer period of time.

1.4 Investing in upgrading and protecting our city's water networks

How about places like Akaroa having properties install a (say 5,000 liter ) water tank on their property with an appropriate pumping mechanism where the house is fed through the water tank and the mains water supply fills the tank in off-peak periods.

The amount of water being used would not alter but the demand for water on the infrastructure would be spread.

Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

1.3

**What do you think of these changes to existing rates, and new targeted rates? Have we got it right? If not, what changes would you like to see?**

Land Drainage Targeted Rate.

I support Option 3: remove the land drainage targeted rate and fund through the general rate.

Reasons:

It seems that the proposed rate and the current situation both suffer from the same problem - that there is no definition/policy/procedure surrounding land drainage. If the rate becomes a part of the general rates then it becomes the 'common good' and matters regarding drainage in all its forms falls within the purview of the CCC.

i.e. if the drainage is not working the CCC needs/will need to attend to a remedy for the situation.

Questions:

1. My property at \_\_\_\_\_ currently has a culvert that diverts a stream onto my property and into the other two streams that flow through my property. i.e. my property is being used by the CCC as a drainage system.

Will the CCC therefore contribute to the upkeep of the streams to avoid flooding my land?

2. Given that the streams that flow through/over my land currently are 'of the common good' in that they drain the entire upper area/catchment of Pigeon Bay, is the CCC under the new rate indicating that they will accept responsibility for the maintenance of the stream bed and banks?

Our heritage, foreshore and parks

Christchurch has a long and proud history of protecting and respecting our heritage. Over the past decade we've carried out a massive programme of repairs and restorations, but we still have some work left to do. In the next 10 years we will continue to restore our own buildings and support private development of heritage buildings. We will also be maintaining and improving our parks and foreshore.

1.8

**We're proposing to invest 11 per cent of our capital spend on our heritage, foreshore and parks. Have we got the balance right? If not, what changes would you like to see?**

I would like to see the Kukupa School saved from demolition by neglect and the trees on the land removed and milled.

Potential disposal of surplus Council-owned properties

We have a small number of properties, including two heritage buildings, that are no longer being used for the purpose they were originally acquired for. These surplus properties make up less than 1 per cent of Council's overall property portfolio.

**1.11 Help us decide their future – what do you think of this proposal to dispose of surplus properties?**

Kukupa School, an historic building belonging to the CCC and under your Parks and Reserves Dept. is not mentioned in your blurb yet is in distinct danger of demolition by neglect.

### Feedback

1.11 Potential disposal of surplus Council-owned properties

Regarding **27 Hunters Rd, Vacant Land, Pt Lot 1 DP14050++**, 12F/538, 390,222 sq metres. This property must be removed from the the LTP and fast track disposal. The normal process for disposal of land that would require Community Board and public consultation should be used instead.

In terms of infrastructure, the Diamond Harbour area is at capacity, if not beyond it, e.g., water, sewage, roads (the roads in the whole area are shockingly bad), therefore no new residential developments should be allowed until the entire infrastructure is significantly upgraded!!!

To solve the problem of housing shortage, building multistory apartment buildings in Christchurch would be a much better solution.

### Feedback

1.1 Have we got the game plan right?

The Arts Centre (Te Matatiki Toi Ora) needs greater support as the literal beating heart of our city. The heritage buildings need to be protected but still used as a drawcard for both locals and visitors. The public focus on repairing the cathedral is absurd when our very own cultural and artistic hub slowly wears away.

The art centre as a whole is being hugely underestimated. There will one day be books published about the lack of public funding being the final nail in the coffin. **Please, please, please** - don't allow this to happen on your watch.

1.2 Rates

This is fine.

1.3 Proposed changes to existing rates, and new targeted rates

More emphasis on the art centre.

1.5 Investing in our transport infrastructure

25 percent is the perfect amount.

### Feedback

#### 1.3 Proposed changes to existing rates, and new targeted rates

I think the proposed water charge adds a huge amount of cost without significant benefit. The cost of installing meters (many flats have only one meter per street frontage -- who would pay?), cost of reading meters and billing, etc. are all costs that need to be recouped, and thus passed on to ratepayers. Families/households with higher numbers of people will be the ones who have to pay, and they are often the households with lower income per household member thus least able to afford it.

For comparison, households in Richmond (Nelson), where water is charged at \$2.17/m<sup>3</sup>, use an average of 440L/day, which isn't a lot lower than the reported Christchurch average of 540L/day. So, I believe the extra charge will not significantly reduce the overall water usage in Christchurch, meaning it will not be money well spent.

If you're going to go to the effort of installing meters and reading them regularly, then it would be fairer to charge everyone by their full usage (and remove/reduce the current fixed water charge).

#### 1.6 Rubbish, recycling and organics

I appreciate it that CCC collects green waste at the kerbside--please keep it up. Here in Richmond the council doesn't collect green waste, so people have to pay separately for that and I think that a lot of green waste must go to landfill because of that.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

#### 1.11 Potential disposal of surplus Council-owned properties

That makes sense to dispose of unneeded buildings, although do think about what other purposes that site/land could be used for to enhance the local community before selling, as it is usually expensive to re-acquire property at a later date.

#### 1.12 Any other comments:

Glad to hear you've found places to save money. I see the budget item "Staff Support & Advice to Mayor" averaging \$1.5m/year. This sounds like very expensive advice, and a place to find savings.

1.5 Investing in our transport infrastructure

Would like to see more pedestrian refuges on Hoon Hay Road, especially near the Lewis Street intersection as many people wish to cross to the Dairy and Fish and Chip shop, also others wish to cross the other way to get to the Early Learning Centre. The traffic has increased on this road several times in the last few years and we now have many heavy trucks going along this road to service the new building estates.

 Subject: Belfast Netball Club submission on the draft Long Term Plan

Tena koutou

Re Renewal of the Belfast Netball Courts and repair of the toilet block

This is the submission of Belfast Netball Club (the Club) on the Christchurch City Council's (the Council) draft Long Term Plan. The Club requests that the funding for the repairs of the Sheldon Park netball court be brought forward, enabling the Community Parks Planned Hard Surfaces Sheldon Park projects works to occur as soon as possible. The Club also requests that the repair of the toilets occurs at the same time.

The courts are in terrible state and in dire need of renewal. They are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting, unusable state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large, community-based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027. Safe courts are essential for the Club's future.

The Club will continue advocating for these important community assets to the Waipapa Papanui-Innes and Waimāero/Fendalton-Waimairi-Harewood Community Boards until they are renewed, and we acknowledge the support of both Boards thus far.

Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block.

Yours sincerely

Karen Ellis

President, Belfast Netball Club

**First name:** Justin **Last name:** Rogers

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I'd like to see a greater emphasis on rapid improvements to the environment for pedestrians, kids scooting, wheelchairs, cycles and other low-carbon travel. Please keep moving forward on the priority lanes for buses as well.

I also am sad to see so much being spent on a sports arena when there is so much need for priorities such as climate change adaptation and affordable and warm housing. I would prefer to see a greater contribution from those who will use such an expensive facility.

Regarding climate change, I hope CCC is planning an area suitable for low-lying communities to relocate to such that we are not offering expensive buyouts to coastal property owners, but rather an in-kind offer of suitable housing in a new area. There must be a better way to manage retreat, that keeps communities together if they want to be. I have no interest in paying millions for worthless properties in the future, and we need to start signalling that now while offering housing transitions to those who need it.

1.2 Rates

Seems fine. Please keep the council assets that, in normal times, provide revenue streams other than rates. Please also consider ways to broaden the sources of revenue beyond rates, such as the regional fuel tax.

1.3 Proposed changes to existing rates, and new targeted rates

Water rates for heavy users seem appropriate - better to manage excessive demand rather than dig up perfectly good pipes. The rest sound like different forms of book-keeping.

1.4 Investing in upgrading and protecting our city's water networks

I hope that's enough. Please consider managed retreat over flood protection, with the released land transitioned to wetland, amenity and habitat.

1.5 Investing in our transport infrastructure

Finish the cycleway network - and get onto the 'minor cycleway' connecting routes simultaneously, rather than later. The minor cycleways might be just paint and intersection improvements, and can be implemented with cheaper 'tactical' methods. The network effect should see active trips becoming much more desirable and

accessible.

Consider congestion pricing for major entry points, far enough away to ensure minor arterials are not overrun with commuters from afar. I have no interest in subsidising the growth of satellite towns by giving ever more space and priority to roads. Keep them free for freight, tradies, deliveries and other useful economic activity; provide high-quality park and ride facilities for commuters.

1.6 Rubbish, recycling and organics

I am curious, but not knowledgable, about how recent policy changes in British Columbia, Canada have attempted to shift waste costs onto producers.

1.7 Our facilities

I have no interest in part-owning a stadium. Or in its ongoing expenses. If you insist on building it, cut your losses and sell it to some consortium and charge them rates.

1.8 Our heritage, foreshore and parks

-

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments

Honestly I'd rather have a science museum - can you find out what Science Alive did with their payout?

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes  
Comments

1.11 Potential disposal of surplus Council-owned properties

## Feedback

1.1 Have we got the game plan right?

Get rid of the nice-to-haves, sculptures, over-engineered gold plated cycle lanes and just get the basic council functions that rate payers expect in order. Trimmed trees, tidy weed free parks & reserves, decent footpaths, smooth roads, clean gutters and storm water drains, chlorine free drinking water, public transport infrastructure, appropriately resourced enforcement section, parking for the Public Hospital.....

1.2 Rates

Its better than originally forecast but I still feel the increases we are subject to, for what we actually see in return, are questionable.

1.3 Proposed changes to existing rates, and new targeted rates

The excess water use charge is ridiculous and not necessary. Had the investment in infrastructure and investment to cater for all the new subdivisions been done properly there would be no need for this.

You have stated you expect revenue of \$2m from this. BY the time you read all the meters, do all the paperwork, sort all the leaks and problems I suspect your revenue take will hardly be worth it. All you are doing is trying to penalise those who put the effort into to making the Garden City what it is. Are you really wanting to be "The Council" who killed the Garden City?

Could I make a couple of suggestions with regard to water use that might actually be acceptable to the city, not cost the Council dollars and might actually solve some of the issues.

1. Introduce a swimming pool owners water levy. It could be \$50 a year for every property that has a swimming pool. It is these people who fill their pools after painting them and top them up with the hose on hot summer days that are part of the problem.

2. During the summer months (Dec/Jan/Feb) introduce a citywide watering ban from 9.00am to 6.00pm EVERY DAY for all residential dwellings. Simple - you don't muck around with excess charges or requests for non-use on certain days etc. Keep it simple - NO WATERING, CAR WASHING, NO IRIGATING from 9.00am to 6.00pm for

three months.

Last year I submitting similarly on this subject and requested some water use figures for my property so I could be more informed about water use. I am still waiting for these.

1.5 Investing in our transport infrastructure  
Ditch the cycle lanes and simply use road marking. Do not ruin Harewood Rd - it is perfectly fine as it is.

### Feedback

1.1 Have we got the game plan right?

I do NOT agree with the decommissioning of Wharenui Pool as outlined in 'Christchurch City Councils' Long Term Plan and would like to see the pool stay for the use of the local community and Wharenui Swim Club. It is extremely ACCESSIBLE , and CONVENIENT for me and many others. It is highly unlikely I would want to negotiate around the large metro complex, and not only would I have have to pay for a swim but also for parking. I have never had a problem finding a free park around Wharenui pool. A big complex like the new Metro, is very overwhelming, and I prefer the smaller, community orientated pool of Wharenui. Historically this pool has produced many National, Commonwealth and Olympic swimmers. Its the oldest running 'competitive Swim club', and is well renowned around other clubs all over NZ. CHCH lost pools after the Earthquake and it seems ridiculous to be pulling down community pools when water safety is so paramount in NZ. The water quality is amazing and I believe its down to a great management team that knows who is doing what job when (not like some of the bigger council pools that have a myriad of workers who don't have their heart in the job). The management team have started introducing swim hats for all , so that it keeps the water quality high and the pool runs smooth. I have been to many larger complex and there is hair and plasters galore! Wharenui Pool accommodates for the community in so many ways, wether its learn to swim classes, learn to swim for local schools (including a neighbouring low decile school that would otherwise have to pay for transport to somewhere like the Metro), Kayaking, Aqua size for the elderly in the community , Fit 60 classes for non competitive swimmers who want more than just lane swimming but not competition, a VERY strong Masters group, and also has a time set aside for Muslim woman to come and be able to swim in privacy. We are trying to build communities, not pull them down!!

### Feedback

1.12 Any other comments:

Re Wharenui Pool closure when the new pool in town opens.

I strongly disagree with this proposal.

The pool is close to Birmingham drive where thousands of people work. The pool is ideally located for workers (including me) to be able to swim within our 1 hour lunch break.

I am able to bike to work and I am able to bike to the pool.

If you close this pool I am forced to use my car. This will impact parking in Birmingham drive and parking in town. Most likely I will have to give up swimming as I wont have time to get to the pool and back.

Yes I do know about Pioneer pool - this is still a twenty minute bike there and 20 min back and the pool is already congested with non working people. I switched from Pioneer to Wharenui because of the congestion.

It is frustrating that you feel that everyone should drive into the new town pool - this is completely counter productive.

You are making it hard for working rate payers to stay fit and healthy.

### Feedback

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

I support the proposal. By way of background, in the early days of the formation of the Ars Centre, the Arts Centre Incorporated Society requested Hon David Caygill, Tony Hearn QC and myself to examine the possibility of a special rate / levy being established, under Statute to provide a stable and reliable source of income to finance the Arts Centre's requirements for operations and capital expenditure. This process would then supercede ad hoc annual applications to the Metropolitan Councils and special applications to the Ministry of Internal Affairs to contribute to the capital costs for fire, egress, and seismic strengthening of the buildings, as well as assist meet the maintenance requirements of the 5 acre central city site. The site was, and is, being independently supervised and governed by the Board for the benefit of the citizens of all of the local councils as well as the public of NZ. It was envisaged that the legislation would closely follow The Canterbury Museum Act based in the formula of Rateable Valuation for the District, weighted by population for each district and then adjusted by a distance factor, eg CCC 1.0 and outlying Councils .40 to then give the share that each Local Authority should contribute to the total rate. As local councils had property valuations every 3-5 years, the proportion of the rate would vary and in essence, CCC was collecting the rate and passing it on to the organisation. Back then, the proposed levy was based on a calculation of 1/8 to 1/4 penny in the £ of the total property valuation and this was deemed sufficient to provide sufficient resources to the Committee/ Board of the time to meet capital and income requirements and also ensure the funds were ring fenced for that purpose.

I support the proposal in the draft LTP in the meantime to provide a more appropriate methodology to be adopted over the 10 year period and provide the ACTB with time to look at a more dedicated Statute to embody a dedicated rate to fund and protect these landmark buildings which sit at the heart of Canterbury history and heritage. The Trust has under its insurance policies done extremely well to upgate and strengthen a significant number of highly damaged Category One buildings as funds allowed and the impact of the earthquakes has dramatically affected the ability to recover tenancy income to pre earthquake times and vacant spaces will still occur until all of the buildings can be occupied. The proposed annual grant will provide the board with some breathing space and ensure that the Trust objectives can be met.

Martin Hadlee,  
Former Fellow CAANZ,

Former Secretary/ Treasurer, Arts Centre Trust Board and predecessor organisations and former Trustee for 6 years.

### Feedback

1.2 Rates

Approve

1.3 Proposed changes to existing rates, and new targeted rates

Yes, I support these priorities and allocations.

1.4 Investing in upgrading and protecting our city's water networks

Agreed, this is a critical resource.

1.6 Rubbish, recycling and organics

Agreed

1.7 Our facilities

Agreed, the changes seem to be minimising reduction of access to community facilities.

1.8 Our heritage, foreshore and parks

Agreed

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

I support the Arts Centre grant. The Arts Centre is a vital arts heart in the city. With so many heritage sites lost, it is critical that this important site be maintained, restored and fully functioning. The community choir that I sing with, along with many other choirs, has performed at the Arts Centre, in the Great Hall and other rooms, and in many spots outside around the Centre buildings over the last 20+ years. Each year we perform at the inner city SingFest which has the Arts Centre (the Great Hall and other spots) at the core of its performances.

It is sad that there are still parts of the Arts Centre which are roped off, broken and not functioning. The Arts Centre will not fully flourish again until the whole Centre is accessible and able to be used (and able to create more revenue). Although the Centre is not owned by the Council, I consider it very much an essential community asset. This has been acknowledged through the previous public subsidies provided to the Arts Centre and I fully support the proposed Council funding over the next three years.

The Arts Centre is also a vital link in the City to Art Gallery to Arts Centre to Museum and park link. An underfunctioning Arts Centre impacts on these other facilities.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

I support this funding.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I am really enjoying seeing Christchurch grow as a cycling city and so i would love to see cycle ways continued to be put on roads. Cycle ways and good, energy effeciant public transport would be something i would be proud of for our city.

I would like to see continued support for the arts and cultural life of our city, events that got people out and about are a must is making chch feel like a real city.

With earthquakes to terrorsits attacks, chch needs a steong feeling of community and social care.

1.2 Rates

im happy for them to increase as long as our rates were going into helping the sustainability and social welfare of our city.

1.3 Proposed changes to existing rates, and new targeted rates

im happy for them to increase as long as our rates were going into helping the sustainability and social welfare of our city.

The arts centre is a chch icon and one of the few historical cultural places we have left, we need to do everything we can to look after it.

1.4 Investing in upgrading and protecting our city's water networks

i dont know enough about this to comment.

1.5 Investing in our transport infrastructure

i think this is a huge priority especially for public transport and cycle ways.

1.6 Rubbish, recycling and organics

yes and i woidl also like to see more alternatives to plastic prompted by the council e.g insentives to suprrmarkets.

1.7 Our facilities  
community facilities are the heart of our city, we have lived so long without proper ones in chch we deserve to have these running at their best. The free wvents these places put on is invaluable to our city and the mental health of the people who live here.

1.8 Our heritage, foreshore and parks  
great - SAVE NG BUILDING!!

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes  
Comments  
yes but not at the loss of chch art gallery

1.11 Potential disposal of surplus Council-owned properties  
  
Community workshops and lectures.  
  
affordable healthy food, \$5 hot meals.  
  
affordable venue hire for art groups, book clubs.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Arts Centre is the jewel in Christchurch's crown. It is of extremely important historic significance especially given the fact that so many of our historic buildings have been destroyed in the earthquakes. It is well patronised by Canterbury locals as well as being a drawcard for our national and international visitors (when they come back!) The businesses and other organisations who are part of the complex are of an extremely high standard and add significant value to the city. It's alive and vibrant and will only become more so in the future. To let the Arts Centre flounder would be grave , short-sighted and irresponsible on the part of the Council.

1.1 Have we got the game plan right?

Please see detailed submission below.

1.7 Our facilities

## Christchurch Art Gallery Te Puna o Waiwhetu

### Introduction

The decline in the number of overseas visitor has had an effect on the whole country, not only on visitors to the gallery, but the proposed changes to the level of service will directly impact the local community. Overseas visitors do not take part in school programmes and almost never in public programmes so cutting these by 25% will only disadvantage the people of Christchurch and Canterbury. After all that the residents of Christchurch have faced in recent times, there is a more than ever need to continue developing community resilience and wellbeing. It is well documented that the arts are essential to cultural and social welfare of a community.

The compelling reasons for **not** changing the levels of service are as follow:

### School Programme

- The demand for the programme exceeds available resource by at least 60%, with schools having to book well in advance to secure a visit.
- At \$2 a lesson it is accessible to all schools.
- With limited art resources and expertise in primary schools, the gallery programme provides a high quality experience with a specialist educator and provides resources for teachers to use back in their own classroom.
- Lessons connect across curricula and the lessons learnt can be integrated into other subject areas.
- The lessons do not just teach children to paint, but to think outside the box, try out new ideas and invent new things.
- A new study from Michigan State University found that childhood participation in arts and crafts leads to innovation, patents, and increases the odds of starting a business as an adult. The researchers found that people who own businesses or patents received up to eight times more exposure to the arts as children than the general public. Steve Jobs is the perfect example. Other research shows that arts education is good at building the kinds of skills kids will need in future workplaces such as communication and collaboration to develop the skills of empathy and cross-cultural understanding.
- Compared with other galleries in NZ, the service provided in Christchurch is low and should be increased.
- Which extra 25% of schools in Christchurch will be disadvantaged as a result of the reduction of service?

### Public Programmes

- Provide equity and access for all citizens of Christchurch through mostly free activities and events.
- Provides opportunities for life-long learning as per CCC plan.

- Huge range of activities embracing the diversity of our community.
- Only 1 gallery as opposed to a number of parks, libraries, orchestras etc supported by CCC.
- Closure on Wednesday nights means people will lose a vibrant, free gathering venue and a safe social place.
- Reducing the programme by 25% will have a trickle down effect on the rest of the local economy. Less work for artists, performers, presenters, caterers, alcohol suppliers, AV services, food trucks and so forth, leading to a downturn in the economic health of the city.

### Conclusion

It is imperative that Councilors reject these proposals and invest in the future of our children in the digital age, nurture creative thinkers, and strengthen ties to their community. Cuts of 25% are major, especially when compared to reducing Turunga Monday night opening by 1 hour. Support for public programmes should be retained at the current level for the 2021/2 year with a commitment to raising funding by 25% by 2024. Similarly, Education services funding should be progressively increased to meet demand, with CCC negotiating central government support to reflect the value provided to curricula.

## Te Mahere Rautaki Kaurera - Our Draft Long Term Plan 2021-31

### Submitter Details

**First name:** Dave **Last name:** Evans

### Feedback

Have we got the game plan right?

Our overarching proposal is to focus on a deliverable capital programme that helps drive our city forward, with particular investment in roads and transport infrastructure and in protecting and upgrading our water networks. We're borrowing for new projects that have long-term value, and ensuring that the debt repayments are spread fairly across the generations of ratepayers who will benefit from them. We're maintaining enough financial flexibility to be able to handle unplanned events, and we're finding permanent efficiencies in our day-to-day spending. We've managed to do all of this while keeping rates increases as affordable as possible.

1.1

**Have we got the balance right? Have we prioritised the right things? If not, what changes would you like to see?**

As you write the above items, it makes sense and is long overdue. However, as the old saying goes, the devil is in the detail and this city council has significantly failed its citizens.

Note below

## Rates

We've considered a range of options for how best to achieve what we need to achieve while also keeping the average rates increase as affordable as possible.

### 1.2

**What do you think of this plan for an average residential rates increase of 5 per cent for 2021/22 and an overall rates increase of 4 per cent over the next 10 years?**

This rate increase is only happening because of the failure of the elected officials to demand that the CEO of CCC present a balance budget. No rate increase.

Achieving no rate increase means either cutting services, which are already stripped bare, delayed, and beset with poor quality. Or, cut expenses. And this Council's main expense is staff. They are not the workers who do the infrastructure work -- fixing broken pipes, maintaining public lands, road/ bike lane building and maintenance. It is the hundreds of middle managers who make massive salaries while the CCC staff rolls continue to grow incredibly fast and bloated. Even worse, the vast majority are whiz kids from university that did not start at the worker level and learn the proper way to do the work, let alone lead the group.

If this CEO (or her predecessor) was competent, versus empire building, she'd start with balancing the budget at no rates increase and clear out as many unnecessary staff as possible -- just like any professional business has to do when their expenses and lack of quality overtake their income.

## Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

### 1.3

**What do you think of these changes to existing rates, and new targeted rates? Have we got it right? If not, what changes would you like to see?**

minor stuff. Should focus on primary reason rates are out of line.

## Investing in upgrading and protecting our city's water networks

We have a responsibility to provide and maintain the wells, pipes, reservoirs, treatment plants and pump stations for drinking water, and manage the collection, treatment and disposal of wastewater and Stormwater.

### 1.4

**We are proposing to invest 41 per cent (\$2.329 billion) of our capital spend on water infrastructure. Have we got the balance right? If not, what changes would you like to see?**

Long overdue. Hire more staff that work and supervise this and cut out most of the fat above them.

## Investing in our transport infrastructure

We've heard from residents that transport is a top priority. It's also the city's biggest contributor to carbon emissions. We want to give people better options for getting around, whether by car, public transport, on foot, on a scooter or on a bike. We also want to ensure our networks are safe.

1.5

**We are proposing to invest 25 per cent (\$1.445 billion) of our proposed capital spend on transport infrastructure improvements. Have we got the balance right? If not, what changes would you like to see?**

Only if you make contractors accountable for poor quality. Dozens (all?) new or repaired transport infrastructure projects are overengineered, do not pay attention to ensuring it last for years before maintenance is required, and far too limited penalties are administered or enforced when work is subpar.

Drive any road in my part of the city (St Albans, ex-Dallington) to see examples

I drive no more than once a week; I bicycle everywhere between Rangiora and Lincoln. Love the bike routes -- and shake my head (as a professional engineer and cyclist) at how much of it is two wide, wrong materials, unsafe for riders, and all too often showing signs of breaking up as proper work was not done at the start point. What a second rate system in contrast to the EU or USA routes.

## Rubbish, recycling and organics

In 2020 the Council adopted a new Waste Management and Minimisation Plan that focusses on changing our 'throwaway' culture and reducing the amount of waste we send to landfill. Implementing the actions in that plan are the key drivers of our operational and capital spending.

1.6

**We're proposing to spend \$25 million on organics infrastructure (which includes upgrades to the organics processing plant), \$18.5 million on transfer station infrastructure and \$18.4 million on recycling infrastructure. Have we got the balance right? If not, what changes would you like to see?**

As long as you improve your sorting to minimize loads going to landfills, great. expecting every person in the city to get it right is a pipedream. Find the equipment that sorts for you as is done in many countries/ locations overseas (or maybe in NZ)

## Our facilities

We're proposing to invest 19 per cent of our capital spend on community facilities. We're also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

1.7

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service? Have we got the balance right? If not, what changes would you like to see?**

Minimizing library service by cutting hours and service that mainly effect the handicapped or disadvantaged. Plain wrong. It is supposed to be a service, not a business.

Our heritage, foreshore and parks

Christchurch has a long and proud history of protecting and respecting our heritage. Over the past decade we've carried out a massive programme of repairs and restorations, but we still have some work left to do. In the next 10 years we will continue to restore our own buildings and support private development of heritage buildings. We will also be maintaining and improving our parks and foreshore.

1.8

**We're proposing to invest 11 per cent of our capital spend on our heritage, foreshore and parks. Have we got the balance right? If not, what changes would you like to see?**

Great. Just ensure the maintenance levels are at least maintained, or better yet improved to the way it was before wiped out the professionals that did those roles.

Funding for the Arts Centre Te Matatiki Toi Ora

We are proposing to provide the Arts Centre with a capital grant of \$5.5 million. We would do this via a targeted rate that would recover the grant cost over 10 years, and would phase in over two years, so the targeted rate would be smaller in 2021/22 than in subsequent years. We're proposing that every ratepayer will pay this rate and it will be calculated as a number of cents per dollar of capital value.

1.9

**Do you support the Council funding \$5.5 million for the Arts Centre? This proposal is currently accounted for in our proposed rates increase. If a decision is made not to proceed, rates would drop by 0.04 per cent.**

Comments

Sadly, a necessary need. Do it.

Funding for base isolation of the Robert McDougall Art Gallery

Canterbury Museum considers the base isolation of Robert McDougall Art Gallery to be a key part of the Museum's redevelopment. In July 2019, the Council agreed in principle to support the base isolation of Robert McDougall Art Gallery at a cost of \$11.8 million, subject to public consultation in the Long Term Plan 2021–31.

1.10

**Do you support the Council funding base isolation of the Robert McDougall at a cost of \$11.8 million? This proposal is not currently accounted for in our proposed rates increase. If a decision is made to fund base isolation, rates would increase by 0.07 per cent.**

Comments

Needs to be done. Long overdue.

Potential disposal of surplus Council-owned properties

We have a small number of properties, including two heritage buildings, that are no longer being used for the purpose they were originally acquired for. These surplus properties make up less than 1 per cent of Council's overall property portfolio.

**1.11 Help us decide their future – what do you think of this proposal to dispose of surplus properties?**

Te Mahere Rautaki Kaurera - Our Draft Long Term Plan 2021-31 from Evans, Dave

432

Selling heritage buildings must maintain a contract that the new owner does not tear them down, but maintain or upgrade.

Selling land that does not effect parks/ open areas makes sense, especially when rates are totally crazy.

1.12

Any other comments:

Rates, rates, and quality Service should be what the CEO dreams about every night -- and then does something about it when she is awake.

### Feedback

#### 1.2 Rates

Support 5 percent increase and more in out years if it is needed to address the serious issues around climate change, particularly, biodiversity, water and the impact of sea level rise.

#### 1.3 Proposed changes to existing rates, and new targeted rates

Full support for targeted rates for heritage and excess water usage.

#### 1.4 Investing in upgrading and protecting our city's water networks

The issues around water infrastructure are serious throughout the country.. Support a large increase in this area of expenditure. Please fix the stormwater infrastructure in Akaroa before commencing the wastewater scheme. Support a speedy implementation of the approved Akaroa Wastewater scheme.

#### 1.5 Investing in our transport infrastructure

Excellent! Full support for improving public transport option including enhancing the cycle way structure.

#### 1.6 Rubbish, recycling and organics

Support

#### 1.7 Our facilities

I think it is a mistake to go down the "austerity" line in cutbacks to public/community facilities. I am opposed to any cutbacks to the spend (collections or opening hours) to Christchurch City Libraries especially Turanga or the finger-tip library. Libraries are a safe civic space where all citizens are welcomed.

#### 1.8 Our heritage, foreshore and parks

Support this expenditure. Please accelerate the vision for the Red Zone and ensure the the Travis ecosanctury is supported.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Comments

Probably not necessary with the Art Gallery able to house international exhibitions.

### Feedback

1.5 Investing in our transport infrastructure

transport needs to be more reliable for it to be a viable option for travel.

good job on the fear cap though, that helps people more between less traditional places (eg visiting family / friends rather than going into the city)

1.6 Rubbish, recycling and organics

love that the city provides organics bin!

1.7 Our facilities

I think that libraries need to be open untill late as if people work a traditional 9-5 they can not visit the libraries if they close at 6pm by the time they drive home. they should also be open on both days of the weekend

1.8 Our heritage, foreshore and parks

plant more natives in parks and on the foreshore

### Feedback

#### 1.2 Rates

I don't think you should borrow, one should live within their means.

#### 1.3 Proposed changes to existing rates, and new targeted rates

I do not agree to the extra water charge. I think there should be no charge.

It is ironic that the dry Canterbury plains are now covered with irrigators for dairy farming and activities like sending bottled water overseas is allowed. While the CCC allows such such activities to occur to the aquifers, I do not think the CCC should then have the right to charge city residents for water.

Also, by charging for water people won't water their gardens, and then you will lose your established trees and green spaces. This will have a huge impact on the ecology of the city.

#### 1.5 Investing in our transport infrastructure

I totally object to the \$235 million proposed to be spent on cycles ways, this is excessive.

No borrowing of money should occur for transport infrastructure. Since the earthquakes, apart from Pages Rd, all the roading has been 'better-ment', its excessive and council should not be spending so much money on roading.

I dislike the fact the council masks cycle ways as being environmentally friendly. For example, the damage you have done to the estuary by in-filling estuary mud flats for the coastal pathway/cycleway, and currently concreting over of grassed pukeko feeding area along humphrys drive to make a wavy cycle lane with scattered planting (which have no ecological value). In addition, although I am not from the area, I read with distaste that Council was considering cutting down established trees for a cycle way by the Copenhagen bakery. These examples show that the current cycle way development is not really environmentally friendly at all. Thus, I object to the council spending this amount of money on cyclelanes, and I object to cycleways that create more concreted area. Any new cycle ways should be worked into the existing concrete/roading footprint. We are in a climate emergency, we need less concrete, more wild areas, more green space, more trees, more areas for wildlife.

These cycleways are so big and over engineered that they might as well be called roads, they need to stop.

## 1.8 Our heritage, foreshore and parks

I object to the proposed \$7.7 million for pathways in the red zone. This area needs to be wild and left to support struggling ecosystems. Paths will prevent this area from supporting wildlife, and will just turn it into another hagle park or dog park. Christchurch is the only city I know of in NZ without a large predator proof area, wild area or forest that supports a vast array of ecosystems. If you turn the red zone into an area with paths, develop it etc you lose this unique opportunity to make our city one in which supports unique swamp land habitat and wildlife.

I object to stop banks being put in the red zone, we are in a climate emergency and need to retreat.

I object to the foreshore being developed. Again, we are in a climate emergency and need to retreat. Also I dislike that our foreshore is becoming 'beautified' CCC are kind of making it look like a pond, i.e. the coastal pathway and estuary edge. It is not conducive to supporting the wildlife that live in this area and doesn't suit the NZ environment.

I think money needs to be spent cleaning up dumps that are leaking pollutes into the waterways, i.e. bexley. I also don't see that our children should have to pay for this, people were using the dump up until recently and thus they should pay. This is something that needs to be cleaned up, and I don't want it left for my children to deal with, or for my children to be paying back money you have borrowed to deal with an issue that you created in my lifetime.

I think you should makes rules to prevent people cutting down established trees. For example, in Sydney, Australia there are restrictions on cutting/pruning trees over a certain age. If the CCC wants to keep Chch as a garden city, you need to reinstate protected trees and have some control on what people can do to trees in their gardens, i.e. anything over 50 years needs a consent. I have noticed in my area a lot of trees have been removed. We are in a climate emergency, this is something that should not be happening with ease.

### Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

### Feedback

1.1 Have we got the game plan right?

I would like to see more commitment to public transport. Don't leave it until it's harder to achieve and we're more desperate.

Examples include light rail, park and ride

1.2 Rates

as long as my rates are affordable, I am OK with this, but i don't want to see a reduction in services or an increase in costs in other areas at the same time. I am also keen to know where the money is being spent efficiently. An example: are we truly looking after our water and city assets?

1.3 Proposed changes to existing rates, and new targeted rates

These are some of the things I'm happy to support. I'm glad for my rates to support the beautiful fabric of our city. I feel this is especially important as the majority of the city will comprise of brand new buildings. The Arts Centre is one of my favourite locations in Christchurch, along with the museum. I'd also like to see the old gallery around the back in use again.

1.4 Investing in upgrading and protecting our city's water networks

Yes. Water is very important for us all. I've always been proud of how great the Chch water is. It would be terrible to see this degrade. I hope that looking after water quality includes cleanliness of the rivers and reducing nitrates up stream

1.5 Investing in our transport infrastructure

Please be innovative with transport. We have been catering for car drivers for long enough. Two new motorways and still potentially not enough? Look at public transport and future proof the region. I also like to walk and cycle, as do thousands of others, so look after those that are keeping it clean and getting exercise.

1.6 Rubbish, recycling and organics

An on going problem that will continue to increase. I have seen first hand how ignorant or lazy people can be with separating their waste products properly, meaning that recycling can end up at the dump because of contamination. Can we somehow encourage more investment in the process from citizens?

1.7 Our facilities

I support spending on community centers. We use these centres regularly. We need these places more than ever in these current times. Closing places that see little or no use should be assessed.

1.8 Our heritage, foreshore and parks

## Feedback

### 1.1 Have we got the game plan right?

While the big-ticket central city projects such as the Canterbury Multi-Use Arena, and Metro Sports Facility are very important for Christchurch's future it is also important to remember that the success of the city's recovery will depend on the Council being able to carry its residents along with it. Small scale de-centralised projects done well will also make a significant, if not even bigger, improvement to the quality of life and mental health of its citizens. Such localised suburban projects will help improve the living environment in our neighbourhoods and provide residents with desirable local areas to relax and recreate. Collectively they can create a city in which its residents will love to live. Make our neighbourhoods attractive, relaxing and mentally refreshing places to spend time and people will come.

A case study would be The Ilam Stream. During lockdown many residents and visitors to the adjacent parks were attracted to the stream and enjoyed its flowing waters as part of their daily walks. So many came in fact that their collective footprints created a track along its banks. But shortly after that the flow stopped for a week or more, as it has been accustomed to do in recent years, and the stream bed turned into a stagnant muddy mosquito infested eyesore. As a welcome solution in this particular instance, I note that the local Waimāero/Fendalton-Waimairi-Harewood Community Board have placed permanent augmentation of this stream's flow as a top priority in its latest 3-year plan. This will be a great step forward for those who live near, or recreate in, Avonhead and Crosbie Parks, and also for all the residents whose properties bound the stream including some University of Canterbury Halls of Residence

### 1.2 Rates

Terribly high for these difficult economic times. I am sure there are still areas for small incremental savings that can be found. It is time to look at every dollar twice before committing it to anything that delivers little benefit for the average ratepayer. Maybe now is the time to cut back on staging those big 'feel good' events that serve as a cost the ratepayer eg the festival formerly known as the Buskers being a case in point. There are others. Also, for example is the Council still spending the best part of \$1,000 per month cleaning that "infinity" sculpture in the Botannic Gardens that attracts bird droppings and collects lots of leaves and general crud around its base in the water? I know the City spent about \$190,000 purchasing the item but perhaps it's now time to take it away as the costs outweigh the supposed benefits. Likewise the Council buying sculptures for the city centre that are easily vandalised during the hours of darkness by passing drunks and then require fixing does little for the overall wellbeing of the average ratepayer citizen. I am sure there are many more of these incremental savings opportunities along these lines that would do more to cheer up the city's ratepayers by way of a smaller rates increase.

### 1.3 Proposed changes to existing rates, and new targeted rates

I cannot see how spending 'only' \$551.8m on roads, footpaths etc and at the same time spending \$235m on cycleways is an example of getting the balance right.

The Council no longer seems to look after its footpaths the way it used to do. Weeds are left to grow through the

surface and eventually damage the paths beyond repair so that total replacement is required. What happened to incremental ongoing weed spraying.

#### 1.4 Investing in upgrading and protecting our city's water networks

Whilst responsibility around water use is critical. The policy of charging for water does seem like the Council is finally letting go of the idea of Christchurch being promoted as being a/the Garden City. Garden tours linked to restaurants highlighting local food and wine have provided better promotional opportunities for the City than seemingly random choices like the Buskers!

Saying that the city's pumps had trouble keeping up last summer because of high usage seems to be a bit disingenuous when the Council has been taking forever to get all its pumping stations back in operation after their upgrades. Is that done yet?

#### 1.7 Our facilities

.

#### 1.8 Our heritage, foreshore and parks

I understand the need for our heritage buildings to be preserved and maintained even though the City seems confused whether it is promoting new or old, and where its English founding father tradition fits in.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

With regard to the McDougall Art Galley, I assume the plan is to reopen it as an Art Gallery and display the Art that has been in storage for so long.....and not just tag it on to the Museum

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I am responding to the Land Drainage rating proposal. Council needs to consider that many rural properties are semi self sufficient and pay for our own works to mitigate flooding and improve drainage as well as other functions. When the wind blows a tree over the road we get out our chainsaw, cut it up and remove it. When we have a digger out doing a job we also get it to improve the open drains (roadside and other) and reform swales etc. In the absence of any council works in the area we also take care of the road, filling potholes and replacing shingle at our own cost. To pay a rate to council and then have to do the work ourselves anyway is not fair. The outlined Alternative option 1 would seem to be the fairest way forward.

Thanks for your consideration.

### Feedback

1.2 Rates  
ok

1.3 Proposed changes to existing rates, and new targeted rates  
Yes, charge for high water useage. We need to treat this previous resource wisely.

1.4 Investing in upgrading and protecting our city's water networks  
Yes, invest in basic infrastructure.

1.5 Investing in our transport infrastructure  
Please invest even more in cycling, walking & public transport, and less in making it easy for most drivers (exceptions for people with mobility impairments). This is a unique opportunity to reshape the transport, social & ecological environment of the city. We could have the 15-minute city!

1.6 Rubbish, recycling and organics  
Yes, and do more.

1.7 Our facilities  
I don't support reduced library hours unless the library has minimal use at these times. We need these welcoming public spaces.

1.8 Our heritage, foreshore and parks

I'm all about enhancing nature reserves, parks & foreshore. Maybe consider other funding options for restoring some old buildings? I'd like to see options for cemeteries to become "incubators" (!) with native plants to attract birds & wildlife instead of being often vast concrete wastelands.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes

Comments

On the condition that the museum’s exhibits are dragged into this millennium 😊

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I object to your proposed land drainage targeted rate changes.

You do not provide any stormwater service to my property so I should not be charged for something I do not receive. I collect my own stormwater in a tank which the city council requested be retained when water was provided to the section. This is used for watering garden, washing car, property etc. Without this good citizen service to the council to relieve run-off from the hill situation to your areas below, which all neighbours provide, council would be required to cope with an excess of water.

Is the council going to provide my property with a stormwater system? There is no mention of it in the plan so what am I being charged for.

With council and Can rates greatly increasing, post earthquake insurance rates ballooning with sea rises to contend with, this extra rate for nothing is one too many. I think the peninsular is being unfairly targeted.

If being a responsible citizen, collecting my own stormwater to assist the council, is to be penalised in this manner, I will be inclined to remove my ugly tank taking up valuable space and let the council cope with the excess water. City water use will increase as a result. I am sure my sentiments will be echoed by other home owners in the same situation.

Comments

The Arts Centre provides a unique and rich cultural resource for the city. It is a focus for mixed use, with a range of venues from both large to small, internal and external, appealing and catering to a range of age, gender, and culture. It is an iconic resource, accessible to everyone in Christchurch. It is also a great attraction and for visitors outside the rating area.

I unequivocally support the funding of \$5.5 million for the Arts Centre.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

The Robert McDougall Art Gallery is a building which needs to be occupied and enjoyed by Cantabrians and used in the spirit of the gift.

I support base isolation for the Robert McDougal Gallery.

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.1 Have we got the game plan right?

The CC need to consult (i.e. publicly notify) all development and land sale

I would like to see less emphasis on developing facilities and greater emphasis ( and allocated funds) on supporting climate change with a particular emphasis on water quality.

The budget for the Otakaro Avon River Corridor seems excessive.

More encouragement on environmentally friendly living

1.3 Proposed changes to existing rates, and new targeted rates

I am very much in favor of charging for water use over 700 ltr

1.4 Investing in upgrading and protecting our city's water networks

yes

1.5 Investing in our transport infrastructure

Public transport - unless it is regular and cheap - it is not worth investing in.

I am very much in favour of a "gold card" for high school and university students - free transport. Students need (financial ) support and you will create a generation that is socialized into preferring public transport

1.6 Rubbish, recycling and organics

We need a plastic recycling plant rather than a n organics recycling plant - most people can deal with their organic waste themselves.

## 1.7 Our facilities

You seem to favor the grander facilities over the small community hub facilities. In small communities, the council facilities, and particularly the libraries serve a meeting point especially between the different generations ( i.e. elderly and mothers with small children). It is a two way street as they also serve as an network point for the CCC to disseminate information and ( in disasters) services.

In other words these facilities support the CCC aim of creating a holistic community. It is false economy to have a silo approach of looking at the economic cost/benefit only and than having to spend on initiatives that relieve loneliness in the elderly.

The lack of foresight and appreciation of the wider benefit of libraries/CC hubs is frustrating. One clamorous library in the CBD does not fullfill community needs.

## 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

## 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

## 1.11 Potential disposal of surplus Council-owned properties

It is an understatement to call the proposed sale of properties small - if yo include all the land to be sold small.

In particular: sale of land in 42 Whero Ave Diamond Harbour - and the sale of land 27 Hunters road. The sale of this land will significantly change to character of the community if it is to be developed. It will affect the following:

- water/drainage/sewerage is currently at capacity with regular problem - a large housing development would strain the systems and increase the danger of pollution of the harbour if there were to be overflows.
- The current road is very delicate and would not cope with further traffic increases.
- The school would need expanding

While some of these costs can arguably be sheathed home to government, the sale of the land and the consequent development would generate as many costs to the CCC as the sale benefits would create.

## 1.12 Any other comments:

The overall aim of this submission is to reject the sale of land on 42 Whero/27 Hunters Road in Diamond Harbour on the ground that it would fundamentally change the character of an otherwise settled community.

If the council was to propose the sale they must use the normal land disposal process including community consultation and Community Board input.

### Feedback

1.1 Have we got the game plan right?

I strongly support keeping the Wharenuui swimming pool and gym open after the Metro sports complex opens.

I refer to Recreation Sports, Community, Arts and Events section of the Draft Long-term plan for the next 20 years.

Primary Outcomes: 1: a strong sense of community 2:safe and healthy communities 3:Strategic Priorities: Enabling active and connected communities to own their own future. These three outcomes suggest there is value in a local community asset which is easily accessible on foot or by bike by people who live in the community around the Wharenuui pool.

Primary Outcome 4 Increasing Resilience aims at improving physical and mental health by getting more people active and ensuring accessibility of recreation and sporting facilities. With the current building of safe cycleways in the area it will be easier for older children to make their own way to the pool or gym after school or during holidays without having to be driven there by a parent.

That part of Riccarton is a low income area where many people may not have a car or the money to access expensive leisure activities. It is also changing in that older houses are being replaced by multi-units and as a result more people will be living in that area and looking for leisure activities.

What is not mentioned in the Long-Term Draft Plan is the necessity for all New Zealanders to be able to swim well because we are an island nation with beaches to enjoy. Wharenuui pool has played a part in teaching children to swim. Primary schools have also made good use of Wharenuui pool for swimming lessons and school swimming sports. With so many primary schools in Christchurch, it's hard to see how the current City Council pools and the new Metro will cope with this function.

On a personal level, I started swimming again as an adult 50 years ago at Wharenuui and I still swim there regularly, mostly because it is near my home (1km). Our children learnt to swim there and as teenagers they joined the training squad and became competent swimmers. They value the ability to swim well and now their children (alas they don't live in Christchurch) are all competent swimmers.

Long Term Plan Submission  
 Christchurch City Council  
 PO Box 73016  
 Christchurch 8154

**Re: Closure of the Akaroa Service Desk as per the Draft Long-Term Plan 2021-31**

**Submitter:** Bernard J Rennell

**Email:**

**Introduction** - The Christchurch City Council policy statement about Banks Peninsula says:

The 2021-2031 Draft Long-Term Plan page 58 indicates that the Akaroa Service Desk is to be closed. The reason given is due to minimal transactions.

Akaroa and the Bays collectively are a remote community, at least 75 km from the outskirts of Christchurch City and a 90-minute drive from the CBD. While the City offers a diverse range of activities and public services to the metropolitan residents, Akaroa and the Bays must be largely self-sufficient and self-reliant regarding employment, education, recreational activities, entertainment, shopping and health care.

The long-term sustainability, resilience and wellbeing of Akaroa's and the Bays communities, is important. If Akaroa and the Bays are to survive economically in coming years, then the local Council services must be maintained at an adequate level. In fact, this is a critical foundation stone for the resilience and wellbeing of the community, for both current and future generations.

A Council's ( Akaroa County Council, Banks Peninsula County Council and Christchurch City Council) presence in Akaroa has been located in the Historic Post Office Building for many years. In 2015 while the Old Post office was closed due to earthquake issues the CCC Service Centre occupied a PortaCom. Without community consultation CCC attempted to move the Service Centre to the Akaroa Museum. This contravened the District Plan for listed historic buildings. Subsequent community consultation found 93% of respondents wanted the Service Centre to remain in the Old Post Office. After CCC spent \$984,407 to repair the Post Office Building it once again became the permanent location of the Service Centre.

In January 2021 the Service Centre was relocated in the School/Community Library. Moving the Akaroa Service Centre in January 2021 was contrary to public consultation outcome in 2015. This move has been stated as a 6-month trial (Jan – June 2021) where upon the use will be analysed, which runs counter to the decision in the LTP to close the centre.

The relocation of the Akaroa Service Centre and/or the removal of the Service Centre Desk located at the Akaroa School/Community Library is contrary to the Banks Peninsula Community Board Plan 2020-2021 and Council policies. The Banks Peninsula Community Board was not consulted, this decision was neither open, transparent nor democratically accountable (as per the CCC Principles stated in the 2020 Strategic Framework). CCC staff have made decisions without public consultation, discussion, or providing evidence or alternatives, all of which are required by the Local Government Act.

The only remaining avenue for ratepayers to comment on the closure of the Service Centre is by writing a Long-Term Plan submission.

### **Decision sought.**

The ratepayers of Akaroa and the Bays ask Christchurch City Council to reinstate the Akaroa Service Centre in the historic Post Office Building with adequate staff, well trained and locally based, to ensure ratepayers in the Akaroa area and the Bays can continue to be well informed, active citizens fully engaged with and participating in community and civic activities within the wider Christchurch district. The Information Centre and Postal services should be relocated into the facility as it was prior to the earthquakes in 2010.

### **The Reasons are as Follows:**

The Akaroa Service Centre, located in the historic 1914-15 Post Office building, provided an active Citizens Hub in a Council building that was specifically refurbished (\$984K +) to meet the requirements of the community and the post-quake building code. This historic, listed building was an effective central location for our community, that met the community needs (including a virtual meeting room), instilled resilience, and it was a source of pride.

Direct engagement with locally based Council staff is critical for the wellbeing of the community many of whom are retired and/or elderly. A community where internet service can be poor if at all, and a number of ratepayers do not have computers. The Service Centre allowed ratepayers to engage directly with Council staff who had an in-depth local knowledge.

The decision to transfer the Service Centre from this central location of a dedicated building to the Library in January 2021 did not follow a formal consultation process. The Council is in breach of its statutory duty to undertake appropriate engagement and consultation, in accordance with Council policies and the Local Government Act.

### **Issues with the Service Centre at the School/Community Library**

- The Akaroa School/Community Library, is a small structure of approximately 180 square meters, adding the Service Centre restricts the ability of the Library to provide the same level of service to students, ratepayers, visitors and Library staff, due to the lack of available space. There is no room for the Council information to be displayed or stored eg District Plan, Have your Say fliers
- There is no private area in the Library where ratepayers can discuss problems with staff, nor is there space to construct a virtual meeting room. Should these services be added staff would lose their open plan office/tearoom and students would probably lose their small research and reading space.
- One Librarian has been trained – for the 6-month trial, offering split hours – 5 per day, 5 days a week.

It is taken that the last decade of earthquakes and now COVID-19 has impacted severely on CCC income. If the assessment of transactions and face to face interactions focused on the past 12 months for the stated closure of the Akaroa Service Centre in the LTP 2021–2031, it is unlikely to be accurate data. COVID-19 which closed borders, mandated lockdowns, social distancing, and limited travel has specifically impacted our remote community. COVID-19 may have provided the means to remove Customer Service from Akaroa as a cost saving exercise, if so, it is very short sighted. Post COVID, international visitors are likely to return in the next 2-5 years, Akaroa and the Bays need to be set up and ready to accommodate greater activity for the economic stability of the area to secure and support the resilience and wellbeing of the community.

CCC staff stated at public community board meeting in Akaroa (15/3/2021) that the Post Office building is a CCC asset and there is no intention of selling it. But they do not know how to use it and would like the community to assist with a use/s. We invite the Council to join the community in achieving a positive and on-going future for the refurbished historic, listed Post Office building at the centre of our community.

We suggest that this should include:

- Relocating the CCC Service Centre, the Information Centre, the Postal service, and Post Office boxes back to this building, which is in the centre of Akaroa and it was specifically designed for that purpose, including disabled access and parking.
- Locate an ATM machine to the side of the building once the BNZ closes in April 2021

1.8 Our heritage, foreshore and parks

Heritage buildings are important. We have lost too many of our beautiful buildings. I fully support their restoration.

However, some park work is not pleasing to me. Removal of mature trees ( to replace them with natives) is not ecologically sound. Wildlife (particularly birds) are losing shelter and habitats and it will be years, if ever, before new planting becomes an adequate replacement.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Cecilian Singers rehearse in the Makers Workshop and occasionally are lucky enough to perform in the Great Hall. After the earthquakes, it was almost impossible to find rehearsal venues or performance venues. As a choir we need space for 30 to 40 singers, a good piano and, essentially, a good acoustic. It is still extremely difficult to find suitable places. After several years of inadequate and problem spaces, we were absolutely thrilled to return to the restored part of the Arts Centre. Apart from its central location, it has excellent facilities, a wonderful atmosphere and a long tradition for us, as our choir began there 40 years ago.

There is no other performance space in Ch.Ch. like the Great Hall. This venue alone brings a guaranteed audience. Visitors to our city are stunned by their surroundings when we perform there. In the past, international choirs like the Washington Women's Chorus have been effusive in their praise of the Hall.

On our rehearsal night we are surrounded by artists, dancers and musicians and this beneficial atmosphere can only grow as other areas on the site are repaired and opened up for use. It is essential that this wonderful facility is fully repaired and operational and can reach its full potential as a true Arts Centre for this city. It is a treasure beyond price.

### Feedback

#### 1.7 Our facilities

Please refrain from making the proposed changes to the libraries. As a library supporter and a lover of books i cannot imagine why these changes are even out for submission.

Books are part of life learning. If you had attended the annual book sale at Pioneer stadium last month you would have seen it. hundreds of families coming in. All keen to learn more.

Closing a library an hour earlier so that people cant get there after work is not just lacking in thought it is depriving people of the ability to learn. Or is that the intention?

The amount of money to be budgeted for anything needs strategic analysis. I cant see a sign of it with this proposal.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

##### Comments

Having researched how the Arts Centre made the transition from university to the home of arts and culture it is now, i am also aware of who the real owners are. Not CCC but the people of Christchurch.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

##### Comments

Another cultural travesty in this city. The history of the Art Gallery and its original funder isnt well known. such a beautiful building left to moulder away for 10 years. I do find it hard to believe that there are so few councillors who want to preserve the city's art and cultural heritage.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

As a ratepayer in Christchurch, a frequent attendee at Arts Centre events, a venue user and an Arts Centre Volunteer, I fully support the Council funding the Arts Centre.

The Arts Centre is an integral part of the heritage and cultural fabric of the City, unique within NZ, and as such should be funded and supported in order to ensure the survival of this outstanding building and community facility for generations to come.

Loss of funding would threaten the ongoing level of activity and restoration of this facility, and it is imperative that the Council support funding this \$5.5 million capital grant to ensure its longterm survival.

## Feedback

### 1.1 Have we got the game plan right?

Im submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

### Feedback

1.1 Have we got the game plan right?

It is not obvious why rates increases are still greater than CPI.

1.2 Rates

These are very large real (>CPI) increases. Why?

1.3 Proposed changes to existing rates, and new targeted rates

I don't see the rationale for a targeted Arts Centre rate, although I do support CCC funding the Arts Centre. I support excess water rates but you'll need to be sure of your metering data.

1.4 Investing in upgrading and protecting our city's water networks

I suspect CCC will lose control of water management as part of central government changes. Be careful here.

1.5 Investing in our transport infrastructure

CCC (and ECAN) seems determined to make cars less attractive when the move to EVs is central to transport emission reductions. This is contradictory. Public transport (in the sense of buses and, god forbid, rail) is old thinking.

There are still plenty of roads that are in a parlous state and these should be fixed first.

1.6 Rubbish, recycling and organics

Yet the CCC has reduced the amount we can put in the yellow bin which inevitably increases landfill.

1.7 Our facilities

No comment.

1.8 Our heritage, foreshore and parks

Balance is about right. Could perhaps make some hard calls on some unrepaired structures in the vicinity of Rydges hotel site.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

## Comments

I know there is a trust deed, but is there some way to increase commercialization of the Arts Centre so as to increase use and reduce ratepayer funding?

## 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

## Comments

It's sad but this is an example of a hard call. We have a good art gallery.

## 1.11 Potential disposal of surplus Council-owned properties

Yes dispose.

## 1.12 Any other comments:

The ownership / governance of CCC owned companies needs to be reviewed. This particularly applies to the airport. How did ratepayers end up indirectly buying significant land in central Otago via CIAL for an airport that, if it is needed, needs to be done via an open and local process? If there is a rationale for local government ownership of such companies then this is predicated on the activities being local. CCHL is simply a smokescreen.

### Feedback

#### 1.7 Our facilities

Yes the impact of COVID-19 has of course meant less international visitors to the Art Gallery (like any other public facility) but it is wrong to penalise local residents, especially children, for this. Children are minds of our future and their creative education will feed into this, as it fed into my own career. As a mother of two primary aged children, I want them to engage in educational programmes the Art Gallery offers. The reduction of public programmes would also be a great shame as these are the events which add value to a visit to the Art Gallery and help to enliven our city - again for residents.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

##### Comments

I absolutely support the grant to the Arts Centre of Christchurch. This block of heritage buildings contain so much of Christchurch's history and provides a cultural heart to the city. We need the amazing restoration work and excellent management to keep going to make more of this vibrant center.

## GREENING THE EAST VISION:

Adults and children have multiple opportunities to connect to, and be enriched by, the green, biodiverse and healthy neighbourhood of Inner City East/Linwood, while discovering the natural and cultural heritage of the area and its unique character.

I support the *Greening the East* vision and its guiding outcomes of *Connect, Enrich, Discover*.

I ask the Council to set aside funding in its Long Term Plan to make the Greening the East Plan a reality.

The reasons I support this are:

As more and more people are attracted into our area, ~~now~~ we lose more and more of our trees etc and become less and less green which affects our sense of wellbeing.

### Feedback

1.7 Our facilities

To Whom it May Concern,

I would like to make a submission in support of the upkeep and running of the Mobile Library Service. For residents and school students in Mt Pleasant this is an extremely important and well utilised service and Tuesday afternoons are a highlight for my children. We love the connection and personal service with the librarian and she has created a great relationship with the children which has enhanced their passion for reading. Without this weekly visit we could not have the same access to books, and the resources and information that the bus provides. It is a childhood memory moment.

I would also imagine that there would be many elderly that love this service as they cannot get to other facilities.

Surely the cost of running this service (which I am sure are minimal) cannot out way the benefits and if anything the facility could be expanded.

Thank you and regards,

Kylie

### Feedback

1.8 Our heritage, foreshore and parks

I have lived in Templeton for 13 years now. We have raised three children and the village has changed substantially in that time. The park however has remained the same this entire time. No upgrades to the play equipment or toilet area have been made. We are constantly seeing the new subdivisions getting brand new equipment and landscaping however Templeton has been left as-is. I would like to see some money spent on our community for a change namely new play equipment and upgraded toilet facilities.

Thanks

Cathy Dalton

### Feedback

#### 1.2 Rates

These are very significant increases, but there does not appear to be much choice.

#### 1.3 Proposed changes to existing rates, and new targeted rates

I support the principle of penalising waste of water, but consider that the proposed mechanisms are unfair, and will add cost to a large number of households without providing a significant disincentive to the truly excessive users.

Generally, the "Background material on proposed changes to rates for 2021/2022" lacks sufficient data to make a fully informed comment. However, enough information is provided for some high-level observations.

The proposed charging system is blunt. The daily allowance is not adequate for a large family. Likewise those who have gardens to feed their families, or gardens that contribute generally to making the urban environment pleasant, may struggle to stay within a 700 litre per day limit in the Summer months even without watering lawns or washing cars.

The policy as proposed is ambiguous or misleading - if a household uses 500 litres per day in April-September, but 900 litres per day October- March, that will trigger a bill? Annual usage is still 700 litres per day. Many households will be confused and angry if they use less than 700 litres per day on average, but are billed for using more of that in the Summer - this sounds a lot like demand pricing (which there may well be a case for, but it is not what appears to be proposed and is quite contrary to the bulk of the water charging which is CV based - "ability to pay" by proxy). Although details are sketchy in the documentation, it appears that the Council expects at least 35% of ratepayers to face some additional charges, possibly as high as 50% [if indeed Summer usage is double winter usage, and annual usage is 540 litres per household per day then average Summer usage would be more than 700 litres per day so, depending on distribution of usage, many or most ratepayers will face excess charges].

I think a larger limit would be fairer. Consider the data presented for Tauranga - 172 litres per person per day. A family of 4 would essentially meet the 700 litre daily limit proposed by CCC - yet the grounds for large family exemption are set at 8 people. On this basis, perhaps a more reasonable limit would 1400 litres per day? This limit would still be sufficient to capture and penalise use by very high water users, rather than just giving extra bills to 1/3 to 1/2 of households.

The mixture of funding of mechanisms seems difficult to justify as fair - more expensive properties pay more, but everyone gets the same allowance, irrespective of the number of people in the household or size of garden.

I suggest:

\* Much increased daily allowance (eg 1400 litres per day), averaged over the entire year, with differential pricing for excess usage - eg \$2 for first 1000 litres per day, \$4 for next 1000 litres per day and so on (or some other numbers that balance the budget). This would reduce the burden on most households, while recouping more from the wasteful.

The next best options would be alternative options 2 and 3. Option 2 is the fairer of these, since option 3 would almost certainly result in significant cost increases for many residents while reducing rates on expensive properties.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

We are opposed to the increased land drainage targeted rates in our area. Reading the proposal we are for alternative option 1. Our reasoning being that although we are CCC residents we do not benefit from particular targeted land drainage as we are not in a flood zone area nor do we have issues with surface flooding. We also do not have roadside kerbs, stop banks and pump systems.

The rates increase is also based of rateable house value, not the amount of targeted drainage works needed or being used which is unfair. Therefore, houses worth less with more serious surface flooding and drainage issues are paying less than we would be.

We would hope that our concerns are discussed and considered in the proposal to increase rates of those properties who have not been apart of this historic rates target.

### Feedback

#### 1.1 Have we got the game plan right?

It is very difficult to assess if the overall plan is right as the information is very fragmented, as presented.

My biggest concern is the way in which revenue is planned to be raised.

It is concerning that we are proposing to borrow 18% of the budget and receive 5% in dividends. Whilst popular with the public, the retention of assets is unwise. We should sell ALL the locally held assets and use the money to fund investment in new assets. We should sell those that are successful later and move on. This is how a responsible company would run these assets. Hoarding companies as a dragon hoards gold is not helpful for the future of our city.

There is nothing wrong with investing spare capital in other cities' infrastructure projects, but it is not in our interests to keep hold of those within our own boundaries.

#### 1.2 Rates

This proposed rate rise is hard to justify in the circumstances.

It is unlikely that a business facing such cost increases would survive long, or that customers would choose to remain loyal to such a business.

It is also unclear whether you mean 5% today and approximately 0.4% per annum or 4% per annum. It is necessary to present a coherent vision to justify such high levels of expenditure when CPI is running at 1.4%

It would be better were the council to find ways to live within its means.

#### 1.3 Proposed changes to existing rates, and new targeted rates

Water rates are unfair. They disadvantage the poor, the overcrowded and tenants to the benefit of the wealthy and landlords. I look after a very disadvantaged population and they will be hit hard by the water rate proposal. It should be abandoned.

In addition, there will be a substantial additional cost involved in reading meters. Instead a social approach should be taken. The cost of water provision should be included in the General Rate and all meter reading activity for domestic properties should cease. Properties such as mine, with a swimming pool, should pay an additional unit rate that covers the cost of inspections and any additional water use (my 8 x 4 pool requires an additional 8,000 litres per year on average, so this should be charged regardless of my household use. Bill per pool surface area for fairness - it's about 250 Litres per square metre. This will also reduce the cost of recovering inspection costs.

Targeted rates do not add clarity, rather they obfuscate the actual costs so it is very difficult to determine how much is really being spent. We are a community and by and large we should share costs fairly across the community. Land drainage rates are a good example - these should be shared across the city and all properties within the city should pay a share. This should be through the General Rate (alternative option 3)

Overall, I support there being only one, general rate.

---

#### 1.4 Investing in upgrading and protecting our city's water networks

It is impossible to assess this from the limited information provided. The figures are meaningless.

If this means investing in products with a very long service life then I'm all for it. If you do this the same way you manage the roads, then don't waste the money. Quality before quantity. Longevity above all else. Long term thinking means low maintenance, robust infrastructure.

---

#### 1.5 Investing in our transport infrastructure

There is a need for improvement, but primarily in the quality of roading.

NO MORE CHIPSEAL on major roads and bus routes - the stuff just falls apart and leads to an uneven ride for bus passengers. Just STOP using it. Do the job properly the first time. Patches with proper seal on junctions and chip in between are just as bad and they break down (Ferry Road) anyway.

Paint the lines properly. Other countries use proper paint for their lines that does not fade and reflects light. We use the stuff for rumble strips, but it is the very best way to paint lines - it will pay for itself in a year or two. Right now it costs a fortune just to keep repainting the lines.

No more stop/go people. The rest of the world uses traffic lights - stop/go people are expensive and inefficient. Contractors using lights would be cheaper.

Stop digging up roads for underground activity after resurfacing. Let's have some joined-up thinking that checks to see if there is a need for underground works before surface work begins. In some countries underground work is embargoed for 5 years after re-surfacing. That may not be possible here, but it should be considered.

---

#### 1.6 Rubbish, recycling and organics

I have no idea if the amounts are right.

I should like to see: FREE tyre disposal (to reduce the fly tipping problem) and recycling that actually recycles everything properly. If it costs more I'm willing to pay, but I want the council to collect soft plastics, polystyrene and really re-cycle most of the yellow bins.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

This should not be funded this way. The Arts Centre is a commercial activity and should pay for it's own renovation. In respect of the value it adds to the city however, the council should prefer an interest-free loan. Grants should not be raised from rates, but instead from sale of capital assets.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

This is not a commercial entity and the works stored therein are of community value. This should be funded.

1.11 Potential disposal of surplus Council-owned properties

Sell them immediately. The council should not hold unused assets within its own boundaries.

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

Our facilities

We're proposing to invest 19 per cent of our capital spend on community facilities. We're also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

1.7

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service? Have we got the balance right? If not, what changes would you like to see?**

Hi, Our submission is relating to the mobile library bus which visits many retirement complex's around the city.

We understand it is proposed to stop the service it provides. Our mum lives in a retirement complex currently visited by the mobile library bus. She cannot drive, cannot walk far, and relies on us to do most of her messages. The mobile library bus gives her some semblance of independence. It is one thing she does not have to burden us with. Even taxi journeys are very difficult for her.

The mobile library bus know their clients, are super helpful and know what subjects our mum might be interested in, so they have some books waiting for her when it comes weekly. They are irreplaceable.

Please do not stop this, what we believe is an essential service, without thinking of her and many others in a similar situation. The library bus provides an effective and supportive service that many people rely on.

Kind Regards

Paul and Ben Teeuwen

### Feedback

#### 1.2 Rates

For the past decade rates increases have been 2 to 3 times cost of living/inflation. The proposal is for another 10 years of increases at a rate currently more than twice inflation. A little mathematics will highlight why this means a huge increased burden to each rate payer.

If inflation averages 2% over 20 years then income of \$1000 in 2021 is the equivalent of \$1490 in 2031 (49% increase). Any increase in rates above this is increased burden on the payer.

At a rate average of 4% over 20 years then rates of \$1000 in 2021 becomes \$2191 in 2031 (119% increase). It is easy to see that this is 70% over and above the inflation increase.

It is claimed this is affordable. On what basis? Which study of rate payer incomes shows this to be affordable?

Additionally, what is missing in the draft plan is a detailed plan as to how these increases will be reduced to at or below the rate of inflation.

I do not support the proposal.

By the way you wrote "... and an overall rates increase of 4 per cent over the next 10 years." Unfortunately, this is not what is proposed and is a misleading statement. What I believe is proposed is an average 4 percent increase per annum and therefore "... an overall rates increase of 48% over the next 10 years"

#### 1.3 Proposed changes to existing rates, and new targeted rates

I support in principle targeted rates on excess water use. The devil in the details is that some will be living in houses where there is water loss through leaking pipes, dripping taps etc. These may not all be visible, and many will be renters rather than owners.

There needs to be a comprehensive plan including a "run in" period where high use water properties are identified and informed of their issues. My concern is how land lords will react.

#### 1.11 Potential disposal of surplus Council-owned properties

Given my comments about the increase burden of rates, I think it is an appropriate time to sell some assets.

#### 1.12 Any other comments:

I would like to see a reduction in council funded entertainment of various forms. Entertainment is a "nice to have", but not a core Council function.

While there is some discussion of recycling and also of climate change. I would encourage the plan to make pollution reduction a key principle of all of the proposals.

One aspect missing is reduction in light pollution. The introduction of LED street lighting has increased light pollution noticeably. They have been introduced on the basis of standards that are "minimum". The Council needs to go beyond minimum standards. Questions to be considered:

1. Why to we need street lights (in a particular area) at all? They are not necessary for driving. There is some need for pedestrians. Cyclists are most visible when they themselves have good lights and high-vis clothing. They become less visible with LED street lighting because of glare and lack of contrast. In many places where LED lights have been put in to light the entire road, less intense lighting on bollards may be used.

2. Why are street lights still being put in place that send light backwards into properties? This is completely avoidable even if it meets some minimum standard. Light on properties disturbs sleep, interferes with the life cycles of insects and birds, and means that we and our tamariki can not view our birthright - the night sky. We are soon to celebrate Matariki - but few in Christchurch can see it because it is lost in the pollution.

### Feedback

1.1 Have we got the game plan right?

First of all, I was born and brought up in Christchurch and have lived here my whole 83 years. I enjoy living in Christchurch, and appreciate the incredible recovery from the earthquakes, the thought and planning and hard work put in by everybody. Also the planning and budgeting to "keep the house in order," ie the City of Christchurch.

My own planning and budgeting, unlike your own, has not a hope of any increase to budget with to cope with such contingencies as you mention is needed for Christchurch. Having another 5% taken on a monthly basis in Rates is unaffordable to me. People other than Ratepayers use this City, ratepayers have a responsibility because we live here of course.

My suggestion is this, that the Rates Rebate be increased the same percentage as the percentage of increased rates for Ratepayers who have only the Superannuation to live on, while living alone in family home. Please give this your attention and consideration. It is only fair, as we have paid rates all our lives in Christchurch.

1.2 Rates

-

1.11 Potential disposal of surplus Council-owned properties

I HAVE HAD MY SAY AND MADE MY REQUEST, AND HOPE IT IS GIVEN EARNEST CONSIDERATION. I LOOK FORWARD TO YOUR EARLY REPLY.

VERLE GARLICK

1.12 Any other comments:

I HAVE NO COMMENT OTHER THAN WHAT I HAVE WRITTEN ABOUT MY OWN LACK OF FINANCE TO SUPPORT A RATES INCREASE.

PLEASE CONSIDER MY REQUEST THOUGHTFULLY AND REALISE THAT SOME CANNOT AFFORD A 5% INCREASE AND 4% EACH ENSUING YEAR!

1.3 Proposed changes to existing rates, and new targeted rates

As the treasurer of a charitable trust, I was disappointed to read that you are changing the Rates Remission Policy based on the balance of cash we have in the bank. As we rely solely on donations a cash balance is simply a buffer - it could disappear very quickly if donations dropped substantially. How are we to continue to make a 'significant community benefit' if we have to pull back some of our services?

### Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

## Feedback

1.1 Have we got the game plan right?

We can't keep building roads at some point we need to seriously consider channing the inner city to public transport only and have amazing buses/trams/rail that links the community. But cycling is our biggest advantage we a flat city that means cycling is easy for anyone. So keep researching and developing safe cycle ways that criss cross the city.

1.2 Rates

Around 5% is reasonable but this also cannot keep being added. Future proof our city as best as possible to prevent rate hikes.

1.3 Proposed changes to existing rates, and new targeted rates

I agree with user pays especially if only a few are costing the city a large sum, but spread the costs over as long as possible for these residents or organisations.

1.4 Investing in upgrading and protecting our city's water networks

Yes.

1.5 Investing in our transport infrastructure

Christchurch should be known as the garden city and the city that cycles just like in the Netherlands, cycling is the best mode of transport.

1.6 Rubbish, recycling and organics

Recycle as much as possible but also gauge what are the biggest contributors to non recyclable rubbish, like how we have got rid of supermarket bags, start eliminating other packaging that are the biggest/worst to dispose of. Ban the use of them in Christchurch.

1.7 Our facilities

Our libraries are amazing for everyone, yes invest in libraries 👍

1.8 Our heritage, foreshore and parks

This actually links into Christchurch the city of cycles too.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

## Questions to think about when making your submission

### Have we got the game plan right?

Our overarching proposal is to focus on a deliverable capital programme that helps drive our city forward, with particular investment in roads and transport infrastructure and in protecting and upgrading our water networks. We're borrowing for new projects that have long-term value, and ensuring that the debt repayments are spread fairly across the generations of ratepayers who will benefit from them. We're maintaining enough financial flexibility to be able to handle unplanned events, and we're finding permanent efficiencies in our day-to-day spending. We've managed to do all of this while keeping rates increases as affordable as possible.

**Have we got the balance right? Have we prioritised the right things? If not, what changes would you like to see?**

### Rates

We've considered a range of options for how best to achieve what we need to achieve while also keeping the average rates increase as affordable as possible.

**What do you think of this plan for an average residential rates increase of 5 per cent for 2021/22 and an overall rates increase of 4 per cent over the next 10 years?**

## Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

**What do you think of these changes to existing rates, and new targeted rates?**

**Have we got it right? If not, what changes would you like to see?**

Some households may only have 1-2 people in them, others up to 10 people, for larger families, I think the water usage, should be based on how many people in each household, not capped on larger families.

## Investing in upgrading and protecting our city's water networks

We have a responsibility to provide and maintain the wells, pipes, reservoirs, treatment plans and pump stations for drinking water, and manage the collection, treatment and disposal of wastewater and stormwater.

**We are proposing to invest 41 per cent (\$2.329 billion) of our capital spend on water infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

## Investing in our transport infrastructure

We've heard from residents that transport is a top priority. It's also the city's biggest contributor to carbon emissions. We want to give people better options for getting around, whether by car, public transport, on foot, on a scooter or on a bike. We also want to ensure our networks are safe.

**We are proposing to invest 25 per cent (\$1.445 billion) of our proposed capital spend on transport infrastructure improvements.**

**Have we got the balance right? If not, what changes would you like to see?**

## Rubbish, recycling and organics

In 2020 the Council adopted a new Waste Management and Minimisation Plan that focusses on changing our 'throw-away' culture and reducing the amount of waste we send to landfill. Implementing the actions in that plan are the key drivers of our operational and capital spending.

**We're proposing to spend \$25 million on organics infrastructure (which includes upgrades to the organics processing plant), \$18.5 million on transfer station infrastructure and \$18.4 million on recycling infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

---

---

---

---

---

---

---

---

## Our facilities

We're proposing to invest 19 per cent of our capital spend on community facilities. We're also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service?**

**Have we got the balance right? If not, what changes would you like to see?**

I would like to see the Riccarton Road Bus lounge stay open. And a Youth Worker be hired for issues arising in the community. Also of people without vehicles, use Riccarton regularly, for shopping and need to sit down, waiting for buses.

## Our heritage, foreshore and parks

Christchurch has a long and proud history of protecting and respecting our heritage. Over the past decade we've carried out a massive programme of repairs and restorations, but we still have some work left to do. In the next 10 years we will continue to restore our own buildings and support private development of heritage buildings. We will also be maintaining and improving our parks and foreshore.

**We're proposing to invest 11 per cent of our capital spend on our heritage, foreshore and parks.**

**Have we got the balance right? If not, what changes would you like to see?**

---

---

---

---

---

---

---

---

## Funding for the Arts Centre Te Matatiki Toi Ora

We are proposing to provide the Arts Centre with a capital grant of \$5.5 million. We would do this via a targeted rate that would recover the grant cost over 10 years, and would phase in over two years, so the targeted rate would be smaller in 2021/22 than in subsequent years. We're proposing that every ratepayer will pay this rate and it will be calculated as a number of cents per dollar of capital value.

**Do you support the Council funding \$5.5 million for the Arts Centre?**

**This proposal is currently accounted for in our proposed rates increase. If a decision is made not to proceed, rates would drop by 0.04 per cent.**

☐ Yes ☒ No

Comments: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

## Funding for base isolation of the Robert McDougall Art Gallery

Canterbury Museum considers the base isolation of Robert McDougall Art Gallery to be a key part of the Museum's redevelopment. In July 2019, the Council agreed in principle to support the base isolation of Robert McDougall Art Gallery at a cost of \$11.8 million, subject to public consultation in the Long Term Plan 2021–31.

**Do you support the Council funding base isolation of the Robert McDougall at a cost of \$11.8 million?**

**This proposal is not currently accounted for in our proposed rates increase. If a decision is made to fund base isolation, rates would increase by 0.07 per cent.**

☐ Yes ☒ No

Comments: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

## Potential disposal of surplus Council-owned properties

We have a small number of properties, including two heritage buildings, that are no longer being used for the purpose they were originally acquired for. These surplus properties make up less than 1 per cent of Council's overall property portfolio.

**Help us decide their future – what do you think of this proposal to dispose of surplus properties?**

\_\_\_\_\_

\_\_\_\_\_

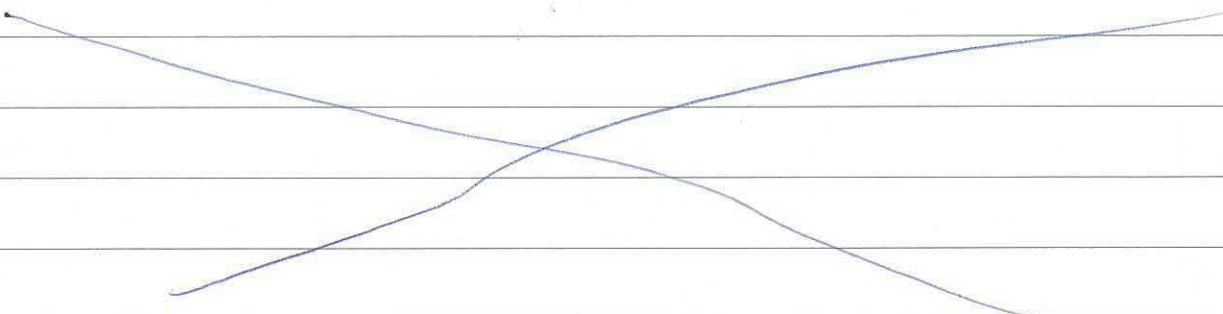

\_\_\_\_\_

\_\_\_\_\_

**Any other comments:**

I believe that Jesus Christ's name should be put back into Parliamentary Prayers, as well as all Council sittings and meetings.

Prayer should stay in our schools, such as Assemblies, Bibles in Schools Programs and free distribution of Gideon Bibles, to all high school students, at year 10.

### Feedback

1.1 Have we got the game plan right?

1.12 Any other comments:

Dear Mayor Lianne Dalziel and Councillors,

Thank you for giving groups like ours a chance to have our say on issues in our area that need council attention.

As a residents' association we feel the strong need to advocate for issues on behalf of our ever-growing suburb.

One issue concerning residents in our area and neighbouring suburbs is the safety of **Cashmere Rd as it curves around past Shalamar Dr to Ferniehurst St and Bengal Dr.**

The road and footpath in this area are extremely narrow and residents of all ages feel particularly unsafe walking and cycling around this corner.

This stretch of road is a popular thoroughfare for motorists, cyclists and pedestrians. It is used by children from Westmorland, Cracroft and further afield who cycle to Cashmere High School, Thorington School and Christchurch South Intermediate (our locally zoned schools).

It provides the most direct access to the Heathcote River path in front of Princess Margaret, which you will know is also the start of the new major cycleway route, the Nor'west Arc. However, we can not get to the cycleway without negotiating this narrow bend.

There is not enough room for cars, cyclists and pedestrians to move safely around the corner. Due to safety concerns on the road, children often cycle on the footpath but this also causes problems because the footpath is too narrow for bikes and people.

Here are a few quotes from Cracroft residents about their experiences using the corner:

"I was terrified by that Cashmere Rd curving bridge when my children were very little cycling or scooting on the pavement and remain terrified for little people (and bigger people) who use it. There is no give at all in that corner for the smallest of mistakes to become a tragedy and the road is just becoming busier."

"Something needs to be done about this as everyday it terrifies me, even driving along there. Biking with our two wee ones is just

soooo scary.”

“We support any action that’s possible to make this patch of road safer for cyclists. Our son had a scary near miss with a bus recently.”

We understand work is about to begin to install traffic lights at Worsleys/Cashmere and Hoon Hay Rds and we thank you for that. These lights are much needed, but we ask that you do not stop there.

We implore you to please take a good look at this stretch of Cashmere Rd and come up with a solution so our children can be as safe as possible.

Yours sincerely

Cracroft Residents' Association

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

Firstly I received a letter from the Christchurch city council on the 6th of April 2021 that was dated the 30th of March 2021 and it stated that the public consultation opened for discussion of the Long term plan 2021-31 on the 12th of March 2021 and then informs me that it closes on the 18th April 2021. I don't believe that this gives me enough time to try and discuss the implications with all my neighbours.

I live in Early Valley road and as there is no town water supply or sewage/ wastewater/storm water/ drainage infrastructure for my Rates \$ the only thing that is done is my rubbish is taken away and minimal road repairs which always seems to need redoing. Once or twice in the last six years the drain/swale on the Selwn district side of the road has been cleaned and the job has not been finished.

I have to pump my own water from our well and our sewage goes into our septic tank.

We have water races/drains that run from property to property from the head of the valley to send the volume of water down stream when we have substantial rain.

Each land owner does the work/pays to keep these races clean to avoid any flooding. (Not the council)

Please stop and consider your actions of asking me to pay 3 times.

1 - once under ECan

2 - once under the Council

3 - once by myself for having to do the work costing me time and money to go and do the job or pay for a contractor to come and do the work

Something for your consideration

Am I entitled to invoice the council for the works that I carry out to

1 - Keep the water races clear.

2 - Mowing the roadside berms that council doesn't do

A separate issue is

There is a drain pipe (approx 300mm dia) that runs under the road from the Selwyn district side to the Christchurch side and when it rains it discharges onto my property and floods my land.

### Feedback

1.11 Potential disposal of surplus Council-owned properties

record of title CB12F/538 Lot 1 DP14050 and Lot 7 DP14050 Hunters Road Diamond Harbour.

These 2 plots have been earmarked for disposal without public consultation prior. I would propose you ditch the fast track disposal and have proper community consultation with our small community as there will be many far reaching changes to our way of life. Also our stretched infrastructure will not manage further strain on the sewerage system, roading and quiet pace of life. We live in the Harbour for a reason, its not suberbia and we do need to have our say.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Generally Yes

1.2 Rates

Yes

1.3 Proposed changes to existing rates, and new targeted rates

We strongly support the targeted rate for the Arts Center.

The Arts Center is a irreplaceable physical and emotional hub for many Cantabrians and an important link to our past. It also is a massive feature and drawcard for local and international tourism.

As a tenant (Lumiere Cinemas), have watched first hand the work being done by the Art's Center to restore and strengthen the buildings and get the properties on a solid commercial footing. The Management Team and Trustees have been a fair commercial landlord. We find them good to deal with and observe that they work hard to support their tenants in many ways.

Due to the inherent historic nature and design of the buildings they aren't necessarily built for maximum rental income , as opposed to a "new style development". This is part of the reason that the Art's Center will need ongoing support, which really only can come from the City Council and the people of Christchurch. For this reason the commercial viability should not be compared to a modern development assessment. There are a large number of smaller tenancies which take a lot of management.

Against this challenge, we feel the Arts Center Management and Trustees are making excellent progress restoring the physical buildings while establishing and managing a cohesive group of tenancies which bringing the buildings to life. Lumiere Cinemas alone brings 60-80k of people per year into the Arts Center to enjoy high quality films, opera and entertainment. The value of the Art's Center to the CBD of Christchurch simply should not be underestimated.

For all of the above reasons, we wish to strongly support the Council's plan to include a targeted rate to enable the good working being done to continue and reach its full potential.

1.4 Investing in upgrading and protecting our city's water networks

Yes

1.5 Investing in our transport infrastructure

If you want people to use buses and the environmental impact of personal vehicles in the CBD, public transport (busses) should be free and should be electric.

1.6 Rubbish, recycling and organics

Yes

1.7 Our facilities

Yes

1.8 Our heritage, foreshore and parks

Yes

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

### Feedback

1.2 Rates

I support these changes

1.3 Proposed changes to existing rates, and new targeted rates

I support these changes

1.4 Investing in upgrading and protecting our city's water networks

I agree with investing in strengthening our water infrastructure

1.5 Investing in our transport infrastructure

I support investing in the transport infrastructure, and agree with prioritising spending towards new active transit and public transport infrastructure. I also want to see more investment in accessibility around the city.

1.6 Rubbish, recycling and organics

I would like to see the cost of responsible disposal of waste reduced in order to disincentivise illegal dumping.

1.7 Our facilities

I do not agree with closing the bus lounge as our city should be prioritising public transport and making journeys and waits more comfortable for public transport users.

I also do not agree with scaling back services at the Art Gallery. The gallery is an important accessible and affordable cultural destination for Christchurch residents. Tourist numbers are also likely to begin recovering in the near future thanks to the covid vaccine and trans-tasman bubble facilitating easier international travel.

1.8 Our heritage, foreshore and parks

I support these investments.

### Feedback

1.4 Investing in upgrading and protecting our city's water networks

I support the introduction of a charge for households that use more than 700 litres per day.

I also support the introduction of charges for irrigation that occurs during the day - all farm irrigation should be done at night-time, early morning or evening.

1.11 Potential disposal of surplus Council-owned properties

Regarding the land listed as 27 Hunters Road PT LOT 1 DP 14050++ and 42 Whero Ave LOT 1 DP 9607++.

I oppose the proposal to dispose of these properties and request that they are permanently protected in a Conservation Covenant and become reserves. I request that the land be removed from the LTP and fast track disposal.

This land has special environmental value with extensive planting of native trees carried out over the past few years. These plantings, while done by volunteers, contribute to the council's commitments to climate change and carbon reduction policies.

The land also includes numerous public access walking tracks including a walking track to Diamond Harbour School. The track to the school provides safe and off the road access for children encouraging exercise and carbon-neutral transport to school.

Part of this land is subject to a grazing licence which helps to keep farming jobs in the local community. This land, if partially planted, would link the plantings in Sams and Morgans Gullies further increasing the environmental benefit of the existing plantings. The land also provides clear views to the surrounding hills and harbour which contribute to feelings of wellbeing and stress relief of residents using the walking tracks. Developing this land for housing will negatively affect the mental health of the local community.

Does the property have special cultural, heritage or environmental values that can only be protected through public ownership?

1.1 Have we got the game plan right?

To Whom It May Concern,

We have received a letter from you about your public consultation on your Long Term Plan 2021-31. We are aware of the impact of this proposal for us as a non-profit organization. We have been blessed by the rate remission we have received from you. We do not agree on the proposed change to the current Rates Remission Policy for not-for-profit community-based organisations.

The reason is: our income is not stable, and we fully depend on donations. On top of that, there is the impact of Covid-19, we have seen a significant drop in our income.

Therefore, we make this submission to ask to not change the current Rates Remission Policy for not-for-profit community-based organizations.

as a trustee of The Arts Centre, a rate payer and a supporter of community, I strongly support the Arts Centre and the vision of a vibrant, diverse range of activities in safe, accessible, inspiring spaces that link the present to the past while focusing on the future.

So much has been achieved in 'bringing back better' at the Arts Centre that the proposed contribution, while small in the context of overall city resources will make a material difference quickly in the context of the Arts Centre which has proven it can deliver cost effective heritage restoration on time and within budget over the past decade.

### Feedback

1.1 Have we got the game plan right?

In this submission I am opposing the council's proposal in its annual plan to reduce the programmes the Christchurch Art Gallery offers to the public and school groups by 25 per cent a year. I propose that the current provision of education services at the gallery is retained or increased. As a national leader in education in art galleries, and also as someone who grew up in Christchurch and still often spends time in the city, I want to respond to this aspect of the draft long-term plan since I believe it is short sighted and does not reflect the stated intent of the document.

The points I make are:

- Firstly, the value of education services in galleries aligns with the stated aims of the Christchurch Art Gallery relating to well-being and developing collective decisions about important issues such as the environment. It is well established that learning in the arts, and participation in art activities increases individual and societal well-being.

The draft document describes one of its principles as:

"Taking an inter-generational approach to sustainable development, prioritising the social, economic and cultural wellbeing of people and communities and the quality of the environment, now and into the future."  
This reduction of resourcing is effectively reducing the ability of children and youth to fully participate in this. Art gallery learning provides an important means for children and younger people (as well as those of other ages) to engage in creative problem-solving around these issues.

The Christchurch City Council's suggested community outcomes of

- building resilient communities with developing a strong sense of community
- Active participation in civic life
- Safe and healthy communities
- Celebration of our identity through arts, culture, heritage, sport and recreation
- Valuing the voices of all cultures and ages (including children)"

are all actively developed through art gallery education programmes.

Additionally significant local and global issues around the environment (such as those mentioned in the draft plan, namely: Climate change, Healthy environment, Healthy water bodies, High quality drinking water, Unique landscapes and indigenous biodiversity are valued and stewardship exercised, Sustainable use of resources and minimising waste) are often addressed through art exhibitions and art gallery education is an effective way for children and young people to get a buy in and think of creative solutions around these issues.

- Secondly, it is illogical to reduce funding which works to the development of potential lifelong visitors to the Christchurch Art Gallery. The draft plan states that, "The ongoing border closures as a result of COVID-19 mean Christchurch Art Gallery is currently welcoming fewer overseas visitors". Reducing the programmes, the Gallery offers to the public and school groups by 25 per cent a year will further deplete visitor numbers, thus putting the institution in an even less viable position.
- Thirdly, art education by nature fosters the ability to cope with and solve uncertain problems. The draft plan states in its "Our challenges" section that "The only certainty is uncertainty." Art gallery education provides the ability to develop creative problem solving which is essential to our sustainable current and future lives.
- Fourthly, currently the provision of gallery education at the Christchurch Art Gallery is low compared to other New Zealand cities such as Dunedin or Wellington. At this point in time, we should be nurturing local visitors.

Because of these four facts it is blindingly clear to me that it is very important to retain or increase the current provision of education services at the Christchurch Art Gallery.

Sincerely,

Dr Esther Helen McNaughton

1.3 Proposed changes to existing rates, and new targeted rates

Re: The Land Drainage Targeted Rate

While I acknowledge that we benefit from land drainage when travelling on Christchurch roads, there is no land drainage outside our property. When there is heavy rain the run off from the road floods on the side of the road and up our driveway, sometimes almost reaching the house. I feel to be charged the full land drainage rate would be unfair when we suffer from this problem. This type of flooding is probably not too uncommon where there is no road guttering.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I support targeted rates especially for support of the arts center and excess water charge.

1.6 Rubbish, recycling and organics

I thoroughly support all efforts to reduce waste and improve efficiency. I think the council should penalise those who repeatedly spoil the recycling by dumping rubbish in yellow bins. However despite the ongoing attempts at educating people i still think there is widespread uncertainty about what can go in the yellow bins

1.8 Our heritage, foreshore and parks

I believe that council can lead by example to encourage the community to be involved in keeping parks etc tidy. I suggest that the on line reporting of issues needing council attention such as water leaks or damaged signs etc could be promoted more as it is a good feedback from the community saying which issues they think are needing attention

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Arts Center has always been a focal point of central ChCh and has far more meaning to the majority of residents than the cathedral. To me having lived through the quakes it was the realisation that at least we still have hagley park, the botanic gardens and the Arts Center, that kept me grounded in our city. Nothing else mattered and i can happily accept the new look of ChCh as long as the familiar arts centre is retained.

Feedback

1.2 Rates

I oppose the proposed change to the land drainage targetted rate. It is unreasonable to extend the targetted rate to unserviced properties where no drainage infrastructure is provided. The provision and maintenance of drainage infrastructure requiried to facilitate urban development should be bourne by those urban properties. I prefer Alternative Option 1: Set the land drainage rate on properties receiving a land drainage service.

### Feedback

1.7 Our facilities

Ngā Puna Wai Sports Hub.

I am making this submission on behalf of the Shirley Tennis Club, and as a personal participant in Canterbury competition tennis, which utilises the NPW facility.

The NPW Sports Hub is a beautiful facility and from the outside looking in, appears to be a good use of public money. Unfortunately, the reality is that the NPW facility, in its current form, is completely unfit for purpose when playing tennis. The pervasive threat of Christchurch's well known windy conditions, amplified by the fact that NPW is situated in a wind tunnel, means you are infrequently given the opportunity to actually 'play' tennis. Instead, you spend a few hours trying as you might to keep the ball within the boundaries of your court and hoping that the wind doesn't carry it off over the fence once more. Everywhere in Christchurch, participants in sport must contend with the wind. However, NPW takes this to the extreme. At other facilities around Christchurch, the wind presents a challenge. At NPW, the wind is at a level where it is forcing participants to consider whether they continue playing in the future as they are no longer enjoying the sport.

Without adequate investment in some manner of wind mitigation, NPW is simply a monument to public capital waste and constitutes nothing less than a missed opportunity for Canterbury's sporting institutions. NPW should be a prize. Currently, it is achieving the opposite of its intended purpose.

Thank you for considering this submission.

### Feedback

1.1 Have we got the game plan right?

I support funding for the arts centre and believe it provides great opportunities and access to facilities for the public.

While I understand the current economic picture, cutting funding to the arts as proposed goes against the aims of the council to reinvigorate the central city. Increased funding to the arts and more importantly to arts institutions is integral to meeting these goals. Providing new funding opportunities to artist run galleries should figure in the councils plans.

1.5 Investing in our transport infrastructure

Trains to Rangiora and Rolleston.

1.8 Our heritage, foreshore and parks

Increase in planting projects, using tree planting as a way to not only offset carbon but support struggling ecology

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

1.11 Potential disposal of surplus Council-owned properties

I am a recent graduate of Ilam School of Fine Arts and currently run Hot Lunch, an artist run gallery space which looks to support emerging artists in Ōtautahi and New Zealand. There is consensus among young artists that there is limited sustained support for emerging artists in Christchurch which leads them to move elsewhere to the detriment of the city. The impetus for our gallery was a perceived lack of long term initiatives to support artists. While short term gap filler projects are great they do not promote sustained interest or opportunities for artists. If the council truly wants to deliver a vibrant and interesting city then they must be willing to commit to young arts practitioners and provide them with long term supports to deliver on this vision.

The former YHA building could be a way of rectifying the mass migration of young artists elsewhere. It could easily and cost effectively be converted into artists residences which could be provided on a year to year basis. Studio space in the city is difficult to come by as most buildings now are new and therefore expensive to rent.

Studios along with accommodation could be provided at a friendly rate to the artist, ensuring that it is not simply a money sink. If this initiative is implemented, along with funding opportunities for artist run galleries we could see a measurable improvement to our central cities night life. These buildings could provide young people with entry into the city.

1.12 Any other comments:  
The situation is pretty dire in the central city, the architecture delivered thus far is awful and uninspired. It is incredibly disappointing to see terrible murals as a strategy to make up for bad architecture. The swathes of dead space in the city lend it to being cold and uninviting. Our openings on High Street near the muse art hotel are often the only thing happening on our street, outside of this it is dead.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Yes-agree

1.2 Rates

OK

1.3 Proposed changes to existing rates, and new targeted rates

Agree. Funds for Arts centre are essential, and a targeted rate is appropriate

1.4 Investing in upgrading and protecting our city's water networks

Yes about right

1.5 Investing in our transport infrastructure

More emphasis on excluding cars from the city centre. More bike and pedestrian friendly routes. Employ smaller bus which can be more frequent to city centre from outlying areas

1.6 Rubbish, recycling and organics

Yes agree with plan

1.7 Our facilities

Agree with plan

1.8 Our heritage, foreshore and parks

Yes about right but more funds needed to support tracks and signage on the port hills. These are vital for recreation and are currently grossly underused given proximity to city and attractions offered by the unique landscape

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

Essential to maintain this beating heart of arts in the city. Its potential to attract tourists and art displays music and live drama will help to keep the city at the forefront of the Nations attractions. This is money well spent.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes
Comments
It is a scandal that this wonderful building lies fallow. Its safety must be secured -and its place in the citys visitor attractions restored
1.11 Potential disposal of surplus Council-owned properties
Only support if purchaser is providing a public good and will is prepared to maintain heritage status
1.12 Any other comments:
The city is recovering well but it is vital to maintain its gardens, trees and easy access to city centre by reducing cars and pollution

### Feedback

Proposed changes to existing rates, and new targeted rates

I disagree with the proposal to change the Land Drainage Targeted Rate.

My property contributes to ECan's land drainage and flood protection works in the Halswell catchment, including the maintenance of the Birdlings Drain on the southside of Old Tai Tapu Rd. My ECan rates also contribute to the Waimakariri River flood protection works that protect greater Christchurch. In addition, my property is zoned "high flood hazard management area" in the District Plan that provides land drainage/flood protection benefits to the wider community restricting my landuse options.

My property at Old Tai Tapu Road receives no land drainage or flood protection from Christchurch City

Council.

In my view rates from Old Tai Tapu Road contributes its fair share to land drain and flood protection in the local (Halswell) catchment as well as greater Christchurch. Adding a third contribution in the form of City Council land drainage rates is an unfair burden on this property.

### Feedback

1.1 Have we got the game plan right?

I would like to see the suggested closure of the Riccarton Rd metro bus lounges reconsidered. I consider it important that people have somewhere safe and warm to wait for their next bus, especially at night and in colder weather. There should also be more incentives for people to use public transport not less.

### Feedback

1.5 Investing in our transport infrastructure

Obviously it is important in striking the right balance for transport infrastructure to work for everyone, and for the most part the investments proposed are good, where the issue lies is in the absurd proposal to close the Riccarton bus lounge. Plenty of people use that lounge to wait for their bus, it is especially important for the elderly and those whose health is not the best to have a warm and safe environment to wait for their bus, also it prevents overcrowding on the pavements by everyone waiting for their busses ever since the lounge has gone sidewalk congestion has significantly eased this makes it better for people walking through the area who are on their way elsewhere but also improves safety as people are less likely to walk into the bus lane to get around other people. This lounge provides an essential service to many residents of Christchurch, health and Safety should be of the utmost concern in this plan over saving on some operational costs.

### Feedback

1.1 Have we got the game plan right?

I am opposed to the decommissioning of Wharenuī Swimming Pool. This pool provides an essential service to the wider canterbury community, and sporting activities in the area. As one of a few pools that are primarily used for squad training and swimming lessons, Wharenuī Pool and Wharenuī Swim Club are able to deliver successful programmes supporting the safety and health of people of all ages. Removing this as a facility will disadvantage many sportspeople from all over Canterbury. In the past, swimmers who competed at a national level travelled from rural Selwyn and suburbs all over Christchurch to train at Wharenuī pool. Removing the pool will increase the pressure on other pools as the Wharenuī Swim Club looks to find a new training base. Fitness and swimming lessons are available for people of all ages, and many schools make use of Wharenuī's facilities. Removing the pool will create a barrier for many people unable or unwilling to travel further afield to other pools. Please reconsider decommissioning Wharenuī Pool.

1.7 Our facilities

### Feedback

1.1 Have we got the game plan right?

The balance is pretty good, but it could do with a little less spending on roads and more on cycling, e-bikes and public transport. Less on sports stadiums and more on food forests and planting food trees in parks and main streets to enhance food security in communities.

Climate change mitigation and sustainable solutions has to be the priority.

1.2 Rates

A rates rise of 4-5% sounds pretty good given all the things we need to fund and rising costs.

1.3 Proposed changes to existing rates, and new targeted rates

No objection.

1.4 Investing in upgrading and protecting our city's water networks

Yes this essential and I support the council rejecting the government's three waters proposal and keeping it local.

1.5 Investing in our transport infrastructure

Less on cars / roads, more on cycling (e-bikes), public transport and walking.

1.6 Rubbish, recycling and organics

We need to work towards zero waste by 2030. Reduce, reuse, renew. Even recycling is not the answer. We need to actively discourage the use of plastics.

1.7 Our facilities

More food forests and food trees.

1.8 Our heritage, foreshore and parks

More food forests and food trees.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

#### Land Drainage Targeted Rate

This is not fair or equitable for remote rural rate payers such as ourselves our property bounding Selwyn District County and nowhere near residential Christchurch.

Our property is not drained by above ground council assets. Furthermore, we understand the Halswell river now takes some stormwater drainage from more recent residential development in Halswell which is unlikely to mean we have benefited from land drainage activities as suggested in your correspondence. It may have had a negative affect on drainage in Lansdowne Valley during heavy rain events which is totally dependant on the Halswell river for drainage and for which we pay rates to Environment Canterbury to maintain. Finally, we very rarely visit the CBD so drainage improvements there are of no benefit to us.

Our submission is to please be fair and reasonable about this matter when considering our specific position and abandon this unfair large rating charge, but at the very minimum at least apply the rating differential for rural properties to the final rate struck, which we hope will be considerably less than what has been indicated to us.

Yours sincerely

Murray & Philippa Edwards

### Feedback

1.1 Have we got the game plan right?

**The netball courts and toilets have been in such a bad state for years! My girls went to Belfast School and played Netball there and they were shocking then and this was 15 years ago!! I am now a teacher aide that works at the school and this is really not good enough and it is time for the council to spend some money in Belfast before someone does some serious injury to themselves. This needs to be a priority. We do not wish to be neglected anymore.**

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

#### 1.2 Rates

After the earthquakes we were informed that rates would be rising over the following **TEN** years.

Here we are, ten years after the big earthquake, and the same story being told! Our rates keep rising, our insurance premiums went up, and life has been a struggle for the last ten years, but apart from the interruption caused by Covid-19, we have managed to pull through.

There seems to be an awful lot of money being spent on new cycleways, yet as a pedestrian, I now need to be wary from all sides these days with the amount of other traffic - cyclists, scooters, skateboarders, mobile vehicles - being allowed to use the footpath too. How long before it becomes mandatory for **ALLPEDESTRIANS** to wear **HELMETS** while using the footpaths?

It would be a nice feeling to not be told over and over, that rates need to rise for the next ten years! I am happy to contribute to the restoration of the cathedral, and any other heritage buildings that can be restored and saved. My only hope is that I will still be living to see the end result!

#### 1.3 Proposed changes to existing rates, and new targeted rates

#### 1.7 Our facilities

I am **appalled** that the Council are considering closing the Riccarton Road Bus Lounges.

I use the facilities at least three times a week as buses are my only means of transport. Since the upgrade of Riccarton Road, the bus stop that was outside NZ Postshop near Clarence St/Straven Rd intersection has been removed. I am over 70 years of age and it has become a trek march to walk to the new bus stop outside the Mall, after visiting the Council Rates Office. There's only one seat outside the coffee shop, at the Riccarton Rd entrance to Westfield. The Lounge is ideally located for this reason. If the Lounge is closed then that means no seating facilities, or cover, and everyone standing, waiting for their bus, is also exposed to the elements. With Winter only weeks away, the **Council** contemplating closing the Lounges in June is just another indication of their **cold-hearted attitude** to assisting bus passengers! At the end of the day, it's still many bus users who also pay rates, AND the salaries of Council staff remember, and who will lose a well-needed facility. It's bad enough waiting at Church Corner for a bus, fully exposed to all weathers. It has been like that for years and the council have never improved the facilities there, yet it too caters for many bus users daily.

The Bus Lounge on the east side is also ideal for use because ECan, who **always know best** decided when the timetables were changed back in 2016, and again since then, that passengers wanting to go into the CBD now need to use **TWO buses**. That is called progress in the 21st Century? I have to get **TWO buses** from my home in Russley to connect with a bus going into the city! Stopping off at the Lounge helps break the journey because I have to wait up to 10 minutes sometimes for a connecting bus. A bus lounge makes it more convenient to wait off the footpath. I don't see having FREE buses either for two years making the slightest difference to public transport in Christchurch.

Listening to the users of the buses makes more sense, but then that would make ECan look silly, and they can do that very well without the public's help!

**Both Lounges** need to **REMAIN** and cutting costs could be made elsewhere.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

The Robert McDougall Art Gallery was gifted to the City of Christchurch for the sole purpose of displaying art, and never intended to be an extension of the Canterbury Museum.

Since the earthquakes, possibly before, it's been closed. From the times I have visited the gallery and also taken visitors there, it has always been an enjoyable experience. I would like to be able to visit there again, but not as part of the museum!

Visiting the gardens **AND** the Robert McDougall Art Gallery was all part of the experience.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

Our rates increases far outstrip wage increases and from my perspective current levels already outweigh the quality of services we receive. My property does not benefit in any way from land drainage and my rateable value reflects this..ie properties in cbd and surrounds have a much higher value through benefitting from services and infrastructure. My support would be for Alternative option 1) Set the land drainage rate on properties receiving a land drainage service. Investment properties should probably pay a higher rate too given they are a business and essentially profiting off the services they are being provided.

1.5 Investing in our transport infrastructure

majority of this money will be spent on christchurch..Rural residents gain very little..and zero public transport

1.7 Our facilities

19% would be better spent on providing more help for the homeless. If the libraries and art galleries cannot stand alone then they probably shouldn't continue.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

### Feedback

**Proposed changes to existing rates, and new targeted rates**

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

1.3

**What do you think of these changes to existing rates, and new targeted rates? Have we got it right? If not, what changes would you like to see?**

**Land Drainage Targeted Rate:**

The blanket approach to levy all rateable properties for land drainage on Banks Peninsula on the basis that these service the whole district is flawed. Because of the rural nature of the area and the topography many catchments are contained within the various valleys and there is no council service provided for land drainage.

Our property at Double Bay Road is such a property with the only dwelling in the valley and does not receive any service from land drainage and to rate it in a district wide catch all is not correct. If this rate is to be applied, then the region should be assessed and rated where the service is supplied. It is not sufficient to say everybody benefits from it therefore rate everybody.

The reason why there are areas exempted from the drain service rate at present is because there is no service provided and this rating exemption should continue.

For your information attached is an image of our property in support of the submission.

## Te Mahere Rautaki Kaurera - Our Draft Long Term Plan 2021-31

### Submitter Details

**First name:** Robert **Last name:** Stoothoff

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

1.3

**What do you think of these changes to existing rates, and new targeted rates? Have we got it right? If not, what changes would you like to see?**

Regarding the changes to the Land Drainage Targeted Rate, I note that this property ( Candys Road) already pays significant ECan drainage rates (Halswell River Rating District), and I wonder whether this will be taken into account in assessing the CCC land drainage rate when/if this is imposed on the property. I'd like to be assured that this will be done.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I fully support the council's plan to provide the arts centre with the funds it needs. If anything I believe they should get more to help them rebuild to be even better than they were pre-quake

1.2 Rates

I think it's a necessary cost to make Christchurch great

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

A tiny cost for such a huge benefit!

Hello I have attached a document which I would like to submit in support of the continued funding and existence of the Community Partnerships Scheme

regards

David Newton

Chair

Eco Action Nursery Trust

# ECO-ACTION NURSERY TRUST

**Charitable Trust** (CC57147)

7 4 2021

Submission to the CCC LTP

To whom it may concern,

The Trust has been supported by both personnel and money sourced from CCC Parks, Community Partnerships Programme. This combination has allowed us to expand our operations from a privately self-funded nursery growing 350 trees to an operation that in 2020 planted 4500 PB3 nursery grade plants into CCC land. It also provided 10,000 plants free to 12 schools to be potted on and planted in winter 2021 and grew 20,000 seedlings that will be provided to an expanded number of Satellite Nursery schools next season to be planted out in 2022. The help navigating the complexities of Council bureaucracy was made possible because of the liaison provided by Sarah Mankelow. This gave us confidence to invest our time and cash as well as currently involve \$50,000 worth of sponsorship in kind a year to help put our plans into action. The figurative "hand holding" gave us the time and the extra cash to help prove our production model and show success. The grant of \$1000 dollars that came from Community Partnerships Programme through Sarah Mankelow purchased 100 spades from Mitre10 allowed us to have most of the 400 student volunteers who helped plant have a spade to do the job. Families usually only have a single spade so when they accompany a student it is essential that all have gear to use.

We had also accessed a Bunnings community grant that helped purchase another 100. Plants need potting mix and we have been very generously supported by CLS Canterbury Landscape Service with donations of 13m3 of potting mix and 15 bags of both seed raising mix and pumice. However, this quantity was not sufficient for growing the current number of pots and last year we did not have enough plants in the ground to approach grant funders for the extra potting mix required. My personal funds were limited so fortunately CCC Parks, Community Partnerships Programme were able to purchase another 20m3 direct from CLS. This meant that we could expand our program to the current level and as importantly it allowed us to have the track record of planted native plants in the ground to successfully apply for Rata Funding (\$5000) and also \$20,000 from Te Tira Kāhikuhiku - the Christchurch Red Zones Transformative Land Use Consultative Group.

As Chair of this Trust I believe we would not have been able to expand to the extent we have and provide an outlet for all of our contributing school student volunteers had it not been for the input, advice and seed grant capital provided by the CCC Parks, Community Partnerships Programme. We are now in a position where we are large enough to no longer require funding from this program but still very much value the support provided by a personable face that represents CCC Parks.

Yours sincerely

David Newton

To: CCC Plan  
Subject: Belfast Netball Club  
Attachments: Belfast Netball Club draft LTP submission.docx

Hi

The Belfast Bowling Club support the Belfast Netball club in it's endeavour to have the courts upgraded as they are a health and safety issue.

Netball encourages all ages to play their sport and it's only right they should be playing in a safe environment.

To not provide safe and clean toilets on sight is an indictment on the City Council.

The Bowling Club in the past has also raised the condition of the driveway from Main North road into Sheldon Park to no avail.

It is well overdue, to spend some of the ratepayers money in the Belfast area to encourage safe sport and clean facilities.

Murray Jones

President

Belfast Bowling Club.

.

Tena koutou

Re Renewal of the Belfast Netball Courts and repair of the toilet block

This is the submission from Belfast Netball Club (the Club) on the Christchurch City Council's (the Council) draft Long Term Plan. The Club requests that the funding for the repairs of the Sheldon Park netball court be brought forward, enabling the Community Parks Planned Hard Surfaces Sheldon Park projects works to occur as soon as possible. The Club also requests that the repair of the toilets occurs at the same time.

The courts are in terrible state and in dire need of renewal. They are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting, unusable state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large, community-based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027. Safe courts are essential for the Club's future.

The Club will continue advocating for these important community assets to the Waipapa Papanui-Innes and Waimāero/Fendalton-Waimairi-Harewood Community Boards until they are renewed, and we acknowledge the support of both Boards thus far.

Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block.

Yours sincerely

Karen Ellis

President, Belfast Netball Club

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.1 Have we got the game plan right?

It's a good plan for the water, rubbish and roads solutions. But borrowing and raising rates so high for new projects when the damage of the quakes hasn't been fixed yet is irresponsible.

1.2 Rates

No, rates are so high at the moment and you want to raise them when we do not get value for our money now!

Money has been or is going to be wasted on things like art work (the circle globe down the motorway- yes free but needed to be repaired and installed at an absorbant cost to the tax payer), buying out financially in trouble Adventure Park (now with a 12 million liability penalty against it), purchasing the heritage property in Akaroa (nearly twice the price it was offered only a few years ago when THAT council rightfully declined to purchase because rate payers wouldn't agree, maybe it did have cultural signicance but if the affected Maori tribe werent interested in the purchase and the council already owns the neighbouring boundary, clearly its not all lost. And now you want to renovate it too- mindblowing!). A roof over the farmers market?? Because it hasnt had ine for the last 50 years why now, when the council is broke?. Moving the war memorial beside the Cathedral only metres away?? Waste of money. And thats just off the top of my head in 5 minutes.

1.3 Proposed changes to existing rates, and new targeted rates

Rates should be better itemised to ensure transparency. I have never felt this more than the last two terms of the council under this major.

We as a city are just trying to pick ourselves up from the earthquake, some people only just getting back on their feet. Now we face financial difficulty with COVID and i understand having to look after businesses, but taking more money away from the ratepayer because of wanting to make Christchurch prettier or commerical areas more inviting is shortsighted. Are we doing it for the tourists? Because they're not here and won't be for a few years yet. In hard times we save, fix what is broken, replace what was removed and maintain what is needed. We don't do all this plus take on more huge projects, its the easiest way to get into big debt. You know why Viki Buck was so liked, because she did exactly that. What will happen if the bottom falls out of the economy and that council debt expands twofold... more rates increases. Possibly making owning houses in nice areas for some families unaffordable, maybe just owning a house unaffordable.

On the water charges, perhaps a bylaw change to consent processes regarding the bottling plant taking as much water for nothing, and now the people who actually live in Christchurch will have to pay for our water! Nowhere in the world gives away a natural resource for nothing! And most definitely, no city in the world gives away its natural resource to a commerical company on one hand then makes the local ratepayer pay for it! Change the law, through bylaws (get the backing of government- surely Leanne Danziel has learnt how to do this over the years) and make them pay, make consents harder with expiry dates. You should know they will have no grounds after a law change- no judge can rule against the law- Parliment is sovereign. Just make it air tight.

1.4 Investing in upgrading and protecting our city's water networks

Yes agreed. This is important to our city.

1.5 Investing in our transport infrastructure

There is no point putting more money into the bus system, when have you ever seen a full bus?! You tried it- having bus exchange areas etc, it didn't work. The buses are atill hardly used but it did encourage petty crime. I hear constantly about school children being assaulted or insulted.

You've made bike lanes wider on narrow inner city roads, lowering speed limits. This has only contributed to traffic jams in busy times.

The motorways are great though.

More footpaths should be installed where there are new subdivisions to encourage walking and biking. Ie the Prestons subdivison have no footpaths to walk or bike along Marshlands Road to the Palms or Shirley centre, so people take cars. You agree for these subdivisions but then don't but the infrastructure needed around it. Esp considering the rates these households pay.

#### 1.6 Rubbish, recycling and organics

Yes agree

#### 1.7 Our facilities

Fair enough closing Bus lounges, as I've stated earlier I would be surprised if the benefit exceeded the costs of running. I think libraries and service desks should not loss any staff, these are difficult times. There is always work to be done in these areas and if not perhaps deligate more tasks out to them, so they are valued council employees.

#### 1.8 Our heritage, foreshore and parks

Yes agreed. But did not purchahse any further heritage buildings or property. The council is struggling to care for what it has as it is. Supporting private developments, this needs to be very restricted. Any aid given must be contracted to ensure if the owner developer sells within a percentage of time ie 15 yrs that money (or percentage of) will have to be repaid to the council. It is not for the developer to benefit in profit at the cost to the rate payer.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

##### Comments

i have been there once in my lifetime, as I can imagine not many households visit to warrant 5.5 million dollars of ratepayers money.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

##### Comments

#### 1.11 Potential disposal of surplus Council-owned properties

If they cannot be used for any other purpose by the council in the near future or be rented out (in a profitable way) then sell. But this is not a green light to see these and then turn around and buy further buildings.

#### 1.12 Any other comments:

Think clever, Christchurch can get out of this whole without having to raise rates too much for so long a period. In these times, keep things simple, keep things ticking along with no new huge investments. Focus on fixing what is broken, what needs to be replaced and what needs to be maintained. Stip trying to leave tour personal mark in your time in the Council and think 'what would the majority of people and ratepayers that we represent want?' You all know this, they were after all your election promises.

Submission on Draft Long Term Plan 2021-2031  
 Christchurch City Council  
 PO Box 73017  
 Christchurch 8154

via email to [cccplan@ccc.govt.nz](mailto:cccplan@ccc.govt.nz)

8 April 2021

### **Potential Disposal of Council-owned Surplus Properties, here 27 Hunters Road and 42 Whero Avenue**

The Council has notified in its draft Long-term Plan (LTP) that it may dispose of the land between the current Diamond Harbour housing area and Bay View Road, without further consultation (other than LTP submissions). The land in excess of 40ha contains Morgan's and Sam's gullies as well as the school track. Many local volunteers have spent time building and improving the tracks and restoring native vegetation. The gullies have not yet been protected by covenants (long-term they should become reserves).

The Diamond Harbour Community Association (DHCA) asks the Council to remove the 27 Hunters Road and 42 Whero Avenue properties from the list of surplus properties. DHCA is of the opinion that the LTP is not the appropriate planning framework for the decision as to retain or dispose of the properties.

DHCA welcomes the assurance from Councillor Andrew Turner that the covenanting project that is currently under way for the protection of ecologically significant areas on the properties will be completed before any decision on the future of the properties is made. However, the protection of the re-planted gullies and the walking tracks is not the main reason why DHCA rejects the proposed process. Due to the size and current zoning of the two properties a potential sale would have a significant impact on the Diamond Harbour Community and on the supporting infrastructure.

The 2018 census show that around 1500 people live in the community and that there are about 700 occupied dwellings. The two properties are zoned residential, which means that a housing development is a permitted activity and the community would not need to be consulted in relation to any subdivision application. Even if a portion of the area is covenanted, the

remaining size of the properties has the potential to increase the number of houses and residents in the Diamond Harbour by about 30%.

A large scale residential subdivision like this has the potential to change the character and amenity values of Diamond Harbour and it is our view that this requires both adequate consultation of the affected community as well as in-depth infrastructure planning.

The quality and reliability of the network infrastructure in Diamond Harbour is currently far behind the standard maintained in the urban areas of Christchurch. After the 2011 earthquake the Council established that the networked infrastructure in Diamond Harbour is generally based on a single conduit, making its susceptible to failure.

Even if the development contribution for newly built dwellings increases significantly, it is more than likely that the infrastructure cannot keep up with the additional load without Council making significant capital investments.

If 27 Hunter Road and 42 Whero Avenue properties are sold as a potential outcome of the LTP process then there is no mandate for community participation in the planning and implementation of a likely large scale subdivision. We believe that this would be in violation of the principles of consultation as laid out in section 82 of the Local Government Act 2002.

for Diamond Harbour Community Association

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Overall I support the LTP plan and think there is an appropriate balance.

In particular, I support the heritage proposals - the targeted rate for heritage buildings and the Arts Centre and I support the base isolation of the Robert McDougall Art Gallery building. So much heritage has been lost because of the earthquakes and heritage has, understandably, had to take a backseat to infrastructure over the last ten years. I think it's now time to give it the level of priority suggested in the LTP.

1.2 Rates

I understand the dangers of underfunding works in lieu of lower rates and support the LTP proposal.

1.3 Proposed changes to existing rates, and new targeted rates

In addition to my comments above, an excess water charge seems reasonable.

1.4 Investing in upgrading and protecting our city's water networks

Support the plan

1.5 Investing in our transport infrastructure

I support the proposal, including cycleways and promoting modal shift. The LTP is about the future, and returning to a balance where the car is less dominant because there are other convenient, safe options, is the obvious way to go.

1.6 Rubbish, recycling and organics

Happy with plan.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

### Feedback

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

I support the CCC's proposal to directly support the Arts Centre as it is a cultural touchstone in the city that deserves to be shown love just as much as all of the stadiums and arenas in Christchurch that the council has helped fund. The Arts is a historically underfunded arena, particularly by central and local government. This proposal has the opportunity to really give some much needed support to the Arts community in Christchurch, and I look forward to seeing more policy like this in the future.

From: CCC Plan  
Subject: FW: Ask a question form

---

**Question** Dear Mayor and Council Members.

Like many fixed income earners, superannuants, and DSD beneficiaries, the ever increasing costs at undermining our need quality of life and affecting our health, and need to be modified or kept to the actual in inflation rate. As many fixed income people have often cut their budgets to the limit and now live on inferior food, less social life, penny-pinching, watching ever dollar, driving less, going with out, reducing electricity use, and becoming more isolated. But the costs keep rising and more under a Labour Government. Some people have reached the limit and cannot cut the slender budget anymore. The price increases have to stop and the factors that cause this must be thoroughly investigated. We cannot have people lose their homes and rental accommodation and have to live on the streets in our city and lovely country. I have seen and heard of three organizations that have experienced abuse and violence over charity food distribution. Shocking! Some people are very afraid of the next rates increase for 2021-22, and cannot cope with a big rate increase as has been suggested in the media. People's welfare is more important than electric buses and nice parks and pretty inner city. It is getting too hard for low and fixed income earners. Please tell the Council and other parts of the Council to cut costs and reduce planned budgets so rates increases are just the inflation rate and 1-2 percent increase for urgent council needs. People's Lives matter in Christchurch.

Subject: General Council spending complaint - copied from Hybris #392391

Good afternoon,

Customer complaint, copied from ticket:

Russell called in today and escalated his call. Russell really just wanted to register his unhappiness - every time I thought we were making headway and I was about to get through to him, he would change the topic.

His concerns are regarding Council spending - he is worried that we do not think things through before carrying out work.

He cited examples of resealing footpaths along Main South road, and then a few years later coming along and replacing the kerb and channel and footpath.

Marking out sportsfields for winter in summer months, and then rain washing the paint away.

He saw two people in high vis sweeping leaves by hand and putting them in plastic bags on Riccarton Ave. We discussed how cars are typically parked there day and night so the sweeper cannot reach the gutter.

He is behind the larger projects such as the metro sports centre and the stadium, but he is very unhappy with the Riccarton Rd revitalisation and the Cycleways.

Nancy Vance

## CCC 2021-31 Long-Term Plan Submission

Nancy Vance

I do not wish to speak to my submission.

---

1. Regarding the potential disposal of Council owned properties:

- 27 Hunters Road, Diamond Harbour      PT LOT 1 DP 14050 and LOT 7 DP 14050  
Title ref. CB12F/538, 38.9654ha
- 42 Whero Avenue, Diamond Harbour      LOTS 1-5, 56-62 and 69 DP 9607  
Title ref. CB452/50, 1.1825ha

These 2 parcels of land should be withdrawn from the "Potential Disposal of Council owned properties" list in the Long Term Plan. A number of matters should be considered if disposal is to proceed through normal disposal processes involving the Community Board and community input, such as:

- Designation for further expansion of Diamond Harbour School (as the school roll would increase with additional housing) and already there is inadequate room for locating additional facilities, and for safe bus and car manoeuvring for the shared school and Kidsfirst Early Childhood centre carpark. This submission will also be forwarded to Banks Peninsula MP Tracey McLellan with request to lobby for the Ministry of Education to purchase/acquire land from the CCC for futureproofing the School and ECE centre, before any land disposal proceeds (normal or fast-tracked).
- Protection of Morgans and Sams Gullies and the extensive planting that has taken place to date with CCC, ECan and Whakaraupō Healthy Harbour support.
- Designation of easements for the "School Track", and its connecting network, that are within these parcels. The School Track is the primary pedestrian access (and safest access) for children walking to school from the wider neighbourhood.
- Upgrading existing infrastructure is critical. The existing sewerage system is old, it leaks, and pipes break regularly releasing sewerage across walking tracks and to the beach. How would this system cope with more housing?
- Design influence and/or guidelines focused on:
  - the types of housing and associated facilities or spaces that 1) the community needs and 2) the land can sustainably support
  - road widths and streetscape treatment that are in keeping with the character of the area, and support water quality of Whakaraupō Lyttelton Harbour

- sustainable stormwater management
  - provision in the design which facilitates walking and cycling, and encourages use of the ferry/bus service rather than private vehicles for commuting.
2. Reticulation Renewals Programme (Project ID 35) is listed as “Citywide” – please ensure that some of this \$316+ million funding is allocated to replacing wastewater pipes in the Diamond Harbour area which are in very poor condition, regularly breaking or leaking (spilling sewerage across tracks and to the beach) contaminating our environment and causing health risks.
  3. Christchurch Art Gallery Te Puna o Waiwhetū  
I do not support the proposed changes in the LTP to reduce the programmes the Gallery offers to the public and school groups by any amount, nor do I support reducing the Gallery’s late night Wednesdays. Though international tourists are still not visiting, our history, stories, and social and political commentary through art are still important for all New Zealanders.
  4. I fully support the \$347.9M allocated to transport projects supporting better environmental outcomes and reducing greenhouse gas emissions - particularly improving public transport facilities across the city and harbour, and providing incentives to decrease vehicle dependancy. There does not appear to be anything in the LTP regarding the Lyttelton-Diamond Harbour Ferry facilities (I appreciate the service is provided by ECAN), there should be funds allocated (as part of this scheme) to facilities maintenance and improvements on both sides of the harbour and towards ensuring the bus/cycle systems support ferry facilities and users. (reference: bullet point #8 on website 12 March 2021, <https://newsline.ccc.govt.nz/news/story/climate-change-action-centre-stage-in-budget>)
  5. Regarding community facilities, particularly libraries: I would like to see the CCC futureproof the opportunity to upgrade the library at Diamond Harbour by allocating capitol towards a feasibility study and the implementation for a new community library facility on Stoddart Point in the future. This would not only meet the needs of the current community but also provide for additional residents to the area (if/when there will be disposal of the land parcels above causing an increase in population), but would also provide a focal point and momentum to restore a village heart to Diamond Harbour, which has been missing since the demolition of Godley House post-earthquake. This could be part of the Library Built Asset Renewals & Replacements funding, project ID 36877.
  6. Total 10 year spend of \$613,120 (from 2026-2028) towards the Diamond Harbour Village (Project ID 60387) is insufficient for the community facilities needed, and the reinstatement of a village heart since the demolition of Godley House post-earthquakes. Over the past 11 years extensive public consultation has clarified the scope of such a project and meaningful progress is currently taking place between the Community Board and CCC which needs to continue, and result in actions on the ground. A minimum of \$1.9M (the insurance payout for Godley House) should be allocated as preliminary funding.

### Feedback

1.1 Have we got the game plan right?

I do not agree with the decommissioning of Wharenui Pool as outlined in Christchurch City Councils' Long Term Plan and would like to see the pool stay for the use of the local community and Wharenui Swimming Club.

Wharenui Pool is a second home for our teenaged daughter. Encouraging exercise is essential for our young wahine and Wharenui pool and swimming club provides a safe, supportive environment for this. In addition, Wharenui Swimming Club is the closest Club to us and is easy to access both by driving or by bus from our children's school.

1.7 Our facilities

I do not agree with the decommissioning of Wharenui Pool as outlined in Christchurch City Councils' Long Term Plan. I would like to see the pool stay for the use of the local community and Wharenui Swimming Club.

Wharenui Swimming Club is the closest Club to us and is easy to access both by driving or by bus from our children's school. Our daughter swims here 5-6 times per week and the club is growing and thriving. Apart from the learn to swim and squad swimming (essential for developing skills and a love of life-long exercise for our young people) the Wharenui Pool it is always busy with a variety of community activities - school swimming sports, Master's swimming at 530am, ethnic groups and canoeists. It truly is a hub of the community.

1.11 Potential disposal of surplus Council-owned properties

### Feedback

1.1 Have we got the game plan right?

The Council has notified in its draft Long-term Plan that it intends to dispose of the land between the current Diamond Harbour housing and Bay View Road.

The land described as 27 Hunters Rd (Record of Title CB12F/538, 38.96ha) and 42 Whero Avenue (Record of Title CB452/50, 1.18ha) should be removed from the LTP and fast track disposal. The normal process for disposal of land that requires Community Board and public consultation, should be used instead.

There are many issues that the community need to discuss with the Council and the Community Board before the land is sold e.g. the uses of the land, the gullies, disposal sequencing and access.

The two pieces of land should be withdrawn from the 'Potential disposal of Council Land' in the Long-term Plan.

### Feedback

1.1 Have we got the game plan right?

I worked out that if rates rises continue at the present rate, assuming my govt super also increases at the official inflation rate, rates will take my entire govt super in 20 years time.

Council MUST keep rates rises to no more than the official inflation rate. What is the point in having all these big spending items if many rate payers will never be able to afford to use them?

1.2 Rates

Not acceptable. People on fixed incomes cannot afford this.

1.3 Proposed changes to existing rates, and new targeted rates

Also not acceptable. Low income people will never be able to afford these.

1.4 Investing in upgrading and protecting our city's water networks

How much money has Council already wasted on chlorination when it was never necessary. I see that Council is applying for exemption to chlorination, this is to be applauded. So why did we spend many millions already on chlorination?

When in other towns I cannot taste the chlorine. The water here is putrid when chlorine is applied. Is Council putting far too much chlorine in the water?

1.5 Investing in our transport infrastructure

Fine as long as rates rises stay under the rate of inflation.

1.6 Rubbish, recycling and organics

As above.

1.7 Our facilities  
If it keeps rates down, fine.

1.8 Our heritage, foreshore and parks  
As above.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
No  
Comments

These types of capital grants should only be made when equivalent savings have been made in other areas.

Arts centers are elitist in concept as only a very small percentage of rate payers will use them, and, if there is an entry fee, many rate payers will not be able to afford them.

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
No  
Comments

As above.

In any case our earthquake damaged roads should take precedence.

1.11 Potential disposal of surplus Council-owned properties  
Agreed. Council should not have surplus unused assets.

1.12 Any other comments:

In case anybody has missed this, poverty is a huge problem in NZ. I know ratepayers who never leave their homes because they cannot afford to.

Big spend items are no use to people on low incomes. Lower rate rises are essential.

Submission to the CCC LTP, April 2021

This submission asks that the Council defer the start of construction of the planned Multi Use Arena by a year to allow for further studies of its long-term viability.

Yes, I realise that the Council has made a commitment to build the facility, and it may face some costs if it postpones it or withdraws at this stage, but carrying those extra costs will, I believe, be worthwhile, and mean that if and when a stadium does go ahead, it will be on the basis of sound economics, now and in the future, and proven long-term demand.

### Background

The original commitment with the Government and other parties was made by a previous Council and Mayor, in 2013, under very different circumstances. At that time the City was reeling from the earthquakes, Lancaster Park had been wrecked, and a stadium was seen by the then Mayor (who loved big rock concerts), Council, and Minister as being an essential part of the City's rebuild. Normal planning rules were by-passed, and a special 10-year designation was put on the proposed site – with none of the usual formal requirements for benefit-cost studies or a resource consent process. It was taken as a 'given' that a stadium was needed for the City, and all the subsequent reports have been predicated on the assumption that one will actually be built, and on the selected site. The arguments have ranged around perceived economic benefits and the perception of Christchurch as a 'second-tier' Australasian city, which might be lost if it doesn't have a stadium.

Now, nearly 10 years later, the chickens are coming home to roost. The designation is due to expire, and the massive cost of even the Council's share of the build has become a millstone around the neck of Council's financial planning. The cost is huge. Yes, the facility can probably be built within the available budget, but even if it is successfully built, it is the long-term cost and risks around that which are the problem. Will it actually be used? Will revenue in any way balance its costs? Will it need expensive repairs or alteration to suit future needs? Will it just drag the Council down?

There have been significant changes in Christchurch, New Zealand, and the world since the idea of a new stadium was first mooted. Top grade cricket has successfully re-established itself at Hagley Park. Rugby and other football codes have, around the world lost 'in person' appeal, and stadiums were half-empty even before Covid struck. Covid itself, and the perception of what might happen with other diseases, has decimated audiences, and resulted in the world mega-concert tour circuit being cancelled. Will they ever re-start? Much international sport is being played in empty stadiums, with just a TV audience. Other world-scale sporting contests have been refined and redefined to use facilities where competitors and spectators can be far apart (eg the SailGP event). Television, with fibre broadband and big screens, can give at least some of the 'immersive experience' which formerly needed personal presence in a stadium. Climate change has become an issue of serious concern. Who knows what the future holds?

It is significant that the Rugby Union – and other sporting bodies – haven't volunteered substantial funds towards the CMUA project – and nor have concert promoters. That is in marked contrast to

smaller projects such as the Theatre Royal or the cricket facilities at Hagley Park – or even the rebuild of Christ Church Cathedral, where sponsors and donors have been keen to come forward.

It is also significant that the ‘temporary’ stadium in Addington is rarely anywhere near full, even allowing for Covid disruptions.

And yet Christchurch City still thinks it is sensible to build a stadium which will seat 20-30,000 people and maintain it far into the future! I think I hear the heavy footfalls and bellowing of an approaching very large white elephant?

Yes, if the Council pulls out of the project it could lose access to the several hundred million dollars which the Government has put aside for the purpose. That money might not be totally lost to the City – the Council should be able to put a good case for re-allocating at least some of it to other beneficial projects.

On the other hand, even after penalty payments and costs so far, the Council might save itself initial expenditure of around \$200 million, and estimated on-going costs of a minimum of around \$4-5 million a year, based on revenue of \$9 million.

An economic analysis of the build has shown that the construction cost estimates are robust, but as far as I am aware there has been no formal study of the long-term costs and risks of operation of the completed stadium. It is no good saying ‘If you build it, they will come’ – that was a line from a movie, not an economist.

There are plenty of other expenditure options (and many much cheaper!) which would lead to the City being able to hold its head up as that second-tier Australasian city, and to get economic benefits.

#### Solution

I urge the Council to defer physical work on the CMUA for at least a year to allow further studies of the long term cost to be undertaken. It should ask the Government to extend the present designation on the land for that time to enable a proper benefit/cost series of calculations to be done, and to allow time for even limited enquiry against RMA standards. That would mean the project could be considered under a more usual planning regime and would allow proper consideration of consequential works, such as parking and transport systems, and of factors such as noise, traffic/parking, heritage and climate. Wind-tunnelling under possible climate change comes to mind. What is the best solution to the Ng building?

We are past the time when the urgency of earthquake recovery is the key driving factor. We are past the time of a rock concert-loving Mayor, and of an impulsive Earthquake Recovery Minister.

It will be hard for the Council to re-examine its interest in the CMUA, but in the uncertain times of Covid and climate change the City cannot afford make a multi-multi-multi-million dollar mistake, such as rushing ahead with a stadium.

My request - that the project be deferred for at least a year.

Yes, I would like to speak to my submission.

### Feedback

1.1 Have we got the game plan right?

I would like to see a lot more traffic calming in the the Halswell/ Wigram area.

Looking at the traffic counter dashboards there are a lot of vehicles travelling above the speed limit.

There seem to be plenty of traffic calming measures in other areas of the city ie Riccarton, Addington, Lower Cashmere.

Many being installed recently

With the increase in population and number of vehicles on the road, and the off ramps from the southern motorway, this area should be a priority

Safety of the community should be a priority before all the nice to have art works etc

### Feedback

1.12 Any other comments:

I live in a neighbourhood of 36 households that were left out of the Government and Christchurch City Council funded roll out for fibre.

We are located at the top of Huntsbury Ave above Kenmure Drive and include properties on Huntsbury Ave, Westview Place and Tiroroa Lane. We are not a new development, with houses being built up here since the early 1990s, and we are within the Christchurch City Hills Living Zone.

At the time of the fibre roll out when it was being laid up Huntsbury various members of our neighbourhood approached the Christchurch City Council and Enable to find out why we were not being included. Nobody could provide an answer.

We collectively approached Enable in November 2019 to ask them to lay fibre in our neighbourhood. Enable developed a network plan (August 2020) that would lay fibre to most of our properties (but not all, excluding the top properties on Huntsbury Ave). Enable are prepared to fund most of this but require our neighbourhood to fund a shortfall of \$36,000+ GST.

Enable have stated we were excluded due to a 350m gap between the edge of their network and the first property on Westview Place. Over time, this gap in the properties will be developed, and since approaching Enable, 3 new houses have been developed. Our neighbourhood is zoned for residential activities, so it should be provided with the same level of service as other areas in the city zoned for residential. It is not our fault that the landholders in this gap have not yet completed development, and the status of this private landholding should not impact on the services that a ratepayer funded CCO is providing within a zone.

A key focus of Council strategy should be to provide an equitable level of service across the city. It is unfair that we are being required to pay for fibre to our streets while the rest of Christchurch had it provided for free, paid for by our rates and taxes – we are effectively being asked to pay twice.

Fibre is going to be provided to small, isolated country towns such as Lake Brunner and Haast, while we have not been given access to it within 7km of the CBD of the South Island's largest city. It is very discouraging to see extensive Enable advertising in the newspaper and on billboards for fibre take up, while there is apparently no funding to complete the rollout.

Please support us in finding the funding for this shortfall to get fibre laid to our streets OR by convincing Enable that they can cover the full cost of the fibre layout by using their discretionary spending.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I agree with the targeted rate for the Arts Centre Te Matatiki Toi Ora. The Arts Centre is clearly an asset to the whole city and requires additional investment at this time.

However, I disagree with the rate for excess water rates: the justification for this presented in the consultation document is weak and seems to rest heavily on the need to reduce water use in summer because the infrastructure cannot meet demand. More work needs to be done to reduce water losses in the system as well as encourage householders and especially house builders to incorporate wastewater capture and storage systems. Christchurch used to call itself the garden city and of course water use will be higher in the summer when water transpiration by plants (and not just lawns) exceeds rainfall. It would seem bizarre that a city that prides itself on its green surroundings were to penalize people trying to maintain their gardens. In any event, the existing rating mechanism based on the value of land and improvements already should provide a means for charging more to properties with high water use. This proposed additional water rate sets a dangerous precedent towards user pays which I oppose.

In addition, considering these two proposals together (for the Arts Centre on the one hand and 'excess' water' on the other), there is an inconsistency in approach. People who like their lawns and don't visit the Arts Centre (and for clarity, I have no lawn and do visit the Arts Centre) might well ask why they are required to pay for their water whereas visitors to the Arts Centre get a subsidy.

1.5 Investing in our transport infrastructure

I'd really like for Christchurch to have more control over the buses. We are not well served by the current system.

1.6 Rubbish, recycling and organics

We currently use compostable bags to collect our green waste, but these are not allowed in the green bin. So we have to empty everything out of these compostable bags and into the green bin, and then throw the compostable bags into the red bin. This is ridiculous. Please find a way of allowing us to use compostable bags in the green bins.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

1.11 Potential disposal of surplus Council-owned properties

Most of these properties will probably be used for new dwellings. The council should build houses on these properties itself rather than sell them to developers.

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

No. Once again the clear focus is on urban areas. As a rural ratepayer we see little to benefit us. I would like to see interest taken in rural problems and when feedback is given to council that council actually, hear, listen and take seriously as so far I have found that nothing has been done about anything that I have raised.

1.2 Rates

Too much for us living rurally. Services do not increase or improve with rate increases.

1.3 Proposed changes to existing rates, and new targeted rates

I strongly disagree with the change to the land drainage targeted rate. For some years we have been forced to pay an extra amount to ECAN for flood mitigation work in Little River. We voted against this but still had to pay. We would like to know exactly how the money has been spent. I have given feedback to CCC on a number of occasions that nothing useful is ever done to maintain the road side drainage channels by ours and neighbouring properties. We have to keep them clear ourselves. This is made harder when shrubs are pruned unnecessarily by council contractors and dropped into the drainage channels. Yes I have complained to no response. We have spend time and money improving drainage on our own property, for our benefit and that of others close by.

I do not agree that there is benefit to me by all the city drainage projects as I spend as little time as possible in Christchurch. I am pleased that the main SH75 has been improved in terms of flood mitigation, but this has been done now.

We are disgusted by the money spend on restoring Christchurch Cathedral, yet have to pay a small amount for this also.

It would be useful to know what the actual amount of the targeted rates would be to be able to provide true feedback.

1.4 Investing in upgrading and protecting our city's water networks

No idea.

1.5 Investing in our transport infrastructure

Need to improve rural roads. Repairs are shoddy, take ages and do not last.

I am astounded that you plan to put up parking charges again. I work part time in Christchurch and am happy to pay something for parking as I have no public transport options living rurally. However, not only is it expensive, unless I go early there are no parks in a sensible walking distance from Christchurch Hospital where I work as a health care professional. It is a terrible and stressful situation for patients and families and has gone on for so long.

#### 1.6 Rubbish, recycling and organics

Should definitely improve recycling. Once again we are disadvantaged rurally in Little River, We have access to the transfer station at Birdlings flat on a Saturday morning for 3 hours only! So this means a special trip in the car, so using petrol, emissions, traffic etc. We should have bins as in Barrys Bay and other parts on the Peninsula, to leave bags of rubbish at other times.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

Absolutely not! I have no interest in the art gallery. Put the money towards assistance for the homeless.

#### 1.11 Potential disposal of surplus Council-owned properties

If not in use sell them.

#### 1.12 Any other comments:

I have contacted the council about issues on many occasions, road repair; cutting trees unnecessarily and unsafely and leaving branches in drainage channels; reckless chemical spraying running into waterways; neighbours building without consent; commercial events on rural property without consent; noise control. The list could go on. I have never yet had a successful outcome from any contact with council. I have been ignored, lied to, attempts to placate me. There must be so much waste of funds due to poor systems, and we the rate payers are funding this waste.

I also believe that I am wasting my time writing this. I have made other submissions but never had my opinions acted on.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

In terms of the removal of rates Remission, we believe this is a significant change that will have a major impact on Incorporated Societies like us. Whilst it may appear that Inc Soc's with cash reserves can afford to pay full rates, often these funds are necessary to secure bank funding and mitigate the risk against poor trading years, something that has been a very real issue for most in the golfing sector.

We suggest a fairer approach might be to introduce the change over a 3 year period with a 33% increase year on year. This would allow Inc Soc's to better budget and forecast over a longer period and "soften the blow" somewhat.

Your consideration to some form of scaled increase would be appreciated.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

We are extremely disappointed to see the proposal to remove the rates remission from non-profits and charities where the closing balance of cash and investments is more than 50 times the total assessed rates. Any non-profit organisation must balance its assets and spending with an eye to the future to ensure its very survival. Our organisation in particular completes work for the council of which the only contribution, or even acknowledgement, is the rates remission. The rates remission is much cheaper for the council than having to employ multiple people and provide a facility for the stray and abandoned cats of Christchurch. Our reserves have stood us in good stead during the Covid-19 pandemic, which has seen a reduced income and increased expenditure, and the refusal of the Lotteries Commission to provide funding from the special fund provided by the Government, even though we were assured that we could receive something. It appears that neither the Government or the Council realise or appreciate the value of the services provided by our organisation. In fact, they don't even acknowledge the work that we undertake unlike your predecessors in the 1970's who actually tried to help. We would urge the council to reconsider taking away the limited funding provided by them for essential services for the community or provide funding to us in another way.

1.11 Potential disposal of surplus Council-owned properties

Wharenui Swimming Pool & Club is part of our culture and history. It taught me how to swim, it taught my friends how to swim. I have heard of your plans to close it down. After surviving 110 years - two World Wars, massive earthquakes, and COVID 19 it shouldn't fall to an ill conceived plan to close it down due to poor Council thinking. I wish to see Wharenui Swimming Pool & Club fully funded and supported.

1.12 Any other comments:

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.2 Rates

Increasing the rates would mean the landlord will increase the rent of the tenants. It will be a financial burden for tenants like myself.

#### 1.3 Proposed changes to existing rates, and new targeted rates

3% increase instead.

#### 1.4 Investing in upgrading and protecting our city's water networks

Removed chlorine from drinking water.

#### 1.5 Investing in our transport infrastructure

Take off bus routes that has less passengers

#### 1.6 Rubbish, recycling and organics

Let household have a bigger Yellow bin as the small Yellow bin is not enough to store the recycle stuffs

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

It is a good move

#### 1.12 Any other comments:

Please do not close off the two bus lounges at Riccarton Road. It makes it difficult for people who cant have access to the toilets, no indicator which bus is arriving, no place to seat and no longer wheel chair friendly for those physically challenged people and the elderly. The council can cut costs in other areas. Retain at least one of the bus lounge, the smaller lounge and have toilets in that smaller lounge.

76

8 April 2021

To whom it may concern,

I write in support of the inclusion in the CCC Long Term Plan 2021-31 of a special grant of \$5.5 million to the Christchurch Arts Centre Te Matatiki Toi Ora, to be funded via a special heritage rate which is included in the current proposed rates increase.

The Arts Centre site is a significant cultural and heritage asset, and one which we should cherish and preserve, particularly in light of the many heritage buildings and sites which were lost as a result of the Christchurch Earthquakes. The buildings on the Arts Centre site include a number of noteworthy architectural icons with national significance, which trace both the story NZ architecture and the development of many Christchurch educational institutions, including the University of Canterbury. The work of restoring and protecting the remaining buildings on this site must be completed, so that our community does not lose even more of its dwindling heritage assets.

More than just buildings, the Arts Centre is also nourishing and supporting the arts and heritage sector, extending its influence out beyond bricks and mortar. The University of Canterbury Teece Museum has been based in the historic Christchurch Arts Centre since 2017. Having relocated to the original site of Canterbury College, the Museum has had the opportunity to share another great heritage resource with the wider community, in the form of the James Logie Memorial Collection. This site, where Canterbury College began almost 150 years ago, connects us to generations of New Zealanders who studied here and have gone on to shape our nation. By having a safe and well-cared for home in the centre of Christchurch, UC has been able to offer a wider range of educational and outreach activities through the Museum to a wider variety of audiences including schools, community groups and tourists. In turn this allows us to create greater connections between UC students and their community, enabling them to see new ways to contribute as a citizens in Aotearoa. The Arts Centre site and team have been excellent supporters and collaborators, helping us to make the most of the opportunities presented by this excellent location. Maintaining a vibrant site is essential to our ongoing success.

The Arts Centre, alongside other heritage / arts institutions such as Canterbury Museum, Christchurch Art Gallery, the Physics Room and the Teece Museum, generate a community of support which raises the profile of the arts and heritage sectors in Christchurch, drawing in greater numbers of people to make use of each facility, and increasing participation in the arts in general. This enriches the life of our community and contributes to the well-being of its citizens. Greater foot traffic also creates opportunities to generate income from activities in and around the arts precinct, and provides a reason for making funding applications based on audience reach. Ultimately, this further supports arts and heritage by bringing in alternative funding sources.

Yours sincerely,

Terri Elder  
Curator, UC Teece Museum and Logie Collection

### Feedback

1.2 Rates

Not in favour of further rate increases.

1.3 Proposed changes to existing rates, and new targeted rates

Need to retain the Remote Rural discount for properties in the Rural 5 Urban Fringe zone that are involved in agricultural production.

How will the CCC define remote rural properties?

Regarding the Land Drainage targeted rate - Option.1 would seem a sound option to me.

### Feedback

1.1 Have we got the game plan right?

Generally right. Strongly feel that installing new cycleways on rough pavement is wrong. Resurface the entire road as part of the project. The LTP has \$47M for asphalt and \$136M for chipseal - would prefer spending more for asphalt as our chipseal programme is leaving a lot of streets in poor condition just 1 or 2 years after renewals. School zones should be 30 km/h not 40 km/h and we need to bring back the local area traffic management programme - so many nice neighbourhood streets were built or rebuilt in the 80's and 90's and it seems little has been done in this area since.

1.3 Proposed changes to existing rates, and new targeted rates

Support the Arts Centre targeted rate. It is about 11 cents a day for ratepayers and well worth it. Definitely need the water charging. Definitely support a targeted higher rate for vacant or temporary carparking sites. Please stop allowing landowners to put up a digital billboard and leave a gravel carpark where a beautiful building once stood.

1.5 Investing in our transport infrastructure

See response to first question.

Totally support cycleways but they need to be on smooth surfaces and please stop building transitions with vertical lips at the channels that are very difficult to traverse. My chain falls off several times a week trying to ride at a decent speed of 25 km/h over the bumps.

1.6 Rubbish, recycling and organics

Fully agree.

1.7 Our facilities

I do not support closing the Riccarton Road bus lounges unless patrons have an alternative.

1.8 Our heritage, foreshore and parks

Agree with heritage investment.

1.11 Potential disposal of surplus Council-owned properties

Regarding Disposal of 27 Hunters Road at Diamond Harbour, I strongly support the a proposal to protect the steeper parts of this land with a Conservation Covenant under section 77 of the Reserves Act 1977, in particular the scrubby areas of Morgan's Gully which are already reverting to native bush with a strong local community effort.

1.11 Potential disposal of surplus Council-owned properties

Regarding the property at 27 Hunters Road, Diamond Harbour, I fully support the proposal to protect the steeper parts of this land, including Morgan's Gully, Sam's Gully and the massive section below 45 Waipapa Avenue with a Conservation Covenant under section 77 of the Reserves Act 1977.

Already there are many native trees springing up on this section, which have been both sown and self seeded. It would be a great shame if this fledging forest was destroyed. Not only would it be detrimental to the plant life but also to the many native birds which are present in this area.

### Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

### Feedback

#### 1.7 Our facilities

I am very concerned about the proposal to discontinue the Mobile Library Service.

This service is an excellent one, particularly for the elderly, those with disabilities, unable to drive, etc.

It really represents something of a lifeline to many who would otherwise be denied access to a library. The proposal to end the mobile service is short-sighted, in my opinion, and I strongly urge that it be reconsidered.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Arts Centre is an important part of our city's heritage, of which very little remains. It is vital that it has on-going support from the City Council.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

The Robert McDougall Art Gallery has been neglected for far too long. I consider the Council has an immediate obligation to carry out the work needed to enable the Gallery to open for its intended purpose as an Art Gallery (I suggest for the city's permanent collection, which remains largely unseen).

May I also mention that I have attended wonderful Chamber Music concerts at the McDougall, the acoustic being quite special.

The Council must honour the wishes of Robert McDougall in restoring this building for the citizens of Christchurch.

### Feedback

#### 1.7 Our facilities

The proposed termination of the Mobile Library service in July, 2022 will have a very detrimental effect on both existing and future customers of the service. This service is provided to those in our community who are unable to access regular library services, very often do not have internet access and are often living a life that is challenging in many ways. I am personally aware of customers who are unable to drive, restricted to their local community, do not use or access the internet in any way and who will be severely affected by the termination of the service. The Mobile Library is their weekly source of reading and community connection.

These customers are also rate payers and have been for many many years and it is a tragedy that in the later years of their life this small pleasure is taken away from them. I recently resigned from the position of Mobile Librarian and the customers who I farewelled were very upset about the impending doom of the Mobile. One customer shrugged his shoulders and said "Oh well that is the end of reading for me then. Can you imagine that life? This particular customer has visited the Mobile library every week for the past 4.5 years. This person is in his mid 90's and is not going to ever use the internet, no longer drives a car and relies heavily on his family to support his life however he does visit the Mobile independently and is able to select his own books. He does not need nor want to become an Assisted Support customer and is in fact fulfilling the Government's policy of "Aging in Place". This policy by its very nature requires services to be available to people in order for them to retain their independence.

As well as stopping in community areas where a library is not close by such as Northwood, Spencerville, Mt Pleasant the Mobile also visits Retirement Villages (not Resthomes). It is my experience that there are definitely residents who are quite capable of driving to their nearest library however due to the location of these Villages once a resident is no longer able to drive this becomes very difficult. In most circumstances they are required to walk some distance to catch a bus which is often prohibitive in and of itself. They are then unable to carry more than one or two books due to their weight and find the entire experience very very taxing. This all contributes to the resident becoming reliant on the services such as the Mobile library.

Social housing makes up the balance of the customers who visit the Mobile Library. Once again these customers are often facing extreme challenges in their lives and the Mobile is their sole source of reading material.

Rather than terminating this service there is the potential to grow the Mobile Library by partnering with agencies such as Aged Concern, Ōtautahi Community Housing Trust and local Community Boards. There is a space to support customers to build their confidence with online platforms and promote the Christchurch Community Libraries services.

### Feedback

1.1 Have we got the game plan right?

Yeah - shutting some facilities and centralising things will encourage more energy to grow in the fairly desolate CBD. Ie, shutting wharehau pool for the metro sports facility makes a lot of sense, similar to how Turanga drove people into the city.

1.2 Rates

Fair enough - rates is a proportion of house value and right now valuations are quite low so higher rates won't have the same impact as elsewhere.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I dont think it is a question of balance. All council functions are important; some services or lack thereof, are more urgent for certain groups or residents of different areas.

My submissions are based on the Banks Peninsula area and Akaroa in particular as my place of residence.

1.4 Investing in upgrading and protecting our city's water networks

Under 3. 'Adapting to climate change', is a statement 'Akaroa's potable water - - - - will become a more serious issue'. And later, 'CCC are part way through a climate change risk screening - - - -'.

'Water supply and wastewater on Banks Peninsula' We need to take into account - - - -environmental constraints.'

***Water on Banks Peninsula is a limited resource. Residents outside the Akaroa township area and a few smaller bays, mainly source their water from streams and springs. Dry summers are causing major issues for all residents whether it be the result of climate change or not, the facts are clear; water access and supplies are dwindling. Banks Peninsula population is growing as retirees move here for lifestyle. More and more holiday homes are now becoming permanent homes for new residents. The number of new buildings is on the increase; some with swimming pools, adding to the water shortages.***

***Akaroa's water supply is sourced from two streams and two bores. All are currently under severe stress resuling in near collapse this Easter long weekend. Such a scenario will happen again as new builds and adverse climate events put pressure on water flows. CCC's Helen Beaumont was quoted recently as saying, "If the streams continue to decline, we will have to tanker water from Christchurch or other locations."***

***Council must address this problem with the utmost urgency. Are new buildings required to install rainwater tanks? If so, why not?***

***The new Water Services Bill has resulted in Government funding being paid to CCC as an SI grant of \$20.26M and a further \$20M will be paid as required work progresses.***

*Mandatory rainwater tanks of, say, 30,000 litres, should be part of new building consents with or without access to the local HP system. Existing homeowners could be incetivised with a grant to install rainwater tanks. Government Water Services funding could, perhaps, be used for this purpose.*

1.8 Our heritage, foreshore and parks

**Cemeteries in Akaroa:**

*Akaroa has three cemeteries. Two are located off Onuku Road (Catholic & Dissenters), and the Anglican cemetery off Hempleman Drive. There is limited space left for future burials in any of the three.*

*A group of volunteers, in recent years have cleared land adjoining the Catholic cemetery that was previousl owned by the Catholic church. This land has been gifted to CCC as ‘cemetery land’. Currently CCC seem reluctant to use this free land, proposing instead, to pay for additional land as stated in the LTP under ‘Parks, Table 1, Appendices, Apendix1’ Quote, “To provide additional capacity for cemeteries to meet future needs, we need to acquire further land (Banks Peninsula) and develop what we have already (Templeton).*

*The cleared land adjoining the Catholic cemetery in Onuku Road is large, adequate in respect to access, slope etc. And it is free! Why should Council spend scarce funds on additional land? There is sufficient space there for many generations. The church is also happy for the space to be used for interdenominational burials.*

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

## Feedback

1.1 Have we got the game plan right?

Thank you. You are doing a good job.

1.2 Rates

Fortunately I am in a situation to be able to afford the proposed increases. I recognize that some people will find the increases a hardship and it is my opinion that situation is a national rather than local government problem.

1.3 Proposed changes to existing rates, and new targeted rates

I have addressed specifics in targeted subsections below.

1.4 Investing in upgrading and protecting our city's water networks

I support a shift to per volume per person usage fees for water and sewage usage.

1.5 Investing in our transport infrastructure

I advocate for sustainable transportation and encouragement away from single occupancy car use. I support the great cycling infrastructure. I often cycle to the central city. Unfortunately, the design of the existing cycleways has often not taken into account the comfort of cyclists (e.g., rough surfaces/markings and sharp corners).

1.6 Rubbish, recycling and organics

I support upgrades that help with waste reduction.

1.8 Our heritage, foreshore and parks

I am generally in favour of supporting all heritage, parks and foreshore.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

### Feedback

1.1 Have we got the game plan right?

the Central City needs to be given stronger prioritisation. Regenerating the central city at pace benefits the whole city and region. Increased investment is needed in street cleaning and maintenance and street amenity (including tree planting and quality paving etc). Already the Avon River Promenade is showing signs of inadequate maintenance of planting, raingardens and paving, particularly around the Terrace.

I suggest that funding for this could be achieved not just from Christchurch rates and development contributions, but a targeted rate on Greater Christchurch residents. Owners of hospitality businesses along Oxford Terrace should take some responsibility for maintaining cleanliness of the streets outside their premises (eg removal of chewing gum and cigarette butts littering the pavers). I support the proposed targeted rate on vacant central city land and full investigation of a change to our rating system over the next 10 years to a land value ratings system (central government encourages local government to consider this to alleviate landbanking).

Adequate budget needs to be allocated for the ongoing management and cleaning of the promenade due to Canada Geese.

I wholly support the decommissioning of Wharanui Pool. It is no longer fit for purpose and as a spectator is quite unpleasant. I strongly object to any further costs associated with maintaining this facility once Metro Sports opens. This significant new community infrastructure needs to be fully supported and there is no reason why Wharanui Swim Club can't operate from there.

I support completion of the major cycleways routes and further investment in PT (with ECan) and active travel. But I think the council could do more in the communications/education space to help residents understand why this investment is so important and doesn't mean everyone needs to ride a bike! There are some great examples from other councils like Tauranga.

I support the proposed additional rate for the Arts Centre given its historic significance, considerable work undertaken to date, its benefit to central city regeneration etc (but feel that it should be funded through a sub-regional rate).

1.2 Rates

I'm happy with the higher rate, in fact would prefer it to be higher if projects could be undertaken more quickly. Where is the cost -

benefit analysis underpinning decisions to defer projects vs opportunity costs? I am not a fan of kicking the can down the road. Clearly we have some catching up to do on infrastructure investment and that should be prioritised over shiny projects such as pools, more community centres and libraries. I would also be happy to pay more for much improved street cleaning and amenity.

1.3 Proposed changes to existing rates, and new targeted rates

i support these targeted rates.

water: Households need to be accountable for their resource use and not see it as a ‘free commodity’ to be wasted. This may affect us as keen gardeners but we will adapt our watering behaviour and /or potentially look at rainwater storage. Large families may be affected also, but i feel its time that people take full responsibility for their own actions and resource use. Others shouldn't have to subsidise people that overconsume.

1.4 Investing in upgrading and protecting our city's water networks

i think everyone agrees that this is (currentky) council core business and needs as much prioritisation as possible. If more money is needed, so be it, provided that it is funded equitably in resoect of current and future residents.

1.5 Investing in our transport infrastructure

see above comments about the need to continue to invest heavily in PT and active transport to support the required mode shift over time, as well as investment in quality residential and business environments so that people want to stay in the City to live and work. More \$\$ needed on education and information sharing in this space and more engagement with youth.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments  
see above reasons for support. Believe that this should be funded by a sub-regional tax in the same way that the museum is.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes  
Comments  
the current Museum is outdated and sunstandard and quite embarrassing really. Just look at what Dunedin has done with its Early Settlers and Otago Museums to out things in perspective. Lets get on with these redevelopments. Funded by a targeted subregional rate.

1.11 Potential disposal of surplus Council-owned properties

support provided these properties have been fully considered for other council needs first.

#### 1.4 Investing in upgrading and protecting our city's water networks

As a frequent user of the bus services, and regular advocate for them, I write to register my serious concerns about the proposal to remove bus lounges in Riccarton Road. The recent bizarre decision to abandon distinctive colour coding on various lines, emanating from a Council whose avowed aim is to encourage more people to use buses, served only to make such use harder for many, including my wife, who is partially sighted, and myself, as even with good sight the bus numbers are barely legible.

The bus lounges were an excellent move to promote more patronage. They provide a cosy and safe environment, especially on a street where there would otherwise be crowding, jostling, and during rush hours, chaos. The shelters provide information, even though one of them has for a long period had technical problems with its display. I frequently see visitors consulting the maps or taking relevant timetables from the display. The shelters are well managed, clean, and as I have frequently seen, provide further service in the form of the staff who can help the frail or otherwise disadvantaged. If the Council is serious in its plan to provide effective alternatives to private cars, I wonder at the logic of this cost-cutting exercise.

As with many other Council initiatives, I would welcome some insight into the post factum evaluation of them. Has the proliferation of cycle tracks been audited to demonstrate the promised reduction in car traffic, as some compensation for the dangerous narrowing of major arteries? Has the removal of bus colour-coding helped the bus patrons in any way, or has it helped only the finances of operators? (I have spoken to many bus drivers who felt the move was ridiculous). Will the removal of bus lounges encourage more people to use buses? I await the results with interest.

### Feedback

#### 1.1 Have we got the game plan right?

It would be a tragedy to decommission Wharenuui pool, after 110 years. It is such a central part of the Riccarton (and surrounding suburbs) and has provided such a valuable contribution for teaching local residents how to swim. Christchurch does not have enough pools, especially ones with a real community focus. The new Metro sports complex is not conveniently located and will not be sufficient. The growing population of the city will demand more and more pools, Riccarton is being in-filled with more and more housing, demanding more facilities, and if this pool is removed it would cause great harm to the community.

#### 1.5 Investing in our transport infrastructure

The new bus routes were poorly thought out and resulted in a big decrease in bus usage (myself included). For example, look at the bus that used to go down Creyke Rd and into the city. It was replaced with route 130, which stops at Deans Ave and then turns around and goes back down Riccarton Rd - useless!

The bus interchange building is freezing in winter as it has no heating, and because the doors that open are oriented to the south, southerly winds race into the building.

The removal of car parks from Riccarton Rd, and all over the central city has devastated shops. People are no longer able to quickly 'stop and shop' - they have to commit to drive into a car park building, which involves a completely different commitment, which ends up turning a lot of people away, and they simply go to malls instead. The removal of carparks doesn't make the city looks better - it just looks more desolate, with more grey tiles and more windswept empty space. It also doesn't make cycling any safer - now cyclists have to contend with motorists and pedestrians who get confused about cycle lanes being in very strange places. And it certainly doesn't make driving a car any safer - the lanes are now so narrow that you cannot fit 2 buses down the street at the same time (e.g. on St Asaph St). There was an immense amount of money wasted in converting Tuam St to be one-way, and removing the one-way system off Oxford Terrace. There was nothing gained from this. In fact, the drive through the city is now less scenic as most people never even see the Avon anymore.

#### 1.7 Our facilities

It would be a tragedy to decommission Wharenuui pool, after 110 years. It is such a central part of the Riccarton (and surrounding suburbs) and has provided such a valuable contribution for teaching local residents how to swim. Christchurch does not have enough pools, especially ones with a real community focus. The new Metro sports complex is not conveniently located and will not be sufficient. The growing population of the city will demand more and more pools, Riccarton is being in-filled with more and more housing, demanding more facilities, and if this pool is removed it would cause great harm to the community.

1.8 Our heritage, foreshore and parks

The pathway connecting Sunningvale Lane and Cobham Intermediate is vital to keep open. If it closes (as planned) then the entire community, spanning hundreds of households, will be blocked off from access to a safer route for walking and biking, and will be forced to use the very busy Memorial Ave. The decision to remove this pathway makes no sense. At the very least, the community needs to be approached for an opportunity to donate money to save this pathway, as it surely wouldn't cost much money per household to save it. The very worst possible decision would be to simply remove it without even trying to find the money to save it.

Some playgrounds could do with an upgrade of equipment, such as the playground at Ray Blank Park. Look at good examples from Selwyn District, such as the playground at Foster Park, which uses a spongy surface to avoid having to use bark (which simply deteriorates).

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes  
Comments  
Yes, this is a vitally important building to the city. It is a real shame that it hasn't been able to be used for the last few years.

1.11 Potential disposal of surplus Council-owned properties

It would be a tragedy to decommission Wharenuui pool, after 110 years. It is such a central part of the Riccarton (and surrounding suburbs) and has provided such a valuable contribution for teaching local residents how to swim. 1.1 Have we got the game plan right?

I wold please ask that the future of Wharanui swim club is reconsidered . It is wonderful comunity pool that buzzes with life and love . Over the last two years in particular the new management have reinvigortated the enterprise . Schools, children , and adults alike spent quality time in the friendly clan environment . i do not believe a complex pool compares and can provide what this pool does for the community

Please reconsider

### Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

they flood when it rains

they are slippery with ice on frosty mornings

when most teams train in the evenings they are slippery and damp from night-time dew

part of one court is permanently wet and covered in a slick film because it never dries out

they have extensive cracking filled with vegetation

they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

### Feedback

1.1 Have we got the game plan right?

I would prefer to see a greater focus on delivery of core services to ratepayers and residents generally leaving the provision of "nice to have but not core" services and their costs to central government with it's much wider revenue base and social responsibilities.

1.2 Rates

As a ratepayer it's very hard to understand why local government consistently requires an increase in revenue from rates over and above the rate of inflation. Most businesses are very fortunate if they can increase their prices at the rate of inflation each year and yet they still manage to fund continuing replacement of capital items and development.

For those of us on a fixed income - and that is a sizeable proportion of your residents - increases in costs over and above the rate of inflation effectively reduce our standard of living. That is an unfair burden to impose upon the fixed income residents.

1.3 Proposed changes to existing rates, and new targeted rates

I understand the logic behind the move to charge all property owners the Land Drainage Targeted Rate.

At first blush it appears fair and logical. But in reality the hypothesis that all properties pay the full rate (even though deferred until 2023) doesn't stand up to scrutiny.

It is true that we all benefit to some extent from the provision of drainage services in the urban areas - but we do not so do equally.

So why therefore should we contribute equally?

I live at the end of a short paper road - there is no access other than down the lane (Millhouse Road) which the CCC does not in any respect maintain. All grading for camber, shingling, spraying of weeds and other maintenance is at my cost. I have never seen a Council contribution to that either in cost or services.

My household storm water/roof runoff is to soak pits and WC etc to a septic tank - all on my property and

maintained at my cost.

If however, I lived in urban Akaroa or Christchurch City there would be 24 hour a day benefit from CCC drainage.

However, at best I would go into Chch city once a week and Akaroa perhaps 3x a week - in each case only for a few hours or less.

That is certainly not the same as living permanently in such a place with permanent land drainage works benefits.

Perhaps for properties such as mine a contribution for the overall benefit of drainage works when I do travel to and shop, etc in urban or city areas is fair and reasonable but certainly no more than perhaps 20% of what someone residing and working in those areas pays.

To do otherwise would be to unreasonably penalise those residing in rural areas who receive much less than full benefit of the land drainage services.

Potable water is a sensitive issue just now here in Akaroa - there is considerable criticism and even resentment of the way in which the local long standing reservoir system was let fail.

However, I acknowledge that even with the very best of intentions there are still system and human errors.

Many of the older residents here in Akaroa and indeed those I know in Chch City rely heavily upon their vegetable garden to keep living costs down and derive significant mental health benefits from both flower and vegetable gardening.

In fact this is all part of the Christchurch reputation as the garden city of NZ and it's inherent beauty.

During the Winter 700 litres a day is certainly reasonable but it would not be sufficient to allow for a vegetable garden and flower beds/shrubs during the October - April period. For that mid-Spring to mid-Autumn period 1000 litres per day would be more reasonable. It would also enable the Chch Garden City reputation to be maintained and help with the well being of residents who enjoy and benefit both physically and mentally from their gardening activities.

#### 1.4 Investing in upgrading and protecting our city's water networks

An effective and sufficient supply of potable water along with collection, treatment and disposal of waste and storm water is an essential service provision in any society. Appropriate investment in this and it's future proofing are essential.

#### 1.5 Investing in our transport infrastructure

Maintaining an effective transport infrastructure is of course essential - but not to advantage or disadvantage any particular group.

At my age cycle or scooter transport for any distance is not possible and nor is that practical for rural residents going into the town/city or service businesses/tradesmen and so on. A well maintained free flowing roading system for car and truck usage is critical.

While public transport for schoolchildren and some commuters is a wonderful service, we are simply not a sufficiently compact or populated city for that to be the predominant means of conveyance.

Better a move to hybrid and electric vehicles.

## 1.7 Our facilities

Council service desks are the only face of the CCC that most of us see - particularly if resident outside Chch City. To close those where there is no other Council office or presence is to effectively abandon an area.

In that case the message sent to ratepayers and residents is that the Council simply doesn't care about you.

Having a service desk at an existing Council facility - such as Library or Information Office - makes good sense and it may be sufficient for that to be manned only upon a part time basis - perhaps 3x days a week.

Incidentally, in the case of Akaroa, the start of the trans-Tasman travel bubble is likely to result in quite a resurgence of visitor numbers.

## 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

### Comments

The Art Centre is a lovely building and facility but it should be self funding from exhibitions, receptions and public attendance.

## 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

### Comments

Again this facility - while excellent - should be self funding

## 1.11 Potential disposal of surplus Council-owned properties

Surplus assets as in any business should be reassessed to determine whether there is any genuinely useful alternative use and if there is not, be valued and placed on the market.

Those who appreciate and value them will purchase them and find a suitable use.

### Feedback

1.1 Have we got the game plan right?

Primary focus needs to be on ensuring on the water supply is safe and sustainable, everything else is insignificant compared to this.

We do not need expensive community facilities to have equal priority, we cannot live without water!

Having worked in community development for years, it is a complete myth, there is no community, there are the occasional committed individuals.

To put large amounts of money into enabling communities to 'own their own future' just means reducing services and expecting a small group of volunteers to fill the gaps. It is a waste of rate payers money.

The river corridor is an expensive extra, not a basic need, and should be shelved until important infrastructure is completed.

To reduce car pollution fast broadband should be available in all areas of Christchurch, there are still many areas where this is not available, thereby encouraging people to work from home. If it can be put in all the way up the West Coast, why not greater Christchurch?

1.2 Rates

In a word exorbitant! That is a huge increase over the next 10 years.

Ratepayers cannot afford this, we are not a never ending source of money to be wasted on fancy, nice to have projects.

We need less frills, stadiums, centres etc and more focus on essentials, water roading, waste water, recycling etc.

1.3 Proposed changes to existing rates, and new targeted rates

Unsure about the water rate.

Think is is a great idea to offer more specifity about how the rates money is spent, ie heritage projects.

#### 1.4 Investing in upgrading and protecting our city's water networks

This needs to be our no 1 priority, would be happy to see this as an even larger percentage, ie 50%.

There is nothing possible without water, we should not be spending money on anything which brings more people into Christchurch before we can provide safe water for the residents. ie no sporting/cultural/business events/buildings which put a strain on capcacity.

#### 1.5 Investing in our transport infrastructure

If covid has shown us anything it is people do not want to be stuck together on public transport.

One way which has not been suggested to reduce emissions is to ensure every house in greater Christchurch is connected to fibre broadband, resulting in far more people being able to work from home.

We know many people who were only able to work from home during covid, however, they struggled due to the poor quality internet. We/they would be keen to make this a semi-pemanent arrangement if the broadband were of better quality. A win win situation, less transport, less emissions, and increased productivity due to less hours commuting.

#### 1.6 Rubbish, recycling and organics

Need to continue encourage recycling and education about what can be recycled.

Dump fees also need to be kept low, as putting up the cost simply increases the amount of rubbish left on the side of the road. We are semi-rural and every time the fees increase the amount of dumped rubbish along the roadside increases.

#### 1.7 Our facilities

Happy for bus lounge to close, wasn't a demand for it in first place.

Money should be spent on existing facilities not building new ones, ie muti use arena.

We need to support the Art Gallery, libraries, and museum etc, we do not need an extravagant multi use arena. The past year should have shown that small, manageable facilites which can be well used by locals should be given priority.

#### 1.8 Our heritage, foreshore and parks

Very happy for money to be spent on heritage projects over new projects, there's precious little history left.

Do not support the river corridor at this time, heritage projects take precedence, and we already have many parks which should take precedence over creating new ones.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

1.11 Potential disposal of surplus Council-owned properties

Yes agree with disposal of Conronation Hall and 5 Worcester St.

1.12 Any other comments:

The council needs to focus on the basics, water, sewage, rubbish, roading, libraries.

Heritage buildings should take precedence over building new ones.

Maintenance of existing parks should take precedence over creating new ones.

We are, on a world scale, a small town, we need to cut our cloth accordingly, the council has too many nice to have things on the shopping list: expensive new buildings, expensive new cycle ways, which we just cannot afford as a small town coping with an international pandemic.

## Te Mahere Rautaki Kaurera - Our Draft Long Term Plan 2021-31

### Submitter Details

**Submission Date:** 10/04/2021

**First name:** Gina **Last name:** Coatsworth

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

.

1.2 Rates

I do not agree with the proposal to extend the land drainage targeted rate. Where I live in Birdlings Flat we have had to purchase and maintain our own septic tank. We also had to purchase one tank to hold a reservoir or drinking water and a second tank to capture stormwater from the roof of our house. These are all items that we have purchased in the last 10 years. Our house is only 100m<sup>2</sup> and our section is less than 1000m<sup>2</sup>. We do not benefit from any stormwater facilities in Birdlings Flat - there are no footpaths, curbs or drainage. The closest footpaths are 10km from our property.

I disagree with the Council's logic that everyone benefits from drainage in CBD and other urban locations. I live 50 km from the CBD and it is unusual for me to travel there - it is too difficult to access with a young family.

Applying this rate to us forces us to pay for services that we rarely access. In effect, we are being doubly penalised as we have already had to purchase stormwater solutions for our property (\$5,000+ spent on a tank to capture rainwater and irrigation pipes to spread the water over our section). If this charge is implemented, then the requirement for a rainwater tank on all new Birdlings Flat properties should be removed.

1.3 Proposed changes to existing rates, and new targeted rates

The Council should implement 'Alternative Option 1: Set the land drainage rate on properties receiving a land drainage service.'

1.5 Investing in our transport infrastructure

I would like to see a public bus service connecting Banks Peninsula with the city. Until this is available, it is unlikely that my family will see any benefit from the land drainage service in Christchurch urban areas.

1.6 Rubbish, recycling and organics

I would like to see a rubbish collection service in Birdlings Flat. The tip is only open on Saturday mornings, which is really difficult if you have work on Saturdays or if you have sport commitments. The contractor who looks after the tip lives on our street and drives past our property to the tip where we have to drive to deliver our rubbish and recycling. If the council is serious about reducing our environmental impact, his contract should be extended to do a collection of the residents in Birdlings Flat. It is ludicrous that all the

residents have to drive 3 km to and from the tip when the truck is parked up here in the settlement.

1.7 Our facilities

This investment seems to be focussed on Christchurch City. On the peninsula we are only seeing a reduction of services in Akaroa. I am not against spending money to improve services - I just haven't seen any plans to improve the infrastructure on Banks Peninsula.

1.8 Our heritage, foreshore and parks

Again, as per previous comments: This investment seems to be focussed on Christchurch City. On the peninsula we are only seeing a reduction of services in Akaroa. I am not against spending money to improve services - I just haven't seen any plans to improve the infrastructure on Banks Peninsula.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No  
Comments  
The Arts Centre is completely inaccessible to me and my family. It is a 100km return trip, then we would need to pay for parking. I have three children: one has a disability and one is under 2 years old. The Arts Centre is difficult to navigate with a pram and too far away from us.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes  
Comments  
Unlike the Arts Centre, the museum is attractive to visit. My children enjoy the displays and will happily spend two hours there, making the 100km return journey worthwhile.

1.12 Any other comments:

I am increasingly dissatisfied with the Council and the services provided to residents of Banks Peninsula. I feel that we are subsidising Christchurch City residents, as Christchurch City is where the majority of the infrastructure upgrades seem to be happening. I have had to contact City Care to chase up basic maintenance of the playground here in Birdlings Flat - I think the Council has completely lost sight of its Banks Peninsula residents and its obligations to these residents. The vast majority of these additional expenses will have zero impact on my life on the peninsula.

### Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

### Feedback

1.1 Have we got the game plan right?

1.7 Our facilities

I do not agree with the proposal to close the Wharenuui Pool.

With the growth in population in SW Christchurch we need more pools not less

Metro pool is to serve the whole city and is too far from the neighbourhood served by Wharenuui.

.Schools no longer have pools so we need lots of facilities for swimming lessons.

### Feedback

1.1 Have we got the game plan right?

Increase the funding for communication to community members who actually utilize the services proposed to be sold off.

1.2 Rates

Put them higher if you have to.

1.5 Investing in our transport infrastructure

Put less focus on cars and making sure people have parking spaces, and more on public transport options.

1.6 Rubbish, recycling and organics

Introduce tetrapak recycling, or a program that can send tetrapaks to auckland for processing cheaply. I would pay \$5-\$10 at a time to bring mine to the landfill, even.

1.7 Our facilities

The Otago Daily Times reported that you were planning to close the metro lounges at Riccarton.

(source: <https://www.odt.co.nz/star-news/star-christchurch/concerns-over-proposal-close-christchurch-bus-lounges>) I looked through the entire 258 page document and didn't see anything about that specifically. Nor did

anything relevant come up when I searched for "metro" or "riccarton." As someone who uses those lounges to wait for transfers multiple times a week, I had no idea - why weren't people told specifically in notices at the lounges, or via the metro facebook/twitter/etc? Closing them would be awful for me, especially in the cold and rain. The service on some routes has already tanked in short time since the council sold Red Bus (I run into 1-2 cancelled buses each week now), having to wait an extra 30 minutes in the rain or cold at riccarton would be horrible. If the long term goal is for people to use more public transport alternatives, closing the lounges will achieve the opposite effect. Closing them also won't reduce the amount of loitering (read: waiting for the bus), but push all the people onto the sidewalks, which were already crowded: That's exactly what happened when the lounges were closed during the construction on Riccarton.

Spend less money on sports and giant arenas. Don't treat art and culture as businesses that need to be financially "viable" to have worth.

### Feedback

1.1 Have we got the game plan right?

The main focus of my submission is around the facility opening hours (documented more fully below). I don't think that anything that reduces access to libraries is "getting the balance right"

1.2 Rates

It would be more palatable if large amounts of money weren't being thrown at loss-leaders like the stadium.

1.7 Our facilities

I am writing in opposition to the proposed cuts in facility opening hours. I think it is disingenuous to cut hours at facilities to leave them open only at the busiest times, as there are people who can't go at those times, and will no longer be able to use the facilities. Reducing access to libraries should be an absolute last resort and not something that we are doing at the same time as splashing out millions of dollars on new stadiums.

**How much do these cuts actually save?** There is no mention in the plan of how much the library and service centre cuts actually save, which makes it very difficult to justify or compare them against other options.

**Weekday opening hours for libraries:** From what I can tell, the proposal is to cut nearly all access to libraries in Christchurch outside of business hours (Tūranga closing an hour earlier, all other libraries currently open after 6pm to be closed at 6pm). When are people who work fulltime supposed to be able to go to the library? I'm also aware of groups that have early evening meetings at libraries, which would no longer be possible. How about, if the goal is "consistency of opening hours across the city", we increase opening hours on the libraries that are currently operating at a reduced level of service.

**Closing smaller libraries on Sundays:** As above, it is already nearly impossible for people who work fulltime to go the library during the week, and now the proposal is to cut more access to local libraries. Personally, I think that weekend access to smaller libraries should be increased. Our local library (Spreydon), is currently only open 10am-1pm on Saturday, which is a time mostly consumed by Saturday morning sports, and it is closed on Sunday. One of the best ways of reducing emissions is encouraging people to live/shop/work more locally, so we should be making local services more available, not reducing them.

**Library van:** Currently the main access to the library that our children have is through the library van coming to

their school. What is the justification for discontinuing this?

**Service desks:** While these two desks may be less used, they also seem to be the most geographically distant from other service centres, which should be a justification for keeping them.

- Akaroa service centre to nearest other centre (little river): 32m drive, 2h19m bike, 5h43m walk, public transport N/A
- Lyttleton - slightly more accessible by car or public transport, but still not realistic for cyclists or walkers (need to go over hill)

From:  
Sent: Saturday, 10 April 2021 4:58 pm  
To: CCC Plan  
Subject: FW: ccc. long term Plan changes

As a resident of Gebbies Valley

Residence at Gebbies Pass rd for 46 years am puzzled as to why we seem to asked to pad out the issues elsewhere in the city.

With the moves that we have had through 2 Councils into the City I have never seen and council worker involved in any drainage work in the area.

To suggest that the infra structure needs work or maintenance is a joke as all drains are on to the adjoining property, no water infrastructure exists and as for sewage ECAN already charge for consents for land disposal of septic waste.

We own 2 other blocks were the same rules apply at Gebbies Pass Rd and also at Akaroa Highway.

It may be of interest to you all that we pay ECAN more for water control than city rates on the flat land that we own

So my take on the proposed increases are that they are way out of step.

Two of the our properties back on to Selwyn and we would pay much less for some improved services from them in the way of rates.

Yours Respectively Daphne and Ralph Stark

### Feedback

1.1 Have we got the game plan right?

I feel strongly CCC's priority of building a stadium is NOT right. I am wondering if CCC ever has done research into what the % is of all population who would A) use the facility as active sports person, B) use the facility as passive spectator C) use the same facility for another purpose

Even the venture park should be a private businnes.. why should we pay for a minority of bikers?? WHY on earth after they are charged with neglectance when the fire hit OUR hills? NO to my rate money for them.

There is too much money allocated for Rugby.

1.2 Rates

guess this has to be done, quake and all considering. please don't raise more, it is hard enough to live with all the expenses we have to deal with.

1.3 Proposed changes to existing rates, and new targeted rates

happy with new drainage targeted rate suggestion, although on Banks Peninsula we have far less fixed stormwater problems in the next 40 years than anywhere else in whole district. so not sure if the rate is fair, or if we should pay less since nothing really happens out here. Nobody even seems to know where the stormwater pipes are!!!

1.5 Investing in our transport infrastructure

Tick . but really would like to see more money invested in public transport, park and ride, TRAINS!!! why always just fixing small issues, instead of looking at big picture? remind yourselves of looking at our peoples' ideas after quake, was it called start up too? we had an amazing green plan drafted, from all people's comments. PLEASE revisit those ideas and don't spend all our money on 'keep business' in place.

#### 1.6 Rubbish, recycling and organics

thumbs up to recycling stations and NEW infrastructure. we are around 30 years behind from Europe!! please catch up, it is embarrassing to watch this space. fast and well designed.

#### 1.7 Our facilities

seems ok the increase in fees.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

#### 1.11 Potential disposal of surplus Council-owned properties

"small number of properties"? DH Hunters land is by far the largest block of land, not comparable with ANY of other blocks!! . 36ha! this size of a parcel should NOT just be given away under the hand, we are not in Mexico!! 3.4 million rated, which potentially could make a developer 10 million? This is a large scale story which is not just a back section in town!!

We are asking for a proper consultation with our community. This 'disposal' to a developer has a huge effect on our living quality over here. First and foremost the only long gravel road used by dog walkers, joggers, horse riders etc, will be get hard surface and within one moment we will have car speeders on this road, as seen on the other half of Bay View road. it is UNSAFE for young girls riding their horses..we chose to live out here because we have this rural feel and won't become a Lincoln /Halswell rabbit /chicken coop subdivision!

Please we are asking for changes ONLY made after consultation. Our gully group, our local pest trapping groups, our many community groups deserving consultation, after putting years of dedication into our community and making it a good place to live. I don't say no to development, but not THIS way.

WALKING TRACKS MUST HAVE PRIORITIES, THIS IS A SAFE COMMUNITY, NOT A PLACE FOR BOY RACERS, AS SEEN CLOSE BY

DO NOT SELL THIS LAND BEFORE APPROACHING OUR VERY EDUCATED, INFORMED COMMUNITY!

#### 1.12 Any other comments:

Dear Sir/Madam

I have written a letter to CCC a few years ago, regarding hard surfacing Bay View Road. Claudia Reid at the time has answered me politely and promised to always keep me informed if and when CCC would hard surface parts of Bay view Road.

Unfortunately this is now obviously not the case anymore. A couple of years ago, CCC surfaced around 50m at 400 Bay View, without any notifications. Afterwards they put a counter onto the road, at last houses of the road,

to see the numbers of traffic. again this spot is not representing how many cars are using the gravel road. whenever the road workers working on the gravel road, once or twice a year, just afterwards we find ourselves , as dog walkers, to run for life, even in the dark at 6am, because some idiots are taking short cut over to Hunters road. Until the road gets worse again and they have to drive carefully and many give up to take this road, safe again for horse riders, joggers and nature lovers.

so please take this into account when making long term decisions out here. we are not Hagley park, not Redcliffs etc community. Thanks for carefully thinking this process through.

Franziska

ps I would appreciate if you find the letter sent to me, and reinstall the promise to inform me when you change surface of Bayview road.

### Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

1.7 Our facilities

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

### Feedback

#### 1.2 Rates

Any rate increase for residents when the Council is wasting money on funding of frivolous projects like the Adventure park for a tiny group of elitist bikers, or funding a rugby stadium which will never be used by more than a miniscule minority of Chch residents is completely unethical. These projects should be completely privately funded and user-paid.

#### 1.11 Potential disposal of surplus Council-owned properties

I wish to request that the land as described as 27 Hunters Rd, Vacant Land, Pt Lot 1 DP14050 + Lot 7 DP 140505 and 42 Whero Ave., Lots 1-5, 56-62 & 69 DP9607 be removed from the LTP and fast track disposal and that public community consultation should be undertaken.

Fast tracked disposal would bypass consideration for gully protection, boundaries, road access, school development, walking tracks, infrastructure and other local interests. This is unacceptable to the Harbour community.

#### 1.12 Any other comments:

### Feedback

#### 1.11 Potential disposal of surplus Council-owned properties

I reject the following properties for the fast track disposal and request these are removed from the LTP so that they can be given proper community consultation. This refers to 27 Hunters Road PT LOT 1 DP 14050++ and 42 Whero Avenue LOT 1 DP 9607++. The reasons for this request include:

- The importance of the land to the community
  - Parts of the land have been utilized for walking tracks providing great use to the local and tourist public.
  - Locals have invested a lot of time planting natives on these properties to grow the native bush.
  - The land is regularly used by horse riders in the area (it is really hard to find good horse riding in diamond harbour)
- The land is home to many native birds e.g. Kereru
- The infrastructure e.g. roading, is not adequate to support a big influx in residents from a further subdivision in the area. Diamond Harbour is already experiencing an influx in permanent residents as baches are being converted to permanent homes. Higher traffic volumes are not suitable for the current road conditions.

### Feedback

1.8 Our heritage, foreshore and parks

I am extremely disappointed to hear that there will be no fenced dog park funded in Halswell in the next ten years!. This area has many dog owners who would like to walk their dogs off lead in safety, apart from other road or park users, in a fenced dog park with other dog owners and their dogs. Many houses and sections are fairly small and we would like to run our dogs off lead. There are few places to do this in Halswell and none are fenced. Thank you for considering funding a fenced dog park in Halswell.

### Feedback

#### 1.11 Potential disposal of surplus Council-owned properties

Referring to the fast track disposal of council land in Banks Peninsula Diamond Harbour, I would like to reject this decision.

This refers to 27 Hunters Road PT LOT 1 DP 14050++ and 42 Whero Avenue LOT 1 DP 9607++.

The Diamond Harbour community is a very collaborative one and therefor must be given the opportunity to discuss and deliberate what is being done to the land in which they frequent.

The above property must be carefully considered and discussed with the local community as it is currently offering well used and locally maintained natural amenities such:

- nature walks, exercise paths
- community native tree planting and maintenance
- dog walks,
- horse riding which is difficult to find in this area
- natural Sanctuary for various bird and animal life such as the Kereru
- also a home for the NZ Falcon or Karearea which is a near threatened species

These paths also offer tourist attractions that are coupled with the ferry and bus routes to create a "day out" type activity that is welcomed by the local community.

Additionally due to Diamond Harbours relative remoteness, the infrastructure is not capable of taking an influx of residential housing as compared to Rolleston due to the difficulty and cost of upgrading infrastructure here over Dyers Pass or from Lyttleton.

There are no direct buses here as of yet which will only add to the road usage as many people will find the long drive constantly tiring. The only other option is the ferry which can get full quickly.

An increase in residential activity will mean running more ferry services or investing in a single larger ferry.

Additionally there are currently many old run down baches and properties that would be better to upgrade first before adding new property that would very likely have less sqm area per plot than what exists here currently leading to a city like way of life in a remote and spacious wider context ill suited for such cramped developments.

### Feedback

1.1 Have we got the game plan right?

Climate change and the biodiversity crisis aren't factored into your plans in anything other than a feel-good way.

Tourism and travel need to be seriously considered. Fossil fuel use on one hand and highly consumptive alternatives on the other may not be options in the future. Our council ought to be battenning down the hatches and looking at the possibility of a very narrow, localised future. Stadium, sports centre, lots of roads, all of these things may be big white elephants sooner than you think.

Chch residents shouldn't in any way be subsidising those from other districts for their travel to town or their sports and event pleasure. You are collaborating endlessly with the other territorial authorities, you should be demanding that they apply the same density requirements, cycleways and public transport/travel reduction as we expect in ChCh. You will see families who are being crowded by high density choose to move to Rolleston and Lincoln to avoid a two-storey, 6-dwelling property being built next door.

Air BnB crack down, we need to intensify our living environment to provide sensible housing and reduce travel, but at the same time good housing is able to be kept empty for personal gain. The cost of this lack of housing is greater than the meagre tourism returns.

What is your planting policy? It clearly isn't native/ecosourced and there is no oversight of the quality of soil being used which appears always to be overrun with twitch and other nasty species. 'Native' plantings around town are left in a dire state run over with weeds, and when eventually tidied there are bare soil patches which simply encourage more weed growth. If you desire a weed patch then for goodness sake just plant it to begin with. Just don't bother - you clearly don't have the staff, the knowledge or the money. Don't do any more. Don't get involved with native planting. Instead, put a fence around some existing natural areas (if you can find them) and protect them, pay someone knowledgeable to make sure it stays protected. The money you must spend on trying to replicate nature, just don't, you don't know what you're doing.

1.2 Rates

The money is manageable.

I want to pay for good infrastructure.

I don't want to pay for a stadium. I don't want to pay for roads for people who don't live here. You've ruined the St Albans community.

1.3 Proposed changes to existing rates, and new targeted rates  
Bring in planning rules requiring new builds to store water. Reward people who do this and yes I'm fine with a targeted rate for water. People should be able to channel water off their roof for the garden and to wash their car.

1.4 Investing in upgrading and protecting our city's water networks  
I'm sure it's not enough. I don't ever again want to hear a city councillor say "we didn't know about the problem". Ratepayers know that this stuff costs a lot, lead us and get it done properly, that's what you're there for.

1.5 Investing in our transport infrastructure  
  
It's not a top priority for me, and judging by what I've heard about the marathon debacle today, not for the council either.  
  
Cycleways and bus lanes I'm happy to support, but not as much as you have planned. Roads for people who don't live in ChCh, no.  
  
I'd rather see this spend reduced and the amount for water infrastructure increased, it is more urgent and the effects are more far-reaching.

1.6 Rubbish, recycling and organics  
I think that recycling programmes reinforce a wasteful, consumptive lifestyle. I would like to see leadership from the council in how to live without the items we're putting in the recycling bin. Champion ways for us to buy without plastic - you could encourage buyers to go to markets and advertise the merits.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Yes overall the balance is right.

More money is needed on biodiversity and tree planting/maintenance. I do not support the proposed 5% cut to community funding.

1.2 Rates

Rates increase is ok however the Council needs to continually assess whether its internal operations are as efficient as possible, including whether certain roles can be made redundant.

1.3 Proposed changes to existing rates, and new targeted rates

I definitely support the excess water targeted rate. I don't think water should be free as this does not encourage people to use water sensibly. There is a lot of water wastage going on.

With a changing climate, it is important for everyone to learn to conserve water.

1.4 Investing in upgrading and protecting our city's water networks

More focus should go into reducing the level of contamination of waste water - for example encourage use of more environmentally friendly cleaning products etc.

Consider introducing a programme to encourage home rain water collection which is plumbed into toilets. The use of clean drinking water for toilets is ludicrous.

1.5 Investing in our transport infrastructure

Cycling is really taking off in this city, thanks to the investment so far. It has really paid off! I support continued

investment into cycling and walking infrastructure.

Locals often say there is no traffic in Christchurch. That is completely not true. If we are not careful Christchurch will turn into Auckland in terms of congestion. We need to disincentive short car trips.

Bring in commuter rail from Christchurch city to North Canterbury and Rolleston.

1.6 Rubbish, recycling and organics

Yes, the focus on organics is great.

Will the upgrade to recycling infrastructure allow the plant to take container lids etc? Currently it is causing confusion that lids must go in the red bin.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

### Feedback

1.1 Have we got the game plan right?

To the Mayor, Councillors and Staff,

Christchurch City Council.

Kia ora

Christchurch City Council 2021 – 2031 Long Term Plan

We note in the Council's Long Term Plan and its associated documents, that the Wharenuī Swimming Pool **will** be closed when the metro sports facility opens (scheduled for late 2022).

We also note that the Wharenui Pool complex has recently been subject to a major post 2011 earthquake refurbishment/refit. The reported cost of 2.9 million dollars is serious money - certainly not just the expenditure of a few dollars here and there on a bit of replastering and a repaint! One could fairly assume that the completed work has extended the pool's life by decades, not just a year or two.

In other words, where-ever Council planners might wish to place the Wharenui Pool in its life cycle, it would seem the facility has been revitalised to a standard which will see many years of economical service, years far in advance of the arbitrary closure date of late 2022 - or thereabouts. The management team now operating the pool should also be congratulated for the business-like manner in which the facility is run, with significant cost-savings returning to the Christchurch City Council.

The critical question to be answered is: What important part can the Wharenui Pool play in contributing to the safety and well-being of Christchurch citizens? The safety and well-being of citizens is of course a critical role of all local bodies and acknowledged by the Christchurch City Council in general but also in particular in its Asset Management Plan; para. 1-1-1 at p. 10.

Building capacity within citizen groups and partner organisations surely has, as one of the Christchurch City Council's key values and indeed priorities, the safety of the community it serves – and we use the term 'serve' advisedly and consciously.

In closing a well run, heavily patronised swimming skills and water sports facility, has the Christchurch City Council 'got the balance right'?

A quick scan of the Water Safety NZ drowning reports shows that New Zealand suffers something approaching 100 drownings every year, with drowning related hospitalisation accounting for something in the order of twice that number annually.

And the most common cause of drowning? **Not knowing how to swim!**

Accessibility to swimming facilities is essential for all, and that includes the not-so-well-off and those without the resources to travel easily beyond their immediate community. Also, closing any community pool in favour of a centrally located facility flies in the face of the above by assuming the latter facility is accessible to all. Timings, transport costs, multiplicity of use and high demand on the new resource all come into play in denying and/or discouraging a significant number of our citizens the enjoyment of their community base.

In an environment of increasing concern for global warming, depletion of global resources and rising transport costs, it would seem the moment is upon us to work even harder and more sensibly towards retaining local community resources, not reducing them.

Wharenui Pool is a quintessential community resource, located right in the centre of an urban area, many of whose inhabitants are generally less well equipped to move with ease out of their locale.

Parks and playgrounds don't appear to be turned over to housing estates just because a new sports facility is growing in the confines of the central city – and, for reasons outlined above, neither should a valuable, well run community swimming facility be

subject to unwarranted closure.

We ask that the Christchurch City Council looks to its primary responsibilities to its community – safety and well-being – by retaining its valuable Wharenui Pool facility. By so doing, the Council will surely ‘get the balance right’.

Nga mihi nui

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

Pre-ambble:

The Draft Long Term Plan 2021 - 2031 is very 'city' centric. The term 'District' is used sparingly with practically all emphasis on Christchurch City. We understand the emphasis required by the urban boundaries and density of population, but as a rural resident under the purview of the Christchurch City Council, with no appreciable evidence of CCC attention or ongoing work, we are understandably 'miffed' by any suggestion of a rates increases without concomitant increases in effective drainage works for our community.

In ensuring we gain a better understanding of CCC work and its planning base, it is not helpful to be guided to what appears to be a useful document, only to be 'denied access' because we don't have the appropriate permission! We refer in particular to the 'Detailed Background Material' and 'page 187 of Vol 2 DLTP'.

That said - and with the lack of clarity available to us - we have our concerns regarding the Draft LTP as it may affect our rates exposure relating to our property at .

In the more than a decade my wife and I have been part owners of the property, we have been entirely responsible for constructing drainage ditches and swales to take storm water from our property to larger drains designed to take surface water to the Opara River across the Bay from us. Our drainage swales and bridging are

partly adjacent to and run alongside public thoroughfares as they direct storm water to the larger drainage system. We understand the maintenance of the latter have, in recent years, become the responsibility of the local land owners. We rarely see CCC involvement in this service.

Although the land on which our property is built tends to sit higher than many of the surrounding properties, there is still unacceptable flooding within and adjacent to the dozen or so domestic dwellings in our locale. We historically have not seen any attempt by CCC to ameliorate this problem.

It follows that, unless any upward adjustment in our rates comes with significant CCC attention to the drainage problems and solutions to our area, we are not inclined to support any increase in those rates.

### Feedback

1.1 Have we got the game plan right?

Our city needs to make sure that it prepares for and addresses climate change in suitable ways. This does mean infrastructure related to roads and waterways, but we need to make sure we do not take the problem lightly and do what is necessary to address it.

1.4 Investing in upgrading and protecting our city's water networks

I think that it is good that the city is investing in water networks and think it is important that there is successful water supply in hard to reach areas of the country, but we cannot forget that we also need to make sure we have clean and healthy rivers and streams, as this also has positive benefits.

1.5 Investing in our transport infrastructure

I think that it would be very good to see bigger investment into transport types other than personal cars, such as more cycle infrastructure and especially public transport investment.

1.6 Rubbish, recycling and organics

It is very good that the government is addressing this problem as it is key to reducing pollution. It is good that there are investments being made in processing and recycling infrastructure, but there also has to be a focus on changing the way we produce goods to reduce use of materials like plastic. There should be effort put in to encourage manufacturers and consumers to use other materials.

1.7 Our facilities

It is good that these facilities are being adapted and changed to suit their rate of use, and think that investment in community facilities is worth doing.

If bus lounges are being closed, there should be investment into other public transport factors, such as making public transport free for a wider group of people, and increased bus availability and frequency. We need to strongly push use of other less carbon-consuming methods instead of personal cars.

1.8 Our heritage, foreshore and parks

I think that we need to start planting more native trees in parks instead of foreign species to bring birdlife back into the city, and that there should be stronger dog control rules in many parks to prevent the killing of birds in these areas.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments

1.11 Potential disposal of surplus Council-owned properties  
I think that it would be good if possible to repurpose them in some way that has a positive effect on the local community.

1.7 Our facilities

i do not wish for the bus lounges to be closed, as they provide a safe, warm and dry shelter for some of our most vulnerable citizens while they wait for their bus. Young people, elderly and people with disabilities are some of the many that pay to use for your bus service, it would only seem reasonable to provide them a safe, warm and dry place to wait for their bus. We the tax payers only think it's fair to look after our most vulnerable; and that means keeping our bus shelters!

### Feedback

1.1 Have we got the game plan right?

I want the Cathedral rebuilt and arts centre completely refixed. These heritage buildings, along with the botantic gardens, are the heart of Christchurch. I don't know why buildings like the Peterborough Centre are still not fixed but then there is rubbish buildings across the road at I think 91 Victoria street that are being kept for some reason. Spend the money. The government should be paying for the Cathedral.

There is a lot of empty spaces in town. These should be built on or their rates should be hiked so the land owners sell them to someone who will build on them. Perhaps they could be residential townhouses given the price of properties at the moment I'm sure people would buy them.

### Feedback

1.1 Have we got the game plan right?

Suggest limiting spending on the "Red Zone" as basic infrastructural work needs doing as outlined elsewhere.

1.2 Rates

I can approve the higher-than-inflation rates increase if the money is being used to repair degraded infrastructures that should have been attended to in the past.

1.3 Proposed changes to existing rates, and new targeted rates

Approve of excess water rates for those using more than 700 litres a day.

1.4 Investing in upgrading and protecting our city's water networks

This should be given priority as it is too easy to allow underground works to decline as they are out of sight. I would urge a move to fluoridation of the drinking water supply as it would benefit the dental health of the community at large. Yes, people "can" purchase fluoride pills but some may not consider it essential or affordable and people do not always want to have to remember to take pills. The Mayor's resistance to this is curious and, sadly, somewhat retrograde. There seems to be no issue with chlorination of drinking water supplies!

Regarding wastewater - has any consideration been given to effects of sea level rise on the functioning of Bromley Sewage Treatment plant?

Wastewater in the Akaroa Harbour area is presenting a problem.. Recommend stopping any further subdivision of land for housing until a satisfactory solution is found. Many seem to be holiday homes only.

1.5 Investing in our transport infrastructure

**Cycleways** will only cater for a minority of commuters as the city's workforce is drawn from a wide area that precludes the practical use of cycles. Even then, their use will be weather-dependent. The arrangement of them in pre-existing streets often creates a shambles for parking and access to premises.

Motor vehicles will dominate transport for some time yet and it should be easier for them to move about and park rather than harder. I wonder if our planners are aware of the huge streams of traffic proceeding in and out of the city at the beginning and ends of the workdays. I doubt that buses or trains will make much difference there as the workers disperse to many different locations around the city and suburbs.

#### 1.6 Rubbish, recycling and organics

Like the current system. The drivers of the collection trucks have a difficult task and are to be commended.

Regarding the former Burwood Plantation Landfill! This is within 1 km of the coastline and only separated from it by sand. With sea levels predicted to rise, it won't be long before the sea cuts through that sand to the landfill. What then? Consideration should be given to locating other former dumps in hazard prone areas. I doubt that dumping large rocks about them will be effective. Sooner or later, the contents are going to have to be moved.

#### 1.7 Our facilities

Fantastic Public Library service - don't reduce it please! Service desks are also useful and should be kept up and not reduced. Not everyone can do things over the Internet.

Is it really necessary to close the Riccarton Road bus Lounges - they offer toilets - are these to be re-installed close by?

#### 1.8 Our heritage, foreshore and parks

Good parks and Reserves.

Regarding items near the foreshore - please consider sea level rise before spending large sums. Likewise, be careful issuing building permits in hazard prone areas.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

But no more!

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

Only because of it's architecture.

#### 1.11 Potential disposal of surplus Council-owned properties

Good idea. Don't keep anything that isn't of use. Perhaps the funds received could be used to construct more Social Housing.

## Feedback

### 1.1 Have we got the game plan right?

I applaud the local Fendalton-Waimairi-Harewood Community Board for including a plan to have permanent augmentation of water flow in the Ilam Stream their top priority. As the council is planning to spend 41% of the capital budget on water infrastructure, small projects such as this proposed by the Community Board can be overlooked and be swarmed the needs of big budget projects. An upstream project such as this augmentation of flow of water in the Ilam Stream also benefits the residents living in areas where the stream flow.

The Network of the Ilam Stream Society has long supported the importance of water flow in this stream. A flowing stream improves the Feng Shui of residential properties in the area. It brings "life" back to the stream such as bird life particularly the friendly fantails and incidences of mosquito swarming have decreased noticeably. On the whole a life stream with permanent water flow supports health benefits in a holistic way to residents living in the area. Activities such as walking pets along the stream bank with flowing water and children getting their feet wet are visibly enjoyed by residents in the area. With this improvement of amenity value tends to attract less rubbish being dumped into empty stream beds. People value a living flowing stream.

### 1.2 Rates

Rate increment is inevitable given that Christchurch has come out of a major earthquake 10 years ago. As long as spending is prudent and money is not wasted unwittingly, it is part of living in a big city.

### 1.3 Proposed changes to existing rates, and new targeted rates

Water metering and targeting excessively wasteful water usage is to be supported. However, having lived in Auckland for seven years, a separate water board tends to attract a new group of highly paid executives claiming justification to high remuneration since the water business is ran like a commercial entity. This could increase the cost of living in Christchurch as the water bill would be paid in a user paid basis independent of annual rate increases.

### 1.4 Investing in upgrading and protecting our city's water networks

Yes these are important responsibilities and looking after a water supply to a city is very important infrastructure.

### 1.5 Investing in our transport infrastructure

This concerns me quite a bit at present. The number of more than half empty buses running at increased frequencies does not look right to me. Christchurch is not as traffic congested as Auckland and I think no matter

how frequent busses are running, residents still prefer to drive their own car for convenience and also save time as riding on buses incur walking for distances if one lives away from bus routes.

As opposed to increasing parking charges in the city and frequencies of bus services, perhaps decreasing bus fares might be a better alternative.

### Feedback

#### 1.7 Our facilities

I am writing, as a member of the museum and gallery sector, to recommend against the reduction of service levels at the Christchurch Art Gallery Te Puna o Waiwhetu.

Councils all around the motu are under pressure to balance rising infrastructure costs, heritage preservation, meeting their Treaty obligations, and services to diverse communities. There is a tendency to look at cuts to community-focused programming and services (like libraries, galleries and events) as one of the first expendable items in a Council's budget; the resultant death by a thousand small cuts slowly reduces community facilities' appeal and usefulness to their communities, and the facilities themselves are stripped of the resource required to innovate and meet changing needs.

The proposed cuts to school and public programming at Christchurch Art Gallery are particularly invidious. This programming - in addition to adding richness and relevance to the collection and exhibition programme - has three specific outcomes that should be highly valued.

Firstly, public programmes attract out-of-town visitors, and give local residents reasons to visit the Gallery multiple times throughout the year (maximising the use they derive from the institution). They also enable the Gallery (which can only present a certain number of exhibitions per year) to offer programmes that will appeal to diverse and more niche communities - and give these communities voice within one of Christchurch's most significant civic sites.

Secondly, school programming enhances children and young people's education and cultural lives. It assists teachers (who receive only glancing amounts of training to support the arts curriculum) to engage students in different forms of learning and rich environments. And it gives children and young people whose families are not regular visitors to cultural institutions the opportunity to access facilities like galleries, and discover their own creativity.

Thirdly, school programming (and public programming aimed at whanau and young people) builds the audiences of the future. It creates generations of confident citizens of the city, giving them the sense that cultural institutions belong to them and can add to their lives. By cutting these programmes, the Council will hamper the Gallery's

own ability to attract and build future generations of visitors.

Cultural institutions all over Aotearoa are struggling with the impacts of reduced international visitation and the uncertainty created by changing alert levels. Institutions like the Christchurch Art Gallery are anchors in your community and your city, and will secure the rebuild of audiences in years to come. Cuts now will simply make that rebuild harder - whilst reducing relevance and access for current audiences. I urge you to reject this proposal.

## Feedback

1.1 Have we got the game plan right?

I don't think the balance is right. Many spending can wait and the maximum rates increase should be 3% because many people are financially worse off now due to Covid.

1.2 Rates

Rates increase should not exceed 3% per year to reduce financial burden of Christchurch residents. High rates increase causes increase in burden for homeowners and landlords will pass those increases to renters and cause rent increase.

1.3 Proposed changes to existing rates, and new targeted rates

i support excess water targeted rate for households that use more than 700 litres a day.

1.4 Investing in upgrading and protecting our city's water networks

clean water supply is essential, so i support spending whatever needed to achieve proper water works and clean no chlorine drinking water.

1.5 Investing in our transport infrastructure

spending on transport is good, but need to be managed properly with a clear goal. So if the goal is to promote the use of public transport, then better bus services should be in place and priorities public transport spending to other spending like changing road layout to benefit private cars.

1.6 Rubbish, recycling and organics

i support this. We should have the same high tech recycling plants as other countries. At the moment, things like milk cartons can't be recycled here but recyclable in Auckland and other countries. So lots of waste end up in red bins. Also, lots of places in city centre don't have their recycling bins picked up by council so everything ends up in the red bins. Very wasteful. Other places encourage recycling by giving a small amount of fees to people handing those items back to the shops, maybe we can try that as well.

1.7 Our facilities

Closing the Riccarton Road Bus Lounges is a bad idea showing the council values money over people. Those lounges provide services and shelter for so many people using buses. Plus if they are closed then that will sure also sends the signal that the council doesn't value public transport. And people may choose other forms of transport, especially at night, on rainy days or in winter.

1.8 Our heritage, foreshore and parks

i think these spending are not as important so these spending should be kept to minimum.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

1.1 Have we got the game plan right?

Hi,

I am responding to the plan to charge us through our rates for land drainage a service we do not receive.

It is a big stretch to hold us to account for potential drainage issues in the Central City, the people who own properties in that area and gain the benefits from Central City property values should be paying for that service.

When a rural property or lifestyle property is developed the owner of that property does not receive any subsidy or financial help from the Council. It's the opposite, we have to pay Council fees for resource consents etc. All drainage, sewerage, water supplies and service come directly from our pocket.

If you are going to start charging for those services you will need to start supplying them.

regards

Brent Davidson

### Feedback

1.1 Have we got the game plan right?

No. You are allowing more subdivisions to spread and put more stress on the existing infrastructure. This upgrade should be fully funded by those developers, not existing properties, that actually dont gain any benifit. We have our main residence in Grange St which the street is an absolute mess. The council was due to upgrade when the 2011 EQ hit. We were told it was cancelled as funds were needed elsewhere. This was understandable at the time. We still have had no improvement, now you want to increase our rates take again, even though you have already gained more due to land values improving. Then our place in Pigeon Bay has full rates, but you provide no rubbish collection, stormwater, water or sewer to our place. There is a gravel road to our place, which thankfully we have 4WD to access it.!

1.2 Rates

it seems unfair that we have to keep funding additional costs, where we get limited return on Banks Peninsula. Even most of the road we use to get to our place is state highway, so you dont have to cover that either!!

1.3 Proposed changes to existing rates, and new targeted rates

As above.

we note in a letter sent to us for our Pigeon Bay rural property, you now want to charge us drainage rates for absolutely no infrastructure to our place. Again, we fail to see how this is fair. All sewer & stormater is treated on site, which we had to pay to carry out as part of our building consent.

it seems unfair that we have to keep funding additional costs, where we get limited return on Banks Peninsula. Even most of the road we use to get to our place is state highway, so you dont have to cover that either!!

#### 1.4 Investing in upgrading and protecting our city's water networks

We finally sorted our EQ damaged house in 2019 after fighting EQC. During the 9 yrs we still paid full rates. Now we have a new house, GV went up so did your rates take. We had to show our house was going to be above the flood plain in 2100, which thankfully we are. What the council plans showed was the new marine parade will be Opawa road. At no time did the council explain during the consent how the sewer was going to work since east of Opawa Rd will be under water. We as property owners keep having these stupid rules put on us but the council seems to keep sailing past into the sunset and raise our rates take. Why dont you reduce the load on some of our infrastructure by making all properties install rainwater storage tanks for irrigation purposes ?This will reduce loads on pumping stations etc, instead of just making things bigger and taking more natural resources to waste. We have seen the impact of dairy farming on our waterways, so why doesnt the council stop wasting water by providing it to properties just to pour onto the ground or asphalt?

#### 1.5 Investing in our transport infrastructure

*You have missed the boat on this one. Before letting all the new subdivisions go ahead, the transport infrastructure should have been sorted first and funded by those developers. During the rebuild in town you had the opportunity to take land and widen roads so a good system could be implemented. Except you left roads the same width and are now trying to shoe horn compromised solutions into a constrained situation.*

#### 1.6 Rubbish, recycling and organics

yes this is important.

#### 1.7 Our facilities

i dont support your planned closing of council service offices in Lyttelton & Akaroa. The wmall communities need support especially for the aging population. We currently reside in Chch, but plan to retire in the next 5yrs to our lifestyle block in Pigeon Bay. We have no cell or internet access currently provide to the area, so will be looking at utilising the service centres as time goes on. Small communities need hubs for gathering & sharing info, especially in times of natural disaster. We may not all be able to get into Chch.

#### 1.8 Our heritage, foreshore and parks

Ok

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No  
Comments

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes  
Comments

#### 1.11 Potential disposal of surplus Council-owned properties

put them up for sale.

#### 1.12 Any other comments:

while we understand things keep growing, rates should be based on a age / percentage base. This way existing properties still fund for replacement, but newer developments pay a higher rate as they are adding more load. This will then reduce on a sliding scale at say 5yr blocks. This way its fairer for properties as they get older, enjoy the services they paid for but also fund ongoing maintenance.

### Feedback

1.1 Have we got the game plan right?

Electric cars cost almost four times as much as other cars. They are a status symbol only the richest in society can afford (or in the case of CCC electric vehicles, paid for by ratepayers). They don't run out of battery driving around town, and adding electric charging stations is only going to help the privileged few who can afford them, not the vast majority of middle-class and family residents who cannot afford them.

Climate change is important, but the conversation is dominated by a disproportionately loud (and aggressive, bullying) group of activists who are far more extreme than most of the rest of us. Many of us are afraid to speak up in public due to the vicious response from these activists. Yes climate change is an important issue, but don't let the most extreme factions bulldoze over everyone else.

Please ensure that all ethnic groups are represented proportionally, not putting one ethnicity or culture ahead of others.

1.2 Rates

Please keep rates as low as possible. It is a difficult time for most households.

1.3 Proposed changes to existing rates, and new targeted rates

A very low proportion of the population visit the Art Centre Te Matatiki Toi Ora. Is it fair to charge everyone for something only a few people benefit from?

1.5 Investing in our transport infrastructure

Electric cars cost almost four times as much as other cars. They are a status symbol only the richest in society can afford (or in the case of CCC electric vehicles, paid for by ratepayers). They don't run out of battery driving around town, and adding electric charging stations is only going to help the privileged few who can afford them, not the vast majority of middle-class and family residents who cannot afford them.

1.6 Rubbish, recycling and organics

Tragically, most recycling ends up costing more than manufacturing a new product. And recycled plastics can only be used for a

very limited number of purposes.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I am appalled and outraged by the proposal to increase rates to rural properties for land drainage. My property is zoned rural and would be affected by this proposal. I have a septic tank system which I maintain and my own spring which supplies my water and involves water pumps which are expensive to maintain. I do not have a kerb-side rubbish collection and I am on a hill. My property has good drainage.

I have received an excessive six page letter outlining your proposal to increase rates to rural properties for land drainage. It states that this would be fair?? If you want to be fair then bring a sewage system, water supply and rubbish collection to rural properties. This increased, targeted rates proposal is inherently unfair and I strongly oppose it.

I live alone, I am      years old and I manage my finances well; however, your proposal would severely affect my ability to continue to live here.

### Feedback

#### 1.1 Have we got the game plan right?

I disagree with the balance of the draft long-term plan in relation to Wharenui Pool. A priority should be to keep Wharenui Pool open, not to decommission it. The description of the pool as an “aquatic function” in the draft long-term plan totally misses the point. Wharenui Pool is not just a pool that can be replaced with a bigger “aquatic function” in the central city. It is a unique community resource that serves the diverse communities who live and work in the Riccarton area. It services the community in ways that the Metro facility cannot respond to. For example, Metro will not be accessible to the many people in the Riccarton community who have low incomes and lack of transport to travel to a pool further away. As a large facility, Metro will also be incapable of providing many of the advantages that Wharenui offers, in that Wharenui is able to close to the public for specific events such as school swimming lessons (making it much easier for teachers to keep students together and safe) and swimming sessions for Muslim mothers and children in a private environment.

#### 1.7 Our facilities

I disagree with the proposal to decommission Wharenui Pool. This change would significantly reduce the levels of service in the Riccarton community, which already has much less recreational space than other parts of the city. This short-sighted proposal overlooks the key point that Wharenui Pool is here for the community and is an essential part of the community of Riccarton. I would like to see Wharenui Pool stay open, whether it is run by the community or the council. It has a long history of serving the community and is widely used and valued as a community facility by the many people who live and work in the Riccarton area.

#### 1.12 Any other comments:

Please do not decommission Wharenui Pool. It is far from being just an “aquatic function” as the draft long-term plan calls it. It is a community resource; it is a community in itself. People make lifelong friendships there. Recently my mum, a regular swimmer at the pool since the early 1980s, has been diagnosed with cancer and the support that the Wharenui Pool community has offered to her, my dad and me has been phenomenal. Perhaps the council could look at investing in what the long-term plan describes as an “aged facility” rather than writing it off, or at the very least the council could pass the pool on to the community to run. The Metro “aquatic function” cannot replace the deep-rooted Wharenui community that would be torn apart if the pool was decommissioned.

## Feedback

1.1 Have we got the game plan right?

I would like to see lower Kelvin LED streetlights. The ones that are being installed are damaging to the circadian rhythm of birds etc, and there has been no public health campaign advising people to put up blackout curtains as the blue spectrum light from the LEDs coming into bedrooms can easily reduce the amount of deep sleep people get (which can affect metabolism and the immune system). <https://www.royalsociety.org.nz/assets/Uploads/Blue-light-Aotearoa-evidence-summary.pdf> Overseas some cities and towns are realising the negative impact and installing 2200K or 2700K LEDs.

1.2 Rates

I don't have a strong opinion on this.

1.3 Proposed changes to existing rates, and new targeted rates

This sounds sensible.

1.4 Investing in upgrading and protecting our city's water networks

I don't have an opinion on this. I am sad about fluoridation being likely (instead of tackling the issue via tackling poverty and increasing good nutrition - like the ChildSmile programme in Scotland), although I know it is not what this question is actually about.

1.5 Investing in our transport infrastructure

I don't have a strong opinion on this.

1.6 Rubbish, recycling and organics

Sounds good.

1.7 Our facilities

I don't think the library hours should be reduced since they are such a vital service to so many people. Regarding service desks I am concerned about those who don't have access to the internet or who are disabled and find it hard to travel further to other service desks.

1.8 Our heritage, foreshore and parks

It would be so good if the Red Zone area could be a dark sky reserve. There is so much growing light pollution affecting wildlife and also human health.

See <https://www.nationalgeographic.com/science/article/nights-are-getting-brighter-earth-paying-the-price-light-pollution-dark-skies>

I was so upset when the 4000K LED streetlights were installed. I can no longer walk the dog after dark (this is a real issue in winter!), due to getting migraines triggered by them. And the shadows are so much darker between the glaring lights than they used to be between the more diffuse soft orange glow of the old lights, that I also feel less safe.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments  
The arts are so vital for wellbeing.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No  
Comments  
The arts are essential but I would be more keen to see money go to more things like Otautahi Creative Spaces, which directly helps people with mental health issues access creativity. The art gallery is wonderful but it's more at the luxury end of things.

1.11 Potential disposal of surplus Council-owned properties

Sounds sensible.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

The imposition of a targeted land draining rate as proposed disadvantages those properties that are serviced by the council's activities and seems incongruous to the concept of fee for service - why would a ratepayer subsidise and activity that they do not have access too.

This is a lazy way for the council to recover funds and strongly oppose the suggest change. The Alternative Option 1 as set down in the March 30 Communication is the most sensible and logical approach. The reasoning that it would be complex to apply is staggering. The council has all the data it needs and the IT systems to generate appropriate billing. To suggest that this would lower the number of properties paying the rate and other wood pay more then that is the very essence of fee for service - again we do not even have access to the service. Why should / would we subsidize others for a service that has no plans of delivery to our property.

1.5 Investing in our transport infrastructure

By reducing ridiculous expenditure on an airport in the Central Otago region by a Christchurch City Holdings controlled entity is one way you can recover some money. Simply an absurd expenditure with this only becoming a future drain on dividends etc going forward.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

## Feedback

### 1.1 Have we got the game plan right?

I see that there is a big focus on the red zone regeneration (area without residents). I understand that there is a desire to transform the area, however I question the urgency and the timing of the funding. Is it possible to stretch it a longer period and use some of the savings to bring forward project that can benefit residents in populated areas of the city (eg Sydenham master plan, Ferry Road Master plan, Opawaho River cycleway, local cycle networks)? Many of the alternative projects would get used by many residents on a daily basis.

### 1.2 Rates

I understand that there is a back log of infrastructure work and last of the earthquake rebuild cost in this long term plan. However, I would expect the Council to work hard to identify efficiencies and saving opportunities to keep the rates increases to minimum (inflation only) in the next long term plan.

### 1.3 Proposed changes to existing rates, and new targeted rates

I oppose the new targeted rates for the Art Centre and other heritage projects. The burden shall not be carried by Christchurch residents only if rates payers funding is required. There is not enough information provided on how the expenditure of the funds will be managed and whether it will be transparent. There is a very small group of residents who may benefit from the funding. Many residents are already stretched by the increasing cost of living and the increase in rates to pay for the basic services. The additional targeted rates are trying to achieve aspirational goals but it should not be paid by people who live from paycheck to paycheck.

Regarding the excess water targeted rates, I am skeptical about the potential revenue as the cost of gathering the water usage data may be larger than the excess rates. Moreover, some larger households with more family members may be discriminated as they may need to pay excess rates even if their per capita usage is low.

### 1.4 Investing in upgrading and protecting our city's water networks

No objections.

### 1.5 Investing in our transport infrastructure

Is it possible to seek further funding from the government or neighbouring districts for road infrastructure in Christchurch to compensate for the commuters from other districts who use Christchurch roads and don't pay rates in the city. The commuters often use the city roads more than local residents who bike or travel short distances only.

## 1.6 Rubbish, recycling and organics

No objections.

## 1.8 Our heritage, foreshore and parks

## Comments

Is this space really crucial for the function of the museum? Can the proposed function of this space be met by the existing facilities (eg Townhall, Art Gallery, Arts Centre, Convention Centre)? What will be the utilisation rate of the facility? Noting the proposed reduction of services at the Art Gallery due to lack of demand, is there a need for an additional venue of the type?

Many residents are already stretched by the increasing cost of living and increase in rates to pay for the basic services. The additional targeted rates are trying to achieve aspirational goals but it should not be paid by people who live from paycheck to paycheck.

### Feedback

1.1 Have we got the game plan right?

I would like to see the beginning of plans to prepare to develop rail for our province that would later link with national rail services. The railway station for ChCh should be moved back to its old site in Moorhouse Ave to be close to the central city and to the new stadium. The linking up with fast growing areas like Rangiora and Rolleston to start with and then reaching out to other growing areas would help to ease the congestion on our roads which will never be kept up with by any new roading plans as the populations in the new 'settlements' increase. Buses use the roads so are no sensible substitute for rail. It will be very expensive and may take time for people to take to using, but the longer it is delayed the more expensive it will become. It will provide jobs in its development and later in its running.

1.2 Rates

This household could manage it. Many newer households may struggle. Councils struggle not to waste it. The more money councils have to work with, the less care they will take.

1.5 Investing in our transport infrastructure

Rail as mentioned above.

1.6 Rubbish, recycling and organics

Hard to comment not knowing much about it. The bin system at our end works well for us and I commend the collectors, truckdrivers. So long as function rather than appearances is foremost in the cost at the other end is the reason for the great cost.

1.7 Our facilities

Sounds more like 'appearances' than 'function' to me.

1.8 Our heritage, foreshore and parks

Great progress is being made. ChCh is looking good.

## Feedback

1.1 Have we got the game plan right?

No - because the east side is still munted - you still haven't fixed the water system and there are leaks everywhere. We have been experiencing disgusting odours and dust from the Living Earth Compost plant for years, and we are being fobbed off by everyone - no consideration is given to Bromley residents in the firing line of the plant. Our rates should have been reduced not increased! You've done nothing to stop the odours and dust at all.

1.2 Rates

We have been experiencing disgusting odours and dust from the Living Earth Compost plant for years, and we are being fobbed off by everyone - no consideration is given to Bromley residents in the firing line of the plant. Our rates should have been reduced not increased! You've done nothing to stop the odours and dust at all.

1.3 Proposed changes to existing rates, and new targeted rates

NO EXTRA CHARGE for water rates!!!!!! Do not separate them!!!

1.4 Investing in upgrading and protecting our city's water networks

Fix them! I am sick of the chlorine in our water system.

1.6 Rubbish, recycling and organics

How about changing the size of the green bin? Its pathetic and far too small. Needs to be the same size as the yellow bin. We have been experiencing disgusting odours and dust from the Living Earth Compost plant for years, and we are being fobbed off by everyone - no consideration is given to Bromley residents in the firing line of the plant. Our rates should have been reduced not increased! You've done nothing to stop the odours and dust at all.

1.7 Our facilities

None of them are accessible for Deaf people - no flashing light alert systems for alarms, no NZSL translations of video messages etc. You need to make these accessible for Deaf people in Canterbury.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

1.11 Potential disposal of surplus Council-owned properties

Make them available for community groups to use free of charge.

1.12 Any other comments:

This council is a sham. It is heavily spending on things that are not relevant - cut down on the high wages, spend them where people want them spent. And LISTEN to your residents! The Bromley odour and dust is appalling, it needs to be sorted and residents have had enough. I want a rates reduction from putting up with all the smell and dust for years.

### Feedback

#### 1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

#### 1.2 Rates

Fantastic idea that gives rates payers the ability to plan and budget knowing the rates increases coming in future.

#### 1.4 Investing in upgrading and protecting our city's water networks

Please do. I just moved from Wellington and we can all see how under-investment in water infrastructure there is going...

The Arts centre is the REAL centre of the city, a centre for the arts, food, a site of historical interest and the site of many taonga - rutherfords den, the teece etc - an absolute must to preserve not only for these reasons but as a centre for tourism as well.

An absolute no brainer to be funded to finish the restoration but ongoing funding also needs to be set up ensure its future in the event that there are further reductions in revenue beyond the control of the trustees.

1.1 Have we got the game plan right?

I would love to see the former PWC site in Armagh St be converted into a heritage breeding site for the rare black-billed Tapāpuka gull.

The site could be maintained with the ruins of the building in it as an earthquake memorial, beautified and made safe for the gulls to breed annually. The space around it could be kept as green space - so vital for healthy cities - and seating, stalls, cafes, possibly a skate park and run into the Margaret Mahy playground.

The new church can go anywhere, the gulls have chosen this as their god-given space!

Thank you.

1.2 Rates

As a ratepayer, rates increases always suck but they are a neccesary evil. I fully accept the need to increase rates, I would like to see it stay close to the annual cost increase.

1.3 Proposed changes to existing rates, and new targeted rates

n/a

1.4 Investing in upgrading and protecting our city's water networks

PLEASE get rid of the chlorine!!!

1.8 Our heritage, foreshore and parks

As above, I would love to see the former PWC site in Armagh St be converted into a heritage breeding site for the rare black-billed Tapāpuka gull.

The site could be maintained with the ruins of the building in it as an earthquake memorial, beautified and made safe for the gulls to breed annually. The space around it could be kept as green space - so vital for healthy cities - and seating, stalls, cafes, possibly a skate park and run into the Margaret Mahy playground.

Thank you.

#### 1.2 Rates

I would always like the increases to be lower, but feel there is much to be done and we have had an earthquake to get over.

How to stream line the consultation process without losing anyone's rights to present their views and have their views considered would be good, as it seems this is a expensive area to any project.

#### 1.4 Investing in upgrading and protecting our city's water networks

Water is one of our basic needs, Canterbury has/had some of the best drinking water in the world. I am keen to get our water infrastructure to a level where no chlorine is required to be added to the water. I miss our lovely clean water so much.

#### 1.5 Investing in our transport infrastructure

I really like the improvements so far on dedicated cycle ways, which then become safe for the whole family to use. I am keen for all work to be completed in this area so we have a citywide safe cycle way network.

#### 1.6 Rubbish, recycling and organics

I am keen for any improvements in this area,

#### 1.7 Our facilities

I am confused how the Riccarton Bus lounges have become redundant so soon after they were set up? Where is the issue, not properly considered before they were set up or a quick/ maybe short sighted decision to close them to cut costs? Somethings seems strange here.

#### 1.11 Potential disposal of surplus Council-owned properties

There are two properties 27 Hunters Road, & 42 Whero Avenue, Diamond Harbour I would like removed from the long term plan's list of properties to dispose of. I am not against a sale in principle but would like the sale to go through due consultation with the community and to ensure that the gullies that have had a lot of planting and weed clearing done, become conservation reserves and the school track is protected before the exact area to be sold is finalised. There may also be an interest from the Department of Education, to have some areas set aside for future school development & expansion. I believe that only by letting this disposal go to through the full consultation process, will all the communities needs or requirements be considered before a decision is made on what areas will be sold.

1.12 Any other comments:

I live in a neighbourhood of 36 households that were left out of the Government and Christchurch City Council funded roll out for fibre.

We are located at the top of Huntsbury Ave above Kenmure Drive and include properties on Huntsbury Ave, Westview Place and Tiroroa Lane. We are not a new development, with houses being built up here since the early 1990s, and we are within the Christchurch City Hills Living Zone.

At the time of the fibre roll out when it was being laid up Hunstbury various members of our neighbourhood approached the Christchurch City Council and Enable to find out why we were not being included. Nobody could provide an answer.

We collectively approached Enable in November 2019 to ask them to lay fibre in our neighbourhood. Enable developed a network plan (August 2020) that would lay fibre to most of our properties (but not all, excluding the top properties on Huntsbury Ave). Enable are prepared to fund most of this but require our neighbourhood to fund a shortfall of \$36,000+ GST.

Enable have stated we were excluded due to a 350m gap between the edge of their network and the first property on Westview Place. Over time, this gap in the properties will be developed, and since approaching Enable, 3 new houses have been developed. Our neighbourhood is zoned for residential activities, so it should be provided with the same level of service as other areas in the city zoned for residential. It is not our fault that the landholders in this gap have not yet completed development, and the status of this private landholding should not impact on the services that a ratepayer funded CCO is providing within a zone.

A key focus of Council strategy should be to provide an equitable level of service across the city. It is unfair that we are being required to pay for fibre to our streets while the rest of Christchurch had it provided for free, paid for by our rates and taxes – we are effectively being asked to pay twice.

Fibre is going to be provided to small, isolated country towns such as Lake Brunner and Haast, while we have not been given access to it within 7km of the CBD of the South Island's largest city. It is very discouraging to see extensive Enable advertising in the newspaper and on billboards for fibre take up, while there is apparently no funding to complete the rollout.

Please support us in finding the funding for this shortfall to get fibre laid to our streets OR by convincing Enable that they can cover the full cost of the fibre layout by using their discretionary spending.

### Feedback

#### 1.1 Have we got the game plan right?

I live in a neighbourhood of 36 households that were left out of the Government and Christchurch City Council funded roll out for fibre.

We are located at the top of Huntsbury Ave above Kenmure Drive and include properties on Huntsbury Ave, Westview Place and Tiroroa Lane. We are not a new development, with houses being built up here since the early 1990s, and we are within the Christchurch City Hills Living Zone.

At the time of the fibre roll out when it was being laid up Huntsbury various members of our neighbourhood approached the Christchurch City Council and Enable to find out why we were not being included. Nobody could provide an answer.

We collectively approached Enable in November 2019 to ask them to lay fibre in our neighbourhood. Enable developed a network plan (August 2020) that would lay fibre to most of our properties (but not all, excluding the top properties on Huntsbury Ave). Enable are prepared to fund most of this but require our neighbourhood to fund a shortfall of \$36,000+ GST.

Enable have stated we were excluded due to a 350m gap between the edge of their network and the first property on Westview Place. Over time, this gap in the properties will be developed, and since approaching Enable, 3 new houses have been developed. Our neighbourhood is zoned for residential activities, so it should be provided with the same level of service as other areas in the city zoned for residential. It is not our fault that the landholders in this gap have not yet completed development, and the status of this private landholding should not impact on the services that a ratepayer funded CCO is providing within a zone.

A key focus of Council strategy should be to provide an equitable level of service across the city. It is unfair that we are being required to pay for fibre to our streets while the rest of Christchurch had it provided for free, paid for by our rates and taxes – we are effectively being asked to pay twice.

Fibre is going to be provided to small, isolated country towns such as Lake Brunner and Haast, while we have not been given access to it within 7km of the CBD of the South Island's largest city. It is very discouraging to see extensive Enable advertising in the newspaper and on billboards for fibre take up, while there is apparently no funding to complete the rollout.

Please support us in finding the funding for this shortfall to get fibre laid to our streets OR by convincing Enable that they can cover the full cost of the fibre layout by using their discretionary spending.

#### 1.2 Rates

I understand that our rate are needed to pay for the things as a community we need to make our city more livable. I support the rates increases and if required would pay even more.

1.3 Proposed changes to existing rates, and new targeted rates

Yes I agree with making people pay for excess water use. I am sick of seeing people watering their gardens and the water running down the roads.

1.4 Investing in upgrading and protecting our city's water networks

In Huntsbury we still have chlorine in our water. When is this going to be removed so we can have the great tasting water we used to have?

1.5 Investing in our transport infrastructure

I really support all the bike lanes. It is an great investment in our future and makes a huge difference as a bike rider to feeling safe on our roads. It is positive for the climate and for the city to help make it more livable. More and better roads just encourages more cars. This is not forward thinking.

1.8 Our heritage, foreshore and parks

I would like to see support for the predator free 2050 project in and around our city, parks and foreshore and over the port hills. I suggest that a paid coordinator to promote pest trapping and support volunteers who are working towards this goal. Such as the predator free port hills initiative.

This is a submission in support of the proposal for government funding of the Arts Centre Te Matatiki Toi Ora.

Walk Christchurch is a guided walking service which has been operating for over forty years. We have shown thousands of tourists around our city. We are a volunteer organisation and donate a large proportion of our proceeds back to the city community. In 2019 Walk Christchurch donated \$10,000 to the Arts Centre Trust.

The Arts Centre is one of the highlights of the tour. Its significance to Christchurch in terms of heritage, science, education, architecture, the arts and entertainment cannot be overstated.

 Long Term Plan Submission  
 Christchurch City Council  
 PO Box 73016  
 Christchurch 8154

**Re: Closure of the Akaroa Service Desk as per the Draft Long-Term Plan 2021-31**

**Submitter:** Jan Whyte and Niall Holland

**Akaroa and the Bays is in a unique situation due to the access. Little River has a much easier access to the city, than does Akaroa and the Bays. It requires a service centre for the CCC to fulfil its obligations as stated in its policy.**

**We would therefore like to fully endorse the following information.**

**Introduction** - The Christchurch City Council policy statement about Banks Peninsula says:

**Our vision:** Banks Peninsula is home to many unique, thriving settlements as well as being a valued place for locals and visitors from the region, country and overseas to recreate, explore and unwind. Our focus is to enhance environmental, cultural, social and economic well-being so that the Peninsula is a vibrant and reviving place to live, work and visit.

Yet the 2021-2031 Draft Long-Term Plan page 58 indicates that the Akaroa Service Desk is to be closed. The reason given is due to minimal transactions.

Akaroa and the Bays collectively are a remote community, at least 75 km from the outskirts of Christchurch City and a 90-minute drive from the CBD. While the City offers a diverse range of activities and public services to the metropolitan residents, Akaroa and the Bays must be largely self-sufficient and self-reliant regarding employment, education, recreational activities, entertainment, shopping and health care.

The long-term sustainability, resilience and wellbeing of Akaroa's and the Bays communities, is important. If Akaroa and the Bays are to survive economically in coming years, then the local Council services must be maintained at an adequate level. In fact, this is a critical foundation stone for the resilience and wellbeing of the community, for both current and future generations.

The Council presence in Akaroa has been located in the Historic Post Office Building since 1915. In 2015 while the Old Post office was closed due to earthquake issues the CCC Service Centre occupied a PortaCom. Without community consultation CCC attempted to move the Service Centre to the Akaroa Museum. This contravened the District Plan for listed historic buildings. Subsequent community consultation found 93% of respondents wanted the Service Centre to remain in the Old Post Office. After CCC spent \$984,407 to repair the Post Office Building it once again became the permanent location of the Service Centre.

In January 2021 the Service Centre was relocated in the School/Community Library. Moving the Akaroa Service Centre in January 2021 was contrary to public consultation outcome in 2015. This move has been stated as a 6-month trial (Jan – June 2021) where upon the use will be analysed, which runs counter to the decision in the LTP to close the centre.

While the relocation of the Akaroa Service Centre and/or the removal of the Service Centre Desk located at the Akaroa School/Community Library is contrary to the Banks Peninsula Community Board Plan 2020-2021 and Council policies. The Banks Peninsula Community Board was not consulted, this decision was neither open, transparent, or democratically accountable (as per the CCC Principles stated in the 2020 Strategic Framework). Again, CCC staff have made decisions without public consultation, discussion, or providing evidence or alternatives, all of which are required by the Local Government Act.

The only remaining avenue for ratepayers to comment on the closure of the Service Centre is by writing a Long-Term Plan submission.

### **Decision sought.**

The ratepayers of Akaroa and the Bays ask Christchurch City Council to reinstate the Akaroa Service Centre in the historic Post Office Building with adequate staff, well trained and locally based, to ensure ratepayers in the Akaroa area and the Bays can continue to be well informed, active citizens fully engaged with and participating in community and civic activities within the wider Christchurch district. The Information Centre and Postal services should be relocated into the facility as it was prior to the earthquakes in 2010.

### **The Reasons are as Follows:**

The Akaroa Service Centre, located in the historic 1914-15 Post Office building, provided an active Citizens Hub in a Council building that was specifically refurbished (\$984K +) to meet the requirements of the community and the post-quake building code. This historic, listed building was an effective central location for our community, that met the community needs (including a virtual meeting room), instilled resilience, and it was a source of pride.

Direct engagement with locally based Council staff is critical for the wellbeing of the community many of whom are retired and/or elderly. A community where internet service can be poor if at all, and a number of ratepayers do not have computers. The Service Centre allowed ratepayers to engage directly over complex issues with Council staff who had an in-depth local knowledge.

The decision to transfer the Service Centre from this central location of a dedicated building to the Library in January 2021 did not follow a formal consultation process. The Council is in breach of its statutory duty to undertake appropriate engagement and consultation, in accordance with Council policies and the Local Government Act.

### **Issues with the Service Centre at the School/Community Library**

- The Akaroa School/Community Library, is a small structure of approximately 180 square meters, adding the Service Centre restricts the ability of the Library to provide the same level of service to students, ratepayers, visitors and Library staff, due to the lack of available space. There is no room for the Council information to be displayed or stored eg District Plan, Have your Say fliers
- There is no private area in the Library where ratepayers can discuss problems with staff, nor is there space to construct a virtual meeting room. Should these services be added staff would lose their open plan office/tearoom and students would probably lose their small research and reading space.
- One Librarian has been trained – for the 6-month trial, offering split hours – 5 per day, 5 days a week.

It is taken that the last decade of earthquakes and now COVID-19 has impacted severely on CCC income. If the assessment of transactions and face to face interactions focused on the past 12 months for the stated closure of the Akaroa Service Centre in the LTP 2021–2031, it is unlikely to be accurate data. COVID-19 which closed borders, mandated lockdowns, social distancing, and limited travel has specifically impacted our remote community. COVID-19 may have provided the means to remove Customer Service from Akaroa as a cost saving exercise, if so, it is very short sighted. Post COVID, international visitors are likely to return in the next 2-5 years, Akaroa and the Bays need to be set up and ready to accommodate greater activity for the economic stability of the area to secure and support the resilience and wellbeing of the community.

CCC staff stated at public community board meeting in Akaroa (15/3/2021) that the Post Office building is a CCC asset and there is no intention of selling it. But they do not know how to use it and would like the community to assist with a use/s. We invite the Council to join the community in achieving a positive and on-going future for the refurbished historic, listed Post Office building at the centre of our community.

We suggest that this should include:

- Relocating the CCC Service Centre, the Information Centre, the Postal service, and Post Office boxes back to this building, which is in the centre of Akaroa and it was specifically designed for that purpose, including disabled access and parking.
- Locate an ATM machine to the side of the building once the BNZ closes in April 2021.

- Encourage greater community use of the building as an active Citizens Hub for Akaroa and the Bays.

- 

1.12 Any other comments:

Fees for NP3 food safety.

We do not understand the fee structure for registration of MPI food safety programme. All other councils charge in the order of \$100-200 per two years for the registration while you charge 3 times the highest charges elsewhere. The reason given was

"The fees received from registrations need to cover the annual costs to the council of registration, complaint investigations, enforcement and monitoring. "

However the monitoring and audit is carried out by an independent organisation. This is paid by us to the auditor in addition to the council fee for registration. Therefore we believe that should there be a complaint or enforcement monitoring, this would be carried out by the auditor and paid by us to them not the council. Please reconsider the fee for this service as it seems excessive.

It appears that MPI require us to work with our local council and not directly with them.

### **The Reasons are as Follows:**

The Akaroa Service Centre, located in the historic 1914-15 Post Office building, provided an active Citizens Hub in a Council building that was specifically refurbished (\$984K +) to meet the requirements of the community and the post-quake building code. This historic, listed building was an effective central location for our community, that met the community needs (including a virtual meeting room), instilled resilience, and it was a source of pride.

Direct engagement with locally based Council staff is critical for the wellbeing of the community many of whom are retired and/or elderly. A community where internet service can be poor if at all, and a number of ratepayers do not have computers. The Service Centre allowed ratepayers to engage directly over complex issues with Council staff who had an in-depth local knowledge.

The decision to transfer the Service Centre from this central location of a dedicated building to the Library in January 2021 did not follow a formal consultation process. The Council is in breach of its statutory duty to undertake appropriate engagement and consultation, in accordance with Council policies and the Local Government Act.

### **Issues with the Service Centre at the School/Community Library**

- The Akaroa School/Community Library, is a small structure of approximately 180 square meters, adding the Service Centre restricts the ability of the Library to provide the same level of service to students, ratepayers, visitors and Library staff, due to the lack of available space. There is no room for the Council information to be displayed or stored eg District Plan, Have your Say fliers
- There is no private area in the Library where ratepayers can discuss problems with staff, nor is there space to construct a virtual meeting room. Should these services be added staff would lose their open plan office/tearoom and students would probably lose their small research and reading space.
- One Librarian has been trained – for the 6-month trial, offering split hours – 5 per day, 5 days a week.

It is taken that the last decade of earthquakes and now COVID-19 has impacted severely on CCC income. If the assessment of transactions and face to face interactions focused on the past 12 months for the stated closure of the Akaroa Service Centre in the LTP 2021–2031, it is unlikely to be accurate data. COVID-19 which closed borders, mandated lockdowns, social distancing, and limited travel has specifically impacted our remote community. COVID-19 may have provided the means to remove Customer Service from Akaroa as a cost saving exercise, if so, it is very short sighted. Post COVID, international visitors are likely to return in the next 2-5 years, Akaroa and the Bays need to be set up and ready to accommodate greater activity for the economic stability of the area to secure and support the resilience and wellbeing of the community.

CCC staff stated at public community board meeting in Akaroa (15/3/2021) that the Post Office building is a CCC asset and there is no intention of selling it. But they do not know how to use it and would like the community to assist with a use/s. We invite the Council to join the community in achieving a positive and on-going future for the refurbished historic, listed Post Office building at the centre of our community.

We suggest that this should include:

- Relocating the CCC Service Centre, the Information Centre, the Postal service, and Post Office boxes back to this building, which is in the centre of Akaroa and it was specifically designed for that purpose, including disabled access and parking.
- Locate an ATM machine to the side of the building once the BNZ closes in April 2021.
- Encourage greater community use of the building as an active Citizens Hub for Akaroa and the Bays.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.1 Have we got the game plan right?

Noise contours addressed. Long overdue and too constraining on land owners. The methodology used is outdated and far behind international standards

Impose a curfew on CIAL or get them to get AirNZ to build a sound proof hanger for engine testing. Put our people first.

Simplify the consenting process in line with the progress wanting to be made at the landowners expense. Too many projects are being constrained, progress has been too slow in our city.

The cycle way focus needs to stop. 301 million is enough.

Force the CEO at CIAL to take a covid pay cut. This is unforgivable and shows his true character by not volunteering to do the right thing by our rate and tax payers. Self serving people have no place in a public servant role.

Renegotiate the CIAL CEO's pay package. He is a public servant and to be paid over double our prime ministers salary is just wrong.

Formally request CIAL undertake the long overdue contour review. Due 2018.

Strongly suggest you restructure our Council. It is too management heavy and too slow to support the progress needed in Christchurch.

Don't increase rates look for internal efficiencies instead.

STOP TARRAS FROM HAPPENING CIAL will not get this across the line with the environment issues they face and the public backlash which is building. Stop this now. Back door deals, smoke in mirrors is not how business should be conducted. Ethical leadership is demanded here

Review CIAL's core business and focus. They are becoming property developers and protecting their own interests rather than those they SUPPOSEDLY represent. They are the worst company to deal with. Arrogant, dismissive and intimidating. Not acceptable in this day and age. Sacking Mr Johns would be a great start. He is a mini Mr Marriott and we all know how that turned out. .

Stop this nonsense with proposing charges for drainage.

Open up land usage to the west and north. It's the safest land in Christchurch. We have a housing shortage for goodness sake. Sea levels are rising and our natural topography dictates migration and development towards these areas. Either that or you are pushing land owners/rate payers out to other councils e.g. Selwyn but the majority work in Christchurch using our infrastructure and resources

STOP being so short sighted and help our people progress our city. The majority are committed to our city. It is home. We have stayed for many reasons. Stop making it too hard to support progress and development. There are many amazing proposed projects being held up by bureaucratic BS.

Common sense needs to be reintroduced as a focus at CCC.

---

## 1.2 Rates

No. Rate increases are the last thing the people of Christchurch need. It's not an even playing field. Some rate payers only get rubbish removal. Others get all services water, sewerage, public transport, rubbish removal. It's inconsistent and a lot of people are not getting value for their rates.

Look at internal efficiencies instead. Salary reviews. Selling dead or unused assets. Streamline the consent process so more consents are granted supporting progress. Stop pushing rate payers out of Christchurch to other areas.

Salary reviews in line with central government salaries. It is not acceptable when comparing regional and central government salaries. We do not get real value for our money. Appreciate there are some big jobs in at C.C.C but not when compared to being in our government and their responsibilities.

---

## 1.3 Proposed changes to existing rates, and new targeted rates

No you have not got it right.

Open up land and you will get more rate payers. It seems blindingly obvious to many.

Stop pushing people working in Chch out to other council areas to live.

Stop any more development on the cycleways until high usage levels demand it.

Sort out the noise problems on the new arterial highways.

Get some forward thinking, rate payer centric leadership at CIAL. Get the noise contour review done. Set international standards as the standard. We are seriously behind the rest of the world here!!

---

## 1.4 Investing in upgrading and protecting our city's water networks

A step by step plan. Not making a mess all over Chch again. Get it right first time. Don't repeat your mistakes after

the earthquakes having to redo work 4 times to get it right. Dont charge rates for those who aren't connected.

Dont charge for drainage. That's ridiculous.

---

1.5 Investing in our transport infrastructure  
smaller buses. Electric vehicles.

---

1.6 Rubbish, recycling and organics

Recycling is imperative. Hold the polluting/dumping companies to account. Heavy fines and public naming.

Broaden your composting collaborations like you have with Oderings. More initiatives like this are required.

---

1.7 Our facilities

Less is more due to Covid-19. Make it more affordable for more people to encourage higher usage from locals until tourists return.

Stop being short sighted in regards to competition. There are a few major projects proposed that will compete with CCC facilities. Competition is healthy. Monopolies are constraining and short sighted. These new proposed facilities will draw Kiwis to Chch and once the world opens up again be a draw card for international visitors.

Be innovative and future focused by supporting progress especially when at the cost of private investors developing more facilities. Stop being the handbrake!!!!

---

1.8 Our heritage, foreshore and parks

The earthquakes smashed most of our heritage. Our parks are established and already maintained.

Sea levels are rising. You cant stop it.

No 11% is excessive.

---

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

Yes agreed. This was the heart of our city along with Hagley park.

---

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

Too much. Could be spent more wisely else where. For instance developing a state of the art consents process to support progress.

---

1.11 Potential disposal of surplus Council-owned properties

Yes. Get rid of them and offset your proposed rates increases.

1.12 Any other comments:

People are pushing back all over the world.

Over paid exec's, self serving leaders, management heavy councils, unreasonable constraints being placed on land owners, inefficient divisions, lack of public centric public servants are all unacceptable. Bring back a common sense approach. Make it easy to deal with the CCC and CIAL. Create efficiencies that make a difference. Open up land usage to combat our housing shortage. Support your rate payers rather than making it so difficult to deal with you and your over complicated processes for progress.

### Feedback

1.4 Investing in upgrading and protecting our city's water networks

Akaroa has major and serious potable water and wastewater problems that are not being addressed in a timely and realistic manner.

**It is imperative to lessen storm and ground water infiltration into the sewer network. This will reduce the required size of storage ponds and irrigation fields. The ageing wastewater system carries many residents' stormwater as well as sewer. In addition, ground infiltration adds to the excessive volume carried by the system, so that in times of heavy rain, overflows occur into the harbour resulting in major pollution around Akaroa township and Glen Bay. A recent Council resolution was passed to achieve an 80% reduction in I & I (inflow & infiltration). This should be prioritised.**

#### **AKAROA RECLAIMED WATER TREATMENT & REUSE SCHEME -- Project 596**

Funding should be deferred until pipework repairs are completed. This will assist in the ability to design a more realistic new system and result in long-term savings, reduced size of the whole network and, with reduced volumes, possibly enable the irrigation of native plants to succeed without excessive output resulting in over-enrichment and death.

Banks Peninsula is facing one of the driest summers on record. This is likely to be ongoing and increasing. Council should be looking at investigating the use of both potable and non-potable water by:

- 1. Requiring new residential buildings to install rainwater tanks for either backup, garden or exclusive use with no connection to the community system.**
- 2. Encourage, with grants, existing home-owners to install rainwater tanks.**
- 3. Storage of non-potable water such as storm-water for reuse on gardens. This will reduce the usage of potable water.**

1.8 Our heritage, foreshore and parks

Akaroa has three cemeteries. Two are off Onuku Road (Catholic & Dissenters), and the Anglican cemetery off Hempleman Drive. There is limited space for future burials in any of the three.

A group of local volunteers who meet regularly to maintain the cemeteries by tidying around graves etc, recently cleared land adjoining the Catholic cemetery that was owned by the Catholic Church. The section has been gifted to the CCC as 'cemetery land'. Currently CCC seem reluctant to use this free land, proposing instead, to pay for additional land as stated in the LTP under 'Parks, Table 1 Appendices, Appendix 1'. Quote, **"To provide additional capacity for cemeteries to meet future needs, we need to acquire further land (Banks Peninsula) and develop what we have already (Templeton).**

The cleared land adjoining the Catholic cemetery in Onuku Road is large, adequate in respect to access, slope etc. And it is free. Why should Council spend scarce funds on additional land? There is sufficient space for many generations. The church is happy for the space to be used for interdenominational burials.

1.1 Have we got the game plan right?

1.6 Rubbish, recycling and organics

#### **RE: RATES FOR CENTRAL CITY WASTE COLLECTION**

I support the submission from the Atlas Quarter Body Corporate in relation to rates for the collection of solid waste.

I support the Council's strategic goal of reducing solid waste but object to having pay \$300-\$400 per year in rates for the collection of the red, green and yellow bins when the Council does not provide this service to me. In the absence of Council providing this service, I pay privately through my Body Corp Levy for waste collection by EnviroWaste. I support waste minimisation and the Atlas Quarter have all the same waste streams (green, yellow and red) as the Council provides.

I ask that the Council either:

- 1) reduce the general rate and waste minimisation levy for developments such as the Atlas Quarter to reflect that no waste collection is provided, or;
- 2) amend your service contracts to provide the waste collection service.

I believe there must be a law somewhere that states that one does not need to pay for a service that is not being provided.

Thanks,  
Peter Morris

### Feedback

1.1 Have we got the game plan right?

1.2 Rates

I strongly disagree. With more residential houses and apartments being built, it is unclear why we need such significant increases, particularly in the City Centre. What used to be empty lots of land are now starting to be converted into a significant number of townhouses that individually pay higher rates than the original landowners. These complexes also pay high Body Corp Fees that cover several services that the Council provides outside the City.

1.3 Proposed changes to existing rates, and new targeted rates

### Feedback

#### 1.7 Our facilities

I wish to register a formal protest against the closure of the Wharenuī Pool and Sports Complex here in Riccarton. I live one block away from the pool. I believe the pool is a great asset in this community within walking distance especially in this neighbourhood where the median income is \$26,400 (2018 statistic for Riccarton South). The median income range within walkable distance ranges from \$18,600(Riccarton West) - \$33,800(Riccarton Central). Taking a bus to the new facility along Moorhouse Avenue would create a financial burden on us, and would not encourage us to take up this reasonable form of activity/exercise. Many of us are in full time employment, using the pool either before or after work hours. Having the pool close to home is definitely a great advantage.

Furthermore I believe this pool is of heritage significance due to it's 111 year history. It would be a shame to have this extinguished in our city.

### Feedback

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Isaac Theatre Royal is in support of The Arts Centre receiving a grant of up to \$5.5 Million, which will see a rate increase occur. Christchurch has lost too many heritage buildings over the past decade and should steadfastly restore and maintain the remaining heritage buildings. Heritage is an important factor in our lifestyle and attracting tourists to Christchurch which injects important revenue to the local economy. Our postcard to the world has been the heritage buildings including the Cathedral, the Arts Centre and the Isaac Theatre Royal. A deep connection with our past serves to enrich and enliven our future. Our heritage is interwoven into the fabric of our culture that enriches our city, our people and our reputation. We must embrace our history, recognise our heritage and celebrate our past as we embark on an exciting future. A city with modern convenience, steeped in heritage architecture is the envy of the world. Christchurch is a monument to heritage, progress and resilience.

### Feedback

1.8 Our heritage, foreshore and parks

Please give us back our pub in Diamond Harbour.

1.11 Potential disposal of surplus Council-owned properties

I reject the proposal for the fast tracked land sales of both 27 Hunters Road, Diamond Harbour and 42 Whero Avenue, Diamond Harbour. I ask that normal land disposal processes are used including FULL community consultation and Community Board Input.

I ask that this fast track disposal be rejected and that proper community consultation should be undertaken. That would consider gully protection, boundaries, road access, school development, walking tracks, infrastructure and other local interests. If the land sells now, there will be no further consultation and subdivision can proceed without community input.

On a personal note both of my children, like many here, walk to school using the school track. This is far safer than them walking on the incredibly narrow and frankly dangerous footpath alongside Marine Parade. If this is community track is lost to developers it would be a terrible travesty.

## **Submission to Christchurch City Council's Long-Term Plan**

On behalf of the Christchurch Art Gallery Foundation, we wish to make a submission in relation to the proposed Levels of Service changes for Christchurch Art Gallery Te Puna o Waiwhetū.

We understand that the Long-Term Plan proposes to look at the affordability of gallery services. Proposed changes include:

1. Reducing the programmes the Gallery offers to the public and school groups by 25% per annum. A reduction in the current participation in Schools Programmes from the target of 11,500 visits for participants for lessons, hands-on activities, resources for schools and the like to 8,625 i.e a reduction of 2,875 is a substantial number of school children who will not be able to utilise the Gallery services and the loss in access to a key component of a young child's education.
2. Reducing the Gallery's weekly Wednesday night opening hours to one late Wednesday night a month. We understand that currently approximately on average 188 people visit the Gallery each Wednesday evening, accordingly a reduction to one night a month will result in access not being available to over 7,500 people per annum.

We believe that these Service Level reductions significantly compromise the Gallery's accessibility to the community. For many this will mean the loss of access to a key component of a young child's education.

The Christchurch Art Gallery Foundation is an independent organisation founded to raise funds and support for the Christchurch Art Gallery Te Puna o Waiwhetū. Over the last ten years we have raised over \$10 million for the Gallery through our 5 Great Art Works Campaign and the development of an Endowment Fund for the use of the Gallery. We ask that Council reconsiders its very successful Wednesday night late opening and the continuation of the Schools Programme.

To: CCC Plan  
Subject: Long term plan 2021-31

in regards to proposed land drainage rating policy changes, i object to any increase in charges because this would unfairly penalise my 2 properties that do not benefit from any council land drainage as they are self draining down a slope into a lake. There are no curb and channel, swales, drainage ditches and or stormwater pipes on the street i live on and very little in the community i believe. To suggest that i benefit from the city facilities is rather spurious as i rarely visit the place, so how i ask do i benefit? It would be most unfair to expect this lower socio economic community to prop up the much wealthier areas especially when you consider that our already comparatively high rates do not provide services such as kerbside rubbish. Therefore i object as it would be most unfair and unjustified to be charged extra fees for a service that does not exist.

Regards,  
Michael Springer.

### Feedback

1.1 Have we got the game plan right?

I live in a neighbourhood of 36 households that were left out of the Government and Christchurch City Council funded roll out for fibre.

We are located at the top of Huntsbury Ave above Kenmure Drive and include properties on Huntsbury Ave, Westview Place and Tiroroa Lane. We are not a new development, with houses being built up here since the early 1990s, and we are within the Christchurch City Hills Living Zone.

At the time of the fibre roll out when it was being laid up Hunstbury various members of our neighbourhood approached the Christchurch City Council and Enable to find out why we were not being included. Nobody could provide an answer.

We collectively approached Enable in November 2019 to ask them to lay fibre in our neighbourhood. Enable developed a network plan (August 2020) that would lay fibre to most of our properties (but not all, excluding the top properties on Huntsbury Ave). Enable are prepared to fund most of this but require our neighbourhood to fund a shortfall of \$36,000+ GST.

Enable have stated we were excluded due to a 350m gap between the edge of their network and the first property on Westview Place. Over time, this gap in the properties will be developed, and since approaching Enable, 3 new houses have been developed. Our neighbourhood is zoned for residential activities, so it should be provided with the same level of service as other areas in the city zoned for residential. It is not our fault that the landholders in this gap have not yet completed development, and the status of this private landholding should not impact on the services that a ratepayer funded CCO is providing within a zone.

A key focus of Council strategy should be to provide an equitable level of service across the city. It is unfair that we are being required to pay for fibre to our streets while the rest of Christchurch had it provided for free, paid for by our rates and taxes – we are effectively being asked to pay twice.

Fibre is going to be provided to small, isolated country towns such as Lake Brunner and Haast, while we have not been given access to it within 7km of the CBD of the South Island's largest city. It is very discouraging to see extensive Enable advertising in the newspaper and on billboards for fibre take up, while there is apparently no funding to complete the rollout.

Please support us in finding the funding for this shortfall to get fibre laid to our streets OR by convincing Enable that they can cover the full cost of the fibre layout by using their discretionary spending.

### Feedback

1.8 Our heritage, foreshore and parks

Currently, only 2.5 Urban Park Rangers are funded to cover the whole of Christchurch and interact with the many community groups which have sprung up to tackle the biodiversity and pollution issues particularly related to parks and rivers.

The Council must consider the benefits to not only parks and biodiversity through significant increases in the number of Urban Park Rangers supporting greater numbers of community groups better, but also the collective benefit to social well-being that comes from individual citizens working together in community groups to better their local environments.

At the very least, a doubling or tripling of the number of Urban Park Rangers is justified by the number of reserves, parks and planted areas along the Opawaho Heathcote River and Avon River that community groups are, or seek to, look after. Greater community involvement that increased numbers of Urban Park Rangers can encourage is of benefit to the entire council-citizen relationship.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

water: an emphasis on managing water in all forms is very sensible, and appropriate in view of the climate crisis. When measuring household use of fresh water, can this be done so that the cost of accurate measurement doesn't outweigh the gain from charges for excess use?

roadway: maintenance is of course important but the emphasis must be on people advantage not vehicle advantage. City residents must be encouraged to use private vehicles less; encouraged to walk, cycle and use public transport more. In consequence this means a need for community emphasis, with no further support and development of large suburban retail complexes. These latter are likely soon to be archaic burdens in the environment as people's shopping styles further change.

1.8 Our heritage, foreshore and parks

foreshore: any development/re-development must take full cognisance of the best scientific advice on the effects of the climate crisis before funds are expended if this is likely to be to poor future purpose.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

1.11 Potential disposal of surplus Council-owned properties

Agree "All properties resolved as "surplus" for disposal upon adoption of the 2021 -31 Long Term Plan" should be disposed of.

1.12 Any other comments:

Merivale mall: the proposal allowing expansion of this mall is misguided and completely unnecessary. The city is already over provided with retail centres. Recent trends combined with events and experiences such as The covid pandemic suggest that people's shopping patterns and styles are likely to continue to change and for physical retail venues to be less favoured. Expansion of Merivale Mall would serve no pressing need or useful purpose for the local community or the city as a whole.

### Feedback

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

Yes, I would like to add my support to the Council's proposal funding \$5.5m for the Arts Centre. I believe the Arts Centre plays a huge role in Christchurch. To me personally, it provides a place for me to run my mobile gelato business from - I am a casual tenant at the Arts Centre. With the current challenges facing hospitality businesses in Christchurch, the Arts Centre has been able to provide us a place to operate from, and by helping us out in this way, we in turn add life and vibrancy back to our little corner of the Arts Centre and Christchurch. We are working hard to promote our new home at the Arts Centre, to attract our loyal customers from around Christchurch back to the Arts Centre.

### Feedback

1.1 Have we got the game plan right?

I live in a neighbourhood of 36 households that were left out of the Government and Christchurch City Council funded roll out for fibre.

We are located at the top of Huntsbury Ave above Kenmure Drive and include properties on Huntsbury Ave, Westview Place and Tiroroa Lane. We are not a new development, with houses being built up here since the early 1990s, and we are within the Christchurch City Hills Living Zone.

At the time of the fibre roll out when it was being laid up Hunstbury various members of our neighbourhood approached the Christchurch City Council and Enable to find out why we were not being included. Nobody could provide an answer.

We collectively approached Enable in November 2019 to ask them to lay fibre in our neighbourhood. Enable developed a network plan (August 2020) that would lay fibre to most of our properties (but not all, excluding the top properties on Huntsbury Ave). Enable are prepared to fund most of this but require our neighbourhood to fund a shortfall of \$36,000+ GST.

Enable have stated we were excluded due to a 350m gap between the edge of their network and the first property on Westview Place. Over time, this gap in the properties will be developed, and since approaching Enable, 3 new houses have been developed. Our neighbourhood is zoned for residential activities, so it should be provided with the same level of service as other areas in the city zoned for residential. It is not our fault that the landholders in this gap have not yet completed development, and the status of this private landholding should not impact on the services that a ratepayer

funded CCO is providing within a zone.

A key focus of Council strategy should be to provide an equitable level of service across the city. It is unfair that we are being required to pay for fibre to our streets while the rest of Christchurch had it provided for free, paid for by our rates and taxes – we are effectively being asked to pay twice.

Fibre is going to be provided to small, isolated country towns such as Lake Brunner and Haast, while we have not been given access to it within 7km of the CBD of the South Island's largest city. It is very discouraging to see extensive Enable advertising in the newspaper and on billboards for fibre take up, while there is apparently no funding to complete the rollout.

Please support us in finding the funding for this shortfall to get fibre laid to our streets OR by convincing Enable that they can cover the full cost of the fibre layout by using their discretionary spending.

Best regards  
Nikki Tod

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.2 Rates

I support rate increases to provide improved services and amenities for Christchurch ratepayers.

#### 1.3 Proposed changes to existing rates, and new targeted rates

I support targeted rates for the Arts Centre Te Matatiki Toi Ora and also for targeted rate for water use over 700 litres per day.

#### 1.4 Investing in upgrading and protecting our city's water networks

A necessary expenditure

I hope this includes an upgrade to Waipapa Ave in Diamond Harbour. It would save City Care having to come out once a week to cope with the latest leak!!!

#### 1.5 Investing in our transport infrastructure

##### Increased ferry service

Although the service is provided by ECAN, I would like CCC to support in increased ferry service from and to Lyttelton and Diamond Harbour, enabling DH residents to use the bus service more often. Without being stranded in Lyttelton when just missing the ferry and having to wait an hour for next ferry.

Particularly as the upgrade to the jetty will enable more people to use the ferry.

Also relevant is the improved parking layout soon to be underway adjacent to the DH jetty.

It is vital to the future of the city that more people use public transport. A more frequent service would help keep people out of their cars.

#### 1.6 Rubbish, recycling and organics

Judging by recent coverage in The Press, this is a necessary expenditure.

## 1.7 Our facilities

I fully support the continued improvements to maintain the DH Community Hall, including

1. New asphalt and some modification to drainage at front entrance to building
2. Acoustic panels in main hall
3. Two way light switches in main hall
4. Re-roofing areas not done in 2014
5. Replacement of Emergency Exit doors in Green Room
6. Upgrade for energy savings in conjunction with Orion

Our hall is used every day of the week - partly thanks to the two recent upgrades. It is a pleasure to be involved in the management of this building.

## Service Centres

Without further information/consultation, I cannot support the demise of Service Centre staff at Akaroa and Lyttelton.

## 1.8 Our heritage, foreshore and parks

I strongly support the Otakaro Avon River Corridor, the Diamond Harbour Cemetery; Naval Point redevelopment, Akaroa Wharf, Diamond Harbour wharf; Head to Head Walkway sea wall renewal; Rod Donald Trust strategic land purchase.

Private Developers are best kept out of The Otakaro Avon River (Red Zone) area unless plans echo conservation/regeneration projects for as many people as possible.

## 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

### Comments

It would be a tragedy if this rebuilding programme had to cease, even temporarily.

## 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

### Comments

Our Museum is a bit of an embarrassment these days and this work is vital.

## 1.11 Potential disposal of surplus Council-owned properties

### 1. Village plan

I was part of a community group who worked with CCC staff on the Concept Plan for Village Development 2017.

I strongly support implementation of any part of it, starting with the traffic calming.

Our village is in need of simple improvements like more seating, a water fountain. Improved signage at wharf is good, but visitors need some

more "sit down and enjoy" areas. More and more visitors are coming -particularly via ferry - and enjoy our village.

Fortunately, Stoddard Cottage is providing an excellent experience for visitors.

1. **2Godley House site**

Of all the issues is Diamond Harbour, this is the most contentious.

Having taken part in the planning, once again, with CCC staff, I support the revocation of part of the recreation reserve for a licensed café to be established. The next stage is to undertake landscape planning to best establish the location of facilities on and off the reserve. Preferably on the Dark Star site, Council built and leased out. It must include a new cafe with a large covered deck, a playground and a covered space for bands, markets etc. If it also included a new Library, that would be the icing on the cake.

**3.Disposal of 27 Hunters Road**

I oppose the sale of the land. The infrastructure of Diamond Harbour cannot support development on this scale.

We come to Diamond Harbour for the semi rural space, the walking etc.

Thousands of hours of voluntary time has been given to Morgans and Sams gullies and have been promised that these will be covenanted so they cannot be built on.

If the school has to expand in the future, some of Hunters Road land would be needed for this purpose.

**No more possibilities for developers coming and imposing their plans for this very special place please**

4.

1.12 Any other comments:

**During the time of discussions about Godley House, 27 Hunters Road, the Village Plan etc, many conversations have taken place at the local cafe and elsewhere.**

**Among older members of Diamond Harbour it is repeated over and over, how good it would be to have some housing here for when we can no long drive. Or, when our houses and sections get too large to manage.**

**Some kind of older persons co-housing would be very well received.**

**Probably not seen as "core" Council business, but is Hunters Road the place to look at this??**

Re: Rates for central city waste collection

I support the submission from the Atlas Quarter Body Corporate in relation to rates for the collection of solid waste.

I support the council's strategic goal of reducing solid waste but object to having pay \$300-\$400 per year in rates for the collection of the red, green and yellow bins when the Council does not provide this service to us.

Being charged for this service and not being provided it is both grossly unfair and also counter to the goals of the Project 8011 programme.

In the absence of council providing this service, we pay privately through our Body Corp Levy for waste collection by EnviroWaste. Our body corporate supports waste minimisation and we have all the same waste streams (green, yellow and red) as the council provides.

We ask that the council either:

1) reduce the general rate and waste minimisation levy for developments such as ours to reflect that no waste collection is provided, or;

2) amend your service contracts to provide the waste collection service.

Given that a solid waste collection service has never been provided to us by the council, I also request that you refund rates levied to Atlas Quarter property owners for this service since October 2018.

Thank you,

Kieran Williamson

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

As Treasurer of the Akaroa Golf Club I am presenting this submission in regard to the proposed change to the rate remission provided by the CCC for non profit organisations.

The AGC submission is that there should be a discretion provision to allow a club to apply for a rate remission where there are special circumstances such as outlined below, rather than have a decision based totally on an arbitrary financial formula.

The AGC owns a clubroom and a small parcel of land but leases from the CCC the golf club grounds. At solely the club's cost it fully maintains and enhances this land by way of bridges, paths and plantings etc. In doing so it provides a key sporting facility for the region that is used by the general community.

Secondly a golf club is a capital intensive operation with cash reserves needing to be built up over a number of years prior to the purchase of large capital items such as tractors or mowers. Why does the proposal only allow committed capital expenditure to be discounted?

As the formula makes no allowance for circumstances such as those detailed above, the AGC will no longer be eligible for CCC support by way of rates remission. The club strongly believes that it is being unfairly penalised and asks by way of this submission that the proposed change includes a provision where discretion can be exercised upon application.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

It is most disappointing

As Leaders in our Christchurch Community, you should never be increasing Rates at a level above The NZ government's "costofliving", for each year, except for Emergencies. 2011 was the last such one, as I recall. Councillors Macdonald, Chu, Gough, and a few others I have not mentioned because I can not hear myself think right now, as Kris Kristoffersen once wrote, are trying to keep us all who live here healthy and safe. Yet, some other Councillors are doing their best to favour some citizens. If you can not be fair, then at least be Honest. We citizens deserve that.

1.2 Rates

It should be NO more than 2.0---2.5%.

Do the Maths.

Be Honest, be aware.

1.4 Investing in upgrading and protecting our city's water networks

I say, when my Council(s) allow our water to be sold at an unbelievably low rate so it can be sent out of Canterbury, then action need be taken to correct the "errors of their ways", urgently.

Less consultation, more positive action.

Christchurch City Council  
PO Box 73016  
CHRISTCHURCH 8154

Long Term Plan  
[www.ccc.govt.nz/longtermplan](http://www.ccc.govt.nz/longtermplan)

We are against the land drainage targeted rate. We are owners of properties in Takamatua, Akaroa. Currently we have no ground water ways, roadside kerbs, swales, soakage systems, stop banks or pump stations other than the new subdivision at the top of Takamatua.

If we had the above, I would feel this would be way fairer, more consistent way to rate people, also being more accessible and pleasant way to live.

The Big Better more Efficient Christchurch City Council currently can not fix a water leak in the road or repair a pothole without a two-year lead in period. Without denial of the road being there, that the pipe was leaking, and that water did not run up hill, to run down my driveway, only stating it was winter and it did get wet.

Eventually when they had the broken pipe shown to them could they accept it was broken, but arguing the water was not theirs – unbelievable. Alternative option, install the assets, charge for the ~~assets~~ once finished.

Acting Head of Financial Management  
 Christchurch City Council  
 PO Box 73016  
 Christchurch 8154

Barry Knutson

**re Proposed Land Drainage Targeted rate**

Thank you for your letter dated 30 March 2021 which was received today the 11th April 2021.

I don't envy your position in trying to find a funding solution for work that is still required to protect properties in the Christchurch city region. I know substantial efforts have been made with the construction of pump stations in areas prone to flooding. If I understand this rate being applied is for additional work rather than retiring debt from past activity.

The reason I don't envy you is as follows:

1. The property market is one of the few remaining markets where property values are set by market forces and reflect the element of risk through such things as flooding. For example it was a consideration for me to purchase land that was naturally draining and in my mind I paid a premium for that comfort.
2. By council strategy only a set percentage of residential property can be covered allowing a level of self draining. In comparison, commercial developments have larger coverage and in most cases total site covered in concrete and rely 100% on infrastructure to drain water.
3. At Birdlings Flat we are self sufficient in drainage and as I have said this has been reflected in the capital cost of property, however we do not gain equal service as our city friends. Our water supply is by trickle feed and it has been left to us to provide our own storage and sewer management. Our waste collection is two kilometers away on a Saturday morning which I find difficult as I work night shift. Spreading the load must be a two way street and the rates must reflect the service provided, to have any resemblance of equality.
4. My understanding is that the areas prone to flooding area not main routes without alternative egress making the argument that it benefits all rather hard to substantiate I would have thought.

Unfortunately , I am of the view that the service we receive from the Christchurch City Council is difficult to justify given the level of service we are offered. Accordingly I would support none of your options and would look at water shed from properties and ask developers to show due justification for their designs in terms of environmental impact which would include potential drainage issues and apply stronger future proofing of the Council infrastructure to cope with this demand.

Sincerely

Barry Knutson

Kelly, Samantha

Subject: Re Proposal to extend Land Drainage Targeted Rate

Katy McRae  
Manager Engagement Strategy and Transformation,

Hello Katy

Submission for above proposal.

I am a resident at Old Tai Tapu Rd.  
Halswell

We live in a flood prone area which is controlled and maintained by Environment Canterbury.

We are currently levied for this service via our rating system.

It would seem very inappropriate that we are levied for the greater Christchurch area when at times we are faced with major flooding on our property due to the run off of nearby Christchurch residential properties.

This would mean we could be paying twice for the same service.

*Regards*

*Ron Long*

### Feedback

1.1 Have we got the game plan right?

Ratepayers pay Christchurch City Council wage/salaries, the amount of which is increasing faster than revenue can sustain. Ratepayers will have finite resources and there will come a time when rates will be unsustainable for some.

Cut exorbitant salaries for heads of council owned entities. These people earn more the New Zealand's prime minister and administer a considerably smaller area.

1.2 Rates

You have stated that at the end of the ten year plan, rates will have increased by 47.8%. That rise will be unsustainable for many, especially an ageing population relying solely on a pension for income.

The targeted rates you propose, are a rate increase by stealth. These too will increase.

I have doubts that these will be removed once the projects are completed and I also doubt we will see the rate rise decline, as stated in your publication.

1.3 Proposed changes to existing rates, and new targeted rates

You have stated that at the end of the ten year plan, rates will have increased by 47.8%. That rise will be unsustainable for many, especially and ageing population relying solely on a pension for income.

The targeted rates you propose, are a increase by stealth. These too will increase.

I have doubts that these will be removed once the projects are completed and I also doubt we will see the rate rise decline, as stated in your publication.

Hopefully the proposed water charge will not result in the loss of the title of "The Garden City". I would object to paying rates for excess water usage when water bottling plants get theirs for free.

#### 1.4 Investing in upgrading and protecting our city's water networks

When will the chlorine be removed from our water????? There was no transparency or honesty around this issue, promises and time frames made and broken continuously. Get sorted ASAP. Meanwhile, our pure unadulterated water goes off shore in plastic bottles! Go figure!!!

Please do all in the Council's power to prevent fluoride being added to our water in the future.

#### 1.5 Investing in our transport infrastructure

Good luck to those hearty souls that you expect will be cycling to work in a Christchurch winter! -5deg frost anyone? Also, with an ageing population, not everyone will be cycling everywhere.

The current cycle lanes are too narrow and cyclists still insist on riding two or three abreast, encroaching on vehicle access. Possibly because of lot of cycle lanes are quite bumpy.

There's a long way to go with public transport meeting needs of ratepayers before cars will be second choice to a train or bus.

#### 1.6 Rubbish, recycling and organics

Agree

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

No brainer

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

Such an under-utilised, beautiful facility. Overflow (stored in basement) of the city's art gallery could be displayed here.

#### 1.11 Potential disposal of surplus Council-owned properties

Need to see details before comment can be made

1.12 Any other comments:

The cleaner running of electric cars has a dirty side and that is that the resourcing and making of batteries is costly as is resource and energy intensive. Disposal of EV car batteries is problematic and the production is linked to grave environmental and human rights concerns with unethical mining practices of rare earth minerals and use of child and or slave labour.

So if you are only measuring CO2 emissions, congratulations you've ticked a box.

The council owned Christchurch airport company has a spare \$45M and counting to invest buying land outside of the Christchurch City Council district such as Taris, with the intent of imposing an airport owned by CCC in a district that doesn't appear to not want said airport. I'm sure money spent on this could be better used to service the ratepayers of Christchurch.

The city centre is sadly disappointing. I personally know of business owners who have finally shut up shop in town after believing and trusting in the council assurances over the years that if they just hang in there, all will be good. Removing first hour free car parking seems counterproductive here.

Surely someone in the council has contacts in China that could procure some decent or even just average Christmas decorations. What a sad and sorry place the city looks at Christmas. Strung lights could be put up and left up year round to at least give the illusion of vibrancy.

As for the idea of allowing cyclists to use the pedestrian city mall, I see this will deter the few people who do have a stroll through town and very much doubt that cyclists will be stopping for a spot of shopping on their way through.

I find the Christchurch Convention Centre to be an absolutely hideous, grey, brutalist looking building. To have blocked off a street, let alone one which faced onto a river vista is a travesty. Every time I drive down Gloucester Street, I get a shock to see this abomination.

On that note, I think an opportunity was lost when land facing Victoria Square and surrounds was allowed to be bought by the Catholic Church. Anyone coming to a convention in Christchurch will have the scintillating opportunity to visit Cathedral Square and it's partially complete cathedral (I opposed this restoration and think this will hold up redevelopment in this area for years to come) or Victoria square and another Cathedral. Not for them any interesting cafe's or interesting little shops or lanes to wonder through near the convention centre. Of course they can wander down to Riverside to eat, take a tram ride, visit Art Gallery and Museum but all this can be achieved in a day.

Council investment in private enterprises, is unsustainable - the adventure park is a perfect example of this.  
Propping up private proposals should be left to banks, not ratepayers.

I took family from out of town to the Earthquake Memorial Wall. Why is this so far from the centre of town? I watched a council worker pushing the reeds and rubbish accumulated along the riverbanks into the current only to end up on the riverbank further downstream. Counterproductive and a waste of resources. He may have had been more successful if he had actually removed the material and added it to the green waste that is eventually sold as compost.

On a brighter note, the hot pools in New Brighton are awesome.

1.12 Any other comments:

To bring more people into the central city, perhaps some type of teaching facility or arts based tertiary endeavour could take place at the arts centre or other council owned facility. There would always be people around and there is plenty of cheap housing/apartments springing up close to the inner city.

1.6 Rubbish, recycling and organics

RE: RATES FOR CENTRAL CITY WASTE COLLECTION

I support the submission from the Atlas Quarter Body Corporate in relation to rates for the collection of solid waste.

I support the Council's strategic goal of reducing solid waste but object to having pay \$300-\$400 per year in rates for the collection of the red, green and yellow bins when the Council does not provide this service to me. In the absence of Council providing this service, I pay privately through my Body Corp Levy for waste collection by EnviroWaste. I support waste minimisation and have all the same waste streams (green, yellow and red) as the Council provides.

**I ask that the Council either:**

1. **reduce the general rate and waste minimisation levy for developments such as ours to reflect that no waste collection is provided, or;**
2. **amend your service contracts to provide the waste collection service.**

### Feedback

1.1 Have we got the game plan right?

1. Please consider prioritisation of separated cycling lanes throughout the city without extensive consultation. It is a top priority for climate and health, and has well researched economic, health, and climate benefits. Continuing and extending this programme of work should be a top priority.

2. I write in strong opposition of reduced library opening hours. Libraries are key public infrastructure like no other, providing access to shelter, community, water, lavatories, internet, and family space as well as the obvious reading and research materials. Tūranga especially brings warmth and vitality to our central city. Reducing library opening hours is prohibitive for many library users and families, particularly those who are in need of the libraries services. I would recommend, if anything, not only reducing library service but extending it as it is one of our best social assets for community building.

1.6 Rubbish, recycling and organics  
Please consider ability to recycle lids.

### Feedback

1.1 Have we got the game plan right?

From what I can tell investment in protecting (and enhancing to some extent) existing indigenous biodiversity values is far outweighed by investment in parks/creating native planting areas. I.e. I would like to see greater investment in protecting existing values rather than creating things from scratch.

1.2 Rates

This is a substantial increase. Care needs to be taken to ensure this is affordable to lower income residents.

1.8 Our heritage, foreshore and parks

As I read it indigenous biodiversity projects is included in this area? If so, this should be more apparent and such projects highlighted.

No Levels of Service are apparent for indigenous biodiversity.

The only one I did find was for a LOS proposed for removal - 6.8.8 - regarding natural coastal features.

The "Strategic Planning and Policy" Group of Activities primarily contribute to the following community outcomes:

..... including • Unique landscapes and indigenous biodiversity are valued and stewardship exercised " But no LOS seem aligned with this key community outcome...?

Page 18 of LTP – biodiversity as a community outcome – how are we going to know we have achieved anything for 'unique ... indig. bd'?

The Biodiversity Fund grant – of \$190k is for private land only, so is not for use by CCC to show stewardship of SES/SNAs on its own land (I also note this year on the website this BF grant fund is \$200k per year. So this draft LTP is a reduction of this funding level.) Recommend funding levels is maintained or increased.

<https://ccc.govt.nz/culture-and-community/community-funding/christchurch-biodiversity-fund/>

Page 21-22

Consider bd priorities for CCC and allocation of budget towards these priorities. Aligned to the Canterbury

Biodiversity Strategy this will reveal a priority to protect existing ecological values.

Key existing bd values within the CCC boundary include:

- Drylands
- Known threatened species habitats
- Port Hills bluff habitats

Direct towards identified CCC SES sites on public land as per schedule of the current district plan – Appendix 9.1.6.1: <https://districtplan.ccc.govt.nz/pages/plan/book.aspx?exhibit=DistrictPlan>

Proposed LTP proposes \$25.7million for ecological restoration of the Otakaro Avon River Corridor. Consider diverting/ringfencing some of this funding for 'protection' projects only, or to the priorities as above.

Scanner041

**Re: Closure of the Akaroa Service Desk as per the Draft Long-Term Plan 2021-31**

**Introduction** - The Christchurch City Council policy statement about Banks Peninsula says:

**Our vision:** Banks Peninsula is home to many unique, thriving settlements as well as being a valued place for locals and visitors from the region, country and overseas to recreate, explore and unwind. Our focus is to enhance environmental, cultural, social and economic well-being so that the Peninsula is a vibrant and reviving place to live, work and visit.

Yet the 2021-2031 Draft Long-Term Plan page 58 indicates that the Akaroa Service Desk is to be closed. The reason given is due to minimal transactions.

Akaroa and the Bays collectively are a remote community, at least 75 km from the outskirts of Christchurch City and a 90-minute drive from the CBD. While the City offers a diverse range of activities and public services to the metropolitan residents, Akaroa and the Bays must be largely self-sufficient and self-reliant regarding employment, education, recreational activities, entertainment, shopping and health care.

The long-term sustainability, resilience and wellbeing of Akaroa's and the Bays communities, is important. If Akaroa and the Bays are to survive economically in coming years, then the local Council services must be maintained at an adequate level. In fact, this is a critical foundation stone for the resilience and wellbeing of the community, for both current and future generations.

A Council's ( Akaroa County Council, Banks Peninsula County Council and Christchurch City Council) presence in Akaroa has been located in the Historic Post Office Building for many many years. In 2015 while the Old Post office was closed due to earthquake issues the CCC Service Centre occupied a PortaCom. Without community consultation CCC attempted to move the Service Centre to the Akaroa Museum. This contravened the District Plan for listed historic buildings. Subsequent community consultation found 93% of respondents wanted the Service Centre to remain in the Old Post Office. After CCC spent \$984,407 to repair the Post Office Building it once again became the permanent location of the Service Centre.

In January 2021 the Service Centre was relocated in the School/Community Library. Moving the Akaroa Service Centre in January 2021 was contrary to public consultation outcome in 2015. This move has been stated as a 6-month trial (Jan – June 2021) where upon the use will be analysed, which runs counter to the decision in the LTP to close the centre.

While the relocation of the Akaroa Service Centre and/or the removal of the Service Centre Desk located at the Akaroa School/Community Library is contrary to the Banks Peninsula Community Board Plan 2020-2021 and Council policies. The Banks Peninsula Community Board was not consulted, this decision was neither open, transparent, or democratically accountable (as per the CCC Principles stated in the 2020 Strategic

Framework). Again, CCC staff have made decisions without public consultation, discussion, or providing evidence or alternatives, all of which are required by the Local Government Act.

The only remaining avenue for ratepayers to comment on the closure of the Service Centre is by writing a Long-Term Plan submission.

### **Decision sought.**

The ratepayers of Akaroa and the Bays ask Christchurch City Council to reinstate the Akaroa Service Centre in the historic Post Office Building with adequate staff, well trained and locally based, to ensure ratepayers in the Akaroa area and the Bays can continue to be well informed, active citizens fully engaged with and participating in community and civic activities within the wider Christchurch district. The Information Centre and Postal services should be relocated into the facility as it was prior to the earthquakes in 2010.

### **The Reasons are as Follows:**

The Akaroa Service Centre, located in the historic 1914-15 Post Office building, provided an active Citizens Hub in a Council building that was specifically refurbished (\$984K +) to meet the requirements of the community and the post-quake building code. This historic, listed building was an effective central location for our community, that met the community needs (including a virtual meeting room), instilled resilience, and it was a source of pride.

Direct engagement with locally based Council staff is critical for the wellbeing of the community many of whom are retired and/or elderly. A community where internet service can be poor if at all, and a number of ratepayers do not have computers. The Service Centre allowed ratepayers to engage directly over complex issues with Council staff who had an in-depth local knowledge.

The decision to transfer the Service Centre from this central location of a dedicated building to the Library in January 2021 did not follow a formal consultation process. The Council is in breach of its statutory duty to undertake appropriate engagement and consultation, in accordance with Council policies and the Local Government Act.

### **Issues with the Service Centre at the School/Community Library**

- The Akaroa School/Community Library, is a small structure of approximately 180 square meters, adding the Service Centre restricts the ability of the Library to provide the same level of service to students, ratepayers, visitors and Library staff, due to the lack of available space. There is no room for the Council information to be displayed or stored eg District Plan, Have your Say fliers
- There is no private area in the Library where ratepayers can discuss problems with staff, nor is there space to construct a virtual meeting room. Should these services be added staff would lose their open plan office/tearoom and students would probably lose their small research and reading space.
- One Librarian has been trained – for the 6-month trial, offering split hours – 5 per day, 5 days a week.

It is taken that the last decade of earthquakes and now COVID-19 has impacted severely on CCC income. If the assessment of transactions and face to face interactions focused on the past 12 months for the stated closure of the Akaroa Service Centre in the LTP 2021–2031, it is unlikely to be accurate data. COVID-19 which closed borders, mandated lockdowns, social distancing, and limited travel has specifically impacted our remote community. COVID-19 may have provided the means to remove Customer Service from Akaroa as a cost saving exercise, if so, it is very short sighted. Post COVID, international visitors are likely to return in the next 2-5 years, Akaroa and the Bays need to be set up and ready to accommodate greater activity for the economic stability of the area to secure and support the resilience and wellbeing of the community.

CCC staff stated at public community board meeting in Akaroa (15/3/2021) that the Post Office building is a CCC asset and there is no intention of selling it. But they do not know how to use it and would like the community to assist with a use/s. We invite the Council to join the community in achieving a positive and on-going future for the refurbished historic, listed Post Office building at the centre of our community.

We suggest that this should include:

- Relocating the CCC Service Centre, the Information Centre, the Postal service, and Post Office boxes back to this building, which is in the centre of Akaroa and it was specifically designed for that purpose, including disabled access and parking.
- Locate an ATM machine to the side of the building once the BNZ closes in April 2021.
- Any other compatible community service that would help to support the ongoing running and maintenance costs for this facility. This could include government departments such as the Ministry of Social Development offering various advisory services for a few days each month. The Department of Conservation is another possibility, offering advice on pest eradication and beneficial planting.

Thank you for your consideration.

### Feedback

#### 1.1 Have we got the game plan right?

More investment in East side of city, particularly

New Brighton Mall area revamped to make it an attractive shopping and business area for all residents to enjoy as once was a popular seaside community in its heyday. Also areas of Burwood, Parklands and Queenspark need life and revamping which is looking run down and tired. Which attracts street crime, youth boredom, etc.

#### 1.2 Rates

Recoup revenue from building and resource consents from wealthy property developers and foreign companies like Cloud Ocean Water who are depleting our natural water aquifers for own profits. Instead of increasing our rates and also charging us excess water charges. Companies like Cloud Ocean Water should be heavily taxed or made to pay excess water charges that will protect and upgrade the whole of Christchurch and wider Canterbury drinking water, stormwater and waste water systems. Why should locals pay and not these foreign and wealthy companies, this does not make sense!

With the upcoming changes in the Resource Management Act, this should not be allowed to happen and no more resource consents be issued for foreign or any company to profit from our natural resources. Stop ECAN from issuing these resource consents and licenses.

#### 1.3 Proposed changes to existing rates, and new targeted rates

As above, wealthy property developers, land owners such as farmers and foreign companies like Cloud Ocean Water should pay for the main proposals of upgrading our water systems, roads/footpaths, climate change emissions including nitrogen and land drainage. Stop irrigation as it is depleting water from our rivers.

#### 1.4 Investing in upgrading and protecting our city's water networks

Foreign water companies need to foot the bill of the whole upgrade and protection of Canterbury's water, storm water and waste water systems not local rate payers.

Also i would like to see fluoride added to Christchurch and Canterbury water in order to reduce tooth decay, especially amongst children and the elderly.

#### 1.5 Investing in our transport infrastructure

Encouragement of carpooling systems and apps.

Make public transport affordable for all residents especially children, students, workers and the elderly.

More emphasis on making cycling safe around Christchurch with more bike lanes, children able to ride on footpaths accompanied by parent and protection against bike thefts with heavy penalties and incentives like spot prizes/competitions for bike use.

#### 1.6 Rubbish, recycling and organics

Larger green organic bins for all Christchurch residents free of charge to encourage gardening, as we are a Garden City and should be a leader in our organic waste management.

#### 1.7 Our facilities

More community facilities provided to East side of Christchurch, especially New Brighton, Burwood, Queenspark and Parklands as whole area needs revamping. This will make places more attractive for local residents and a place to visit like New Brighton in its heyday with Shopping mall and it will make residents proud of their local community. This will lower crime and poverty in the area.

#### 1.8 Our heritage, foreshore and parks

Repair and develop New Brighton area to its former glory. Especially the Shopping Mall to attract local shops and business back to the area.

Cycle tracks and lanes leading to our foreshores, beach areas from inner city for families to make a day to cycle out to New Brighton or North Beach.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

Invest in developing local artists and their crafts rather than the elite.

The Arts Centre and Art Gallery should be used for all local artists to show and sell their craft by making it affordable for all. Make it a cooperative for local artist and craftspeople. They can manage and fund the costs themselves also applying for government funding and grants like Lotto  
Bring back the markets and food stalls too.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

Apply for Central government funding and grants like Lotto rather than ratepayers.

#### 1.11 Potential disposal of surplus Council-owned properties

Protect the heritage buildings by selling and transfer to Heritage NZ or Historic NZ or similar.

If the surplus buildings are not being used or put to good use, sell them.

### Feedback

1.1 Have we got the game plan right?

I love the CCC emphasis on cycleways. For me, the more the better, plus walkways that link communities.

I also want to see a first class bus service. Sadly the current bus system is not competitive against traveling by car. We need a bus system that encourages many more people to use it. For example, through a comprehensive park and ride system, many express buses, and more bus only lanes. For example, the trip from Sumner to the CBD takes much longer than it did pre-earthquakes. I am disappointed that I do not have a copy of the old timetable to provide the journey data. But the electronic sign on the Causeway shows a typical journey time by car of about 12/14 minutes into the CBD. Sadly the bus takes at least twice that time. It is not competitive. I would like a first class bus system.

1.2 Rates

It looks like it is needed, a necessary evil.

1.3 Proposed changes to existing rates, and new targeted rates

I do not yet support the water rate as planned. I liked what ECAN did re log burners, ie, they used education (then regulation) as the initial approach to encourage home owners to reduce their air pollution. I would like CCC to use a similar approach, ie, identify the high users (the top 20% of users, which may mean much more than 50% of water used) and encourage those high users to change their ways.

1.4 Investing in upgrading and protecting our city's water networks

Necessary evil. I love chlorine free water. I have to buy bottled water when I leave Chch.

1.5 Investing in our transport infrastructure

I love the CCC emphasis on cycleways. For me, the more the better, plus walkways that link communities.

I also want to see a first class bus service. Sadly the current bus system is not competitive against traveling by car. We need a bus system that encourages many more people to use it. For example, through a comprehensive park and ride system, many express buses, and more bus only lanes. For example, the trip from Sumner to the CBD takes much longer than it did pre-earthquakes. I am disappointed that I do not have a copy of the old timetable to provide the journey data. But the electronic sign on the Causeway shows a typical journey time by car of about 12/14 minutes into the CBD. Sadly the bus takes at least twice that time. It is not competitive. I would like a first class bus system.

1.8 Our heritage, foreshore and parks

I am not sure where Red Zone land comes into the LTP, but I am keen for CCC to enable use of this wonderful asset. That includes the Port Hills red zoned land.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

Unless there is a real plan for the building. It seems to be surplus to requirements, and hidden away. Could CCC downsize into it?

1.11 Potential disposal of surplus Council-owned properties

Sell them, if there is no plan to use them.

Attached Documents

File
No records to display.

### Feedback

1.2 Rates

I think this is feasible given all the priorities.

1.3 Proposed changes to existing rates, and new targeted rates

I think these targeted rates are warranted.

1.4 Investing in upgrading and protecting our city's water networks

As long as we can have un-chlorinated drinking water as soon as possible.

1.8 Our heritage, foreshore and parks

This is very important to me as a ratepayer.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

I would also endorse sustained funding for the arts centre to ensure its buildings are all completed including the old dux and that it has adequate resources to staff the site.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

1.11 Potential disposal of surplus Council-owned properties

I don't think they should be disposed. Am sure the public will offer good suggestions for what they could be used for, especially involving community engagement. Very small part of the council's property portfolio - if money is needed larger assets could be sold.

**Re: Closure of the Akaroa Service Desk as per the Draft Long-Term Plan 2021-31**

**Introduction** - The Christchurch City Council policy statement about Banks Peninsula says:

**Our vision:** Banks Peninsula is home to many unique, thriving settlements as well as being a valued place for locals and visitors from the region, country and overseas to recreate, explore and unwind. Our focus is to enhance environmental, cultural, social and economic well-being so that the Peninsula is a vibrant and reviving place to live, work and visit.

Yet the 2021-2031 Draft Long-Term Plan page 58 indicates that the Akaroa Service Desk is to be closed. The reason given is due to minimal transactions.

Akaroa and the Bays collectively are a remote community, at least 75 km from the outskirts of Christchurch City and a 90-minute drive from the CBD. While the City offers a diverse range of activities and public services to the metropolitan residents, Akaroa and the Bays must be largely self-sufficient and self-reliant regarding employment, education, recreational activities, entertainment, shopping and health care.

The long-term sustainability, resilience and wellbeing of Akaroa's and the Bays communities, is important. If Akaroa and the Bays are to survive economically in coming years, then the local Council services must be maintained at an adequate level. In fact, this is a critical foundation stone for the resilience and wellbeing of the community, for both current and future generations.

A Council's ( Akaroa County Council, Banks Peninsula County Council and Christchurch City Council) presence in Akaroa has been located in the Historic Post Office Building for many many years. In 2015 while the Old Post office was closed due to earthquake issues the CCC Service Centre occupied a PortaCom. Without community consultation CCC attempted to move the Service Centre to the Akaroa Museum. This contravened the District Plan for listed historic buildings. Subsequent community consultation found 93% of respondents wanted the Service Centre to remain in the Old Post Office. After CCC spent \$984,407 to repair the Post Office Building it once again became the permanent location of the Service Centre.

In January 2021 the Service Centre was relocated in the School/Community Library. Moving the Akaroa Service Centre in January 2021 was contrary to public consultation outcome in 2015. This move has been stated as a 6-month trial (Jan – June 2021) where upon the use will be analysed, which runs counter to the decision in the LTP to close the centre.

While the relocation of the Akaroa Service Centre and/or the removal of the Service Centre Desk located at the Akaroa School/Community Library is contrary to the Banks Peninsula Community Board Plan 2020-2021 and Council policies. The Banks Peninsula Community Board was not consulted, this decision was neither open, transparent, or democratically accountable (as per the CCC Principles stated in the 2020 Strategic

Framework). Again, CCC staff have made decisions without public consultation, discussion, or providing evidence or alternatives, all of which are required by the Local Government Act.

The only remaining avenue for ratepayers to comment on the closure of the Service Centre is by writing a Long-Term Plan submission.

### **Decision sought.**

The ratepayers of Akaroa and the Bays ask Christchurch City Council to reinstate the Akaroa Service Centre in the historic Post Office Building with adequate staff, well trained and locally based, to ensure ratepayers in the Akaroa area and the Bays can continue to be well informed, active citizens fully engaged with and participating in community and civic activities within the wider Christchurch district. The Information Centre and Postal services should be relocated into the facility as it was prior to the earthquakes in 2010.

### **The Reasons are as Follows:**

The Akaroa Service Centre, located in the historic 1914-15 Post Office building, provided an active Citizens Hub in a Council building that was specifically refurbished (\$984K +) to meet the requirements of the community and the post-quake building code. This historic, listed building was an effective central location for our community, that met the community needs (including a virtual meeting room), instilled resilience, and it was a source of pride.

Direct engagement with locally based Council staff is critical for the wellbeing of the community many of whom are retired and/or elderly. A community where internet service can be poor if at all, and a number of ratepayers do not have computers. The Service Centre allowed ratepayers to engage directly over complex issues with Council staff who had an in-depth local knowledge.

The decision to transfer the Service Centre from this central location of a dedicated building to the Library in January 2021 did not follow a formal consultation process. The Council is in breach of its statutory duty to undertake appropriate engagement and consultation, in accordance with Council policies and the Local Government Act.

### **Issues with the Service Centre at the School/Community Library**

- The Akaroa School/Community Library, is a small structure of approximately 180 square meters, adding the Service Centre restricts the ability of the Library to provide the same level of service to students, ratepayers, visitors and Library staff, due to the lack of available space. There is no room for the Council information to be displayed or stored eg District Plan, Have your Say fliers
- There is no private area in the Library where ratepayers can discuss problems with staff, nor is there space to construct a virtual meeting room. Should these services be added staff would lose their open plan office/tearoom and students would probably lose their small research and reading space.
- One Librarian has been trained – for the 6-month trial, offering split hours – 5 per day, 5 days a week.

It is taken that the last decade of earthquakes and now COVID-19 has impacted severely on CCC income. If the assessment of transactions and face to face interactions focused on the past 12 months for the stated closure of the Akaroa Service Centre in the LTP 2021–2031, it is unlikely to be accurate data. COVID-19 which closed borders, mandated lockdowns, social distancing, and limited travel has specifically impacted our remote community. COVID-19 may have provided the means to remove Customer Service from Akaroa as a cost saving exercise, if so, it is very short sighted. Post COVID, international visitors are likely to return in the next 2-5 years, Akaroa and the Bays need to be set up and ready to accommodate greater activity for the economic stability of the area to secure and support the resilience and wellbeing of the community.

CCC staff stated at public community board meeting in Akaroa (15/3/2021) that the Post Office building is a CCC asset and there is no intention of selling it. But they do not know how to use it and would like the community to assist with a use/s. We invite the Council to join the community in achieving a positive and on-going future for the refurbished historic, listed Post Office building at the centre of our community.

We suggest that this should include:

- Relocating the CCC Service Centre, the Information Centre, the Postal service, and Post Office boxes back to this building, which is in the centre of Akaroa and it was specifically designed for that purpose, including disabled access and parking.
- Locate an ATM machine to the side of the building once the BNZ closes in April 2021.
- Any other compatible community service that would help to support the ongoing running and maintenance costs for this facility. This could include government departments such as the Ministry of Social Development offering various advisory services for a few days each month. The Department of Conservation is another possibility, offering advice on pest eradication and beneficial planting.

Thank you for your consideration.

### Feedback

1.1 Have we got the game plan right?

My submission is in relation to the Targeted Land Drainage Rate.

I do not live in the Christchurch City Council Rating area, my rates go to the Waimakariri District Council and through that to ECAN, therefore I am paying the ECAN part of the cost of Land Drainage.

I pay rates on the property affected by the proposed new targeted rate:-

1. The property affected by the proposed rating plan is a family bach for which no-one who uses it is asked to pay any fee. It does not make a profit.

2. The Christchurch City council does not supply any drainage to the property.

3. The Christchurch City Council does not supply any sewerage disposal facility to the property - we have to pay for that ourselves. This is despite the promise made a few years ago that this would be provided and was subsequently axed when the Wainui residents were not prepared to pay the cost ourselves.

4 The Christchurch City Council does not supply a rubbish, green waste or recycling collection service to the property - we have to do this ourselves and pay any costs incurred.

5. The Christchurch City Council does not supply any street-lighting.

All of the above services are listed as council services which are paid for through our rates. Since we are paying for these services which we are not receiving I feel that it is unjust to expect us to pay more rates for yet another service that we will not receive.

That completes my submission.

### Feedback

#### 1.2 Rates

Yes, rates increase is necessary to ensure all projects continue.

#### 1.7 Our facilities

I am a kaiako of Year 0/1 children at a Christchurch school. I am concerned about the proposal to reduce funding to the Art Gallery for school groups. We use the education service offered by the Art Gallery by taking our class to the Gallery every year. It is an affordable cost for all children/families (at \$2 per child) and is a great way to introduce them to the Arts in our community. The Art Education programmes offered by the Gallery are always popular and often need to be booked a Term in advances. The educators offer a range of lessons that I am not able to replicate in the classroom. Any reduction in funding to this programme will have a significant impact on the Arts education for Christchurch tamariki.

### Feedback

1.1 Have we got the game plan right?

To Whom may concern,

Today i came home from work to find this letter in my mail box,regarding a proposal for a long term plan for 2021-31>

We are fully shocked what this means to us. We live in Birdlings flat, non of the areas you have said affect us not at all.

WE ALREADY PAY FOR OUR SEWER TANK TO BE CLEANED ONCE A YEAR,

WE ARE ON LIMITED WATER ,NO MATTER WHAT THE TOWN SUPPLY PROBLEMS ARE

WE DONT HAVE ANY CONCRETE CURBS DOWN ARE STREET OR OUR NEXT STREET.

WE DO NOT EVER GET ANY FLOODING IN BIRDLINGS FLAT

WE HAVE TO TAKE OUR RUBBISH TO A RUBBISH DUMP, BECAUSE YOU DO NOT SUPPLY A PICK UP TRUCK , LIKE YOU DO IN TOWN.

WE ARE ALWAYS GETTING POWER CUTS IN BIRDLINGS FLAT

WE DO NOT GET ANY OF YOUR SERVICE THAT YOU ARE WANTING TO CHARGE FOR.

WE FEEL THAT YOU ARE MAKING US PAY AND OUR NEIGHBOURS HOUSES A SERVICE THAT YOU DO NOT PROVIDE FOR,

WHY WOULD ARE RATES NEED TO GO UP EVEN MORE WHEN YOU DO NOT HELP US IN THE FIRST PLACE. WHY CHARGE US FOE ALL THIS EXTRA ECAN

PLEASE EXPLAIN THIS TO THE BIRDLINGS FLAT PEOPLE , WE AS LITTLE NEIGHBOURHOOD NEED TO GET THIS SORTED.WE ARE NOT FARMERS,

THIS IS SHOCKING TO SEE SUCH BEHAVIOUR FROM A COUNCIL THAT DOES NOT HELP US IN THE

FIRST PLACE.

TAKING MORE MONEY FROM US TO HELP THE TOWN PEOPLE WHEN YOU DONT HELP THE SMALL COMMUNITIES,

WE DONT ARGEE

RACHAEL AND TREVOR BATHWE

1.2 Rates

WE DO NOT AGREE AS I HAVE SAID YOU DONT GIVE US ANY SERVICE IN BIRDLINGS FLAT.

WE PAY FOR OUR OWN SEWER TANKS TO BE CLEAN . WE ARE ON LOW WATER SUPPLY NO RUBBISH TRUCK IN OUR STREET

WHAT THE HELL ARE WE PAYING FOR ????????????????????

1.6 Rubbish, recycling and organics  
GET AB RUBBISH TRUCK DOOR TO DOOR SERVICE, FOR BIRDLINGS FLAT MAKE THAT CHANGE

### Feedback

1.7 Our facilities

I was deeply concerned to hear the proposed cuts to the Christchurch Art Gallery education programme.

This programme is a wonderful resource for the children and teachers of Christchurch.

While the children are provide with great art activities to compliment their visit, it is encouraging and teaching them to be art appreciators in the future.

For many children it is their first visit to the Gallery but many have made returned with their parents and family.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

Why is the consultation opened on 12th March 2021, letter mailed to affected properties is dated 30 March 2021 and submissions close on 18th April 2021. Council certainly has cut down the time frame residents have to give their submissions in. Are they hoping residents will miss the deadline?? Some residents will miss the deadline to put in a submission because of holidays or extenuating circumstances.

Our property;

- We already pays towards the Halswell Dge Class D, - if this new rate comes into force we will be paying twice
- We have no footpaths, no sewer, no water supply, we don't have problems with flooding or drainage, yet we are expected to pay rates towards these
- Why would charges be related to the value of the property. The value of property does not relate to the amount of water drainage required. A low value, large dwelling requires more drainage than a high value small property.

If a property does not use the land drainage service then why should it pay for it, let alone twice.

### Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

RE: RATES FOR CENTRAL CITY WASTE COLLECTION

I support the submission from the Atlas Quarter Body Corporate in relation to rates for the collection of solid waste.

While we support the Council's strategic goal of reducing solid waste but object to having pay \$300-\$400 per year in rates for the collection of the red, green and yellow bins when the Council does not provide this service to us. In the absence of Council providing this service, we pay privately through our Body Corp Levy for waste collection by EnviroWaste. We support waste minimisation and have all the same waste streams (green, yellow and red) as the Council provides.

**I ask that the Council either:**

1. **reduce the general rate and waste minimisation levy for developments such as ours to reflect that no waste collection is provided, or;**
2. **amend your service contracts to provide the waste collection service.**

The Council's usual three-bin residential system is impractical and undesirable in this style of higher density residential development. There is no-where to store the 339 bins that would be required for all 113 residential units (they would not fit in the waste storage rooms). Putting 226 bins (green waste plus either recycling or rubbish) onto the street each week for collection would be unsightly and nightmare for Council contractors, residents, pedestrians, vehicles and neighbouring businesses.

**thank you**

### Feedback

1.1 Have we got the game plan right?

I agree that the drainage costs must be fairly shared amongst all properties in CHC. However, at my property in Charteris Bay, I have a covenant requiring a stormwater retention tank to assist with discharge rates into the public system which is already an additional cost to install and maintain. I would agree to paying the additional rates only if I can get a rebate/discount by installing a retention tank. If not possible, I would question whether the covenant can be relaxed as I'm strongly against paying twice.

1.2 Rates

i believe this is too high given CPI is significantly lower. Salaries can't keep up.

1.3 Proposed changes to existing rates, and new targeted rates

i believe water should be included in the rates should a threshold be exceeded.

1.4 Investing in upgrading and protecting our city's water networks

Fair balance.

1.5 Investing in our transport infrastructure

Fair balance. Would be good to see innovative alternative solutions to existing transport methods. Especially in the EV space.

1.6 Rubbish, recycling and organics

Fair balance.

1.7 Our facilities

Strong advocate for good community centres and council facilities.

1.8 Our heritage, foreshore and parks

Fair balance

### Feedback

#### 1.7 Our facilities

I would really like the mobile library service to be saved. As a child this service was very important to me when I had a parent who was very ill and who was unable to take me to the library. Is this purely a cost cutting mechanism? I'm sure there are regular users of the service who would pay an annual subscription fee if they are on at least a medium level income. If anything I think the mobile library service could be creatively expanded. I work with tamariki and whānau in many of our city's most socially deprived areas. Many of these children do not have access to books in the home and this has serious consequences on their future success. Please save the mobile library!

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

The CCC has an obligation to install base isolation to the Robert McDougall Art Gallery. This building is suitable not only for exhibiting artworks but also other public functions.

1.11 Potential disposal of surplus Council-owned properties

The NG building should be retained even if it needs to be moved from its current site. We have lost so many of our heritage buildings and definitely need to retain those that are remaining. We don't want a sterile city with only large and little boxes, there are already too many with all the apartment blocks in the CBD.

1.2 Rates

Rates rise, AGAIN..

I come home from a days work, it's been a tough year and still we have uncertainty looming.

And with a single income squeezed to nothing, no disposable income to speak of.. most of the income goes on rates and taxes well done ccc.

I've just read your three or four A4 page relating to rates rises.

In the last 3yrs the rates have gone up \$400+

I'm starting to ask myself what do I get for these rates, my bins are emptied less frequently than my work my work colleague in all the district's.

I'm not on mains water.

I'm not on mains grey water

I have to contact the CCC every year to get the 2 foot long grass cutting done or nothing would get done at all! its pathetic.

There's no walking paths you speak of to maintain.

The roads omg the roads... and Subsequent repairs to the roads are poor at best.

There is no local tip in my area

In fact this virtually nothing that the Christchurch County Council provides in this area that the rate payers are paying for..

So go ahead take take take... I've expressed my opinion I think the council should be appalled at rates rise its disgusting.

If a CCCouncil needs to make more revenue, why doesn't it do what most companies do? and look at itself and

get rid of the Deadwood at the top! and stop paying obscene salaries.

Most of us know of people have lost the job's this last year and some of us are just hanging on.

Good Job CCC

1.1 Have we got the game plan right?

It is absolutely imperative that we save and promote the art centre! Considering that the council subsidises the Art Gallery at an estimated rate of \$26.00 per person, it is ludicrous to not invest in one of our very few remaining heritage sites that has so very much to offer. In two years UC will celebrate 150 years and that story started right there in the Art Centre - it is as much a part of Christchurch as the Cathedral, if not more so as it is not bound by religious pretence.

Please, please, please help us to keep this story alive and the remaining history of Christchurch protected.

1.2 Rates

I think with the way house prices currently are going that this decision needs to be delayed a little longer to see if things settle or continue to spike.

1.3 Proposed changes to existing rates, and new targeted rates

No one enjoys paying rates, however, as compared to places like Nelson, Christchurch isn't currently doing too poorly.

1.4 Investing in upgrading and protecting our city's water networks

this is a valid concern; we do not want to become like wellington

1.5 Investing in our transport infrastructure

buses are getting too expensive; I would like to take the bus to help the environment, however, it actually is far cheaper for me to drive and that includes parking.

1.6 Rubbish, recycling and organics

We need more facilities that can recycle soft plastics and a glass bottle/ can plant like they have in Australia where you get \$0.05 per bottle is another very effective way of reducing waste and encouraging recycling

1.7 Our facilities

Less funding to the art gallery - this already gets enough and is not a fair ratio of guest to government spending.

1.8 Our heritage, foreshore and parks

We have so little heritage sites left; we need at least 11% if not more to ensure we don't lose these too

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

### Feedback

1.1 Have we got the game plan right?

We have two properties in Birdlings Flat and have received your letter of 30th March, 2021. We strongly object to a proposal to increase rates by adding a drainage rate. In our situation this is not ethical.

In the village of Birdlings Flat (wherein we have two properties, one being kept natural) there is no drainage infrastructure. There are no drainage gutters, or drainage pipes. These are not needed. There is no drainage problems.

Furthermore, there is not a deep sewerage system (only septic tanks), no rubbish collection (although we pay rates for this service) and no footpaths and we are very happy with this lifestyle, as it is a lifestyle under threat. The only CCC services provided for us here are water and electricity supply.

We add that we never go into ChCh CBD. We go to Lincoln for goods and services.

Respectfully,

Clark Nicholson and Kathy Kise Nicholson

### Feedback

1.1 Have we got the game plan right?

Personally, I would like to see a drop in the rates to be paid as I view some of the projects purposed unnecessary.

1.2 Rates

Personally, I would like to see a drop in the rates to be paid as I view some of the projects purposed unnecessary.

1.3 Proposed changes to existing rates, and new targeted rates

I disagree with our rates to be used for the Arts Centre &/or for heritage buildings. This should be left for the private sector as it is more efficient with costs, etc.

I also disagree with charging for the use of water. Instead of doing this more money can be spent on fixing the water supply pipes. What I am aware of, currently 20% of water is lost daily from the broken water supply pipes. Another idea is drilling down to the depth of water where businesses are taking it to ship off overseas. Perhaps even stopping the taking of water for commercial use. That way there will be plenty of water for Christchurch & its surrounding area for local use without charging for it. I would hate to get into the situation where we will have to buy the water back from overseas in order to drink or to use for cleaning purposes when we have it in the first place for free from nature. (Except for the cost of pumping & piping it ourselves.)

1.4 Investing in upgrading and protecting our city's water networks

I agree this has to happen since a lot of damage was cause from the earthquakes.

1.5 Investing in our transport infrastructure

I think some of this has to happen to help reduce carbon emissions. However, I believe we do not need to spent so much money. I see in the eastside of Christchurch with the cycle ways they are not been used - except by school children. (An idea is having more electric buses to reduce the carbon emissions sooner. The govt. has plans to ban petroleum based vehicles by a certain year anyway.)

1.6 Rubbish, recycling and organics

I agree this needs to happen. Otherwise, we may end up with a worst situation in the future. However, I do not think we need to spent so much on the organics waste as, what I am aware of, the general public cannot use it to fertilise their gardens, etc. because of the pesticides. I believe this can just be dumped in landfills.

## 1.7 Our facilities

I think we can reduce some of the CCC services as some of it can be done online now like the paying of rates. I agree with closing the Riccarton Road Bus Lounges will be a good idea as this will reduce costs. I suggest not having so many service centres &/or libraries too. With this we can reduce costs by not having so much staff & not having a duplication of services at the Civic Building.

## 1.8 Our heritage, foreshore and parks

I disagree with the CCC funding of private development heritage buildings. This should be left to the private or volunteer sectors to fund. I do not like how my rates are going to be spent in this manner. For example, from my perspective, the Cathedral in the Square can be pulled down to be replaced by something more multi-functional or left for the Anglican Church to look after.

However, I do agree with the funding of parks & the foreshore as these are important recreational facilities. It is important for people to get outdoors.

## 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

## Comments

I think this should be in the hands of the private sector as it tends to be more efficient with costs, etc. I do not think the CCC should be involved here.

## 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

## Comments

I think this building could be sold off instead. The govt., private or social sectors can make better use of it.

## 1.11 Potential disposal of surplus Council-owned properties

I agree with the disposal of surplus properties. The govt., private or social sectors can make better use of them.

## 1.12 Any other comments:

As you can gather I am unhappy with paying more rates for services & projects I do not agree with. I have always felt the CCC does too much & should just focus on the basics like: water & waste, parks & recreation, dog & noise control, infrastructure and building consents. I believe it should not get into heritage, social housing or building big projects like the Linwood Pools, QE2, etc. I believe all of this is better left to the private or social sectors as they tend to provide a better service at a lower cost. Thus, in order to save money & to reduce the rates being paid I would like to see the CCC social/city housing, Linwood Pools, etc., sold. I also would like to have the fireworks at the New Brighton Pier cancelled.

I understand my perspective will upset some people as it will not reinforce their worldview, so sorry about this. Please, be aware rates always go up but people's incomes do not keep pace with them. I struggle to make my ends meet without the rates increase adding to my stress. Thank you for allowing me to express my situation & I hope you understand where I am coming from.

I also understand that all of this is extremely detailed to organise & to come up with, so I thank everyone for all of the work that has gone into it.

### Feedback

1.1 Have we got the game plan right?

would like to see laws implemented regarding light pollution. You do have them in your rules and regulations, but not implemented.

Controlling light pollution saves money and protects the environment.

Areas like woolston, where there are wildlife reserves are sensitive to light pollution, and needs to be controlled, so their environment is protected and kept as natural as possible.

The white LED'S that are being installed, a lot of research is coming to light, they are harmful to us and the environment. Even our health system is stating the harmful effects of LED lighting.

They are cold and let out a lot of glare. The most comfortable on the human eye is around 2700k, our streetlights are fitted with harmful 4000k and, research is proving they disturb our sleep patterns, and maybe causing eye issues and leading to more these days needing glasses due to the harsh blue and white LEDS.

I have seen bird and heard them singing at night when they should be asleep. Lighting at night is not good for the environment but the impacts can be reduced by using 2700k lighting and properly shield.

I propose in areas where there are wild life areas you have dimmer LED lighting, properly shield from glare and a mix of 2700k.

Also Christchurch would benefit from being an even more tourist city if we controlled light pollution enough to see the stars.

Many had already before covid, traveled to the dark areas to see the stars and a tourist attraction.

A city like Christchurch would benefit from having light pollution regulations to be able to see a darker sky and would bring millions or extra dollars, if everyone knew CHCH had light pollution regulations and could see the stars in all their glory like they used to when I was a kid.

Also Controlling light pollution is the easiest to control with instant benefits. It saves power and our carbon foot print.

also why the need to have lighting on at all when no one is around?

Areas with low traffic could be controlled with either light dimming technology or motion sensor technology saving Christchurch even more money.

I also propose unnecessary lighting like advising and buildings lite up have a curfew, say off after 9 or 10pm.

this has happened in other cities around the world and light pollution awareness is becoming more known as more cities have come to realize bad lighting practices waste money, and increase our carbon footprint.

You are always looking for ways to save money, and controlling light pollution does this by using intelligent lighting practices, directing light were in needs to go, not up into the sky wasting money.

Light pollution is like everyone leaving their taps on all night wasting water.

How would you feel if everyone left their taps on all night wasting water?

This is happening at night with lighting. Motion detection lighting should become part of our light pollution regulations were practical.

Its not just ourselves we should be thinking about, but the wider picture the environment. You seem more concerned about saving money than protecting the environment and controlling light pollution when its been shown to be harmful to us and environment.

I others have bought up this issue and been frankly ignored.

Here isca link from our health system stating the harmful effects of LED lighting. While it is mostly about indoor lighting the exact same principle applies to outdoor lighting.

<content://com.sec.android.app.sbrowser/readinglist/0411222102.mhtml>

When our own goverment states LED lighting is bad for us, should this not grab your attention?

if you care to research there are many resources stating how lighting impacts us. Your clearly only listen to those whos interest is in selling you unreseached lighting, based on poor design for our environment. They are only interested in making money.

Cutting back on light pollution saves you money, even better designed LED and designed to put all the lighting downwards save you money and can reduce wattage even further. Glare is frankly dangerous at night and makes the city look ugly.

a light controlled environment not only looks good, but easier to see at night.

How about not ignoring light pollution and take controlling it seriously, saves everyone money and helps reduce our carbon foot print and a reduction on climate change.

you don't want every home own leaving their taps on all night wasting water and would soon put a stop to it, so why are you letting waste lighting happen?

Same situation.

1.2 Rates

not good, any increase is not good for anyone. Hense if you had light pollution controls would go to some way of the need to reduce rate cost. Also controlling light pollution would bring far more people into Christchurch as tourist. You also win.

A 4 or 5% increase is far above inflation and should be capped to inflation and wage rates

1.5 Investing in our transport infrastructure

investing in a decent public transport system saves money. decent public transport system would mean more cars off the road, saving everyone money and reducing congestion, road maintenance and even new roads which are not the answer, decent reliability public transport is the answer

1.3 Proposed changes to existing rates, and new targeted rates

Good Morning, and thank you for the opportunity to air my views.

Firstly, may I bring to your attention that the letter ALL Birdlings Flat residents received re the Land Drainage Targeted Rate was dated 30th March 2021. I received my letter on 9th April, and as I write, many others are reporting NOT getting their letter yet. Receiving the letters with little time to think, discuss, research and submit a reply! On our local Resident's Facebook page, information has been shared regarding the legitimacy of the 'consultation process', ie: that the CCC is being seen to be asking our opinion, but has in fact all ready made up it's mind. Consultation meetings have already been held on the Peninsula, in March and at the beginning of April, before we received this letter.

Here in Birdlings Flat there is no flooding, surface or otherwise. There are no drainage issues as a result of rainfall. When it rains heavily there are flooding/surface water issues out on State Highway 75, in both directions. Over the 15 years I have lived here, there have been perhaps 5 times I was unable to either leave or return to my home because of the water across the road in either direction. The roads have been closed several times in those 15 years.

If we are going to be paying MORE on our rates bill, I would want to see something actually change about the issues I've described above. From reading the Council's letter, it seems to say that there would be NO change or improvement to existing services, or to the amount recovered from ratepayers, merely that the cost of what is already happening will be shared out to ALL ratepayers, even those of us who can't hope to access the beautifully-drained city we're paying for because SH75 is impassable in heavy rain! Doesn't make sense. Birdlings Flat does not 'benefit from land drainage', and to describe it as a 'fairer approach' seems wrong to me. There were at least two occasions during the 10 years that I worked up the road in Little River when I could not get home from work (the roads were closed with surface flooding after heavy rain). I am speaking for myself when I say that I would fully expect that kind of flooding to be addressed so it doesn't happen any more, if my rates had been increased to help with the costs of land drainage and flood protection! I'd be getting pretty irate if it wasn't dealt with.

We already pay (as part of our ever-increasing rates) for multiple things that many of us don't have a need for, don't use, and will never gain any benefit from, miles away from us in Christchurch. We live out here, not in there. Yes, we do require access to the city in differing amounts (some ratepayers in Birdlings Flat very rarely go to

Christchurch) for groceries, shopping and for some of us: work. But the Art Gallery? I've never been. Cycleways I'll never use. And don't get me started on the Halswell Library design (a building designed to look like it's fallen over in an earthquake, what thoughtless folk approved that!)

The road leading into Birdlings Flat is atrocious, fix that before asking us for money to fund things we don't use.

I am happy to be contacted for any further discussion. Birdlings Flat has a very nice new Community Hall where the residents would gladly gather to korero with the City Council over any of the issues around Rates. We get very little for our rates here, mostly funding things outside our community in Christchurch, for the benefit of others and hardly used by us. We have no footpaths, no rubbish collection, just a couple of streetlights, and that's how we like it! That is why most residents moved here, to get away from the city.

\*deep sigh\*

Thanks for your time anyhow,

Jo Cameron

#### 1.2 Rates

Building a stadium is a waste of money when there are others around the country struggling to cover their costs,

Stadia invariable go into cost over runs. Are expensive to run and fail to deliever the hype attached to them at the build stage.

Increasinglymajor live events will be held without spectators and repeats of covid like outbreaks only reinforce this

1.3 Proposed changes to existing rates, and new targeted rates  
approve of support for the arts centre and the water tax

1.4 Investing in upgrading and protecting our city's water networks  
essential

1.5 Investing in our transport infrastructure  
Not sure what the alternative to roads is but we seem trapped in a more roads,more car use, more congestion, more roads loop

1.6 Rubbish, recycling and organics

1.7 Our facilities

On behalf of the Waimairi Tennis Club we would like to make a submission to council to invest in structures at

Ngā Puna Wai Sports Hub that will help reduce the effect that the wind, especially the easterly, has on the tennis courts. At present many of our club members, and other members from other clubs in Christchurch, prefer not to play there when it is windy and would rather play at their home courts. They all like the surface of the courts and the facilities but the wind just makes it unpleasant and unenjoyable to play. Planted hedges will eventually grow but may take too long to make a difference. We ask that the council look at options to help resolve this matter before the start of the 2021/2022 season.

1.12 Any other comments:

I would like to talk about an invasive bird that pushes around native birds at every time of the year; the European Starling.

Other than the birds the starling pushes around, they also contribute to noise pollution with their horrible screeching and pollution in general with their droppings.

This is how the starling stops native birds every time of year:

Winter: The starling kicks out native Silvereyes that are trying to get as much energy as possible as the Silvereyes are cold.

Spring: The starling kicks out some native birds that nest in nest boxes, sadistically tipping out the eggs or chicks and placing their own eggs inside. At least the cuckoo only removes a single egg and still lets most of the chicks survive.

Summer: The starling kicks out Silvereyes (again) and Bellbirds trying to get nectar from flax. However, I'm not sure about the Tui as a Tui (90-120 grams) is heavier than a starling (85 grams).

Autumn: The starling gets fruits from the Kahikatea in flocks, removing all fruits in a mere few days, thus depriving Kereru, Bellbirds, Tui and yes, Silvereyes again, of a good food source throughout the winter.

The best ways to get rid of these horrible birds is to:

Put up nest box traps; when the starling goes inside, it gets trapped inside the nest box.

Use foods the starling dislikes, e.g. large fruits like oranges which silvereyes love, sugar-water, flying insects.

Use physical barriers e.g. cages, small spaces or uncomfortably positioned feeders e.g. upside down feeders so the starlings can't reach their favourite foods.

Additionally, starlings hate dense and short forests as there are no safe spots to perch or / and it is too hard to navigate.

Removing the starling from the district (and other districts like the Waimakariri District) makes it so birds like the Silvereye and Bellbird increase in population and birds like the Kereru and Tui increase in range and population.

Yes

Comments

The Arts Centre is a beacon of culture for both residents and visitors of Christchurch, and I fully support our rates contributing to ensure its safe future. The hard work already undertaken to preserve the rich history of these buildings is remarkable, and as a local, I am keen to see it completed. Perhaps, most importantly, we need to have the vision and foresight to see it thrive well beyond our generation.

### Feedback

#### 1.7 Our facilities

When baby boomers will be swamping the aged care environment in the near future, why would there be any consideration of cutting costs by removing the mobile library unit?! This is essential, as is the Outreach service. It makes no sense. The service could be more relevant, but not cancelled. Also, as an aged care worker, I readily noticed how inaccessible the central library is to aged care and those with disabilities-esp the main rotating entrance, which stops and traps people with Walker frames if they touch the door. Also why are large print books on the very top floor? All staff I spoke to in the library agree and asked me to formally comment on the poor design of accessibility for all.

If the council wants to be inclusive- be inclusive of those with disabilities who prefer to frequent such services. If they're not coming and using - it's simply because designers have not considered their needs.

I tried to email my concerns on behalf of clients a year ago- and guess what?? The email service didn't work. Typical council. I hope this gets through and taken note of on behalf of those who cant even use a computer to email themselves- or get in the main library door safely.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

The LTP proposes a targeted rate in the central city to fund the annual grant to the CCBA. Pg 39

Only "central city businesses" would contribute. The boundaries are loosely defined as an area between Kilmore, Manchester, St Asaph and Montreal street .

All business properties will be levied at the same rate. (\$276.89)

CHCH CBD has traditionally been **defined** as the area within the four avenues (Bealey Avenue, Fitzgerald Avenue, Moorhouse Avenue and Deans Avenue) and thus includes the central **city**, some less dense surrounding areas of residential, educational and industrial usage, and green space including Hagley Park, the **Christchurch** Botanic ....

**I request: that a larger area is included.** ie All the area south of St Asaph Street to Moorhouse Avenue, and Victoria Street to Bealey Avenue as well as to Fitzgerald Avenue.

**And that this modified Targeted rate is accepted.**

I suggest that by spreading the costs across the entire CBD, better representation for all the CBD will be achieved.

**I request that some performance based standards are introduced on the CCBA to account for these funds.**

1.8 Our heritage, foreshore and parks

**Heritage Incentive Grant (HIG) Scheme: (Covers Built Heritage)**

**I Request the CCC restore the Heritage Incentive Scheme grants funding to its previous level of \$750,000 when the funds of the disbanded Landmark Grants have been exhausted.(Likely to be 2023-24)**

The CCC has widened the criteria to include character buildings that are not listed. (Recently the barbed wire fence featured in the media.)

The CCC is planning to add more buildings onto the District Plan.

HIG is the "carrot" to entice owners to list their buildings.

The HIG has been used for very successful restorations of commercial Heritage buildings especially in the CBD and surrounding areas.

1.11 Potential disposal of surplus Council-owned properties

**I request that The Councillors set aside the proposed "Potential disposal of surplus Council-owned properties" and conduct a full meaningful community consultation be conducted outside the LTP.**

### Feedback

1.1 Have we got the game plan right?

I live in a neighbourhood of 36 households that were left out of the Government and Christchurch City Council funded roll out for fibre.

We are located at the top of Huntsbury Ave above Kenmure Drive and include properties on Huntsbury Ave, Westview Place and Tiroroa Lane. We are not a new development, with houses being built here since the early 1990s, and we are within the Christchurch City Hills Living Zone.

At the time of the fibre roll out when it was being laid up Hunstbury various members of our neighbourhood approached the Christchurch City Council and Enable to find out why we were not being included. Nobody could provide an answer.

We collectively approached Enable in November 2019 to ask them to lay fibre in our neighbourhood. Enable developed a network plan (August 2020) that would lay fibre to most of our properties (but not all, excluding the top properties on Huntsbury Ave). Enable are prepared to fund most of this but require our neighbourhood to fund a shortfall of \$36,000+ GST.

Enable have stated we were excluded due to a 350m gap between the edge of their network and the first property on Westview Place. Over time, this gap in the properties will be developed, and since approaching Enable, 3 new houses have been developed. Our neighbourhood is zoned for residential activities, so it should be provided with the same level of service as other areas in the city zoned for residential. It is not our fault that the landholders in this gap have not yet completed development, and the status of this private landholding should not impact on the services that a ratepayer funded CCO is providing within a zone.

A key focus of Council strategy should be to provide an equitable level of service across the city. It is unfair that we are being required to pay for fibre to our streets while the rest of Christchurch had it provided for free, paid for by our rates and taxes – we are effectively being asked to pay twice.

Fibre is going to be provided to small, isolated country towns such as Lake Brunner and Haast, while we have not been given access to it within 7km of the CBD of the South Island's largest city. It is very discouraging to see extensive Enable advertising in the newspaper and on billboards for fibre take up, while there is apparently no funding to complete the rollout.

Please support us in finding the funding for this shortfall to get fibre laid to our streets OR by convincing Enable that they can cover the full cost of the fibre layout by using their discretionary spending.

1.3 Proposed changes to existing rates, and new targeted rates

I am strongly opposed to the changes proposed in the land drainage targeted rate.

I receive absolutely no benefit from land drainage carried out by the CCC on my property.

All drainage work on my farm is carried out and paid for by me.

I seldom if ever visit any areas where the CCC carries out drainage that would benefit me.

I support alternative 2. i.e. No change to the existing land drainage rating policy.

Po

1.11 Potential disposal of surplus Council-owned properties

Im requesting that the land described as 27Hunters Rd(record of title CB12F/538,38ha, and 42Whero ave (Orecord of title CB452 /50,1-18ha be removedfrom the LTP fast track disposall. The normal process for disposal of land that would require community Board and public consultation, should be used instead.

1.12 Any other comments:

The two pieces of land should be withdrawn from the potential disposal of council land in the LTP for the following reasons A The current process does not meet the requirements of Section 82 f the local government Act 2002, principles of consultation. B Thorough community consultation to determine the best future use of the land. C Decisions on the sale of the land should not be made only by council staff, without community board recommendation. D Boundaries of the land to be sold should be determined prior to disposal to protect existing walking tracks, ie the School track and the Mt Herbet in Morgans an Sams gullies. In addition extensive replanting of native vegetation has been undertaken by by community members

### Feedback

1.1 Have we got the game plan right?

It would be a terrible loss to the community to not have a mobile library service. A lot of older adults would be very adversely affected along with children and families. People who are not able to get out and about easily would be severely disadvantaged. For many older adults it will significantly impact their quality of life. There will be less opportunity for an activity of interest which is part of who the clients are. There will also be decreased community contacts for the above groups of people.

### Feedback

1.1 Have we got the game plan right?

I do not support with any reduction in library services. Reducing library hours will limit my ability to access the library as I work full-time. Reducing hours also undermines the bookable community spaces, especially the ones in Tūranga.

I would also expect to be able to call the library on the weekend, especially days that libraries are open. Being able to receive help with digital resources even on the weekend is important to maintaining library use and membership.

Closing the mobile library will remove library services from vulnerable communities, unacceptable.

The library is one the services council that people actually like, this will reduce community engagement.

### Feedback

1.4 Investing in upgrading and protecting our city's water networks  
Introduce fluoride to the water supply as soon as possible please.

1.7 Our facilities

When will the council be replacing Godley House in Diamond Harbour? We need to have a hospitality venue on that site to provide competition to the existing pub to ensure high quality hospitality offerings to bring tourist revenue to the Ferry and Diamond Harbour. The necessary changes need to be made to allow a licensed premises to operate from some part of that site (the corner previously occupied by the Dark Star would be ideal).

1.11 Potential disposal of surplus Council-owned properties

The properties in Diamond Harbour that are listed for disposal '27 Hunters Rd' and '42 Whero Avenue' must **not** be disposed of without full community consultation and discussion. If these properties are sold to developers it will significantly change the community, the infrastructure is not in place to support developments of this size without major improvements to infrastructure including roading and wastewater. There are still a large number of vacant sections in various subdivisions in Diamond Harbour, and there is no need to add more.

### Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

## Feedback

1.1 Have we got the game plan right?

Proposed sport's stadium is a white elephant, that will be a continued drain on the city's finances. Professional sports should pay for their own facilities. The so-called economic benefit of huge sports events to the city is largely based on false economic reasoning. Only a small portion of the funds spent by spectators comes from outside the wider Canterbury region. The largest fraction comes from within the region and hence is mostly money re-allocated from other possible spending within the region.

1.2 Rates

Statement is ambiguous, unclear, sloppy. Proposed increase for 2021/22 year is 5%. Proposed overall increase of 4% for next 10 years. Is this meant to be the total increase for the entire period 2022/2032, or is it an annual increase of 4%?

1.4 Investing in upgrading and protecting our city's water networks

Yes. Water infrastructure vital to be upgraded and properly maintained.

1.5 Investing in our transport infrastructure

More and cheaper public transport with non-polluting vehicles. Disincentives for car commuter traffic through higher parking charges.

1.6 Rubbish, recycling and organics

Probably right, but alternative systems for rubbish disposal should be considered, such as operated by most European countries by charging for volume used (e.g., bag charges).

1.8 Our heritage, foreshore and parks

Moth-balled earthquake-damaged historic buildings (provincial chambers, etc.) are an eyesore. They should either be restored now or torn down, not left for another 10 to 20 years in their current state.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

Important to be restored completely and promptly, not left partially finished for years to come. Re-allocate some funds from stadium by scaling that extravagance back.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

The Robert McDougall Art Gallery is superfluous. There are sufficient other venues available. Demolish.

1.11 Potential disposal of surplus Council-owned properties  
Dispose.

### Feedback

1.1 Have we got the game plan right?

I am writing regarding the closure of Wahrenui Pool which I am fully opposed to and believe that this is a very short sighted thing to do. Wharenui Pool serves as a local option that is easy for people to get to, parking is easy and free, and the cost to use the pool and have lessons is less than other council operated pools. The Metro facility is not a good alternative for people. It requires driving or taking a bus therefore adding cost and making swimming prohibitive for people, particularly those on a smaller fixed income. Personally Metro sports will not be an option for me. I do not want to take my children into central city and deal with after school traffic plus finding and paying for parking, it is quite simply a hassle I wont bother with. I am currently nearer to Pioneer Pool and cant even get into lessons for my children there which is why we are taking lessons at Wharenui. Many people I know have been on waitlists for lessons at Pioneer for months, so pools like Wharenui are essential as clearly council cant even manage current demands for lessons as it is. I dont imagine anyone in my area are going to want to drive into town after school to take their kids to lessons either. Wharenui Pool is an important part of the community and a resource that cannot be taken away for so many more reasons than the few I have just pointed out.

# Te Mahere Rautaki Kaurera - Our Draft Long Term Plan 2021-31

## Submitter Details

**Submission Date:** 12/04/2021

**First name:** Lynda **Last name:** Goodrick

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.4 Investing in upgrading and protecting our city's water networks  
I support this investment in our infrastructure.

1.7 Our facilities

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

1.12 Any other comments:

Community funding must NOT be decreased. the cities Not For Profit sector funding from the CCC has not been increased to keep up with inflation. Last years increase for the COVID response should remain in the budget. The sector cannot run solely on volunteers which is often the response from funders.

Does the CCC have volunteers running any of your departments?

Can you imagine our city without the tireless work of this sector?

## Feedback

1.2 Rates  
see below

1.3 Proposed changes to existing rates, and new targeted rates

### RATES INCREASES

- % increases in rates are increasingly, disproportionately and unfairly burdening sectors of the community with above average valuations
- the financial burden for the property owner/s is exacerbated by the council using **Capital value** to determine the % rise
- as outlined over the 10 years of the long term plan an average value property's rates will increase by near 50% at the end of 10 years due to the cumulative % of successive annual rates increases. The compounding annual increases will be much higher for properties in higher **capital valuation** classes; increasing the burden for above average value property owners. The disparity between low and high rate payers is unreasonably large and expanding
- properties of above average **capital valuation** are not the province of people who can afford to pay more. Long term owners (of a decade or several decades) are influenced by changes in their neighbourhood that are outside their control which can change the neighbourhood's socio economic level. Many intend to live their lives out on their property and are not focused on property sale to make income. This rates apportionment drives cost increases that can force owners from their long term home
- **value of improvements** is better placed to indicate the ability of the property owner/s to afford these targetted and general rates increases
- fairer again would be the use of total CCC budget divided no of rate payers to give an average cost for a property increase

### TARGETED RATE FOR DRAINAGE

- Again a focus on **capital valuation** for rates is unfair for the reasons outlined above and I would advocate for **an average cost per property**
- In lieu of this first preference for the targeted rate allocation use of **capital valuation** has undesirable consequences compared to the **value of improvements**.
- There is currently pressure to intensify housing while this is reasonable a consequence is an increasing loss of urban green space to buildings, paths and roads; which decrease water absorbtion on site and increasing runoff and the need for drainage infrastructure
- In addition maintaining a pool of larger sections with green or open space (as opposed to housing per se) has benefits for the city. Amongst these 1. Improved local aesthetic; especially where there is already intensification of housing 2. Maintaining character and heritage homes eg Villas of late 1800/early 1900s often built on 1,000m2 sections (many replaced by town houses in recent decades). 3. Trees, shrubs and lawns on larger urban sections contribute significantly to CO2 absorbtion within the city. 4. these gardens support important individuals or populations of native and exotic trees (in keeping with the council objectives of treeing the urban environment). 5. Larger sections often conserve native biodiversity for example native trees; these are important in their own right but also provide seasonal foods for indigenous wildlife eg bellbirds circuit neighbours in spring for flowering kowhai and kereru seek winter berries & new foliage in spring; Indigenous wildlife in the urban environment should be enhanced rather than negatively impacted by cost pressure on owners to sell with

- the risk of land sub-division and loss of their habitat
- rates rises should not drive owners from their properties (especially as rates rise to unaffordable levels for long term residents) encouraging frequent sub-division and loss of green space. Targeted and general rating for urban properties should not be tied to land section size (at least up to a half acre / 2000m2) it is fairer related to the **value of improvements** or better still **averaged** across properties
- 

#### 1.4 Investing in upgrading and protecting our city's water networks

The council to identify and repair the most significant source of freshwater leaks from the domestic supply and build a system that allows coordination with other water works (storm and sewage) to reduce road upheavals etc and build efficiency

If council has influence over the allocation of ground water with ECan advocate to halt the sale of ground water overseas to reserve for NZ use, prevent CO2 emission in transport and huge waste with related packaging

Set a timeframe to reduce water leakage from the CCC network and benchmark progress to the application of the public excess water use charge

A free domestic water allocation should also relate to the land area of a property for example a family of four on 200m2 should not use exactly the same family on a 1,000m2 section. Some allocation (not excessive) to support gardens is warranted to maintain food production (resilience that may be important during crises or if low earner) and trees given their importance for CO2 absorption, biodiversity, aesthetics etc

#### 1.5 Investing in our transport infrastructure

A bike network is a good objective radiating around the city and following key features eg coast and significant rivers. On roads design for efficient use of road space; for example do not use the dangerous raised concrete strips found along Rutland and Colombo Streets these take up road space unnecessarily; use green paint and red paint well as elsewhere

I support bus and CCC vehicle fleets being quickly converted to an electric fleet with some smaller buses for less utilised routes. Encourage council staff to cycle or walk to meeting outside council chambers within specific distance from the building

How is the council thinking about vehicle and scooter battery end of life repurposing so as to avoid landfill. Support CCC capacity at the dump recycling centres; research foreign repurposing of batteries to apply to Christchurch context. Are scooter contractors bound to appropriate plans for disposal of battery and retired scooters

Support contractor provision of standards bicycles for public use

Parking to drop and pickup patients at Christchurch hospital entrance needs vast improvement; it is very stressful when people may already be infirm or stressed by medical situations

More passing pullouts for cars driving to Akaroa on both sides of the Hilltop hill (as opposed to passing lanes); these need to be sealed and well signed to improve that road's safety

#### 1.6 Rubbish, recycling and organics

Need more messaging about red bin management so on collection days small items eg plastic sleeves and bags

do not blow away along the road and subsequently enter waterways eg message house holders to place small items together into another container

Apply sanctions on coffee cups (plastic coated ) and plastic lids and other significant single use items

Encourage business to get away plastic packaging eg hardware items that are hung in sealed plastic and move to organic films and cardboard. Develop an regularly updated business directory for retailers supplying sustainable packaging and recyclable or compostable single use items (pass on to appropriate business associations). Possibly phase in penalties at retail end to encourage use of alternatives eg supermarkets still using thin plastic at produce section when could use paper bags or encourage customer bags. Encourage reuse and return schemes especially for drink bottles or maybe greater glass use if stacks up as CO2 efficient

## 1.7 Our facilities

For remote areas such as Akaroa it is many miles to a council staffed facility - maintain significant capacity there as the population structure is older and travel related to council business back to the city or Little River is CO2 emissions heavy and the roads are often busy. Combine CCC facility with other functions to result in a community hub eg i-site, post, ATM and cafe

## 1.8 Our heritage, foreshore and parks

Good re Heriage buildings

Re **Hagley Park** stop the further development of exclusive use areas; already golf, cricket and some sports courts tie up large portions and exclude public causing crowding at times.

Rubbish is a significant issue for the park (and others undoubtedly) over the years i have seen it is chopped up during lawn mowing; fractioned plastics can therefore blow and end up in the Avon and have downstream effects on the marine environment. Provide educational signage re rubbish and environmental consequences of pollution (also more widely in public spaces like the coast and parks generally). Deploy staff weekly on rubbish pick up especially pre mowing.

Expand the edible trees programme in Hagley and other parks with further plantings of hardy cultivar. Encourage other home production for resilience - Events or displays to demonstrations to children and adults how to grow some of your own vegetables and fruits.

Maintain but do not expand sealed paths; maintain the pea gravel as good alternative path surfacing for water absorption. Excellent to see mulched areas under large trees utilising leaf for nutrient recycling and soil health.

Do the council have predator control in the park - if not think whether it could be implement safely

Further the use of native plantings on the dune systems and elsewhere and provide education signs for vulnerable restoration plantings or to protect wildlife from human activity. Excellent restoration work done at Port Hills eg Bowenvale, at Travis Swamp and Otukaikino should continue around the region.

## 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Comments

Do not use capital value this is overused as a mechanism for rate revenues see section on rates

Otherwise support as long as public maintain good access to the Arts Centre (is this the case for the Town Hall? could not access just foyer during day time twice - this seems inappropriate as is a public space)

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

What is base isolation?? If the building can be used in the meantime defer its redevelopment for the museum???

1.11 Potential disposal of surplus Council-owned properties

Yes Re 2 heritage buildings only yes if the heritage characters is significantly retained (ie not turned into a facade)

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.4 Investing in upgrading and protecting our city's water networks

I support the council's resolve to keep our drinking water safe WITHOUT chlorine and without flouride, and I support the council to seek an exemption from the Government proposal in the Water Services Bill to require residual chlorine treatment.

I support the excess water use targeted rate.

I would like to see a dedicated fund for public education - including letterbox leaflets and advertisements in local media on the following issues:

I would like to propose that the council address the problem of increased use of antibacterial soap, which is washed directly into our treatment ponds and into the ocean, where these antibacterial agents are damaging the coastal ecosystem. I would like to see public education on this issue: ordinary soap is perfectly adequate for hygiene.

I would like to see public education on issues that affect our local waterways: washing cars should be done on grass, not on the driveway. Please raise awareness of washing paint and chemicals down stormwater drains and directly into our local streams and rivers: PLEASE MAKE MORE BLUE FISH (only rain should go down the drain) - and install these in residential areas!

1.5 Investing in our transport infrastructure

I support the continued development and extension of cycleways.

While the focus has been on routes into the city centre, I would like to now see cycleways connecting peripheries. For example, from Halswell Quarry to Cashmere to St Martins to Ferrymead to Sumner. And from Woolston to Brighton. And from Opawa to the Red Zone.

I support the proposed spending on bus infrastructure and improvements.

Please create incentives for families to use public transport: It is cheaper to pay for parking in town than for a family to catch the bus!

#### 1.6 Rubbish, recycling and organics

I support the spending on infrastructure.

I would also like to see some spending on ongoing public education on issues relating to waste. For example:

Heavy metals from batteries and mercury from energy-saving lightbulbs are contaminating our landfills. Please provide battery/lightbulb collection at every sales outlet!

Please provide public education (including letterbox leaflets and advertisements in local media) on the importance of safe disposal of batteries and lightbulbs.

Creating compost from organic waste is fantastic, except for the potential toxic substances in organic waste: especially common is ash from burning treated timber, which is contaminated with arsenic.

Please create an education leaflet to be provided at all sales outlets (garden centres and building supply stores) with information on treated timber and the importance of not burning treated timber offcuts.

Please produce BIN STICKERS for council rubbish bins:

e.g. NO ASH in the green bin

e.g. NO Batteries or lightbulbs in either recycling or red bin.

Raising awareness is the first step to changing behaviour.

#### 1.8 Our heritage, foreshore and parks

Afforestation / native reforestation deserves a separate mention!

Many small community groups are replanting along the Otakaro and Opawaho rivers - outside of the red zone - with some support from council. However, there is not enough council support! Council needs to employ more rangers to meet the demand of new community groups who want to do planting in their local areas.

There needs to a separate fund for native plantings along our streams and rivers and other urban green spaces. This is a key step towards climate resilience.

There is a need for trees in new residential developments! New developments should include trees along roadsides and where individual lot sizes are too small for trees, there should be regular shared green spaces with trees. We are currently seeing new residential developments around the city that are void of trees, and have been design with no space for trees! These are already "hot zones" in the summer. This is not planning for a climate friendly future: please address this issue!

I support the council in continuing to increase the urban forest and to aim to plant trees along all roads. Please

also consider planting trees in the centre of very wide roads in residential areas.

## Feedback

1.4 Investing in upgrading and protecting our city's water networks  
Fluoride please!

1.5 Investing in our transport infrastructure  
Prioritising public and accessible transport is only going to become more vital, going forward. 25% on transport is reasonable, but of that I'd like to see private vehicles continue to be discouraged and other options given greater funding.

1.7 Our facilities

I'm concerned for the reduced hours at both Tūranga and the art gallery. For those who work most days, evenings are often the only times we will be able to access these resources. I'm involved with Pathway Trust, running writing workshops for recently released prisoners, in the process of reintegrating into society. We have a bi-weekly session at Tūranga which runs from 6.30-7.30 - a time slot which fits around my work hours AND the attendees parole restrictions. Reducing Tūranga's hours could put this program at risk. The workshops not only supports ex-prisoners with literacy, self-expression and community-building, but also reintroduces them to public venues in a small and safe way. I think it's brilliant that one of the first places that feel familiar and comfortable is our libraries! And often the library resources are essential for continued reintegration into society.

As to the art gallery, the reduction in educational programs is also a concern. This seems like very short term thinking, which will harm our art galleries and NZ's visual art scene, for the long term. Enticing young people into engaging with art and artists has huge pay-off across their lives, but also leads to giving back into the arts community. Cost-cutting in the short term is going to cost us all in the long-term.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

1.11 Potential disposal of surplus Council-owned properties

Involve Ngai Tahu in this decision.

### Feedback

1.1 Have we got the game plan right?

I would like to see the council fix the netball courts in Belfast. They area very important community amenity to the Belfast area and are critical to the ongoing viability of the Belfast Netball Club. Not only are these courts in bad condition they represent a safety risk due to uneven and cracked surfaces. The Belfast Netball Club is a voluntary organisation that does not have the ability to fund the cost of fixing these courts and it would be a shame for the club to fold and for the local community to loose such a valuable amenity. These courts are also used by other entities including Belfast Primary School and the local marching team.

Thank you

## Feedback

### 1.2 Rates

Higher rates are needed to pay for everything we need

### 1.4 Investing in upgrading and protecting our city's water networks

Council needs to spend more to prevent sewerage entering waterways and to repair our leaking water pipes

### 1.5 Investing in our transport infrastructure

Milns Road has an open ditch up to a Metre deep alongside the road between Halswell Road and close to William Britton Avenue. Vehicles occasionally drive into the ditch especially at night when it is hard to see. In the years I have been living here I have seen at least 3 vehicles in the ditch. This ditch is also dangerous for pedestrians, once again especially at night. **I believe this open ditch in a residential area is unacceptable under today's safety standards.**

Additionally and also very dangerous there is a section of Milns Road between Old Red Barn Road and William Britten Avenue which is very narrow and dangerous compared to the rest of the road. This section is so narrow that it is difficult to navigate safely especially when a truck is in the opposing direction. Power poles dangerously close to the road compounds the risk in this narrow section.

There is also no kerb and channel on Milns Road except directly outside the new Milns Park subdivision. Even when the new subdivision was established at Old Red Barn Road there is no kerb and channel on the South side.

If roads do not have kerb and channel installed when subdivisions are established when will this be done!! Dunbars road and Awatea Road outside Wigram Skies are examples of roads that look like they will never have kerb and channel installed??

**To make Milns Road both safe and presentable the following needs to be completed.**

Fill in the ditch on the North side.

**Widen the narrow section of road by extending the Northern side of the road over the filled in ditch. The attached photo shows the section that needs widening.**

Remove/ underground the dangerous power poles.

Install kerb and channel on both sides of the road starting from Halswell Road.

### Feedback

1.8 Our heritage, foreshore and parks

Pigeon Bay Forshore

The coastal erosion is getting very close to impacting Holmes Bay Rd. There is concern with many residents and a willingness to work with the council to find a solution. A rock sea barrier is considered a possible solution and would protect this vital route for years to come.

This is an important road, providing the only access road from Pigeon Bay to Holmes Bay. It provides access both in and out for 22 residences, as well as large stock trucks that frequently use this route.

The road continues on over a narrow single lane shingle road to Port Levy. If there are issues with SH75, such as serious motor accidents, flooding in the Little River area, slips, earthquakes, fallen trees, vegetation fires etc.

Pigeon Bay to Port Levy provides an alternative route through to the Lyttelton Harbour roading network and into Christchurch, which is vital for the wider Akaroa community.

Pigeon Bay is a popular destination for cyclists, walkers, runners, motorcyclists. With a campground, yacht club, community hall and a number of other historic buildings, there is a surprising amount of traffic and activity in the area, particularly at weekends. This is increasing year on year and Holmes Bay traffic is increasing.

Holmes Bay Road also provides access to the CCC skips - for waste collection and recycling and is the collection point used by the whole Pigeon Bay community.

### Feedback

#### 1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

### Feedback

#### 1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

#### 1.11 Potential disposal of surplus Council-owned properties

Proposed disposal of 27 Hunters Rd and 42 Whero Ave, Diamond Harbour.

- Both these areas should be removed from the City Councils LTP and fast track process.
- Instead they should be treated to the normal process for disposal of land that requires Community Board and public consultation. Fast track disposal as advocated in the LTP doesn't adequately met the requirements of Section 82 of the Local Government Act 2002.
- The land is currently zoned as residential, but there are many issues that need to be considered before it is disposed of. The Black Point development is an example of what happens without proper community consultation- there is no beach reserve or easy access.
- Sam's and Morgans' Gullies, which are adjacent to the land, have been extensively replanted by local volunteers as well as council staff and need need to be protected by covenants before not after disposal of land.
- Consideration needs to be given to the impact on the local school roll by any future development and the likely need for more classrooms and grounds to accommodate this.
- A gradual, staged disposal would better enable a smooth process of development and integration into the existing, relatively small community.
- Community consultation is likely to encourage more variety in the use of the land; there is a strong local interest in council owned housing for older residents, for example.
- The impact on existing aging and, in some places, inadequate drainage and roading must be considered and who will pay for them needs to be considered before not after disposal.
- Diamond Harbour and the neighbouring Church Bay and Charteris Bay comprise a community, who value the natural beauty and relative isolation of where they live. The culture of this place has been built up gradually over the years with a strong local flavour. This needs to be respected and made to thrive in any future disposal of the land in question.
- THANKYOU.

### Feedback

1.1 Have we got the game plan right?

cycle ways at \$300 million? Prioritised youve got to be joking. All theyve done is disrupt resident parking in many streets. And apart from the long haired, khaki shorts, sandale and long sock ccc greenies, they are totally under utilised and a \$300 million exercise in stupidity and the rate payer foots the bill.

1.3 Proposed changes to existing rates, and new targeted rates

Another hairbrained scheme to rort extra rates from the rural community rate payers. Some over paid idiot with a useless degree and no experience, decides, to justify his position that its a great idea to try to rip a few million from the farmers and small holding owners BASICALLY FOR RAIN THAT FALLS ON THEIR LAND.

for our substantial rates we get RUBBISH COLLECTION . We have our own wells and water supply. We treat our own sewage by tank or plant. We have no street lights, nor pavements. Few of us are served by public transport. Many of us have the councils knee on our necks being restricted to utilise or develop OUR properties because of fanciful and unjustified airport contours.

the council spends a ridiculous \$300 million ( predicted \$92) on totally under utilised cycle ways. Hundreds of millions on what will be a white elephant conference centre, multiple million on a metro sports centre thats had major ground issues and blown out cost wise. Another multi hundreds of millions ( that will blow out double) on what will be a white elephant stadium which apart from that has been specific located by idiots.

so now we have some fool thinking its a good idea to rip the rural. This rural says - get stuffed. Sack a couple of hundred over paid under utilised idiots in the ivory tower and the rest can take a pay cut. Look within not without for a change. Get real. Just stop ripping the ratepayer to pay for your cockups

#### 1.4 Investing in upgrading and protecting our city's water networks

You sure got it right - NOT. my understanding from ecan is that our aquifer water is now polluted by nitrates and other intensive farming runoff. BIG BUSINESS ruling the lives of the little man. From the purest water in the world to chlorination all because stupid councils allowed dairying on the bony stoney surrounds and let the farmers drag untold million of pure water from our aquifers without charging them and we were in return repaid with millions of tons of and urine. These companies profit whilst us idiot ratepayers and citizens pay the price. Our water takes 100 years to get from the mountains to the coast. Starts pure and arrives contaminated. Thanks councils.

#### 1.5 Investing in our transport infrastructure

Another idiot council created scenario. By protecting your 75% owned airport company to the west of the city you restricted many hundreds of acres of the most suitable, safest and easily developed residential land from being developed. After the quakes you knew development had to go west but you ignored this and allowed development of TC3 costly remedial land in the halswell catchment area leading to other problems created by this incompetence. Ecan has main issue climate change and sea encroachment into the eastern chch yet bright sparks issue building permits in areas of 1 metre water table.

the west at the airport is 40 metres above sea level and a 17 metre water table. But with its infill development and pocket size section subdivisions the council was very successful sending thousands of ratepayers into the west. Unfortunately to west melton and surrounds and rolleston. And theres more. By their sheer stupidity the council managed to create daily vehicle congestion as many of these outlying lost ratepayers commuteto christchurch daily. Yes we certainly have some real bright sparks planning this cities growth. Maybe we need a few realistic dullards who have common sense ingrained

#### 1.8 Our heritage, foreshore and parks

The sea is rising. Why are you allowing development in the effected areas

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No  
Comments

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

#### 1.11 Potential disposal of surplus Council-owned properties

Which of the mates will get them

#### 1.12 Any other comments:

Time to go through council like a dose of salts. Time to get rid of the deadwood and break the self protection circle. The rest can take a pay cut.

every day there seems a new bright spark regulation already in an over regulated city. Next thing youll want a turd tax and put weighing devices in our toilets or some genius after spending a few hundred thousand of ratepayers money will come up with a multi input formula giving per household daily discharge by weight.

1.1 Have we got the game plan right?

1.12 Any other comments:

Two years ago I shifted into my apartment in the Atlas Quarter, Wells Street Central Christchurch. The main reason for shifting was that I could see the center of the city was going to be an exciting place to live and wanted to be part of this excitement. This certainly has been the case and I congratulate the Christchurch City Council for taking a major role in this, I love our city and have pride in taking visitors to Christchurch along our new walkways and showing off our new inner city.

There is only one draw back to living in the Atlas Quarter and that is residents here have to pay between \$300-\$400 pa in our rates for waste collection, a service we do not have from the council. We instead pay a private company, Envirowaste to collect and dispose of our solid waste.

As a pensioner in my 76th year I am happy to pay for a service I get but very unhappy to pay for a service I simply do not get.

Thank you for taking the time in reading my submission, I look forward to a favourable reply from you.

### Feedback

#### 1.1 Have we got the game plan right?

I think that you are trying to make the city great for residents but I can't say the same for our area- Church Bay. I also think that there is so much waste in your roading projects. The current Dyers Pass road works - I've not seen more than 2 men actually working at any time I have been past. The rest are standing around. The road works are not beneficial as do not actually widen the road and as for more barriers, the people who drive over the edge are usually boy racers. It would have been far more sensible to make a bikeway over Victoria park for the bikers and that would have left more room for the motorists.

Similarly over here, there is a barrier that needs replacing most months or more often - Hunters Gully on Bayview Rd. The workman loves coming over here. Why not replace it with more substantial than wood and why not prohibit large trucks from using it especially those with trailers as the most recent destruction was by a concrete truck with a trailer. the corner is simply too tight for large vehicles.

Apart from more thinking into these areas - the repairs are ready for repairing again nearly as soon as they are finished. They are not filled properly before the surface is done. Who supervises these repairs and why not do them properly in the first place?

The targeted cathedral rate. We didn't ask for the cathedral to be repaired. The majority of city people wanted a new building which would have cost less and would be fit for purpose as well as being a tourist draw card. The old cathedral is just like any other village church in Europe.

Consultation costs are considerable but do not achieve much. Some consultation is definitely necessary but to see it take so long and subsequent inaction is so upsetting. e.g Tsunami zones. Great work but the plans will be several years before put in place because that is the speed of the CCC I am told.

So why not take a big breath and make sure you are spending appropriately. Think like a rate payer.

#### 1.2 Rates

Any rate increase is hard to take when one is no longer getting a salary. I appreciate that you keep them as low as you think you can but are you sure you have looked at all possible ways to save, especially on your contracts.

#### 1.3 Proposed changes to existing rates, and new targeted rates

It seems that CCC keeps taking things out of general rates and making them targetted. Arts Centre is a case in point. I love the Arts Centre but keep it as it is. We already pay heritage projects - leave it as it is.

Excess water rates are already there but many properties have no meters. I really believe in excess water rates so don't be generous in the allowance. Make people aware of this valuable resource.

#### 1.4 Investing in upgrading and protecting our city's water networks

Water infrastructure is extremely important but i understood we had already done most of this renewal after the earthquake so surely this is too much of a percentage to use.

#### 1.5 Investing in our transport infrastructure

We already have a targetted travel rate so either get rid of it and invest 25% or make it clearer what it is for. I totally agree that transport is a priority as the city is getting congested at certain times. Why not a central city tax on vehicles so that those who use them in the centre where they have options, pay.

#### 1.6 Rubbish, recycling and organics

Until there is a uniform agreement between NZ councils, spending on upgrading should be limited to make sure it is the right infrastructure. e.g When we had green boxes for glass, there was less contamination in a whole bin. The biggest disposal issue is plastic so put your money into disposing of all kinds of plastic and diverting that from the landfill. That would be an achievement - no plastic at any landfill. No plastic particles in our bodies. Make it clearer what you intend to do - upgrades to organic processing plant - what upgrade-to do what?

Recycling infrastructure - what? When I know the ansers, I'll be able to give an opinion as to whether you have the balance right.

#### 1.7 Our facilities

I think your changes (reductions in) to service desks is right. Most people use online but elderly prefer to go to libraries to do their rates and rate rebates. What changes to community facilities are proposed? We are delighted that our local library is now open more hours but were disappointed in the lack of use of volunteers.

#### 1.8 Our heritage, foreshore and parks

A large part of this budget should be for the foreshore and parks rather than heritage as it has had a lot in the past 10 years. Our rangers do a great job to make the recreation areas in and around the city walkable and bikeable. this encourages more people to get exercise. How about adult exercise areas too?

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No

Comments

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

Comments

This building is not and has not been used for a considerable time. So until it has a use, leave it.

#### 1.11 Potential disposal of surplus Council-owned properties

I strongly object to disposal of land in Church Bay - Hunters Road. There is not the infrastructure to support a new subdivison of that size at the current time. It is so good to keep some rural aspect of our area when there has been so much new development. Our roads are simply not wide enough or good enough to sustain that size of development. We already have the worst roads in NZ - a comment we make each time we move around the country and get back to our roads. The heavy trucks that come with developments are making them much worse. There are 2 gullies on this land that have been planted by the community and used by the community for recreation. There is a school track, also made by volunteers and maintained by them and planted, watered,

weeded by volunteers. This is what makes this area so special. Don't dispose of this land. Keep it leased as farmland and covenant the gullies.

1.1 Have we got the game plan right?

See below for the sale of land....

1.2 Rates

yes, its expected

1.3 Proposed changes to existing rates, and new targeted rates

Yes I agree with households paying for water, once they go over the amount that a family of five would use with veg gardening included. I would not want lower income larger families to be further economically hurt.

Its a shame you can't charge all the car washing!

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

making it thrive properly is the only way to attract more visitors, it looks a bit half hearted at present.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

Yes I do

1.11 Potential disposal of surplus Council-owned properties

Please do NOT dispose of 42 Whero Ave & 27 Hunters Road in Diamond Harbour.

The two pieces of land should be withdrawn from the 'Potential disposal of Council Land' in the Long-term Plan.

The current process does not adequately meet the requirements of

Section 82 of the Local Government Act 2002 (Principles of consultation).

The Gullies and existing tracks must be protected. The Conservation covenant already drafted and submitted needs to be fully implemented instead of being held back.

We would request that all the existing plantings and fence boundaries be kept as my children and my cubs group helped plant large areas of those tracks. The area marked for sale completely covers large portions of the school track in particular. And seems to propose the boundary fence line be moved closer to Morgan's Gully edge.

You can see the sale would greatly hinder the school track and stop children making the effort to walk to school as a new route would have to be figured out.

The healthy harbour initiatives and the entire harbour are at present trying to honour a clean up and preservation of the waterways. This needs to be given consideration.

Thank you.

Our family whole heartedly oppose the request to dispose of this land with out putting in place proper covenants and protections of all areas already worked on and conserved by our community.

1.1 Have we got the game plan right?

Yes.

1.2 Rates

I accept that it's necessary.

1.3 Proposed changes to existing rates, and new targeted rates

I am on board with them.

1.4 Investing in upgrading and protecting our city's water networks

Yes - I wish we could spend this money on other things but water is a necessity so this money needs to be invested.

1.5 Investing in our transport infrastructure

Mostly. I would like to the balance of this spend shifted more towards improving the city's cycle network.

1.6 Rubbish, recycling and organics

Yes this is good. Looking forward to not smelling the Bromley dump!

1.7 Our facilities

I am comfortable with these changes.

1.8 Our heritage, foreshore and parks

Yes, if anything I'd like to see more spend on heritage - I would love to see the Canterbury Provincial Council building reopened, for example.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Arts Centre is one of Christchurch's most special places.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

The Museum is a wonderful community facility.

1.12 Any other comments:  
Bascially I support the 10-year plan. I'd like to reemphasise the importance on investing in cycle infrastructure as well as preserving heritage to make Christchurch a city people want to live in.

### Feedback

1.1 Have we got the game plan right?

I think the balance is about right.

1.2 Rates

I am not sure if this is absolutely clear! I am reading it as 5% this rates year (2021-2022) and a total of 4% over the next 10 years. Well now I have gone back and checked and I think what is meant is an average increase of 4% EACH year over the next 10 years! That wasn't clear to me.

1.3 Proposed changes to existing rates, and new targeted rates

No comment.

1.4 Investing in upgrading and protecting our city's water networks

Protecting our water networks is crucial. I hope this work will lead to an improvement in the quality of the water to enable the removal of chlorine.

1.5 Investing in our transport infrastructure

Very supportive of improvements to public transport and to encouraging people to use it.

1.6 Rubbish, recycling and organics

I support this work.

1.7 Our facilities

Sounds about right.

1.8 Our heritage, foreshore and parks

I would love to see more investment in the foreshore and in parks.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

### Feedback

1.1 Have we got the game plan right?

I think you probably skew towards doing stuff in the central city which is really cool but think small improvements at a local level in suburbs (cleaning waste, more green space/artwork) add a lot to make Christchurch a nice place to live as well as visit.

The central city is great and is important to have as a hub but if where your house is and where you actually live is nicer too wouldn't that make you happier to live in Christchurch?

1.3 Proposed changes to existing rates, and new targeted rates

One change I would really like to see is a targeted rate where people could propose ideas for their own suburb which they agree to pay via a targeted rate for something which they know they will benefit from.

That way they will feel more connected and involved in decision making and it could lead to some cool projects popping out throughout the city.

Have no idea if you do that already but thought it could be a cool idea

1.5 Investing in our transport infrastructure

I think making cycleways makes sense but why do they have to be two way? They take up lots of space and it actually is less convenient when you want to turn left but have to be on a cycleway on the right side of the road. Just installing barriers makes people like at uni seem like a much better solution.

Also I think in Riccarton at least the increased densification from flats and townhouses makes parking a real issue for people living there. The mall already makes street parking difficult for residents and with the cycleway coming too add to a range of factors that mean people who live there have nowhere to put their cars.

Making buses free for certain groups could make this easier but idk. Not everyone is going to cycle because they need to take kids or carry stuff.

1.6 Rubbish, recycling and organics  
I think this is a really good idea and would be happy if a lot more was spent on this.

1.7 Our facilities

Why are you closing Wharenui pool? :(

Living in Riccarton it is a great place to go and is one of the few things in the area that actually feels like is 'ours'. The rest of the city already goes to Westfield mall or just drives through so it is nice to have something actually for residents. It looks really nice with all the art,seems well run and the school and lots of community members make good use of it so why does it have to go?

It doesn't make sense to me and makes me sad.

1.8 Our heritage, foreshore and parks  
I think focusing on the land and green space is more important than the heritage buildings. You can always build more buildings but getting land back once it is developed is really hard.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Comments  
Why does it need the grant? would be helpful to see before making a decision

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
No  
Comments

1.11 Potential disposal of surplus Council-owned properties  
If you aren't using them someone else can so makes sense

1.12 Any other comments:  
There is so many questions in this form lol

### Feedback

#### 1.7 Our facilities

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it

#### 1.12 Any other comments:

it is disappointing you propose to stop the mobile library service as we use it most Thursdays and kids love walking to it alone sometimes which gives them independence and responsibility. Please can you reconsider or look into other options for some of the areas which are more remote?

## Feedback

### 1.2 Rates

i think the Council should look more carefully at ho the rates money is spent - stop the spending on climate change so much so fast - cycleways will be used for a long time - why are they being paid for in a short time by the immediate population. don't create any more social housing as the second largest landlord in NZ isn't that enough - assist other groups to create assistance

culture, sports are important too and to be given a back seat to social agendas -

1.3 Proposed changes to existing rates, and new targeted rates  
want to see the Arts Centre obtain regular annual funding

1.4 Investing in upgrading and protecting our city's water networks  
how can the average person answer this question - typical Council useless query - searching for support not eliciting appropriate answers

1.5 Investing in our transport infrastructure  
too high - why so much on cycleways - i bike regularly and the money is too much in a short time frame - go slower and include some cultural support for the Arts Centre - that will bring in tourists to help payback - the cycleways won't

1.6 Rubbish, recycling and organics  
how can we say without reading who knows what background papers - maybe hold contractors accountable and stop paying for lousy work - the last composting plant degraded due to poor design and materials -

1.7 Our facilities  
cut out bus lounges - that was a huge waste of money - the work blocked businesses ad then it became a hangout for proplmes

1.8 Our heritage, foreshore and parks  
stop funding local developers to build cheap townhouses with no parking downtown and put the money to better use such as heritage or parks

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes
Comments
It is vital to support this treasure in our midst - it is of interest to local and international people and is certainly worthy of support. i think the Arts centre deserves annual funding as a trust they have restrictions on how they can use the site.
1.10 Funding for base isolation of the Robert McDougall Art Gallery
Yes
Comments
crazy \$11m for mcDougall but only \$5 for the Arts Centre - go figure

### Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

they flood when it rains

they are slippery with ice on frosty mornings

when most teams train in the evenings they are slippery and damp from night-time dew

part of one court is permanently wet and covered in a slick film because it never dries out

they have extensive cracking filled with vegetation

they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

**We Need Your Help To Get New Courts**

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow.

However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Rates appear to be increasing, but in rural areas such as Diamond Harbour, the roads leading to Christchurch are in a poor state. There are lots of patch jobs going on, most of which are poorly done and fall to bits within months. Large parts of the road to Christchurch are incorrectly cambered, corrugated on corners and uneven. The road needs to be rebuilt properly for safety instead of lowering speed limits and putting up barriers. It would be good if we could see the benefits of constant rate increases which are becoming unaffordable for many.

1.3 Proposed changes to existing rates, and new targeted rates

1.7 Our facilities

Godley House needs to be rebuilt on the former site. The foundations are of no importance to anyone. Document them and then rip them up and make them into a path or a memorial.

Godley House was an asset to the people of Diamond Harbour and the many visitors to the town. The council needs to apply funds to the construction of a similar licenced facility on the same site and the Reserve status of the land for the facility needs to be revoked.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

1.11 Potential disposal of surplus Council-owned properties

I am opposed to the sale of the land in Diamond Harbour bordering Hunters, Rd and Where Avenue below Bay View Road. The sale of this land and possible development into residential properties. This would lead to too many people in Diamond Harbour

and put a strain on what is already poorly maintained roading and infrastructure in the harbour.

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.2 Rates

there is still many infrastructure and restoration projects that need to be done around our city, a rates increase is inevitable to fund these.

#### 1.3 Proposed changes to existing rates, and new targeted rates

I think that households that exceed the target for water use should be given a grace period to fix any issues that they may have eg. leaks and education provided in how to reduce water usage.

#### 1.6 Rubbish, recycling and organics

Focus needs to be on more education around what can be recycled and composted to reduce contamination. Compostable packaging needs to be processed at a large scale instead of being sent to landfill. Sourcing local ways of processing recycling into useable product should be a top priority so that we are not shipping our problems elsewhere in the world. We are a progressive city in many ways and we should be showing the rest of the country how it's done.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

##### Comments

The Art Centre is such an important part of our city and its heritage. It is an asset that should be preserved for future generations. The work that has already been done is amazing.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I am not currently a resident of Christchurch City, but a resident of Lincoln, Selwyn. I cannot stress enough, however, the value the Arts Centre is to Christchurch as a heritage precinct, and as a functional centre for so much that is important to your wonderful city. It is as iconic as the Cathedral, and the Museum, and harks back to the past from the present. I have made donations to the Arts Centre, particularly to see the Great Hall strengthened & restored, and I will continue to do so if given a vehicle to do that. Please do what you must to raise the funds to maintain this treasure & its functionality.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

As a current non-resident of the city, it is easy for me to say YES, but I am not a ratepayer. I have been for the years from 1981 to 2005, and may become one in the future. As a past ratepayer & possible future one, I hope the CCC does raise a targeted rate to ensure the continuation of this iconic part of the city.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Arts Centre is a crucial part of the heart of the city, both for the citizens of Christchurch and for visitors. its historic significance is only part of this, and the evolving uses of the buildings over the years shows the practical and imaginative solutions arrived at. Earthquake repairs were a great leap forward, and Philip Aldridge's astute management and financial acumen will continue to nurture further development. It would be a great pity - a civic shame even - if that momentum were stunted for lack of funding.

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Too much spending on roads and not enough on sustainability and community development.

1.2 Rates

Spending should at least keep pace with inflation, but climate change responses will require investment of spending.

1.5 Investing in our transport infrastructure

In general, more spending on cycling and pedestrian facilities and less on roads.

1.8 Our heritage, foreshore and parks

#### Barnett Park

Locally, a review of the Barnett Park Management Plan is seriously overdue and needs to incorporate native regeneration, pest control and improvements to the recreational facilities. Basic maintenance has been seriously neglected. The same applies to the important asset of the estuary edge along Beachville Road and Beachville Reserve which have been badly neglected for many years.

#### Te Raekura Redcliffs Park

The playground in the old Redcliffs Park has been removed and facilities for small children are no longer available. The RRA feels that play areas in the new Te Rae Kura Redcliffs Park should be enlarged and improved to compensate.

#### Beachville Reserve

Beachville Reserve is suffering from coastal erosion and loss of trees and needs urgent attention to repair the amenity. This was reported to Council over a year ago and nothing has been done so specific funding is needed to address this.

#### Beachville Esplanade

This is a major asset on the estuary edge but was not properly restored following the seawall works and is in need of landscaping, proper grassing of open areas and street furniture.

#### 1.12 Any other comments:

The Redcliffs area has been suffering from a steady deterioration in public facilities over recent years with poor maintenance of public areas, and increased through traffic without regard to the needs or safety of the residents.

#### Public Toilet

Funding is needed to replace the public toilet that was removed from Barnett Park with a more conveniently situated one in Moncks Bay, which can service the the users of the Coastal Pathway and Moncks Bay. The RRA believes that this should be given a higher priority than redeveloping and landscaping the car park, which is little used.

#### Main Road Redcliffs Master Plan safety considerations, speed limit.

The Master Plan was consulted on in 2014 but has been repeatedly deferred to the great disappointment of the local people. Part of the plan was to include safety improvements with pedestrian crossings and a reduced speed limit. Residents have been surveyed and a large majority is in favour of the imposition of a 40kph speed limit through Redcliffs from the Causeway to Moncks Bay. If necessary these safety measures should be introduced without waiting for other aspects of the Master Plan.

#### Barnett Park management plan

The management plan for Barnett Park is seriously out of date and this should be reviewed in the light of the need for improved recreational facilities, ecological improvements and restoration of native habitat. Maintenance has been neglected in recent years.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

Before moving to Wellington in December 2020 I lived in Collingwood (Golden Bay/Mohua) for 17 years.

Travelling to Christchurch and visiting/supporting the Arts Centre several times a year was one of the special privileges of living in the South Island. The Arts Centre is being reinstated in a way that will definitely support the identity of Christchurch as a heritage and cultural centre into the future. Restoration since the earthquakes is truly remarkable and to stand in the Great Hall is breathtaking. It will be wonderful when the whole complex has been restored to the same standard.

I believe financial support from the council is fully justified as endorsement of its role as a heritage icon linking the past and future of Christchurch City. On behalf of all New Zealanders, please give the Arts Centre secure financial support through annual grants. It deserves it and will repay your investment as tourism returns to "normal" and in recognition of its acknowledged heritage status. Thank you.

### Feedback

1.7 Our facilities

I am concerned about the 10% funding cut for the Akaroa Museum. Our Year 13 History students use the museum every year as part of their internal assessment on Ngai Tahu and the settlement at Akaroa. It would be a real shame if Akaroa Museum could not provide the same service due to funding cuts.

The small assets in the CCC property portfolio are just as important as the large ones such as the indoor stadium.

## Te Mahere Rautaki Kaurera - Our Draft Long Term Plan 2021-31

### Submitter Details

**Submission Date:** 13/04/2021

**First name:** Katelin **Last name:** N

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

they flood when it rains

they are slippery with ice on frosty mornings

when most teams train in the evenings they are slippery and damp from night-time dew

part of one court is permanently wet and covered in a slick film because it never dries out

they have extensive cracking filled with vegetation

they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

**We Need Your Help To Get New Courts**

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow.

However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

## RESERVE MANAGEMENT COMMITTEE – PRIORITIES FOR THE LONG TERM PLAN

LITTLE AKALOA RESERVE: February 2021

	Priority initiative	Why this matters	Responsibility (RMC or Council)	Target timeframe
1	Slipway	This area is suffering serious erosion from the sea. Retaining is needed between slipway and Decanter Bay Road – [Photo 1]	Council	Immediately
2	Road to wharf	The road is the only access to the wharf and is used by multiple people. The sea wall has recently been repaired but there is a large tree that should be removed as if it falls it could possibly take out the road – [Photo 2]	Council	6 months
3	Beach Sea wall	Approximately 3 years ago a temporary fix was done to the beach sea wall that protects Chorlton Road and Toilets/changing rooms. At the time it was indicated that this fix was for 5 to 8 years, we are already 3 years in, and rocks are starting to dislodge again – [Photos 3]	Council	2 to 5 years
4	Groins installed & creek bed cleaned out	The current Groins are deteriorating and being undermined. The beach is in danger of being eroded away by the water flow from the adjacent creek entering the beach and the way the current comes in the bay on the West side and exits the East side. Existing groins are no longer effective and need replacing/repair. The creek bed should be cleared to assist redirect the water flow from the creek into the beach – [Photos 4]	Council	As soon as possible to minimize long term cost
5	Entrance road to dump. - Requires metal/sealing	Access to the dump is immensely jeopardised by the undulating entrance. People will stop using this facility and commence roadside dumping impacting on our environment – [Photos 5]	Council	Immediately
6	Toilets/changing rooms on foreshore replaced and upgraded.	Toilet area frequently presents an unpleasant odour. The toilets and the changing rooms are the only public facility in the foreshore area	Council	24 months

		and are highly used most of the year. There is a need for them to be upgraded to today's standard – [Photos 6]		
7	Little Akaloa Public wharf	This wharf is the only operational wharf between Pigeon Bay and Akaroa Harbour, it is rapidly deteriorating and needs repair. Piles replaced, decking upgraded, bearers replaced – [Photos 7]	Council	24 Months
8	Pavilion by tennis Courts	This has been upgraded externally by the community and the community are now starting with the inside – [No Photos]	RMC	12 months
9	Cemetery Trees	Over the last Christmas period, high winds dislodged tree branches. Members of the community hired a scissor lift and made the area safe. All these trees need to be accessed and a plan put in place to make safe – [No Photos]	Council	12 Months

### Feedback

1.1 Have we got the game plan right?

The Burnside Environment Group has worked closely with the Councils Park Rangers for the past 3 years. This has brought great benefits both to our student body and to the local community. We have already planted extensively on the school grounds and so it has been a wonderful opportunity to extend our plantings into Jellie Park. We hope to help create a corridor of native planting to enhance bird life and provide recreational and educational opportunities for the school and community. Matt (former Ranger) and Tamara have been extremely helpful and provided us with plants to support our project. We have 140 members in our group and exposing our students to environmental issues and community initiatives I believe helps to make the informed and caring adults of the future that Christchurch needs. We believe that the financial investment from the Council involved in this project creates wonderful returns for our local area and will be much appreciated by future generations. The Rangers do a wonderful job and it would be such a sad step to see this opportunity lost due to funding issues. I would be more than happy to present this argument to Council officials who might be decision makers and we would welcome a visit to meet our wonderful students and to see the fine work they do. Very best regards Jon Land

### Feedback

1.1 Have we got the game plan right?

The rates are becoming unaffordable for those on fixed incomes. We see no efficiencies in day to day work, For example, planting a tiny strip of grass/weeds along the Sparks Road Quarrymans Trail Cycleway which requires regular cutting and then a man to come with a sucker /blower.

The footpaths in our area are hazardous because of a combination of earthquake damage and council berm tree planting around Halswell Road in particular.

But our particular street, Maryhill Avenue, requires urgent attention.

1.2 Rates

Dont agree.

We have already been stung for Cathedral repairs, waste minimisation ( when now we know that most our our waste has to go to Kate Valley, instead of being " recycled".)

The Council should optimise their revenue from commercial enterprises, rather than bail them out as they did for the Adventure Park.

1.3 Proposed changes to existing rates, and new targeted rates

Use education, rather than penalties, for households.

The Arts Centre should be a stand alone commercial operation. The City has and will continue to to benefit from this tourist attraction.If anything the Council should allow a proportion of its opearating budget ot support this facility.

1.4 Investing in upgrading and protecting our city's water networks

The CCC should fight to be released from the proposed National management of our water.

We have, historically, very pure water.

1.5 Investing in our transport infrastructure

Have you tried smaller busses which would be more fully occupied?

From Hoon Hay a 30 minute frequency bus service with no shelters or seating is unattractive for older people.

1.6 Rubbish, recycling and organics

As said before.

1.7 Our facilities

So you propose closing the well supported, community focussed facilities, in favour of the multi million \$ new ones?

1.8 Our heritage, foreshore and parks

We want to see a plan to restore the Provincial Council Chambers and the former Municipal Chambers.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

No  
Comments  
It should be in your budget, exclusive of our rates.

### Feedback

1.1 Have we got the game plan right?

Infrastructure top priority, look after and maintain what we have got. then libraries, parks, museums and public galleries, pools - especially local pools and heritage buildings. Keep easily accessed parking in the city or it will die - progress in the city is disappointing. Keep and extend but slow down the roll out of the very expensive cycleways and focus on cycleways separated from roads. Our street network of signs and lanes is becoming so complex.

Cut out the fluff.

1.2 Rates

This should be an absolute maximum. Rates are the major expense for most of us on fixed incomes.

1.3 Proposed changes to existing rates, and new targeted rates

The Arts Centre needs support. It is the jewel in the crown and central to that area of our city.

we pay so much in rates i do not think we need a separate water rate. In our street there have been so many breaks in the water pipes to houses and water wasted due to age and poor maintenance.

1.4 Investing in upgrading and protecting our city's water networks

Water infrastructure top priority but Council has allowed it to become worn down. This is the Council's responsibility.

1.5 Investing in our transport infrastructure

Slow down cycle lane roll out. Focus on safe, separated from traffic lanes not cycleways down busy roads that duck and dive and disappear along the route.

easy to access car parking in the city is very important if the city is to be the real heart of Christchurch again. Public transport and cycling are not an option for many and we have a large number of elderly people to consider

as a car provides door to door travel.

We observe in our area Council employees who bike to work but then have ready access to council provided cars for any travel they require during their day. Not many of us have that option and using our own vehicle is part of how we make our income - which pays our rates.

1.6 Rubbish, recycling and organics

cutting The use of packaging before it becomes waste.

water fountains with bottle fillers available. Be like San Franscisco and ban disposable water bottles from sale.

Reintroduce refundable deposits on bottles/containers.

1.8 Our heritage, foreshore and parks

Get the heritage buildings in the city fixed asap. Others to follow

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments

there are other areas to save rates in. There is a huge number of businesses/ enterprises the council donates rates income to perhaps you need to look closely at those.

The Arts Centre is much loved and deserves Council support.

I can't help but wonder if this has been cynically focussed on as a way of getting agreement to a rates rise.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

We wish to oppose the proposed general drainage rate for my area, as per your posted notification you have acknowledged the land owners in my area are already part of ECAN Halswell Drainage area and pay considerable drainage rates to ECAN to manage drainage in our area. To attempt to rate land owners for a service CCC does not provide is unjustified, but as landowners are already rated by ECAN for this service it would be double dipping and totally unjustifiable. I request the status quo remain as a fair way of paying for drainage in my area. Double rating for the 1 service is unjustified.

However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

**First name:** Trish **Last name:** Rainey

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Arts Centre is a vital part of our history, the heart of our city and is so appreciated by so many people for so many differing reasons it must be held dear, looked after, supported and repaired in its entirety.

1.11 Potential disposal of surplus Council-owned properties

Which are the buildings that are being referred to? Are they the Provincial chambers, these should be retained. absolutely

# Te Mahere Rautaki Kaurera - Our Draft Long Term Plan 2021-31

## Submitter Details

**Submission Date:** 13/04/2021

**First name:** Elizabeth **Last name:** Spear

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.2 Rates  
increases are inevitable

1.3 Proposed changes to existing rates, and new targeted rates

The Arts Centre needs all the money it can get to finish rebuilding.

Water should be paid for by those who use it.

1.4 Investing in upgrading and protecting our city's water networks  
Upgrades of the infrastructure are inevitable but priority should be given to ensuring Christchurch water remains PURE and nothing is added.

1.5 Investing in our transport infrastructure

Remove all electric scooters and bikes from the footpaths. Hire companies should be responsible for storing their equipment OFF the footpaths. Footpaths are FOOTpaths not parking spaces for hire company equipment nor are they race tracks for electric scooter and bikes.

Invest in small buses running more regularly

1.6 Rubbish, recycling and organics  
Make dumping free - to encourage all to use the facilities and not dump on roadsides . Provide free collection every quarter for items too large to put in bins.

1.7 Our facilities  
Libraries and service desks are vital for the community. They should be retained with maximum staffing and open hours at all cost.

1.8 Our heritage, foreshore and parks  
More than 11percent required for these projects.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments  
The Arts Centre must be funded to complete the rebuilding work

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes  
Comments  
This building must be protected and preserved for future generations. A suitable use for it must be found.

1.11 Potential disposal of surplus Council-owned properties  
If the buildings were purchased/constructed by the Council and Council funded then - yes - dispose of them. If however they were gifted with covenants then they must be retained and a suitable use found for them. The Council must allow the public of Christchurch to decide on any future use

### Feedback

1.1 Have we got the game plan right?

I agree with the plan as it stands.

1.2 Rates

Yes, I agree with this but I think you should look further at rates relief for poorer households. Could you lobby the government to increase the rates subsidy they provide?

1.3 Proposed changes to existing rates, and new targeted rates

I agree with the changes as they stand.

1.4 Investing in upgrading and protecting our city's water networks

I agree with the proposal as it stands.

1.5 Investing in our transport infrastructure

I agree with the proposal as it stands.

1.6 Rubbish, recycling and organics

I agree with the proposal as it stands.

1.7 Our facilities

I agree with the proposal as it stands.

1.8 Our heritage, foreshore and parks

I agree with the proposal as it stands.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

I agree with the proposal as it stands. This is a small expenditure to secure such an important feature of the city.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

Please make sure that the Robert McDougall Art Gallery continues to be available as a venue for the visual and performing arts.

1.11 Potential disposal of surplus Council-owned properties  
I agree with the proposal as it stands.

### Feedback

1.4 Investing in upgrading and protecting our city's water networks

Free healthy water should be a main priority for all, with no chlorine added where possible.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Arts Centre is a pivotal hub for the arts and creative activities in NZ. The buildings and the history and memories held within its walls are some of the richest in the country.

We have lost so much heritage architecture in Christchurch and this project needs to be completed to ensure the sustainable future of this unique treasure.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

the proposed changes to the land in DH (Hunters Rd and Whero Ave needs to be removed from the LTP and put through the correct process including being put up for discussion among the local people who have put endless hours into planting and tending natives. We are a rural area and the land is well used for walking tracks and recreation. Please CCC DO NOT let this become another Godley House debacle.

1.2 Rates

I appreciate that rates need to rise over time but I am not seeing much in the way of increased services as a result

1.4 Investing in upgrading and protecting our city's water networks

First priority: stop allowing our water to be bottled by overseas companies

1.6 Rubbish, recycling and organics

it seems the amount of things that can be recycled keeps shrinking. Let's get processes in place before the public loses interest in recycling altogether

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

My submission is in regards to the potential withdrawal of the current mobile library bus service.

I am saddened and sickened to see this vital service on the chopping block! This service provides entertainment and education to one of the most vulnerable sectors of our community (the elderly), a sector that have spent many many years, paying rates in our fair city! I understand the bus also visits areas that are geographically distanced from a library. No doubt this service will be used by young families, and potentially people with physical and or financial limitations

These elderly citizens MUST be considered before this service is cut! The cost of the service is relatively low, and could be funded by cutting out some unnecessary council junkets! And considering the current state of the world, dollars must have been saved that would have normally been spent on international travel.

I urge you councilors to consider how you would feel if your own family was affected? Not everyone has family or even friends who can run to the library for them!

### Feedback

1.1 Have we got the game plan right?

See below - land drainage targeted rate

1.2 Rates

See below - land drainage targeted rate

1.3 Proposed changes to existing rates, and new targeted rates

Today we received a five page letter from CCC regarding proposed changes to Land Drainage Targeted Rate, stating that 'this will have an impact on your property's rates'.

What this impact may be is not clear from your letter, nor can we find any further information on the CCC website. However, the implications are that we are likely to see a very significant rate rise in the near future.

We live in a remote rural property, meaning that the Christchurch City Council provide neither water, sewerage or waste collection services to our property.

Over the past few years, we have been obliged to spend considerable sums on upgrading septic tanks, repairing culverts and waterways, including those on council land along the side of our access road; having to take our garbage to the nearest refuse station is an additional expense.

We consider that any increase in our rates without any significant improvement in services would be grossly unfair, not to mention the financial impact that this would have on a retired couple living in a remote rural environment.

### Feedback

1.1 Have we got the game plan right?

Please don't close my pool. I love swimming at Wharenui, I love the coaches and all the staff and I have made some awesome friends that I only see at swimming. I train really hard and no other pool is as special as Wharenui.

1.7 Our facilities

The Wharenui pool is a special place, it has great pools and no other pool is so friendly. I can practice netball in the stadium and then swim too which is awesome. There are not enough pools in Christchurch - please don't close the Wharenui pool as it will make me very sad.

### Feedback

1.1 Have we got the game plan right?

Please don't close the Wharenui pool. It is home to the best swimming club in Christchurch and has the best staff, coaches and members. The pool is well placed so my Mum can drop me off and Dad can pick me up after training on his way home from work. I am too young to drive or catch the bus by myself. The pool is my favourite place in Christchurch. I can do my strength and conditioning training in the stadium and then train in the pool afterwards which is really helping my swimming and other sport.

1.7 Our facilities

The Wharenui pool is very special, many Olympic swimmers have trained here and I love how the pool has so many different users. My Club swims there, there is learn to swim, splash nights for racing, different groups use the pool such as the Waka group and para swimmers and water canoe people. I love seeing so many different people using the pool and learning how to be safe in the water.

1.11 Potential disposal of surplus Council-owned properties

Please don't pull down the Wharenui Pool, there are not enough pools in Christchurch and to lose another pool would make me very sad.

### Feedback

#### 1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

- they flood when it rains
- they are slippery with ice on frosty mornings
- when most teams train in the evenings they are slippery and damp from night-time dew
- part of one court is permanently wet and covered in a slick film because it never dries out
- they have extensive cracking filled with vegetation
- they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow. However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

### Feedback

1.1 Have we got the game plan right?

I would hate to see Wharenui swimming pool closed down. Would be a massive lost for not only the community but also Wharenui School. The yearly swimming lessons via the school cost next to nothing due to partnership with the pool and is some of the only lessons to swim, which is a highly valuable skill to know, that some of the children get due to lack of funds, busy lives, families language barriers ect. If they were to lose this I worry there will be no swimming lessons available anymore or if there it it will come at a cost that alot of families at the school simply can't afford I have seen and heard 1st hand some of the struggles the families have.

The loss to the community would be huge. I know of families and people who go to the pool for the quieter no frills atmosphere due to sensory issues, autism other issues or parents who find it easier to keep an eye and more peaceful to spend time with their children.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

Why are the council spending millions on cycleways and dropping hours off librarys when over 80% of rate payers have library cards and do use the service as it is at the moment. Community groups often use the library on late nights and weekends. You would be taking away a free service that I believe all Christchurch rate payers have a right too whenever they choose what ever the day or time.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.1 Have we got the game plan right?

No, the expenditure of unnecessary or non essential costs including the general operational costs of the council needs to be reconsidered.

As an example the cycle ways which are underutilized and too costly need to be held until demand and value is determined. Yet in some areas that need cycle paths no action is taken. The city schools all bike to Kerrs Reach to row with students knocked off bikes every week.

Another would be the regeneration of the red zone, costly and will generate no revenue to the city, unless it's a lake. Understand that it would be nice but in times of essential capital expenditure and tough times for your rate payers this also needs to be withheld.

Then we look at the cost of the council and delivery of services, too expensive with limited accountability and results. Trim the fat rather than increase the rates.

1.2 Rates

No, the cost is too high. Household incomes are not going up 4-5% yet all expenses are. The CCC rates are already too high exceeding the average rate cost in New Zealand.

1.3 Proposed changes to existing rates, and new targeted rates

What does this really mean - more cost to the rate payer, so don't bother.

1.4 Investing in upgrading and protecting our city's water networks

Essential, too expensive but needs to be done. Clean water is a basic right for all people.

1.5 Investing in our transport infrastructure

Ditch the cycle lanes, they are too costly and don't generate the outcomes. Prove they work, i reckon more people drive in circles looking for parking now so carbon emissions are higher.

1.6 Rubbish, recycling and organics

If you want people to recycle and use the transfer stations the cost has be to reduced and it has to be simple. Bigger green bins, cheaper fees for green waste and consider a community services card rate. It those that are struggling to make ends meet have waste that can't afford the transfer station costs and as a result stuff gets dumped.

1.7 Our facilities

Once again some if the expenditure is in the nice to have bucket and should be deferred. No new facilities should be built with the exception of the sports arena and sport complex as they generate visitors and therefore city revenue. The facilities we have need to be improved where required like the Nga Puna Wai wind issue.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments  
Your residents are struggling with the burden of rates, but this done right will generate visitors and revenue to the city. I would rather this be done and funded by cost savings.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

No  
Comments

1.11 Potential disposal of surplus Council-owned properties

Yes

1.12 Any other comments:

Council has to reduce the operating costs, if they can't accountability and service standards need to be transparent to ratepayers. Make comparisons to private enterprise to identity if. There is alot of fat - trim it and save the rate payers some money.

i am now . On the day of the Christchurch February earthquake I was at my job in The Christchurch Art centre. I worked as a tutor at a small Art School called Your Studio Trust, which provided tutorage and encouragement for pupils with intellectual disadvantages. I think the Arts Centre needs all the encouragement and financial help available to restore it to its formal glory and better. It should be an affordable venue for all. The christchurch Arts centre is worthy of all the help it can get and I fully support the funding for it. I now live in Akaroa but visit it as often as possible.

sincerely Ericad'Stewart

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I support the Arts Centre and the limited heritage Christchurch has left being supported by the Council.

1.4 Investing in upgrading and protecting our city's water networks

I support water infrastructure being regularly maintained and upgraded to meet the city's reasonably foreseeable needs.

1.5 Investing in our transport infrastructure

I support transport infrastructure keeping the city moving (rather than emulating Auckland's gridlock and the huge economic costs that flow from that.) I also support public transport options being developed to the stage that provide a real alternative to private motor vehicle journeys, because at present the city is a very long way from that goal.

1.7 Our facilities

Christchurch's libraries are real community and learning hubs for Christchurch communities. I believe the services provided by Christchurch's libraries should be increase and enhanced rather than "changed to reflect use " if that equates to 'downgraded' (in common parlance.) In particular, collections must be maintained and enhanced, not reduced, as must public access.

1.8 Our heritage, foreshore and parks

I support the principle of repairing, restoring, and enhancing our built heritage, foreshore areas, and parks.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Arts Centre is the city's most significant heritage complex, imo, and has been hard hit by Covid and the reduction of tourism revenue, coming on top of the earthquake rebuild, which is a gargantuan project for any organisation, let alone a charitable one. I believe it is vital that it is retained and sustained now, for Christchurch's present and future.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

Again, this is a significant city heritage and cultural resource that must be made safe for the future. Although all rates increases are hard for ratepayers, this is also a time of unique need in terms of securing the city's future.

1.11 Potential disposal of surplus Council-owned properties

I do not believe the council should dispose of heritage buildings given how few we have risk and inadequate protections to ensure they will be retained for the city's future.

### Feedback

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

I see this funding as imperative to the future of The Arts Centre.

I have lived in Christchurch for 18 years, originally from the UK. So I have seen The Arts Centre change over time, I used to work at Le Cafe when I first came to NZ for a period of time in my 20s and would spend many a weekend when not working at The Arts Centre sipping on a wine at Annies, making earrings in the Bead Shop or listening to live music at the Dux. It has come full circle and now in my 40s I am a fully trained teacher and teach an array of education programmes there. I attend many a concert, exhibition... I still sip on wine but at now what is known as Cellar Door and still spend many a weekend there.

The Arts Centre is so much to so many people, in all different aspects and walks of life, especially the creative community. However from my point of view it is irreplaceable for the new generation of children that embark on a journey that they might never get to undergo. For some students they will have never been into a building like it before and may never get the opportunity to experience another building or piece of history like it. A building that has so much history, tells so many stories, encapsulates beauty in it's buildings on the outside and all it's beautiful intricacies that hide behind it's walls. This is a piece of history that if it were to close would be a tragedy and a loss to the next generation. New Zealand does not have lots of beautiful old buildings like the UK, so it should be treasured.

I have recently been out to schools on a Roadshow and when talking with teachers they cannot believe there is the

Te Mahere Rautaki Kaurera - Our Draft Long Term Plan 2021-31 from French, Katy organisation: The Arts Centre behalf of Educator

878

possibility that The Art Centre's doors may close. They cannot voice enough the value it has for all their students of all age groups from year 3 up to year 13. As a LEOTC provider we have formed longstanding relationships with so many schools, teachers and students/ parents alike who have experienced the magic of The Arts Centre. My own two children included, only                      yrs old they already both have wonderful memories of The Arts Centre.

Every day when I walk into work, I feel privileged to be able to work in such a magical place that offers and is trying so HARD to continue to offer so much to it's community. The Arts Centre has a big heart and is in the hearts of many.

I fully support funding of The Arts Centre.

Many thanks, Katy.

Kia Ora

As a professional artist and tutor, who has been practising in Christchurch for the past eleven years, I am giving up this city. There is literally no support even though I have been given a Civic Award and NZer of the year, Local hero awards for my contribution through my art I feel completely adrift. I simply can't afford a studio or shop without assistance. Although recognised for my contributions I am not supported. Art has contributed so much to the well being of this city, I don't understand why I have to go offshore for support. There is an arts centre but it is empty and unaffordable. If I did have a shop/studio there the lack of free parking would hinder my students and customers. The arts centre market has died, I was part of this but after numerous bad weather days and rain ruining my art prints through the holes in the canvas canopies the centre couldn't afford to fix, I gave up. Im leaving for Australia, I've done my best here but enough is enough. I wish Christchurch city the best. And I hope the arts scene comes back one day.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I strongly object to the proposed increase in drainage rates of up to 33% in the following years.

All water drains off my property naturally by rivers and streams that flow into Lake Ellesmere . Often having nothing to do with drainage or roading.

I would like to see the rate rise kept to a minimum as the council does little in terms of water flow to the lake.

### Feedback

1.1 Have we got the game plan right?

Yes to essentials, (water, roads) but no to ego projects like the new library, i know many people who have never been there. Our local library (South) is wonderful, why do we need more.

**Local councils need to wake up to the financial realities of COVID-19. Non-essential spending must be suspended so that rates can be kept low, allowing households to lead the economic recovery.**

1.2 Rates

Crippling for us. We pay well over \$100 per week. Our joint income is just around \$80k pa.

The foundation costs of our rebuild combined with CCC rapid rate hikes have meant that we are like many other on limited or fixed income, ie getting hammered with increasing costs through no fault our own. Having lived here for over 20 year i would hate to move away, but it could become an economic reality, driven out by rate hikes.

1.3 Proposed changes to existing rates, and new targeted rates

No more rate hikes please.

Make water over 900 litre, not 700 as this isn't much for a larger family.

1.4 Investing in upgrading and protecting our city's water networks

### Feedback

1.8 Our heritage, foreshore and parks

Hi. I'm a graphic designer living in Christchurch. I would like to comment on the developments encroaching on the beauty of Halswell Quarry from a designers perspective. For example Quarry Gate which butts up right next to the Quarry. It looks so ugly now driving down the hill from cashmere road to the Quarry and seeing all the ugly rooves jammed together right next door to the quarry.

I would suggest that the Quarry is surrounded by a green buffer zone which would allow the Quarry to breath. I would hate for another development to be allowed to butt up against the Quarry and suffocate it's beauty

kind regards

CCC LTP Support - Christchurch Arts Centre April 2021

13 April 2021

Phillip Aldridge, Director  
Brad Adlam, Operations Manager  
Arts Centre  
CHRISTCHURCH

Dear Philip and Brad

### **Christchurch City Council - Long Term Plan Support**

I trust this letter finds you well.

On behalf of SCAPE Public Art Trust, we would like to express our support to the Arts Centre to obtain local government funding for an ongoing subsidy through the Christchurch City Council Long Term Plan (LTP) 2021-2031 and support the Council creating a Special Heritage rate to fund the grant.

SCAPE Public Art relocated back to the Arts Centre in 2016 and is one of many organisations and tenants within the Arts Centre. Our organisation's arts community and audience have benefited from our association and partnership with the Arts Centre as a venue partner in providing highly visible and accessible site locations for the installations of temporary artworks for our SCAPE Seasons, as well as providing facilities to host free education artwork classes and our community engagement programmes.

Our partnership is symbiotic in creating opportunities for Ōtautahi Christchurch communities to participate in local arts events and supporting the ongoing regeneration of the central city following the Canterbury Earthquakes and most recently COVID 19.

The iconic Arts Centre's restoration of its heritage listed buildings are an utmost priority in supporting Ōtautahi's cultural values and history. The efforts the Arts Centre has contributed to local business communities and its tenants should without doubt be recognised as a drawcard for local and national visitors.

We understand the financial challenges the Arts Centre is facing, and SCAPE Public Art recognises the importance for this organisation to receive CCC LTP local government funding to provide the continuation of on-going maintenance and restoration for Ōtautahi Christchurch's most significant central city landmark.

We wish the Arts Centre our very best for a successful outcome.

Kind regards

Sincerely

Deborah McCormick  
Executive Director

15 April 2021

Christchurch City Council  
Our Long-Term Plan Submission

**SCAPE Public Art Partnership with Council to build a World Class Collection of “Cultural Assets” for Ōtautahi Christchurch.**

This submission from SCAPE Public Art is to seek the continuation of funding for the annual SCAPE Season (Festival & Events) and (Strengthening Communities) Council Funds. SCAPE Public Art is also requesting support for the reinstatement of the Public Art Fund.

SCAPE make this submission to our long-term plan to further develop and formalise over the next 10 years, our commitment to producing public art for our City through our partnership agreement with Christchurch City Council.

Through aligning both organisations future vision and values of promoting wellbeing connection through enabling, equal access, equality and accessible to all, SCAPE will successfully deliver all outcomes in the following ways:

- **Annual Festival Seasons – SCAPE Public Art Seasons** are now after 23 years significant events in Christchurch’s annual festivals & events calendar in Spring each year. We seek a continuation of our funding via the ‘Strengthening Communities’ and ‘Festivals & Events Funding’ streams at Council over the next 10 years.
- SCAPE produces and promotes a refreshed Spring season, public art walkway festival of new public artworks (every annual season), events, education, programmes and activities.
- Annual marketing campaigns (linked to ChristchurchNZ) and visitor experiences related to these public artworks.
- **New legacy artworks via the Council’s Public Art Advisory Group (PAAG).** Current track record for delivery has seen artworks including (*Fanfare, Solidarity Grid, STAY, Tree Houses for Swamp Dwellers, Flour Power, Passing Time, Raise the anchor, unfurl the sails, set course to the centre of an ever setting sun!, Diminish & Ascend, VAKA A’ HINA, Ka mua Ka muri, The Pool*), commissioned, produced and gifted to the city – valued at \$7.7M with \$1.8M allocated by CCC PAAG and \$5.8M other SCAPE achieved matched funding.
- Our current position is for every \$1 allocated by CCC PAAG, SCAPE matched this with \$4.15 from other funding and sponsorship sources.
- CCC PAAG funding is only applied for specific legacy permanent artworks. All funding goes towards the artworks purchase and installation which become assets of CCC. SCAPE maintain these artworks under

a 3-way agreement with the Council and Artist for 1 year then transfers these to Council for ownership and maintenance.

Our long-term vision is to work with Council to grow Christchurch's public art collection as a valuable and vibrant world class destination. Continue to engage large loyal, local audiences, via annual SCAPE Public Art Seasons. Develop national and international attendances and recognition.

Ōtautahi Christchurch's public art collection, specifically *VAKA A' HINA* by Sēmisi Fetokai Potauaine and *Diminish & Ascend* by David McCracken, produced in partnership between Council's PAAG & SCAPE, have been included as exemplars of Public Art within the Creative NZ document 'Arts and culture part of your community's future' guidelines for arts organisations around Aotearoa New Zealand, to make submissions into their respective LTP's in 2021 (see attached).

We wish to acknowledge and thank the Christchurch City Council for their support and commitment to the Public Art Funding which has been administered through the Public Art Advisory Group (PAAG) over the past 13 years. It has been fantastic.

We note that this funding has not been continued in our Long-Term Plan.

SCAPE Public Art would like to work with CCC and PAAG to continue to leverage our phenomenal, demonstrated support from the public sector for a matched city public art fund. **As in the past we would leverage this CCC Public Art Fund allocation by raising funds from the private sector. Past experience indicates matched funding of \$4.15 for every \$1 of CCC spend delivering a total value of artworks at \$7.7M**

- The arts should be a strategic and funded priority for the city – the funding needs to be assured to create confidence ongoing in the cultural community.
- When the Arts are thriving, life in Christchurch is more connected, more interesting, more enjoyable.
- PUBLIC ART IS FOR EVERYONE. We want public art in Christchurch – just like Christchurch weather – to become part of everyday conversation!
- A creative city through the arts is essential to artistic growth in the city and nurturing and supporting artists.

The partnership of PAAG and SCAPE see's Christchurch's public art collection on the cusp of catching up with Wellington and Auckland with their large public art collections. We are seeking the reinstatement of funding over the next 7 years to complete an international standard body of public artworks across the central city and key gateways to continue our great partnership trajectory.

It's disappointing to learn that there is no allocation for the Public Art Fund within the DRAFT Long Term Plan. This funding disappearance directly threatens the unbelievable more than matched funding (every \$1 supplied by Council has been matched by \$4.15 from industry and private sources), how can we sit by and let this happen?

#### **Requested re-instated Public Art Funding 2021 - 2031**

Year	2021-22	2022-23	2023-24	2024-25	2025-26	2026-27	2027-28	2028-29	2029-30	2030-31
CAPEX	\$50K	\$100K	\$250K	\$350K	\$450K	\$525K	\$750K	\$525K	\$850K	\$525K
OPEX	\$10K	\$20K	\$80K	\$81K	\$83K	\$85K	\$86K	\$88K	\$90K	\$92K

SCAPE supports Council's Public Art Advisory Groups suggestion that the Public Art Fund be separated out from the Christchurch Art Gallery budget, and perhaps be devolved to a standalone 'Christchurch Public Art Charitable Trust' to deliver public art funding with 'SCAPE Public Art Trust' delivering the artworks and matched funding.

The right investment is needed to advantage Christchurch and our ability to become a major events destination for world-class public art and the festival that surrounds it. SCAPE Public Art wishes to play a lead role at the forefront to enhance our city's profile and directly shape our image as a tourism, business and investment destination.

As an organisation, SCAPE is ambitious and has a proven track record of delivery, innovating, trying new things and challenging ourselves to engage people on a conversation about public art in the city. To continue to deliver this through our annual seasons and wider programme, we require a commitment to the vision to delivering "Place, Process and Presence". SCAPE Public Art see itself as very much part of that delivery.

We look forward to strengthening our partnership with the city and doing our part in developing public art for the community which, as we all know, is important to the healing and ongoing wellbeing of Christchurch people.

We look forward to your feedback and are open to ways to continue the delivery of excellent public art programmes, while acknowledging and managing within Council's restraints and expectations.

Kind regards  
Sincerely

Deborah McCormick  
Executive Director

Michael Fulton  
Chairman  
SCAPE Public Art Trust

# Arts and culture: part of your community's future

Ngā Taonga Toi:  
ngā taonga pāpori āke āke

creative *nz*  
ARTS COUNCIL OF NEW ZEALAND TOI AOTEAROA

**Poipoia te kākano kia puāwai**  
*Nurture the seed and it will bloom*

# Supporting your community's cultural wellbeing

We know your council is working hard to pull together its long-term plan.

Arts and culture play a vital role in enabling thriving communities. We encourage your council to make them a part of your community's future.

**Why?** Your council is required to promote the cultural wellbeing of your community\*, and you already provide considerable support for arts and culture. Your support enables:

- Local artists to make and show their work to audiences, and to make a living.
- Your community to access and participate in the arts.

\* Under the Local Government Act 2002, section 10(1)(a)

# Local government's support for arts and culture

We know times are tough for councils and their communities, but we encourage you to continue supporting arts and culture, and grow your support where possible.

Here are some of the ways your council already supports arts and culture.

## Community halls

Dance classes, community choirs, art classes, theatre groups and music and movement groups gather in community halls every week.

## Public art

Used to tell the stories of mana whenua and your community's unique identity, enhances the urban environment and residents' sense of place.

Image: Vaka 'A Hina by Sēmisi Fetokai Potauaine. Commissioned by SCAPE Public Art, Christchurch.

## Theatres, concert halls and venues

Spaces for local and touring performances, events and rehearsals.

“Having sustainable community arts venues supports the telling of local stories. It enables further creative activity within the community, it builds audiences through making arts experiences more affordable and accessible. This is vital for wellbeing, and should be seen as an ongoing investment in community rather than a handout.”

**Dr Jeremy Mayall**

Chief Executive  
Creative Waikato

## Art galleries and museums

The kaitiaki of your community's art collection, providing public engagement and education opportunities.

## Libraries

Access to books, internet, learning programmes and spaces for people to gather, work, play and learn.

## Regulation

Use of public space for events and the display of creative work, and permission to make noise!

## Events

Cultural and community events, and public programming.

## Funding for marae

For their preservation, maintenance and development.

## Funding

Regional or district-wide grants for arts and culture organisations, projects and venues.

“Acknowledging, protecting and celebrating cultural histories and values within the central city has many benefits to the community as a whole. In Ōtautahi Christchurch we’ve seen building pride in Ngāi Tūāhuriri / Ngāi Tahu identity and culture have a beneficial effect on the wellbeing of Māori and their sense of belonging, and build shared pride and community cohesiveness.”

**Debbie Tikao**

Matapopore Charitable Trust

# The benefits of investing in arts and culture

Investing in arts and culture supports your community's wellbeing in the following ways.

## Cultural

- Enabling diverse communities to express and celebrate their cultural identity.
- Helping communities to understand and accept cultural differences.
- Supporting the revitalisation of Te Reo Māori and Te Ao Māori.
- Growing knowledge and value of the stories, values and places of importance to mana whenua.
- Increasing understanding of Pasifika communities and Aotearoa's place in the Pacific.

## Environmental

- Creating spaces and places that people value and want to care for.
- Addressing and growing understanding of complex environmental issues.
- Building communities' connection to the whenua.
- Creating a sense of place, belonging and civic pride.

## Social

- Creating a sense of belonging, connectedness and greater understanding between communities.
- Supporting good physical and mental health outcomes.
- Enhancing a community's ability to deal with social challenges.
- Growing people's knowledge and providing opportunities to learn.

Image: Matariki at Wharewaka Fuction Centre, Wellington.

**More than 6% of New Zealand's workforce, around 130,000 jobs are employed in creative industries.**

## **Economic**

- Creating jobs and opportunities for local businesses – artists and arts organisations, and the aligned sectors of hospitality, tourism, education and manufacturing – and providing valuable work skills.
- Creating vibrant towns and cities people want to live, work and play in.
- Supporting a stronger sense of connection to place for both residents and visitors by providing and promoting distinctive stories and experiences unique to a rohe.
- Supporting recovery from unexpected shocks or disasters through supporting social cohesion and opportunities for people to share experiences.
- Making your town or city an attractive place for tourists.

Image: Len Lye Centre | Govett-Brewster Art Gallery, New Plymouth.

“We should no longer have to argue the merits of meaningful social and cultural connection or expression. Anybody who has intimate knowledge of a community, in all its glorious diversity, should be able to look inside their heart and understand the profound benefit of arts and creativity on the health of that community.”

**Liz Sneyd**

Co-founder  
Virtuoso Strings

# Ways to support arts and culture in your community

Here are some ways your council could include additional support for the arts and culture in your long-term plan.

- Include the arts, culture and creativity in your long-term plan's community outcomes.
- Commit to developing an arts and culture strategy or plan with the members of your arts community if you don't already have one.
- Work with your arts community to review your council's arts and culture strategy or plan if it's out of date, and to identify ways in which your arts community can support you to implement the strategy or plan.
- Consider increasing funding for arts and culture over each year of your long-term plan.
- Consider adopting a policy that requires council infrastructure projects to include art or design elements – and for the best result, bring artists into planning from the outset, not just as an add-on at the end.

- Think about which council-owned venues and spaces you could make available to your arts community to use free of charge or at reduced rates for both rehearsal and development of new work, and the presentation or performance of work.
- Consider providing dedicated spaces for the Māori and Pasifika artists in your community.
- Commit to greater investment in Toi Māori (Māori arts) in your community. Work with mana whenua and Māori arts collectives and organisations to identify opportunities and where the greatest needs are. Ensure Māori representation on your council's Creative Communities, Arts, Events and Public Art panels.
- Commit to ensuring that there is at least one Pasifika person on your council's Creative Communities Scheme Committee. Your Committee should reflect the diversity of the people in your city/district.
- Commit to including people with lived experience of disability on your council's Creative Communities Scheme panel.
- Commit to doing a stocktake to understand which arts organisations and groups in your community aren't currently receiving funding and address these gaps.

Image: Ōtāhuhu Transport hub - The station design reflects the history of the area and the site's importance to local mana whenua as a historic portage site for waka.

# Involving your arts community in long-term plan decision-making

Your local arts community will have plenty of ideas about the ways in which it can make your town or city a vibrant and prosperous place. Consider involving artists in your long-term plan consultation by:

- organising a meeting or workshop for members of your arts community (arts organisations and institutions and independent practitioners) to provide their feedback on your council's draft long-term plan
- arranging to meet with your regional arts development organisation (if you have one) to get their feedback on the local arts community's needs
- sending a survey to the artists in your community to get their feedback on things you could include in your draft long-term plan. Consider working with your regional arts development organisation (if you have one) to get this survey out to your local arts community – ensure your promotion channels are inclusive so all cultural and ethnic groups in your community have access to the information.

**Help your community to thrive:  
make the arts and culture part  
of your community's future.**

“Having worked as an artist for six years, my involvement in a community arts project gave me the realisation that the value of arts to a community was bigger than me and my personal arts practice. These experiences opened to me the huge value of lowbrow art, grassroots and community arts. I’ll now forever champion that access to arts facilities, opportunities and resources is an unnegotiable requirement for social wellbeing.”

**Simone Anderson**

Director  
The Incubator Creative Hub

## Feedback

1.1 Have we got the game plan right?

I'm submitting on the draft Long Term Plan to ask the Council to prioritise the immediate renewal of the Belfast netball courts at Sheldon Park and the repair of the toilet block.

The courts are in terrible state and in dire need of renewal. The netball courts are a health and safety concern because:

they flood when it rains

they are slippery with ice on frosty mornings

when most teams train in the evenings they are slippery and damp from night-time dew

part of one court is permanently wet and covered in a slick film because it never dries out

they have extensive cracking filled with vegetation

they have holes for tennis net poles that are no longer used

The toilet block was damaged in the earthquakes and is frankly, in a disgusting state.

The junior teams at the Belfast Netball Club, Belfast School, Belfast Kids First Kindergarten and other community and sporting groups use the courts. The senior teams (under 17 and up) no longer use the courts due to the high risk of injury. Instead the Club pays each year to hire courts for senior teams to train on. This is a large burden.

**We Need Your Help To Get New Courts**

Belfast Netball Club is a large community based club, run by a small, dedicated committee. It has approximately 250 registered players this year. New subdivisions and the proposed addition of a second school in the area means this number will grow.

However, for the Club to be able to support growth it requires adequate facilities, now, not in 2027.

Safe courts are essential for the Club's future. Please Christchurch City Council, prioritise the immediate renewal of Belfast Netball Courts and the immediate repair of the toilet block! Bring forward the Community Parks Planned Hard Surfaces Sheldon Park projects works and include the repair of the toilets with it.

1.1 Have we got the game plan right?

The Belfast Netball Club require 300 submissions by 18 April 2021 to make an impact.

You can directly input your submission here: <https://www.ccc.govt.nz/the-council/consultations-and-submissions/haveyoursay/show/386#startsubmission>

You can make a submission on the draft Long Term Plan by:

Step One: copy the submission text below

Step Two: click the button that says "Submit"

Step Three: fill out the online form

Step Four: paste the text into the top "Have we got the game plan right?" section.

If you don't want to fill out the form you can email CCCplan@ccc.govt.nz directly with your submission. Or, you can make your own submission - you may wish to share your own experiences of using the courts.

A petition will also be circulating on uniform nights and at Club Day.

### Feedback

1.1 Have we got the game plan right?

the facilities in sheldon park for the netball courts and adjoining toilet block are in an incredibly bad state of repair. I have witnessed young people duting trials trip over on the undulating court surface, in one instance severely injuring one girl whose season was put to an end shen she injured her ankle. It is likely that more incidents like this will occur

the toilet lock is really run down and unappealing to use. The blockwork has cracks obviously as a result of the earthquakes that have not even had any temporary repairs. It is very unsettling to use the facilities mthey look unhygenic and dirty

please consider fast tracking the upgrade of these facilities

1.2 Rates

the increases to chch residents in recent years is becoming too much. I know of many people of fixed incomes that just cannot continue to absorb these increases without their quality of life being drastically diminished. For the elderly desperately trying to maintain their independence it is getting incredibly hard

Comments

1.11 Potential disposal of surplus Council-owned properties

27 Hunters Road and 42 Whero Avenue in Diamond Harbour - this should not be a fast tracked disposal and proper community consultation should be undertaken. The land is used by the community in many other more valuable ways than more residential sections where long term vacant sections already exist nearby. In addition to the potential loss of this community asset, the surrounding infrastructure both in the immediate vacinity and wider access from the city can not support an increase in buildings and traffic.

### Feedback

#### 1.2 Rates

I think that this is acceptable.

#### 1.3 Proposed changes to existing rates, and new targeted rates

I agree with the targeted rate for the Arts Centre.

#### 1.5 Investing in our transport infrastructure

More than enough appears to have been spent on cycle lanes particularly in light of the fact that I daily see cyclists not using the expensive lanes provided for them.

#### 1.7 Our facilities

Do not get rid of the Mobile Library. This is an important way for people who are limited in their ability to travel around the city to be able to access reading materials. it is unrealistic to expect that everyone has access to a computer or wishes to read on screen.

#### 1.8 Our heritage, foreshore and parks

The Council should ensure that money spent in the parks area is correctly spent, while the balance seems adequate the finer points of tenders and contracts need to be examined. Living near a large park I too often see unemptied rubbish bins and large tree branches lying around for weeks. It is vitally important that the Council makes sure that contractors meet the obligations that they have signed up to.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

**Comments**

It is vital that the Council contribute to the Arts Centre as this collection of buildings is vital especially in light of the loss of other heritage buildings on the city. I feel that this targeted rate seems a suitable way for the Council to fund its contribution.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

**Comments**

The Canterbury Museum does not own or have automatic rights over the Robert McDougall Art Gallery. The Council should not fund this base isolation as it is purely a way for the Museum to gain control of the storage area under the gallery and thereby take over the gallery by stealth. It is not right that the Council should impose even a small rates increase on ratepayers at the behest of another organisation particularly when the Museum also draws patrons from many outside the Christchurch City Council area as well. Any funding for the Robert McDougall Art Gallery should be to enable the use of the space as it was intended.

1.11 Potential disposal of surplus Council-owned properties

Any heritage buildings should be retained by the Council other properties that are no longer being used by the Council may be best disposed of.

### Feedback

1.4 Investing in upgrading and protecting our city's water networks

Christchurch used to have some of the best city fresh water in the world. CCC's aim should be to get to a point where chlorination of water can be stopped.

1.5 Investing in our transport infrastructure

The city needs to get travellers out of cars and into buses. Bus lanes are one way of making bus travel more attractive so consider increasing the number of bus lanes in the city. There is no point in having bus lanes that are not enforced so increase the enforcement on bus lanes.

1.6 Rubbish, recycling and organics

Please re-introduce the ability to recycle soft plastics in the yellow roadside bins

1.7 Our facilities

Do not close the Metro lounges on Riccarton Road. These lounges provide a place of security, information and shelter in one of the very busiest public transport hubs in the city. Removing these lounges will push more people back into their warm and secure cars. If CCC are serious about increasing bus patronage you'll keep these lounges open.

### Feedback

1.5 Investing in our transport infrastructure

Unsure that the dollars that have been spent, and are proposed to be spent, on cycle lanes will provide a reasonable return on investment. Perhaps more emphasis on providing parking in the CBD would prove to be better economics. Cycle lanes are a good idea but in a more simple form than what we are seeing.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

1.11 Potential disposal of surplus Council-owned properties

Unless there is a specific need for the council to own these buildings, there is no reason to maintain ownership and the expense of keeping them. They become a liability rather than an asset.

## Feedback

1.1 Have we got the game plan right?

lets use a user pays system, engage water meters for irrigation

larger properties get charged more rates , give them a larger green bin, this is then sold as compost etc

Gold coin at Art gallery, museum etc everyone can afford this, use a coin turnstile or a card for several visits

1.2 Rates

Don't increase all rates, we pay \$17000.00 a year our road is crap we have overhead POWER LINES ETC East side pay much less rates and have better streets, and same facilities as west side have! I suggest a sliding scale, increase cheaper areas up and more expensive areas a small increase.

1.3 Proposed changes to existing rates, and new targeted rates

See above

1.4 Investing in upgrading and protecting our city's water networks

Spread it out over longer period

1.5 Investing in our transport infrastructure

Think before act!

If you had looked at European cities you would see they use wide shared footpaths for pedestrians and walkers.

The roads made more narrow with ridiculous wide cycle lanes dangerous for cyclists and cars as lanes run out on busy roads . The where do we go.

Have smaller more regular buses in off peak time, and get them to branch out into streets off main arterial roads then elderly or infirm do not have to walk so far and more people would use them so people can flag down quickly

1.6 Rubbish, recycling and organics  
Big green bins for all houses over 700 sq metre sections

1.7 Our facilities

Later hours for libraries across town, each have 1night when open until 8pm. They could start later like 10am on these days.

Same with Art Gallery 2x week open 12-8pm you will only need staff at these times then. Office workers at Art Gallery use own entrance, so save on front of house and security.

Also gold coin for everyone to art gallery and museum.

1.8 Our heritage, foreshore and parks

Engage community activity around local parks, many retired people would help keep these clean and tidy and good way for them to meet neighbours and socialise.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes

Comments  
Also have koha vessels at this site for visitors to put coins into

### Feedback

#### 1.7 Our facilities

I am really disappointed and concerned that there is a proposed cut in funding to the Christchurch Art Gallery. It is such a valuable thing for the residents and visitors of Christchurch. It is a place that the community can go and learn, in a non threatening environment, mostly free of charge which is a barrier in many other environments. The funding is proposed to effect the late night Wednesdays which is often the only opportunity for some of us to visit the Gallery. To be able to be involved and feel included in the events that they hold on the Wednesday evening, and to be a part of this arts community in this way is really crucial to mine and my family's well being and we feel immensely concerned that these may cease due to funding cuts.

1.12 Any other comments:

The submission my organisation is making relates to a Council letter which I am aware was sent to 'not-for-profit community based organisations' with respect to annual remission of Council Rates.

This invited submissions by 11 May 2021.

The attached Submission is in response to that letter.

John Robinson

Rates Submission Christchurch City Council 2021

## THE STEWARDS' TRUST OF NEW ZEALAND INCORPORATED

### Submission re: Christchurch City Council Rating for Church Properties

The Stewards' Trust on New Zealand Incorporated (Stewards) holds title to 5 Properties (each having one land title) as Trustee on behalf of Open (Christian) Brethren Churches. All are within the City Council area. These properties are listed at the end of this communication.

All of these properties are occupied by functioning Churches and are classified 'non-rateable'.

Remission policy does not apply to General Rates because Churches are exempt under section 8 of the Local Government (Rating) Act 2002, Schedule 1, Part 1, clause 9, viz.

'Land used solely or principally –

- As a place of religious worship;
- For a Sunday School or Sabbath school or other form of religious worship and or religious education'.

With respect to Churches and following discussion with an official of the Council it is understood that the proposed rate remission modifications apply only to Water and Sewerage Connection charges.

Currently the Churches described have a 50% remission on Water and Sewerage Connection charges.

As Stewards' Trust understands it, the proposal is that the remission element be withdrawn where it is shown that any individual Church has certain financial resources, as determined by the formula explained in the Council letter.

Churches meet spiritual, social, educational and other needs – not only for their own members but for the wider community. Churches in general provide a range of largely voluntary community services, such as English as a Second Language (ESOL), Mainly Music (MM) - for infant children and parents, community food banks, meals, social events for all ages as well as for religious worship and Christian education.

Churches do not exist for personal/private profit or gain.

Stewards' Trust acknowledges the remission policy currently in place with regard to Water and Sewerage Connection charges and consider it should be retained, in recognition of the community contribution made by Churches.

On behalf of:

The Stewards Trust of New Zealand Inc.

John Robinson, Secretary

List of Church properties in the CCC area:

1. Bryndwr Gospel Chapel, 179 Idris Road. Lot 2, DP 387188
2. Durham Street Gospel Chapel, 375 Durham Street. Lots 1-6 DP 10108
3. Ekalesia Au Uso Kerisiano Samoa, 78 Stanmore Road, Linwood. Lots 1-2 DP 5752
4. North Beach Christian Fellowship Tedder Avenue Lots 3-4 DP 4876
5. Wairaki Road Bible Church 392 Wairaki Road. Lots 6-7 DP22114.

### Feedback

#### 1.7 Our facilities

Belfast Netball Courts and the toilet blocks are in a terrible state and in dire need of repair.

Renewal of the netball courts, driveways and carparks and the repair of the toilets a Council priority, please expedite this.

The renewal of these important assets will not only benefit the community, but also those of us who serve the community in this area.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Canterbury Opera Foundation supports The Arts Centre being included in the Long-Term Plan 2021-31 and the Christchurch City Council creating a Special Heritage rate to fund the grant.

The Arts Centre is unique. It provides a variety of spaces for performance both intimate and large, rehearsal rooms, and practise rooms for opera and opera practitioners. This in turn brings audiences to The Art Centre who spend money at the cinema, bars and cafes.

The Arts Centre must be looked after to ensure Christchurch has heritage buildings for arts and creativity in the city.

The Arts Centre is where people come to feel at home in Christchurch. The Great Hall holds so many memories for a wide variety of people and not just people who live here. They've sat exams here, gotten married here, eaten here, visited markets here, got an education here and spent their childhood here. Where would all these people go to relive their own personal historical magic if The Arts Centre was taken away?!

1.11 Potential disposal of surplus Council-owned properties

The YHA would make perfect art studios – there would be plenty of artists who would benefit from the space as well as the central city location in the art hub of Ōtautahi. I expect there would be people willing to manage/facilitate the studios voluntarily (I would, if that meant that others could use it). There is a desperate need for affordable and reliable studios as the Old School in New Brighton is set to be demolished which housed many creative and community groups and individuals.

### Feedback

#### 1.2 Rates

I think it's misleading and a little unrealistic thinking and creating an expectancy that the rates can remain at 4% over the next 10 years can be done. A lot can happen in 10 years that we have no control over.

#### 1.4 Investing in upgrading and protecting our city's water networks

It's really important that we get this right. We need to spend what's needed to upgrade our infrastructure to ensure our fresh, clean water supply is maintained.

#### 1.7 Our facilities

Our facilities are excellent, Please spend enough money to keep the facilities in this condition

#### 1.8 Our heritage, foreshore and parks

I'd love to see the Council heritage buildings being restored as well as the Canterbury Provincial Council Buildings, Old Municipal Chambers (Our City O-Tautahi) and others.

#### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

This is an incredible building, part of the heritage of Christchurch and needs to be looked after by us all.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

I am happy to pay towards the restoration of the Christchurch Heritage building. I would love to see this art gallery open up again.

1.6 Rubbish, recycling and organics

SUBMISSION TO CCC LONG TERM PLAN 2021

FROM: Paerangi Matunga & Kimberley Sewell,

14 April 2021

Tēnā koutou

#### RE: RATES FOR CENTRAL CITY WASTE COLLECTION

We support the submission from the Atlas Quarter Body Corporate in relation to rates for the collection of solid waste.

We support the Council's strategic goal of reducing solid waste but object to having to pay \$300-\$400 per year in rates for the collection of the red, green and yellow bins when the Council does not provide this service to us. In the absence of Council providing this service, we pay privately through our Body Corp Levy for waste collection by EnviroWaste. We support waste minimisation and have all the same waste streams (green, yellow and red) as the Council provides.

#### We ask that the Council either:

1. reduce the general rate and waste minimisation levy for developments such as ours to reflect that no waste collection is provided, or;
2. amend your service contracts to provide the waste collection service.

#### Regards

Paerangi Matunga & Kimberley Sewell

## Feedback

1.1 Have we got the game plan right?

Can we dump all the money for the heritage crap. I know, it's a shame and we'd all love some history buildings. It's not a priority now, the old cathedral has had it's chance and all the decrypted earthquake buildings need to be torn down and start again. New Zealand is a new country can we just embrace that, lets get better public transport, cut back on fuel consumption with better cycle/bus routes.

Sort out the water and all the roads also.

1.2 Rates

I think it's bad. Why is there not a sliding scale like we have for taxes. The ones with little keep what little they've got to make their life better and the ones with lots have to give a little more as their life is unaffected by an extra 2%.

1.3 Proposed changes to existing rates, and new targeted rates

I don't want any of my rates going to heritage. The excessive water charges, great. Unsure if that's the correct cap 700L. I'm sure that's been looked at by engineers and surveyors.

1.4 Investing in upgrading and protecting our city's water networks

Just do what ever needs to be done to get this sorted.

1.5 Investing in our transport infrastructure

Just do what ever needs to be done to get this sorted.

1.6 Rubbish, recycling and organics

Just do what ever needs to be done to get this sorted.

Can we get bigger red bins please. Having smaller bins does not encourage less waste, it just means the poor throw there rubbish in the river because they don't have time or money to take it to a dump.

1.7 Our facilities

I only use gym/pools and they seem pretty good. Library on times i've been seems to be doing well.

1.8 Our heritage, foreshore and parks

No. Scrap this. We've got kids without food, parents that cannot get to work on time. People sick with waste water and rubbish. That's the priority.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

Arts are needed for a good life.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

1.11 Potential disposal of surplus Council-owned properties

Sell them.

### Feedback

1.8 Our heritage, foreshore and parks

Personally I would like to see a couple of percent more of the budget be put into this, perhaps take some from the water upgrades and put it into this even just 2-3%

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

I am the owner of a small business which operates successfully at The Arts Centre. I absolutely support funding this incredible hub of business, arts, culture and tourism that is part of the fabric of Otautahi. I know the grant is absolutely essential to the continued running, maintenance and development of the Arts Centre and without it the future of the centre is uncertain. Even putting my business aside I think The Arts Centre is a unique place that brings in people from all around the country, people have fond memories and experiences here and it deserves funding to keep it going.

1.11 Potential disposal of surplus Council-owned properties

Sell them or switch up their use to make them more viable. Consider allowing a developer like Box 112 to utilize them.

1.12 Any other comments:

I don't support the closure of Wharenui Pool, I use the pool on average 3 times a week and it is vital to my mental and physical health and know many feel the same. I appreciate the metro sports facility is a priority but Wharenui has been an essential part of the community for many, many years.

## Feedback

### 1.1 Have we got the game plan right?

Our farming business is **totally opposed** to the proposal that the land drainage rate that is currently a targeted rate levied on properties benefiting from land drainage infrastructure be extended to properties that do not benefit from this infrastructure.

The proposed expansion of the rating base is unfair, unjust and plain wrong. It is also surely of questionable legality to charge for a service for which we receive no benefit and in fact, are required by other legislation, to manage for our property ourselves, with no local body or national level support.

Once the phase-in is complete it will cost us an additional \$2,986.00 per year, for which we will receive absolutely nothing. See further comments below.

### 1.2 Rates

**We have a very dim view** of this plan to contain average residential rates to 5 percent by focusing your sights on extending the currently targeted land drainage rate to properties that do not benefit. There can only be one rationale for this proposal ie levy rates on the higher CV of large, relatively remote, rural properties and whizz bang, a juicy extra dollop of rate payer monies into the coffers, without alienating urban ratepayers.

This proposal is manifestly unfair and unjust. Let the rates lie where they fall.

### 1.3 Proposed changes to existing rates, and new targeted rates

**We are totally opposed** to the proposal that the land drainage rate that is currently a targeted rate levied on properties benefiting from land drainage infrastructure be extended to properties that do not benefit from such infrastructure. Our **Objections** include:

- **The proposed rating change is unfair, unjust and plain wrong.** Rural ratepayers who receive absolutely no benefit from the land drainage rate should not be forced to subsidise the (mainly urban) ratepayers who do.
- 
- **We are solely responsible for managing our own on-farm waterways, drains and wetlands,** to a standard in line with increasingly more demanding national & regional policies and regulations. We receive no financial assistance from the urban sector for doing this. These are costs that each landowner individually bears. It is unacceptable that CCC now proposes that we also be required to subsidise (mainly urban) land drainage activities.

- 
- **We already contribute a disproportionate amount to Christchurch city services and infrastructure** that we seldom have the opportunity to use. Your justifications that rural landowners also work, shop in and otherwise access city amenities is spurious. Many rural residents access these amenities infrequently and already pay substantially for roading & footpath maintenance & other City amenities eg sports facilities that they would argue is of limited benefit to them.
- **The additional rates burden placed on us** once the proposed 3-year phase-in is complete will amount to **\$2,986**, taking our total rates bill to **in excess of \$26,000** (not including the currently proposed increase in general rates). We simply cannot afford these never-ending increases. Farming is not a cost-plus industry, and the profit margin is already exceedingly thin. And at the same time we are being expected to absorb additional costs for improved water and land management as demanded by increasingly stringent (over the top?) National & Regional policies & regulations.
- The proposed basis for rating (as a % of capital value) is grossly unfair, with totally disproportionate burdens being placed on rural ratepayers, compared with urban ratepayers, for minimal at most, benefit.
- In a world where rates are increasingly being targeted to the direct beneficiaries of services where they can be clearly identified, this proposal appears to be moving totally counter to that. Is this simply an effort to reduce the rates burden on our urban cousins by hitting up farmers with generally higher valued properties (based on scale of productive land area,) as a fairly soft target. To us this is exactly how it appears.

**We submit that the proposed change not be adopted, and that the land drainage rate remain a targeted rate as presently levied.**

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

Retain the current land drainage rate on properties receiving a land drainage service. User pays. As a rural property owner on the Banks Peninsula, we pay our own private contractors to install drainage on our property. I can't imagine under your proposed blanket land drainage rate that the Council will be reimbursing businesses who pay for their own drainage.

The land drainage rate should remain as a rate payable on properties receiving a land drainage service.

Alternative Option 1.

1.11 Potential disposal of surplus Council-owned properties

In regards to the former Kukupa School Site in Pigeon Bay. These buildings have significant history for Pigeon Bay and I support the vision of some of the community for a proposed use of the building as a gallery and arts education space. If there is funding available for this it should be bought forward to get the restoration of this building underway.

### Feedback

#### 1.7 Our facilities

We are aware at Te Iringa o Kahukura/ Cashmere High that part of the plan is to reduce staffing funding and funding for education programmes at both the Christchurch Art Gallery and the Akaroa Museum.

I am objecting heartily to both proposed cuts. Our kura regularly uses the Christchurch Art Gallery for trips and the demand for this will INCREASE, not decrease, with the NCEA changes beginning next year that require an increase focus on the art of Aotearoa/NZ, and Māori and Pasifika artists. The Christchurch Gallery is by far our best source to see artworks by these artists and also often to meet the artists. In addition, I regularly visit the gallery in the school holidays with my own tamariki and take advantage of the awesome education programmes they offer.

The Akaroa Museum is an essential facility for anyone studying the history of Canterbury. It has a valuable collection of archival material which the museum educators guide our students through each year. This year they accomodated 60 of our Year 13s and I know many other schools visited them.

Some quotes from my Y13s on the value of the Akaroa Museum and their staff to their research process:

"The Akaroa museum provided me with sources that I wouldn't have been able to access on the internet, for example getting a picture of one of the information boards on the museum wall gave me information about the flax trade which I didn't get a lot of information on from the internet."

"we got a deeper understanding from all the museum archives"

"In the Akaroa museum I found 3 sources including; The Historical records of New zealand (vol 2) by R McNab, 1914; apart from the first paragraph this whole source is a primary source and the main thing that it gave me would of been the quotes and the real primary records of what happened from some of the main people involved."

"The Akaroa museum had many good books and archives on my topic which are very difficult to find elsewhere as I realised after I got back from the trip, therefore, I was very pleased with myself that I collected multiple photos of the archives, book and other sources which had lots of information on my topic. "

The Akaroa Museum displays are constructed through extensive collaboration with Kāi Tahu and reflect mātauranga Māori, which we are supposed to be valuing in our society. Cutting staffing and making it harder for

schools to access this knowledge runs totally counter to the intentions and focus of national government, especially with the release of the Aotearoa Histories Curriculum.

Why would you ask us to pay more rates but then cut back essential services those rates pay for..?!

## Te Mahere Rautaki Kaurera - Our Draft Long Term Plan 2021-31

### Submitter Details

**Submission Date:** 14/04/2021

**First name:** Margaret **Last name:** Sweet

**Your role in the organisation:**

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

Support a targeted rate for the Arts Centre

Support a rate for people who use excess water.

1.4 Investing in upgrading and protecting our city's water networks

Yes, it is essential to maintain the infrastructure for the provision of all aspects of water usage

1.5 Investing in our transport infrastructure

Yes. As an older person I must have access to good facilities for using a car including inner city carparks. An eighty year-old cannot start riding a bike and waiting at bus stops is not possible for people with limited mobility

1.6 Rubbish, recycling and organics

Yes. I try to comply with the rules around recycling. It would be helpful to see those rules regularly restated.

I am continually uncertain how to dispose of left-over food.

1.7 Our facilities

I make good use of the Fendalton Library, and the Service Desk and Post Office at the Fendalton Library.

1.8 Our heritage, foreshore and parks

I have had a long association with the Ngaio Marsh Heritage House. I have appreciated the support Council have given over the years to this heritage place.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The Arts Centre is a much used and very important facility providing for both locals and visitors. It helps to create Christchurch's special character.

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes

Comments  
It is sad to see this lovely building unused.

1.11 Potential disposal of surplus Council-owned properties  
Not sure.

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

## Feedback

### 1.2 Rates

I can accept the need for this. The value we get from the rate dollar is pretty amazing.

### 1.3 Proposed changes to existing rates, and new targeted rates

I support the targeted water rate if a household uses more than 700 litres per day.

### 1.5 Investing in our transport infrastructure

Cycle ways are great but there needs to be an education programme for cyclists as I still see people cycling on the road when they are alongside a cycle way (this is on Annex Road cycle way).

Lincoln Road is terrible and it is going to be worse when the special bus routes lanes are developed. Trying to get out on to Lincoln Road from roads such as Sylvan Street, Annex Road, and Torrens Road is very difficult even when you are only trying to turn left. If you need to turn right it will become impossible with a median strip down the middle of the road. While I support the development of public transport and cycles ways it CANNOT be at the expense of householders who need to use a car. Lincoln Road needs widening and better consideration given to the needs of motorists on this stretch of road. I have lived in this area for over 40 years and the situation was bad 20 years ago and it has only got worse.

### 1.6 Rubbish, recycling and organics

I support these initiatives

### 1.7 Our facilities

I do NOT support closing Tūranga at 7pm. The library is one of the key community anchors for the central city and brings life to that side of town. Even though the usage between 7-8 is not as high as other times the facility should be open for those who do want to use it. When there are performances on at the adjacent theatres they usually start around 7.30pm. It is good to have a crossover of time and also the theatres are not open every night. Tūranga is more than a library - it is a social and community hub, a place of learning and experience and as such is a crucial part of the social infrastructure. Finding ways to activate the space between 7-8 to encourage more use is a better option than closing. We do not want to do what Birmingham did after it built the

biggest public library in Europe - very soon after it reduced the hours dramatically so please do not do that here.

Regarding the larger libraries - I recommend settling on a 7pm closing for Halswell, South, Fendalton and possibly Linwood as they are key anchor points - others across the city could close at 6pm. Linwood, being in the Mall may need a different approach.

It is unclear from the plan if there is any impact on the collections vote from the proposed budget. I would like to be assured that there is no intention to reduce the collections vote. Books, magazines and newspapers (both electronic and physical), as well as access to databases of information remain the core product of libraries.

Libraries continue to be one of our communities' most significant assets and services. We are in a time when the very fundamentals of democracy are being eroded around the world, and it is difficult to know what information to trust. Fake news, conspiracy theories and the rewriting of history abounds. Libraries are an essential part of the defense against these things which undermine our democratic way of life, and create division in our communities and between peoples. They are even more relevant today as places of learning, information, community connection and experience. Reading helps us understand each other, broadens our horizons and hones critical thinking. Christchurch City Council has a proud history of valuing libraries and investing in their future for the people of our city. Please continue to do this.

#### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

No

##### Comments

I would like to see this deferred for at least five years until other major projects are complete

#### 1.11 Potential disposal of surplus Council-owned properties

I support the disposal of Coronation Hall and 5 Worcester Street and other properties and land as identified in the list.

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

#### 1.7 Our facilities

My issues arise particularly from the proposed changes to the Library services. There are elements here which are clearly intended as cost saving measures which strike me as shortsighted at best and directly counterproductive at worst.

1) Closing Turanga at 7 on weekdays denies service to a significant and important section of the Library's clientele. Those who work a normal 9 to 5 are given a meager 2 hours to travel to the library, find parking in the city centre, and conduct their study or research. This is simply not enough time to productively engage with the Library's services. Libraries are spaces in which we expect a quiet, relaxed atmosphere conducive to intellectual engagement. They are not a supermarket specializing in the dispensing of books to the hurried consumer. This problem also applies to the not insignificant number of secondary and tertiary students who use the evening hours to provide a safe, quiet, and productive place to study.

2) To make the above problem even worse, you also propose cutting access to all other large libraries entirely during this time. Shutting at 6 means that any normal worker simply does not have access to the public libraries during the week. With 5 o'clock traffic as it is, there is no point at all in trying to rush through a library in the space of the ten minutes you might possibly have. This proposal is an absurdity. Numbers might be lower in the evenings, but those who come during those times *can often only come during those times*. Closing at 6 effectively amounts to denial of service to a massive section of the population.

3) No indication is given that the communities that make use of the Aranui and Matuku Takotako: Sumner libraries have been consulted on their use of the libraries on Sundays. Why is consistency in opening hours across different suburbs desperately important? It may look cleaner on internal documentation, but this decision seems to have no regard for the fact that different communities can and do work in different ways and have different needs. If they are underutilized, then all very well, but some hard data to back up that decision is warranted, I should think, especially in regards to the points above.

4) The reductions to the Fingertip Library Service can only be a cost-saving measure and are, again, woefully misjudged. I'm not sure if the people who proposed this decision are aware of what the Fingertip Service actually does and how integral it is to the effective delivery of the library services. It is certainly problematic that the proposal itself does not make clear the importance of the Fingertip Service to the public who are supposed to be consulted on these changes. There is no indication in the long term plan that the Fingertip Library Service is

what you are making contact with whenever you call the library to make an enquiry. Nor that the smaller libraries themselves make use of the Fingertip service as a backup resource for knotty problems that arise. Given the huge increase in e-resources as a central element of library services, and the fact that a significant section of the population that utilise our libraries are members of older generations that are not necessarily tech-savvy, the tech support provided by Fingertip should be available whenever our libraries are open.

5) The elimination of the Mobile Library Service is unconscionable. Over the last year, the Mobile Library has been publicly lauded as a vital lifeline during the pandemic when mobility has been widely constrained. However, this approbation does not mean that it has only been a vital service during that time. It merely let a wider section of the population know about a service that was already vital to many beforehand. The easing of the constraints on public life does not remove the need for the Mobile Library for those who relied on it before the pandemic.

In summary, these proposed changes look very much like a standard selection of ill-researched, badly thought out cost-saving measures that are considering only the bottom line and have entirely lost focus on why we provide library services in the first place. These are not just "facilities" that can be reduced to their financial paper trail. Our libraries are a vital and necessary public service, and that service needs to be actually available to the public. Every single proposal here acts against that basic thought.

### Feedback

1.1 Have we got the game plan right?

I'm very disappointed at the move to reduce education, public programmes and opening hours at Christchurch Art Gallery Te Puna o Waiwhetu. I hope the Council is able to maintain at least some of what is being proposed from reduction.

Education is so important for growing new audiences - and this is a key outcome for a public art gallery.

1.2 Rates

I'm fine with this.

1.3 Proposed changes to existing rates, and new targeted rates

It would be interesting to see specifically what is spent on heritage properties, but I wonder how heritage will be defined.

1.4 Investing in upgrading and protecting our city's water networks

I don't know, but would like to see Otautahi's drinking water as pure as it can be.

It used to be something in which we took considerable pride.

### Feedback

#### 1.7 Our facilities

I was in the city centre on Easter Monday. There were lots of people at Riverside, the Strip, Cashel Mall and the Art gallery. Walking across the square, past Turanga and to new Regent Street there was no-one.

We have been a city crying out to get people into our central city and to support our business. We have spent millions on facilities such as Turanga and ensuring our Art Gallery kept going after the earthquake. We want tourists to come to our city - both domestic and international.

Now we are deliberately undermining these goals by closing the very places that encourage a wide section of our community into the city. Free activities for families, activities that don't involve shopping and encourage the investigation of our history, heritage and culture and promotes curiosity.

Closing or reducing library and art gallery services is an easy target. I don't feel that you have looked at the other non-financial benefits and I believe that there should be a wellness budget looking at the ill effects of some of these decisions.

As a parent of children who were 5 and 7 during the earthquakes I am forever grateful for the Art Galleries outreach program and coming into schools and giving children a window into art and another world that didn't include earthquakes. These children are now teenagers and young adults with great memories of art galleries. Now by reducing programming you will miss another generation that are also living through the effects of COVID. We need to spend more on our youth not less. Children my age have done the hard yards of earthquakes and Covid and they need investment in programming not a reduction.

The most ironic part of your plan is reducing Finger Tip library services. The very people who are there to provide access to library services some of the most vulnerable in our community is going to have its hours reduced while the physical libraries are also having their hours cut. Not everyone has access to the internet and devices. The library is committed to give access to everyone and one of the tools we have to provide access is being cut.

Once again this is a lazy and easy way to reduce spending.

## Feedback

1.11 Potential disposal of surplus Council-owned properties

Long-term Plan of CCC concerning land disposal of 27 Hunters Rd & 42 Whero Ave.

As a recent resident of Diamond Harbour and a rate payer I am concerned that the council is proposing to fast track the disposal of the above land without consultation of the residents in whom it will affect. Should not democracy be maintained with the consultation of the community board and public consultation. I am totally against the council disposing of any of this land without this procedure.

The community has invested many man hours and dollars in plantings and beautifying the area, if the council run rough shod over the community board and just sell it what is to happen with this effort. Protection of gullies has to be decided along with future road access, infrastructure and upgrades. All this requires consultation with the people who live here.

Proper consultation is required so please remove the above properties from the LTP and fast track disposal.

Yours faithfully

Sharon Simon

File
LTP Submission - Louisa Vowles

Louisa Vowles,

Draft LTP Submission

14 April 2021

**Q: Have we got the game plan right?**

I would like to make a submission specifically about the following reductions to service proposed in the Long Term Plan.

- Reducing the Gallery's weekly Wednesday late night opening hours to one late Wednesday a month.
- Reducing the programmes the Gallery offers to the public and school groups by 25 per cent a year.

In relation to those proposals - I am concerned that across the wider section of of LTP Council Facilities this sits within - these changes to service disproportionately affect Libraries & Art Gallery - facilities of cultural learning and engagement for the community. 50% of the proposals described affect Libraries & Art Gallery.

This would be in contrast to your proposed investment in New Community Facilities - which devotes 80% of a proposed investment of \$348.9m to Sports Facilities.

I would like to see a more balanced investment in community facilities - and specifically would like to object to the proposed changes to Art Gallery education and public programme.

**Q: What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service? Have we got the balance right? If not, what changes would you like to see?**

One of the Art Gallery's key performance indicators is to **Deliver a diverse range of Public and school-specific programmes to promote and educate the importance of the visual arts.** The proposal sets out that the Target is reduced by 25% - from a target of 11,000 visits a year to 8,625. In fact, pre-covid, in 2018-19 a total of 12,910 children attend schools programme visits at the gallery - a wonderful achievement in our wider role in the community outcome of 'Celebration of our identity through arts'.

As well as a great way to introduce new and young audiences to the Art Gallery and its treasures, and start life-long connections, I feel passionately that visual arts experiences in education provide invaluable opportunities for our tamariki, including

- Boosting critical thinking
- Connecting students with their own culture as well as with the wider world
- Developing critical literacy

We are fortunate here in Christchurch that we have a world-class public art gallery within the city that can provide these experiences - and in my belief should be funded to do so in a level that would reach as many children here in the city as possible.

Likewise the Gallery is set a target of delivering a programme of public programmes. Public programmes such as artist talks, film screenings, curator led tours and practical workshops bring a much needed extra level of interpretation to the exhibition programme. If you look at the offering of any world-class art gallery you will see that this layer of interpretation - focusing on varied audiences and communities - is critical to the success of the exhibition programme.

Put simply, exhibitions do not exist in isolation. Public programmes around them are especially important in engaging members of minority communities in the city. They are typically attended by locals over visiting tourists - an area of audience the gallery is actively trying to grow.

Recent public programmes that have successfully engaged such communities include:

<https://christchurchartgallery.org.nz/events/pride-special>

<https://christchurchartgallery.org.nz/events/hotere-101>

<https://christchurchartgallery.org.nz/events/faasamoa-fatu-feuu>

<https://christchurchartgallery.org.nz/events/te-wheke-fun-day>

Many of these public programmes happen on a Wednesday eve - the only evening opening the gallery runs.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

We are strongly opposed to the proposal of rating all rateable properties in the district for land drainage.

We are a rural property 8kms from Akaroa and don't receive any of the services on our property relating to land drainage.

The proposal set on Capital Value unfairly targets the rural properties, we already pay in excess of \$12,000 per annum.

The fairest option is Alternative Option 1 Set the land drainage on properties receiving a land drainage service.

### Feedback

1.11 Potential disposal of surplus Council-owned properties

Regarding land as 27 Hunters Road, Vacant Land, Pt Lot 1 DP14050++, 12F/538, 390,222 sq metres

I request that the above land in Diamond Harbour proposed for disposed in the LTP be removed from the LTP so that any future proposal to sell land can involve public consultation that is meaningful, recognises the significance of the land in relation to the existing Diamond Harbour community. I would need the opportunity to submit on:

- The difficulties managing stormwater and past experience for properties below the site.
- The aging CCC water infrastructure I have seen on my street and difficulty for it to cope with more stormwater from above the property.
- The uncertainty how stormwater would be managed when more of the higher land is unavailable for absorbing rain.
- The need to protect the gullies that have involved long term significant community work and the need to have buffer zones to protect planting.
- How CCC would manage a significant increase in population subject to the presence of vulnerable areas of sea level rise along parts of the road network.

### Feedback

1.7 Our facilities

*LTP proposal "ART GALLERY: Reducing the programmes the Gallery offers to the public and school groups by 25 per cent a year"*

The ground floor space on the northern side of the foyer could in fact be MUCH better used by doing away, over a period of say 2 years, with the current programmes, and instead house a resource centre of books and audio visual materials for ratepayers, the public, visitors, and art students to use. I recall an excellent example of such a resource centre at the Dunedin Art Gallery, some years ago.

The current art gallery library of art books is locked away, inaccessible other than via prior arrangements.

The majority of the gallery's works are in the vaults, and some never/seldom gets exhibited anymore. The art gallery should be **resourced properly** to digitise the content over a period of time, and these should be accessible in the resource centre, and online, together with the books locked/hidden away.

## Our Draft Long Term Plan 2021–2031 submission form

### Your details:

Full name

Alan Tunnicliffe

### I am completing this submission:

☒ For myself or ☐ On behalf of a group or organisation (please tick one)

Organisation name

Your role in the organisation

Do you wish to present your submission at a hearing? ☒ No ☐ Yes (if yes, you must provide contact details below)

Daytime phone number

## Questions to think about when making your submission

### Have we got the game plan right?

Our overarching proposal is to focus on a deliverable capital programme that helps drive our city forward, with particular investment in roads and transport infrastructure and in protecting and upgrading our water networks. We're borrowing for new projects that have long-term value, and ensuring that the debt repayments are spread fairly across the generations of ratepayers who will benefit from them. We're maintaining enough financial flexibility to be able to handle unplanned events, and we're finding permanent efficiencies in our day-to-day spending. We've managed to do all of this while keeping rates increases as affordable as possible.

**Have we got the balance right? Have we prioritised the right things? If not, what changes would you like to see?**

Balance is right. Look for more permanent efficiencies

### Rates

We've considered a range of options for how best to achieve what we need to achieve while also keeping the average rates increase as affordable as possible.

**What do you think of this plan for an average residential rates increase of 5 per cent for 2021/22 and an overall rates increase of 4 per cent over the next 10 years?**

I think a rates increase of  $< 5\%$  is very desirable

## Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

**What do you think of these changes to existing rates, and new targeted rates?**

**Have we got it right? If not, what changes would you like to see?**

---

---

---

---

## Investing in upgrading and protecting our city's water networks

We have a responsibility to provide and maintain the wells, pipes, reservoirs, treatment plans and pump stations for drinking water, and manage the collection, treatment and disposal of wastewater and stormwater.

**We are proposing to invest 41 per cent (\$2.329 billion) of our capital spend on water infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

Balance is right considering the importance of water  
Charging for using over 700 litres per day is OK.

## Investing in our transport infrastructure

We've heard from residents that transport is a top priority. It's also the city's biggest contributor to carbon emissions. We want to give people better options for getting around, whether by car, public transport, on foot, on a scooter or on a bike. We also want to ensure our networks are safe.

**We are proposing to invest 25 per cent (\$1.445 billion) of our proposed capital spend on transport infrastructure improvements.**

**Have we got the balance right? If not, what changes would you like to see?**

Balance is right. I am in favour of more emphasis being put on  
public transport, the ~~cycle~~ bike network, safety for pedestrians & cyclists.

## Rubbish, recycling and organics

In 2020 the Council adopted a new Waste Management and Minimisation Plan that focusses on changing our 'throw-away' culture and reducing the amount of waste we send to landfill. Implementing the actions in that plan are the key drivers of our operational and capital spending.

**We're proposing to spend \$25 million on organics infrastructure (which includes upgrades to the organics processing plant), \$18.5 million on transfer station infrastructure and \$18.4 million on recycling infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

Balance is right. Education about changing our 'throw away' culture is important.

## Our facilities

We're proposing to invest 19 per cent of our capital spend on community facilities. We're also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service?**

**Have we got the balance right? If not, what changes would you like to see?**

I am against changes to levels of service, such as at AKaroa. I would like the Mobile Library to be kept, also the current hours at Libraries & art gallery. Keep both Bus Lounges open - they are used a lot, more so on cold, wet days

## Our heritage, foreshore and parks

Christchurch has a long and proud history of protecting and respecting our heritage. Over the past decade we've carried out a massive programme of repairs and restorations, but we still have some work left to do. In the next 10 years we will continue to restore our own buildings and support private development of heritage buildings. We will also be maintaining and improving our parks and foreshore.

**We're proposing to invest 11 per cent of our capital spend on our heritage, foreshore and parks.**

**Have we got the balance right? If not, what changes would you like to see?**

Balance is right. Restoration of heritage buildings is very necessary. I would like to see the Upper Riccarton War Memorial Library Building repaired and restored and repurposed

## Funding for the Arts Centre Te Matatiki Toi Ora

We are proposing to provide the Arts Centre with a capital grant of \$5.5 million. We would do this via a targeted rate that would recover the grant cost over 10 years, and would phase in over two years, so the targeted rate would be smaller in 2021/22 than in subsequent years. We're proposing that every ratepayer will pay this rate and it will be calculated as a number of cents per dollar of capital value.

**Do you support the Council funding \$5.5 million for the Arts Centre?**

**This proposal is currently accounted for in our proposed rates increase. If a decision is made not to proceed, rates would drop by 0.04 per cent.**

☒ Yes ☐ No

Comments: \_\_\_\_\_

\_\_\_\_\_

## Funding for base isolation of the Robert McDougall Art Gallery

Canterbury Museum considers the base isolation of Robert McDougall Art Gallery to be a key part of the Museum's redevelopment. In July 2019, the Council agreed in principle to support the base isolation of Robert McDougall Art Gallery at a cost of \$11.8 million, subject to public consultation in the Long Term Plan 2021–31.

**Do you support the Council funding base isolation of the Robert McDougall at a cost of \$11.8 million?**

**This proposal is not currently accounted for in our proposed rates increase. If a decision is made to fund base isolation, rates would increase by 0.07 per cent.**

☒ Yes ☐ No

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

## Potential disposal of surplus Council-owned properties

We have a small number of properties, including two heritage buildings, that are no longer being used for the purpose they were originally acquired for. These surplus properties make up less than 1 per cent of Council's overall property portfolio.

**Help us decide their future – what do you think of this proposal to dispose of surplus properties?**

1.12 Any other comments:

I live in a neighbourhood of 36 households that were left out of the Government and Christchurch City Council funded roll out for fibre.

We are located at the top of Huntsbury Ave above Kenmure Drive and include properties on Huntsbury Ave, Westview Place and Tiroroa Lane. We are not a new development, with houses being built up here since the early 1990s, and we are within the Christchurch City Hills Living Zone.

At the time of the fibre roll out when it was being laid up Hunstbury various members of our neighbourhood approached the Christchurch City Council and Enable to find out why we were not being included. Nobody could provide an answer.

We collectively approached Enable in November 2019 to ask them to lay fibre in our neighbourhood. Enable developed a network plan (August 2020) that would lay fibre to most of our properties (but not all, excluding the top properties on Huntsbury Ave). Enable are prepared to fund most of this but require our neighbourhood to fund a shortfall of \$36,000+ GST.

Enable have stated we were excluded due to a 350m gap between the edge of their network and the first property on Westview Place. Over time, this gap in the properties will be developed, and since approaching Enable, 3 new houses have been developed. Our neighbourhood is zoned for residential activities, so it should be provided with the same level of service as other areas in the city zoned for residential. It is not our fault that the landholders in this gap have not yet completed development, and the status of this private landholding should not impact on the services that a ratepayer funded CCO is providing within a zone.

A key focus of Council strategy should be to provide an equitable level of service across the city. It is unfair that we are being required to pay for fibre to our streets while the rest of Christchurch had it provided for free, paid for by our rates and taxes – we are effectively being asked to pay twice.

Fibre is going to be provided to small, isolated country towns such as Lake Brunner and Haast, while we have not been given access to it within 7km of the CBD of the South Island's largest city. It is very discouraging to see extensive Enable advertising in the newspaper and on billboards for fibre take up, while there is apparently no funding to complete the rollout.

Please support us in finding the funding for this shortfall to get fibre laid to our streets OR by convincing Enable that they can cover the full cost of the fibre layout by using their discretionary spending.

### Feedback

#### 1.7 Our facilities

As a school, we find the resources and the assistance provided from the staff at the Akaroa Museum invaluable. We come to Akaroa/Banks Peninsula for three days, as we require primary source material regarding the Maori in Banks Peninsula as well as the contact period with the Europeans for the girls NCEA Level 3 History assessments.

In Oamaru, we can not access material to the degree we gain from Akaroa Museum and Okains Bay Museum, and without a comprehensive range of primary source material our students will not be able to get to Excellence level. The staff at Akaroa Museum are never-ending in their assistance and their kindness to the girls. We are normally there for a number of hours on one of the days that we are there. Linda and her staff, go out of their way to answer questions, provide sources out on tables (so they have clearly planned for our visit well before we arrive and they also set out material into each key area to ensure that the girls feel supported) as well as take the girls through the various artefacts and presentations within the Museum. The DVD is also a fabulous way for the girls to start their research on the day that we are there.

We definitely need the assistance/material that they provide if we are to be able to provide the students with an equal opportunity to achieve Excellence, which as a teacher is essential. My students should not be disadvantaged due to them living away from such a wealth of material.

### Feedback

#### 1.2 Rates

#### 1.7 Our facilities

As a city council you have a responsibility to put measures in place to protect, care for and encourage those who make up the fabric of Christchurch City.

It is disappointing that as a council in your draft 10 year plan there are plans to close the riccarton bus lounge, a vital space for shelter and safety for the public. This also undermines the incentives in place for making steps towards reducing our collective carbon footprint in these times when it matters most considering the state of our planet's climate and impending crisis. Think global, act local - this is your responsibility as our trusted council members.

Also the reduced hours of library hours and reduction in Christchurch Art Gallery Te Puna o Waiwhetū education programmes and decreased events is extremely disappointing, as these are the things that knit together the smaller creative communities within Ōtautahi Christchurch. It's these people that inform the cultural and creative tone of our city, that keeps people coming back, as well as making this place feel like "home" beyond the infrastructure and architecture in this city, which is what keeps people going in the end.

 Subject: LTP submission - Riccarton Bus Lounge

Submissions to the CCC Long Term Plan for 2021-2031

### Form Summary

<b>Name</b>	Shannon Lambert
<b>Suburb</b>	Upper Riccarton
<b>Are you against the closure of the Riccarton Bus Lounges?</b>	Yes, I am AGAINST the closure of the Riccarton Bus Lounge. The bus lounge is an essential facility for public transport users, providing shelter from the elements and a well lit safe environment for shoppers, commuters, the youth and the elderly on the busiest public transport corridor in Christchurch.
<b>Do you think under the proposed Long Term Plan, the council should increase funding for bus stop improvements (shelters, seating, etc.) and for bus lanes (reduces traffic and reduces travel time for buses)?</b>	Yes, I SUPPORT increasing funding for bus stop improvements and bus lanes,

## Feedback

### 1.1 Have we got the game plan right?

I support the proposed balance of spending within the draft long-term plan. I do not support the option of decreasing spending by deferring investment (e.g. delay of Hornby Pool and Library).

### 1.2 Rates

I support the proposed plan for an average residential rates increase of 5 per cent for 2021/22 and an overall rates increase of 4 per cent over the next 10 years.

### 1.3 Proposed changes to existing rates, and new targeted rates

- I strongly support the proposed heritage targeted rate.
- I do not support the proposed excess water targeted rate. Rather, I support Christchurch adopting the same fixed+volumetric approach to water charging as used in most other parts of New Zealand (Alternative Option 3).
- I support the council using rating tools to incentivise the beautification and redevelopment of vacant CBD land.

### 1.4 Investing in upgrading and protecting our city's water networks

- I support the proposed quantum of investment in water infrastructure.
- I support the council's commitment to return to unchlorinated drinking water.
- I support the council's continued investment in innovative green infrastructure for storm water management (e.g. Hendersons Basin).

### 1.5 Investing in our transport infrastructure

- I support the proposed quantum of investment in transport.
- In particular, I support the proposed prioritisation of 5 Major Cycle Routes.
- I support Council involvement in MRT business case.

### 1.6 Rubbish, recycling and organics

I support the proposed quantum of investment in rubbish, recycling and organics.

### 1.7 Our facilities

- I support the proposed quantum of investment in community facilities. I strongly support the proposed investment in the

proposed new Linwood Pool, Hornby Pool and Library, and the delivery of the Metro Sports Facility and Canterbury Multi-Use Arena.

- I support the changes to libraries, service desks and the Art Gallery. I support the closure of the Riccarton Road Bus Lounges.

1.8 Our heritage, foreshore and parks

- I support the proposed quantum of investment in heritage, foreshore and parks. I recommend that the council pool playground investment to build more destination playgrounds (like Margaret Mahy) in lieu of smaller local playgrounds.
- I support the proposed investment in progressing the development/redevelopment of Nga Puna Wai, Hagley Park, the Botanic Gardens and Lancaster Park.
- I support the proposed investment in heritage buildings, including Canterbury Museum, Robert McDougall Art Gallery, Cunningham House, The Canterbury Provincial Council Buildings, The Old Municipal Chambers.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes  
Comments

1.11 Potential disposal of surplus Council-owned properties

I support the proposed disposals of surplus council-owned properties.

1.12 Any other comments:

- Continue to support investment in public/street art in the CBD. It looks fantastic.
- Prioritise investment in good data collection and ICT systems to inform civic decision-making.

Otherwise, keep up the good work.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I support the targeted rates for the Arts Centre and more specifically the payment by the CCC to the Arts Centre.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

The council founding for the Arts Centre is important and necessary. We need to ensure the Arts Centre's survival and through to its thriving. It is a treasure for everyone in the heart of our city. It's importance goes beyond being a driver of economic activity (which it will do). It is about more than being a place to work or to to shop or to experience events or even to learn. As it is also about providing places where people spend free time and build up an emotional connection with their city - places that are good for their soul and help make them better people and our community stronger for that.

### Feedback

1.3 Proposed changes to existing rates, and new targeted rates

I strongly disagree with the proposed Land Drainage Targeted Rate (LDTR).

As a landowner along the Old Tai Tapu Rd I am provided with minimal services from the Christchurch City Council (CCC).

There are no footpaths, street lighting, sewer drainage, stormwater drainage or water supplied to my property and as such I have invested heavily in providing sewer, stormwater and water to my property.

In regard to land drainage and flood mitigation; As required under my Ecan Resource Consent my house has been elevated to mitigate potential flooding. This has involved extensive earthworks, which I have funded myself, to raise the floor level. Further to this I pay annual rates to Ecan in regard to their flood mitigation work.

Furthermore, I have installed stormwater disposal measures including a swale at my road boundary to assist with any potential flooding that may occur on the Old Tai Tapu Rd.

It is an absurd expectation by the CCC that property owners, who have not been provided with water drainage measures by the CCC and as such have funded and provided those measures themselves for their own properties should now be expected to assist in the funding of the councils obligations to the property owners who have historically relied on the CCC to provide these basic services.

It is grossly unfair and unrealistic that the very land owners who have been required to provide, at their own cost, their own stormwater and flood water measures should now be expected to prop up the CCC shortfalls.

The CCC proposal notice states, *"The proposal is a simpler approach to rating for land drainage facilitating **greater consistency and fairness** between ratepayers"*.

This statement is nonsense; properties who have already provided their own stormwater and flood water measures and/or are targeted and subjected to applicable Ecan rates do not need to have *"greater consistency"* with those who rely on the CCC. If the CCC required 'consistency' then surely the first step would be to refund all households who have funded their own stormwater disposal and flood water measures, provide the services to all ratepayers and then apply a 'consistent' rate.

The issue simply appears that the CCC are looking to apply further rates to the very property owners who have provided their own measures (in conjunction with the Ecan rates) to allow the CCC to gather further funds to meet their shortfalls.

The reasoning of the CCC proposal is also reliant upon and states, *"there will no longer be a need to identify a "serviced area", **which is a difficult task** given the range of assets that assist with land drainage and flood protection and control works"*.

This is further nonsense; the task of determining whether a property is serviced or not and what flood measures and controls are necessary for that property is a simple exercise given the records held by the CCC. It is inappropriate and misleading to suggest that this is a “difficult task”.

The CCC proposal also claims that, “We should recover these costs in a way that recognises that the whole city benefits from land drainage” and that “these services enable all of us to get around more easily without surface flooding to the whole district”.

Here the CCC proposal presupposes that rate payers in rural areas, Banks Peninsula, etc regularly utilise the inner city or non-outlying areas of Christchurch but that is not the case.

The CCC proposal is galling when, without question the level of council services provided to Banks Peninsula and the other outlying areas is poor with a lack of drainage facilities, water supply, street lighting, footpaths, etc. If it was not for the fact that there are very high vehicle numbers in these outlying areas, such as the Old Tai Tapu Rd, the Akaroa highway, etc, due to Christchurch residents (motorists and cyclists) venturing outside the city suburbs on weekends then the roads too would undoubtedly be in a poorer condition.

The CCC calculate rates based on the value and size of properties. Most of the properties in the outlying areas are of a higher than average value, with their values being increased by having the need to provide their own infrastructure requirements (water and drainage). The suggestion to then apply additional rates to these properties, based on the value of these properties, to pay for council water and drainage shortfalls to other properties is ridiculous.

In essence, it is absurd for the CCC to expect that these property owners should prop up the CCC shortfalls. Surely a more logical approach, which would appeal to all rate payers, would be to review council inefficiencies, over resourcing, etc and manage any potential shortfalls internally.

## Te Mahere Rautaki Kaurera - Our Draft Long Term Plan 2021-31

### Submitter Details

**First name:** Phil **Last name:** Ross

**Would you like to present your submission in person at a hearing? (if yes, you must provide a contact phone number)**

☐ Yes

☒ I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

### Feedback

1.1 Have we got the game plan right?

I would like to see greater empowerment of local communities in decision making about what is needed within each community. Community Associations should have better support to initiate and direct projects for community improvements.

I would like better access to Council information. Reports should be available electronically at ALL public libraries. Printing out reports already funded by public money should be at cost (not 20c/page).

1.2 Rates

I don't like increased rates. I limit my spending based on what I can afford and cannot choose to raise my revenue to suit what I want to be able to spend. Having said that, I recognize increasing costs and a wide range of projects requiring attention. How about limit your raised rates to whatever rate the government raises old age pensions or benefits to single mothers.

### 1.3 Proposed changes to existing rates, and new targeted rates

I received a letter asking about land drainage ratings. I would be more comfortable choosing between the options if I could see the actual implications of the different approaches. The interactive map on the website does not provide much information. You identified a target figure of \$43.6 million, most of which is based on handling storm water. On our land, water availability limits the productivity of the land and we are going to some lengths to capture, store and use storm water from our impervious surfaces. Could this affect what you charge me for your "service" in handling storm water? I am working to decrease the run off requiring heavy engineering solutions and I believe your own "best practice guides" suggest this is the best approach. So why not support the service I provide?

### 1.4 Investing in upgrading and protecting our city's water networks

I was involved with the Bromley sewage treatment plant upgrade project. I was surprised to learn then that upgrading the sewage collection reticulation system costs more than the treatment plant upgrade by about 3 times. Here in Diamond Harbour, the collection system and pumping to Bromley will cost even more. Scrutiny of the plant performance indicated recurring system failures or non-compliant episodes and the receiving environment in the estuary was clearly adversely affected by the discharge. Even with the "deep outfall" project, areas of Pegasus Bay were expected to be damaged by the large volume of contaminated effluent.

The original work on activated sludge treatment systems (Ardern and Lockett, 1917) identified the potential for resource recovery (nitrogen and phosphorus) as a principle strength of the system. Doing this would require elimination of the industrial waste streams discharged into the Bromley plant (about 20% of the contaminant loading). Do less pumping, treat locally, recover the waste water and reuse it rather than dumping it in the ocean.

### 1.5 Investing in our transport infrastructure

We have 1 main road connecting Diamond Harbour with Christchurch and it is within 1 meter of tide water along several kilometers of its route. I'm not so concerned about the "balance" in your funding as the outcome you achieve with respect to safe driving and access.

### 1.6 Rubbish, recycling and organics

Better access to waste disposal is needed in Diamond Harbour. As a rural property, my land is not serviced by rubbish collection. Could there be skips or bins placed around some areas to facilitate better waste collection and segregation?

### 1.7 Our facilities

Your facilities are great but travel to them takes a long time and they are frequently crowded. Would there be a way of defining more, less fancy facilities closer to more of us?

### 1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

#### Comments

I visit 2 or 3 times a year. Good facility.

### 1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

#### Comments

Im not sure what you mean by base isolation. What is this?

## 1.11 Potential disposal of surplus Council-owned properties

Christchurch City Council Long-Term Plan

– Disposal of surplus land – 27 Hunters Rd Diamond Harbour

Submission of Philip Ross

Christchurch City Council has indicated intention to dispose of surplus land without further consultation. The list of properties on the Council website includes 27 Hunters Rd (legally described as CB12F/538, Part of Lot 1 DP 14050 and Lot 7 DP 14050). The parcel is large (38.9 hectare) and is located within areas of Diamond Harbour with existing residential housing. The current zoning is Residential - Banks Peninsula. My concerns with the sale of this property are as follows:

1. 1) The current zoning does not adequately identify the values and conditions within the land parcel. Substantial ecological restoration work has been conducted by community volunteers within the several gullies within the parcel. This includes removal of noxious weeds and plantings of native plants appropriate to the site conditions.

My suggested remedy: Remove the land parcel from the list of surplus properties, identify the ecologically important areas and protect them as reserve areas or covenanted natural areas.

1. 2) Sudden changes in community structure are disruptive and potentially create a range of adverse impacts. Local infrastructure (roads, water supply, sewerage, power supply, etc) have all had issues in the last few years. The sudden potential doubling of the Diamond Harbour population is likely to exacerbate all of these problems.

My suggested remedy: Split the land parcel into several sub-sections, staging the incremental impacts to be in line with and co-ordinated with the required improvements in local infrastructure.

- 3) The property at 27 Hunters Rd was acquired by Banks Peninsula District Council many years ago (1913?). It seems to me that the Council has a duty to consider more diligently the possible range of purposes for the investment (the original purpose of acquiring a large block of land in Diamond Harbour) other than a potential economic windfall.

My suggested remedy: Consult with the community and community organisations (the school, community groups, etc) and some urban planners. There is a great opportunity here. It should not be lost for a simple quick payout.

Phil Ross

1.12 Any other comments:  
Keep up the good work.

### Feedback

1.1 Have we got the game plan right?

I do not agree at all with the decommissioning of the Wharanui Pool as outlined in Christchurch City Council's Long Term Plan and would like to see the pool stay for the use of the local community and the Wharanui Swimming Club and other swimming clubs in the Christchurch area. There is already such a shortage of pool facilities. To remove an existing one that has easy access for the community is an utterly ridiculous concept.

Forcing people into the centre of town to use the pool there will make it impossible for many to access because of time, travel and cost constraints.

Is the idea not to get more and more people into healthy activity, not making it more difficult for them to do this????

Wharanui has an existing client base of established casual and club swimmers which it attracts because of its ease of access, and location in the community. Losing this would be a severe blow to the area. Not to mention the job losses of the staff at the pool as I imagine their jobs would not be guaranteed at Metro, nor would it be guaranteed it would suit them all to work there.

You cannot sit and make great plans of change without considering the extensive difficulties those changes would bring to the PEOPLE in the communities you are meant to be representing.

You might well be considering I do not live in the area using this pool. But I have lived in the Avonhead area for almost 14 years and that pool has been well used and many of our friends go there and we still go there for swim meets and other events, so yes, I consider I have full right to speak on their behalf.

1.2 Rates

Is it ever worth arguing the issue of rates increases?

1.4 Investing in upgrading and protecting our city's water networks  
Getting it right.

1.5 Investing in our transport infrastructure

No.

PARKING is a major issue. You need to provide more multi level parking garages in various locations.

Disability parking is shockingly in short supply. I struggle daily.

1.7 Our facilities  
Better Disability Facilities.

1.8 Our heritage, foreshore and parks  
Better Disability Facilities.

### Feedback

1.7 Our facilities

#### Re Closure of Wharenui Pool

I am one of the many that learnt to swim at Wharenui. I was an adult of about 30 years and would stop there on the way to training at the Christchurch College of Education. The pool in Sockburn had just closed so Wharenui was the closest. I was encouraged to learn to swim by the friendliness of the staff and found the size of the venue eased my fears, unlike that of Jelly Park (too daunting). If it hadn't been for the Wharenui Pool Complex I very likely would have given up learning and let my fear conquer me.

Please don't close this valuable resource.

Yours sincerely, Gabriele Watson

## Feedback

1.1 Have we got the game plan right?

The Art Gallery is a fundamental facility in this city and funding should continue and NOT be reduced.

1.2 Rates

If that is necessary then it should be as suggested.

1.3 Proposed changes to existing rates, and new targeted rates

The Arts Centre targeted rate is acceptable to enable for this beautiful area to ALL be completed in a reasonable time frame.

NO to water excess charges.

1.4 Investing in upgrading and protecting our city's water networks

Since the earthquakes the sub structure of the city was badly damaged and all needs upgrading. NO TO CHLORINE and YES to FLUORIDE

1.5 Investing in our transport infrastructure

The bus system is appalling. What about a series of SMALL ELECTRIC buses running a regular service to ALL parts of the city - If it was implemented surely the costs would be immense. The large busses are only need at morning and afternoon/evening times. It is ridiculous to see big empty buses most of the day.

1.6 Rubbish, recycling and organics

A great necessity.

1.7 Our facilities

Stopping the Library bus to retirement villages etc is crazy and unfair to the elderly who have paid rates for so many years and now need and appreciate this service.

1.8 Our heritage, foreshore and parks

I believe you have got it right.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes  
Comments  
And it should be then used according to the Mc Dougal gift and be an extension of the Art Galley and may be some of the porcelain and the like from the Museum

1.11 Potential disposal of surplus Council-owned properties  
probably a good idea.

## Our Draft Long Term Plan 2021–2031 submission form

### Your details:

Full name

Bertha Runton

### I am completing this submission:

☒ For myself or ☐ On behalf of a group or organisation (please tick one)

Organisation name

Your role in the organisation

Do you wish to present your submission at a hearing? ☒ No ☐ Yes (if yes, you must provide contact details below)

Daytime phone number

Our submission is intended to represent what different groups of people are thinking. Could you please tell us your gender and age group.

## Questions to think about when making your submission

### Have we got the game plan right?

Our overarching proposal is to focus on a deliverable capital programme that helps drive our city forward, with particular investment in roads and transport infrastructure and in protecting and upgrading our water networks. We're borrowing for new projects that have long-term value, and ensuring that the debt repayments are spread fairly across the generations of ratepayers who will benefit from them. We're maintaining enough financial flexibility to be able to handle unplanned events, and we're finding permanent efficiencies in our day-to-day spending. We've managed to do all of this while keeping rates increases as affordable as possible.

**Have we got the balance right? Have we prioritised the right things? If not, what changes would you like to see?**

No excess water charges for households  
~~instead~~ Ratepayers are being asked to  
 finance fresh water to provide water  
 bottling companies with huge profits.

### Rates

We've considered a range of options for how best to achieve what we need to achieve while also keeping the average rates increase as affordable as possible.

**What do you think of this plan for an average residential rates increase of 5 per cent for 2021/22 and an overall rates increase of 4 per cent over the next 10 years?**

ratepayers can not afford this & council  
 would know it.  
 Nil Rate increase !!

## Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

**What do you think of these changes to existing rates, and new targeted rates?**

**Have we got it right? If not, what changes would you like to see?**

No rate increases - Ratepayers cant afford any more - Council to trim its budget - Pay cuts for top management & councillors Covid has affected everyone!! no perks for <sup>any</sup> council staff

## Investing in upgrading and protecting our city's water networks

We have a responsibility to provide and maintain the wells, pipes, reservoirs, treatment plans and pump stations for drinking water, and manage the collection, treatment and disposal of wastewater and stormwater.

**We are proposing to invest 41 per cent (\$2.329 billion) of our capital spend on water infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

the balance is not right!! Water bottling Plants should be contributing toward water infrastructure. If a law change is required in order for this to happen - make it a urgent priority for council

## Investing in our transport infrastructure

We've heard from residents that transport is a top priority. It's also the city's biggest contributor to carbon emissions. We want to give people better options for getting around, whether by car, public transport, on foot, on a scooter or on a bike. We also want to ensure our networks are safe.

**We are proposing to invest 25 per cent (\$1.445 billion) of our proposed capital spend on transport infrastructure improvements.**

**Have we got the balance right? If not, what changes would you like to see?**

Transport budget to be cut in half.  
bikes & scooters should be banned from the city centres  
far too dangerous to be among pedestrians  
Young & old.

## Rubbish, recycling and organics

In 2020 the Council adopted a new Waste Management and Minimisation Plan that focusses on changing our 'throw-away' culture and reducing the amount of waste we send to landfill. Implementing the actions in that plan are the key drivers of our operational and capital spending.

**We're proposing to spend \$25 million on organics infrastructure (which includes upgrades to the organics processing plant), \$18.5 million on transfer station infrastructure and \$18.4 million on recycling infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

Agree with this

## Our facilities

We're proposing to invest 19 per cent of our capital spend on community facilities. We're also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service?**

**Have we got the balance right? If not, what changes would you like to see?**

The Riccarton road bus lounge should never have been opened - waste of ratepayers money.

## Our heritage, foreshore and parks

Christchurch has a long and proud history of protecting and respecting our heritage. Over the past decade we've carried out a massive programme of repairs and restorations, but we still have some work left to do. In the next 10 years we will continue to restore our own buildings and support private development of heritage buildings. We will also be maintaining and improving our parks and foreshore.

**We're proposing to invest 11 per cent of our capital spend on our heritage, foreshore and parks.**

**Have we got the balance right? If not, what changes would you like to see?**

Budget for parks & foreshore to be cut in half.  
no city council grants to be given to private development of heritage buildings.

## Funding for the Arts Centre Te Matatiki Toi Ora

We are proposing to provide the Arts Centre with a capital grant of \$5.5 million. We would do this via a targeted rate that would recover the grant cost over 10 years, and would phase in over two years, so the targeted rate would be smaller in 2021/22 than in subsequent years. We're proposing that every ratepayer will pay this rate and it will be calculated as a number of cents per dollar of capital value.

**Do you support the Council funding \$5.5 million for the Arts Centre?**

**This proposal is currently accounted for in our proposed rates increase. If a decision is made not to proceed, rates would drop by 0.04 per cent.**

☐ Yes ☒ No

Comments: apply for a heritage grant, lotto grant or government grant.

## Funding for base isolation of the Robert McDougall Art Gallery

Canterbury Museum considers the base isolation of Robert McDougall Art Gallery to be a key part of the Museum's redevelopment. In July 2019, the Council agreed in principle to support the base isolation of Robert McDougall Art Gallery at a cost of \$11.8 million, subject to public consultation in the Long Term Plan 2021-31.

**Do you support the Council funding base isolation of the Robert McDougall at a cost of \$11.8 million?**

**This proposal is not currently accounted for in our proposed rates increase. If a decision is made to fund base isolation, rates would increase by 0.07 per cent.**

☐ Yes ☒ No

Comments: apply for a heritage grant, lotto grant or government grant.

## Potential disposal of surplus Council-owned properties

We have a small number of properties, including two heritage buildings, that are no longer being used for the purpose they were originally acquired for. These surplus properties make up less than 1 per cent of Council's overall property portfolio.

**Help us decide their future – what do you think of this proposal to dispose of surplus properties?**

It would depend of on the value of these two properties if they have not been looked after by council it buyers may not be interested.

**Any other comments:**

Its all been said. Please take notice !!

### Feedback

#### 1.1 Have we got the game plan right?

I live in a neighbourhood of 36 households that were left out of the Government and Christchurch City Council funded roll out for fibre.

I live at the top of [REDACTED]. The left out area includes properties on Huntsbury Ave, Westview Place and Tiroroa Lane. We are not a new development - houses have been built up here since the early 1990s, and we are within the Christchurch City Hills Living Zone.

At the time of the fibre roll out when it was being laid up Huntsbury various members of our neighbourhood approached the Christchurch City Council and Enable to find out why we were not being included. Nobody could provide an answer.

We collectively approached Enable in November 2019 to ask them to lay fibre in our neighbourhood. Enable developed a network plan (August 2020) that would lay fibre to most of our properties (but not all, excluding the top properties on Huntsbury Ave). Enable are prepared to fund most of this but require our neighbourhood to fund a shortfall of \$36,000+ GST.

Our neighbourhood is zoned for residential activities, so it should be provided with the same level of service as other areas in the city zoned as residential.

Council should provide an equitable level of service across the city. We should not be required to pay for fibre to our street while the rest of Christchurch had it provided for free, paid for by our rates and taxes – we are effectively being asked to pay twice.

The status of private landholding should not impact on the services that a ratepayer funded CCO is providing within a zone. Enable have stated we were excluded due to a 350m gap between the edge of their network and the first property on Westview Place. Over time, this gap in the properties will be developed, and since approaching Enable, 3 new houses have been developed.

We live within 7km of the CBD of the South Island's largest city but have not been given access to fibre – yet fibre is going to be provided to small, isolated country towns such as Lake Brunner and Haast.

Enable advertise extensively for fibre take up, but not for us! Apparently there is no funding to complete the rollout.

Please support us in finding the funding for this shortfall to get fibre laid to our streets OR by convincing Enable that they can cover the full cost of the fibre layout by using their discretionary spending.

#### 1.5 Investing in our transport infrastructure

a free central city bus as there used to be to enable people to easily get around the central city, as they used to be able to do when the free electric bus ran every 20 minutes. Parking would be needed on the city centre outskirts. You would then be able to visit and shop in the city centre rather than heading to the malls with easy access and free parking, which attracts shoppers.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora  
Yes  
Comments

1.10 Funding for base isolation of the Robert McDougall Art Gallery  
Yes  
Comments

The Museum is such an important part of our city and needs to be able to tell more of our stories.

It has been on hold for so long now. Please fund the base isolation so our museum can be updated and some of it's hidden treasures brought out for all to enjoy.

### Feedback

1.1 Have we got the game plan right?

I would like to submit against the proposed plans to reduce the service levels and funding to the Christchurch Art Gallery and the art sector in general.

The arts can not afford to be neglected when it comes to funding. It is- and always has been the essential, carrying heart of our society (especially during times of natural- or environmental threats). It should also be, like for any metropolis, the main attraction and draw card internationally...

1.6 Rubbish, recycling and organics

I would support a proposal that concentrates on recycling predominantly. Waste elimination and recycling programmes are a crucial part of the environmental future.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

### Feedback

#### 1.7 Our facilities

The closure of Wharenuui Pool is a travesty. The wider Riccarton community will suffer immensely at its loss. The 18 local schools which use its facilities would suddenly be left stranded and their children without the benefit of water safety training. Likewise, the pool provides a communal network for hundreds of regular swimmers who, in many cases, have been attending for decades, including my own mother and her parents. Instead of closing Wharenuui Pool, consider one of two options: The Council could maintain it or it could turn over control to the community. Either would maintain the community network and a rare activity hub for Riccarton.

Further proposed changes to the Council's facilities are also objectionable. In particular, the reduction of the Art Gallery's hours and programs, which would limit access to the arts and send the message that Christchurch is not a city interested in culture. It is a world-class gallery; why not place it on full display?

### Feedback

1.1 Have we got the game plan right?

While I do not see have an immediate issue with decreasing the amount of cars into the city I strongly disagree with the process.

Crime in christchurch is on an upward trend, particularly with theft of scooters and bikes and this will be propelled by CCC initiatives such as cycle lanes and increasing the price of parking.

I strongly believe the CCC needs to invest in the following,

- greater security (Cctv)
- a mass buying of bike locks to sell discounted or GPS for bikes
- secure bike facilities/storage units

I strongly believe that doing otherwise will result in increased theft, or continued lack of action by the police (i know this is a huge thing due to the chch bike pages i am in, as well as having a bike stolen).

I believe having this infrastructure in place will greatly encourage biking into the city. It is not as simple as being cycle tracks, or decreasing parking.

Furthermore, the price of parking should not be increased as proposed. I believe the CCC needs to engage with "Wilson carpark" site holders/landlords and actively work towards not having Wilson parking in the city by taking over the leases, this way any profit goes to the chch. This can also lead to conversation encourage development of those sites.

I think the current proposal/acts damage the city and its people as the lack of security deters people going into the city, as does the price of parking. This ultimately hurts the city.

Parking should only be increased when the city is made for cycles, not while that work is on going

1.2 Rates

See below re rates.

### 1.3 Proposed changes to existing rates, and new targeted rates

Overall I do not believe CCC does enough to limit rate increases, nor limit council expenses.

Examples include riccarton road.

43 million has been spent on riccarton road since 2013 - this is an absurd amount of money for a 3km stretch of road. This could have been a lot cheaper if the job was done correctly the first time, or all at once. As there were 4 main jobs. Plus several reseals.

Inflated wages at the top end

Council does not do enough to generate revenue, which includes water. Water being from a different well, or river should not exclude commercial users (water bottlers) from being charged for water. (especially when water restrictions are placed on every one else) it is canterbury/christchurch water after all.

As mentioned previously CCC should get rid of Wilson carparks.

Revenue should and could be generated by charging commercial Companies a fee for misuse of waste (i.e, rubbish in recycling and vice versa)

Decrease the price of parking and increase parking fines

### 1.4 Investing in upgrading and protecting our city's water networks

Please further investigate grey water systems.

### 1.5 Investing in our transport infrastructure

Public transport (bus) is a huge failure and routes were better when the 83 was in action. Years ago. See above re encouraging cycling in christchurch.

It is not enough to be safe while biking the CCC needs to do more to keep the bike safe.

### 1.6 Rubbish, recycling and organics

More needs to take place to allow more things to be recycled. Over time we have seen the amount of stuff that can be recycled decrease and this is unacceptable.

Fees should be enforced to discourage mistreating the waste/recycling system

### 1.7 Our facilities

It does not make sense to encourage public transport but then close the riccarton road bus lounges. Perhaps meet in the middle and close one.

### 1.8 Our heritage, foreshore and parks

This is ok.

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Yes

Comments

Yes. I do not believe the CCC does enough to support arts in christchurch. This is evident by the previous slashing of art gallery budgets.

1.10 Funding for base isolation of the Robert McDougall Art Gallery

Yes

Comments

This is fine.

1.11 Potential disposal of surplus Council-owned properties

Depends on ROI.

Land worth more in future, worth to hold?

1.12 Any other comments:

I think the council should engage more with the museum to put more of their items on display in vancant spaces in town the art gallery too.

While I do not know the volume of the art galleries Holdings the museum has 2.3+ million items, a rotating display could help draw people into the city

### Feedback

1.4 Investing in upgrading and protecting our city's water networks

Please address all the water leaks around the city. We see quite a few as we drive around, and always lodge a "Snap, Send, Solve" report for the ones in our area - some of which (in Penruddock Rise, in particular) keep re-occurring. I understand that these leaks, which generally appear to originate from the water meter/tobybox area outside residential homes, might account for a considerable percentage of total water usage.

1.6 Rubbish, recycling and organics

A uniform approach, to what is recyclable and what is not, across the country. There seem to be regional differences, which prompts the question: Is best practice being used?

1.9 Funding for the Arts Centre Te Matatiki Toi Ora

Written Submission to CCC re Draft Long Term Plan 2021-31

22 Penruddock Rise  
Westmorland  
CHRISTCHURCH 8025

14 April 2021

**SUBMISSION TO COUNCIL ON DRAFT LONG-TERM PLAN 2021-2031**

The Westmorland Residents' Association would like to make representation to Council on the roading network that services the entire Westmorland subdivision.

In particular, our concerns are related to the corridor from the traffic lights at the Sparks Road/Hendersons Road intersections, to the south along Hendersons Road, then to the east along Cashmere Road to the intersection of Cashmere/Hoon Hay/Worsleys Road (currently being upgraded) and further to the east along Cashmere Road and over the bridge to Ferniehurst Street.

With the huge amount of development now taking place within Westmorland itself, and all the other nearby developments, we have concerns over the ability for our residents to travel freely and safely into and out of our community.

Westmorland is unique, in that we have to travel out of the subdivision to do all the things that residents normally do within their own community. We have no shops, no service stations, no restaurants, no medical or sports facilities and no schools. We rely on the roading system for the safety and well-being of our residents - be they motorists, cyclist or pedestrians.

Our school children have to travel along Cashmere Road to go to school and, for those heading east, there are no footpaths until they reach Oderings Nursery and no pedestrian crossings at all. There is a refuge island outside the Cashmere Park subdivision, but that doesn't incorporate an actual pedestrian crossing. Children continuing eastwards along Cashmere Road also have to navigate the very narrow bend just beyond the Cracroft shops, around to the Ferniehurst Street intersection..

Our motorists have long faced significant delays exiting Westmorland at the Penruddock Rise/Cashmere Road intersection, at peak times, and that will only get worse with traffic from at least some of the 200-odd additional homes to be built on Westmorland Heights and some traffic transiting through Westmorland from Worsleys Road, via Gosforth Way.

It is our belief that the Penruddock/Cashmere intersection, and the stretch of Hendersons/Cashmere referred to above, has become the "collateral damage" of a stretch of road now operating well beyond what it was originally designed for. We would urge Council to consider our concerns and, hopefully, make some allowance for improvements within the new Long Term Plan

On behalf of the Westmorland Residents' Association, I thank you for the opportunity to make this submission, and look forward to any favourable consideration you may give it.

Yours faithfully

Lindsay Richards  
Chairman  
Westmorland Residents' Association

### Feedback

1.11 Potential disposal of surplus Council-owned properties

To Whom It May Concern,

I, Angela Boer, hereby strongly request the Christchurch City Council to remove the land in Diamond Harbour decribed as 27 Hunters Rd -Vacant Land, Pt Lot 1 DP14050++,12F/538, 390,222 sq metres- from the current Long Term Plan.

I am of the opinion that, only by public consultation of the community and liaison with the DH Community Board, a fair and democratic process would be used for the disposal of surplus land.

I would like the CCC to keep in account the immense efforts the locals (all volunteers) have made to restore the vegetation in Sams and Morgan gullies by planting hundreds/thousands of native trees and shrubs. Also to have a good look at the many natural walking tracks, they have build through and along these gullies, creating safe tracks for school kids to walk to and from school, and adding huge recreational value for all DH residents and day visitors! NB we do not have any park of significance where we can go for a longer walk!

Keeping climate change in mind and being aware of all the different bush/shrub fires we've have endured on the Port Hills/Christchurch over the last 5 years, I think that we need to have left a safe empty larger area in

Diamond Harbour, where we could flea to in case of a huge bush/shrub fire! In fact we do not have many open spaces where we could evacuate to in an event of a big fire.

in my eyes it is clear that disposing of this surplus land is NOT so cotton-dry! There are many valid reasons, like eg the ones I mentioned above, to require Community Board and the public consultation.

Please, do not surpass the residents of Diamond Harbour Community!

Yours sincerely,

Angela Boer,

## Questions to think about when making your submission

### Have we got the game plan right?

Our overarching proposal is to focus on a deliverable capital programme that helps drive our city forward, with particular investment in roads and transport infrastructure and in protecting and upgrading our water networks. We're borrowing for new projects that have long-term value, and ensuring that the debt repayments are spread fairly across the generations of ratepayers who will benefit from them. We're maintaining enough financial flexibility to be able to handle unplanned events, and we're finding permanent efficiencies in our day-to-day spending. We've managed to do all of this while keeping rates increases as affordable as possible.

**Have we got the balance right? Have we prioritised the right things? If not, what changes would you like to see?**

Perhaps the problem with Council is not the amount of rates being collected but that the money is not being spent effectively & efficiently (eg: the bus lounges on Riccarton Road). This is rate payers hard earned money & the Council often seems to act as if it's Monopoly money. It's ironic that the Council talks about a loss of income due to Covid 19 as a reason for rate increases & then turns around and gives chief executives of Council owned companies massive bonuses that are well over the average Kiwi's income. It's well past time to trim the fat!!

There seems to be no accountability for Council spending & with this concern about apparent wastage of rate payers money that it is time the Council learned to live within its means just like everyone else does.

### Rates

We've considered a range of options for how best to achieve what we need to achieve while also keeping the average rates increase as affordable as possible.

**What do you think of this plan for an average residential rates increase of 5 per cent for 2021/22 and an overall rates increase of 4 per cent over the next 10 years?**

The rate payers are not a bottomless pit of money. The Council talks about the effect Covid 19 has had on their income but seems to be wilfully ignoring the impact it has had on rate payers finances. It is long past due that the Council employs some staff with basic finance & budgeting skills.

\*<sup>9.</sup> The Council says they cannot legally do anything about it. Laws can do get changed. Why has this not been made a priority?

## Proposed changes to existing rates, and new targeted rates

We're proposing a range of changes to existing rates, including the land drainage targeted rate and how we define remote rural properties. We're also proposing some new targeted rates, including a targeted rate specifically for the Arts Centre Te Matatiki Toi Ora, a heritage targeted rate to show the proportion of rates you already pay towards specific heritage projects, and an excess water targeted rate for households that use more than 700 litres a day.

**What do you think of these changes to existing rates, and new targeted rates?**

**Have we got it right? If not, what changes would you like to see?**

Charging for excess water use is clearly just the first step toward every rate payer contributing for water alongside their rates. It is a slap in the face to rate payers to expect them to pay for water when foreign interests are allowed to take it at virtually no cost & then sell it overseas for substantial profits. ~~na.~~

## Investing in upgrading and protecting our city's water networks

We have a responsibility to provide and maintain the wells, pipes, reservoirs, treatment plans and pump stations for drinking water, and manage the collection, treatment and disposal of wastewater and stormwater.

**We are proposing to invest 41 per cent (\$2.329 billion) of our capital spend on water infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

I agree with this but this seems to be something the Council has neglected for a long time. Why are the foreign water bottling companies not contributing their fair share to this. Again, an urgent law change is required if the current law is insufficient.

## Investing in our transport infrastructure

We've heard from residents that transport is a top priority. It's also the city's biggest contributor to carbon emissions. We want to give people better options for getting around, whether by car, public transport, on foot, on a scooter or on a bike. We also want to ensure our networks are safe.

**We are proposing to invest 25 per cent (\$1.445 billion) of our proposed capital spend on transport infrastructure improvements.**

**Have we got the balance right? If not, what changes would you like to see?**

changes to the bus routes don't cater to public needs & need a major re-think if they want residents to use public transport on a regular basis.

Scooters on pavements are a menace to pedestrians. There need to be rules about where these can be used, maximum speeds & fines for those flouting these rules.

## Rubbish, recycling and organics

In 2020 the Council adopted a new Waste Management and Minimisation Plan that focusses on changing our 'throw-away' culture and reducing the amount of waste we send to landfill. Implementing the actions in that plan are the key drivers of our operational and capital spending.

**We're proposing to spend \$25 million on organics infrastructure (which includes upgrades to the organics processing plant), \$18.5 million on transfer station infrastructure and \$18.4 million on recycling infrastructure.**

**Have we got the balance right? If not, what changes would you like to see?**

I agree with this proposal.

## Our facilities

We're proposing to invest 19 per cent of our capital spend on community facilities. We're also proposing some changes to levels of service. This includes changes to libraries, service desks and the Christchurch Art Gallery Te Puna o Waiwhetū to reflect how and when residents use these facilities, and to acknowledge the impact that COVID-19 has had on visitor numbers. It also includes closing the Riccarton Road Bus Lounges.

**What do you think of our proposed investment in Council-owned facilities across Christchurch and Banks Peninsula, and in our changes to levels of service?**

**Have we got the balance right? If not, what changes would you like to see?**

The opening of the Riccarton Road bus lounges was always a mistake. This mistake happened because the Council failed to then listen to the legitimate concerns of ratepayers.

## Our heritage, foreshore and parks

Christchurch has a long and proud history of protecting and respecting our heritage. Over the past decade we've carried out a massive programme of repairs and restorations, but we still have some work left to do. In the next 10 years we will continue to restore our own buildings and support private development of heritage buildings. We will also be maintaining and improving our parks and foreshore.

**We're proposing to invest 11 per cent of our capital spend on our heritage, foreshore and parks.**

**Have we got the balance right? If not, what changes would you like to see?**

The Council should not be contributing rate payers money to the private development of heritage buildings.

## Funding for the Arts Centre Te Matatiki Toi Ora

We are proposing to provide the Arts Centre with a capital grant of \$5.5 million. We would do this via a targeted rate that would recover the grant cost over 10 years, and would phase in over two years, so the targeted rate would be smaller in 2021/22 than in subsequent years. We're proposing that every ratepayer will pay this rate and it will be calculated as a number of cents per dollar of capital value.

**Do you support the Council funding \$5.5 million for the Arts Centre?**

**This proposal is currently accounted for in our proposed rates increase. If a decision is made not to proceed, rates would drop by 0.04 per cent.**

☐ Yes ☒ No

Comments: While I agree with restoring the arts centre sure the money for this could be obtained via government or heritage grants or lotto grants or public fundraising, rather than going down the well-worn track of hitting up Christchurch rate payers yet again.

## Funding for base isolation of the Robert McDougall Art Gallery

Canterbury Museum considers the base isolation of Robert McDougall Art Gallery to be a key part of the Museum's redevelopment. In July 2019, the Council agreed in principle to support the base isolation of Robert McDougall Art Gallery at a cost of \$11.8 million, subject to public consultation in the Long Term Plan 2021-31.

**Do you support the Council funding base isolation of the Robert McDougall at a cost of \$11.8 million?**

**This proposal is not currently accounted for in our proposed rates increase. If a decision is made to fund base isolation, rates would increase by 0.07 per cent.**

☐ Yes ☒ No

Comments: The Council's 'go to' strategy seems to be to hit rate payers with annual rate increases rather than considering other options. Fresh ideas are definitely needed here. Eg: fund-raising for heritage buildings (such as when the city purchased Monea Vale), lotto grants, government grants, etc.

## Potential disposal of surplus Council-owned properties

We have a small number of properties, including two heritage buildings, that are no longer being used for the purpose they were originally acquired for. These surplus properties make up less than 1 per cent of Council's overall property portfolio.

**Help us decide their future - what do you think of this proposal to dispose of surplus properties?**

It depends on what these properties are & what condition they are in.

**Any other comments:**

The Council needs to listen to the concerns of rate payers & respond accordingly, rather than going through the motions of public consultation & then doing whatever they want.

### Feedback

1.1 Have we got the game plan right?

Please do not cut the mobile library service. See "Facilities" below

1.2 Rates

OK

1.5 Investing in our transport infrastructure

I am very happy that you are still prioritising bike lanes as the ones we have are really great but they need to link up more.

1.7 Our facilities

Please do not cut the mobile library service.

I live in an over 60's complex that is visited weekly by the Library bus. It is a wonderful service. Although I am mobile and still drive my car, many of my neighbours are no longer able to do this so having the library come to us is an invaluable service. It is a great social time as we congregate by the bus and catch up with each other while waiting for our turn to get on and swap our books. Books are discussed and swapped and news caught up on.

There are several residents here who are in their 80's and 90s and are not very mobile. They have walkers but cannot go far. They can get from their unit to the bus but they would find it impossible to walk as far as the bus stop to get a public bus to another library. They often even find it difficult getting in and out of somebody else's car.

The librarians who staff the bus are friendly and helpful and often bring requested books or recommend others. They physically hold the books then pass them down to frail older people after they have negotiated the 3 steps out of the bus.

Please continue this service or these folk will be missing out.

I know savings have to be made but hopefully the cut in hours across the rest of the library sector will be enough.
